For the Love of DIXIE

NEW! Another book saved by TBR's OPERATION BOOK RESCUE!

Authentic History: Ku Klux Klan, 1865–1877

By Susan Lawrence Davis

The only officially authorized history of the original Ku Klux Klan, written by the daughter of the founder of that organization in Alabama. Written to counteract the misrepresentations made about the original KKK and its activities, this now-suppressed book contains many astonishing "insider" insights, such as:

- The KKK was financed from England by the Jewish former Secretary of State for the Confederacy Benjamin P. Judah (who fled the South at the end of the Civil War);
- The KKK's chief chaplain was a Roman Catholic;
- The KKK's chief justice was an influential North American 33rd Degree Masonic leader;
- The hood—for which the KKK became famous—was in fact outlawed by the original organization because so many people were using its disguise to commit crimes in the name of the KKK;
- The original KKK's primary activity was political in nature, and their officers in various legislative bodies—reaching as high as the U.S. Senate—were focused on restoring White rule to the Southern states;
- When official KKK posses were formed, they were under strict orders never to dispense mob justice or engage in whippings, lynchings or other abuses;
- When rogue elements and non-KKK members started performing atrocities in the KKK's name, the leadership ordered the organization permanently disbanded, citing such abuse of its name as the primary reason for its closure.

Written in a racially paternalistic style, this work also clearly reveals the mindset that lay behind the slave-owning era: a false belief that the Blacks were content and loyal under White rule—and that only a few Southerners understood and supported the view of President Abraham Lincoln. He believed, namely, that the Black presence posed a long-term demographic threat, and that they needed to be repatriated to Africa, rather than stay under White rule in America.

It's a sensational historical document, vital for anyone wishing to gain a proper understanding of the Southern resistance to Reconstruction.

This edition has been completely reset, contains all the original images (digitally restored and improved) and is fully indexed.

Authentic History: Ku Klux Klan, 1865-1877 (softcover, 229 pages, #1020, **$25** minus 10% for TBR subscribers plus $5 S&H inside the U.S.) is available from TBR, P.O. Box 550, White Plains, MD 20695. Call toll free 1-877-773-9077 to charge, Mon.-Thu. 8-4 ET or visit us online at www.BarnesReview.com.

TABLE OF CONTENTS

Ku Klux Klan, 1865-1877

Preface
I: Introduction
II: Tennessee, Pulaski
III: Alabama, Athens
IV: The First Convention
V: Fourth of July Parades
VI: Tennessee anti-Ku Klux Law
VII: President Johnson's Policy
VIII: The Federal Ku Klux Acts
IX: The Union League of America
X: Conditions from 1870 to 1877
XI: The District of Columbia
XII: Virginia
XIII: Mississippi
XIV: Georgia
XV: North Carolina
XVI: Texas
XVII: Missouri
XVIII: Arkansas
XIX: Florida
XX: South Carolina
XXI: Louisiana
XXII: Close of the Ku Klux Klan
Index

SAVED FROM THE MEMORY HOLE BY TBR'S OPERATION BOOK RESCUE

The Impending Crisis of the South: How to Meet It (1857)

By Hinton Rowan Helper

One of the most influential anti-slavery books in pre-Civil War America, this book was written by a Southerner who not only opposed White supremacy but also clearly understood the relationship between race, civilization, culture, political power and demographics.

By assembling official statistics from slave-owning and non-slave-owning states, the author proved conclusively that the presence of Black African slaves was not, as the South's leaders claimed, vital for their economy but, in fact, exactly the opposite.

Helper shows that by all measures—economic, social, political, agricultural yield per square mile, education, literacy, infrastructure and many other indicators—the use of Black slaves by the South was an impediment upon economic growth that had severely retarded the entire development of all the Southern slave states.

The book conclusively proves that slavery—and the presence of large numbers of Africans in the South—was a significant barrier to the economic advancement of Whites. In addition, Helper compiled the most detailed statistics on slavery, showing exactly how many slaves there were and the precise number of slaveowners. It turns out that the vast majority of White Southerners did not own slaves but were conned into supporting a jingoistic fake "Southern Nationalism" orchestrated by a very small clique of immoral ultra-capitalists.

This work, which became a Republican Party election propaganda piece in the U.S. presidential election of 1860, also revealed that the officially endorsed abolitionist movement had two goals: the emancipation of African slaves and their immediate deportation back to Africa or somewhere else where they would be permanently and geographically isolated from White America.

This book and its ideas caused a storm in the South, where it was banned and its possession and distribution outlawed. In Arkansas, three men were hanged after being arrested for having this boo in their possession. Nonetheless, between 1857 and 1861, 150,000 copies of this book were circulated.

Helper's warnings about the long-term effect of the presence of massive numbers of non-Whites in White America has come true more than a thousand times over.

The Impending Crisis of the South: How to Meet It (softcover, 294 pages, #1021, **$29** minus 10% for TBR subscribers plus $5 S&H inside the U.S.) is available from TBR, P.O. Box 550, White Plains, MD 20695. Call TBR toll free at 1-877-773-9077 to charge, Mon.-Thu. 8-4 ET or visit our online bookstore at www.BarnesReview.com.

Politically Incorrect Books on Southern Culture, History

The Honorable Cause: A Free South —Twelve Southern Essays

The Honorable Cause: A Free South is a collection of 12 essays written by pro-Southern and pro-secession activists. It places into context what it means to be "Southern" and why Southern identity is so important. It explores secession and how to achieve political and social liberation for the South. This book is intended to inspire emotion and thought. The authors want the reader to internalize the content and see a free and independent Dixie as the most honorable outcome for a unique people. *The Honorable Cause: A Free South* answers questions on our own terms and in our own way. Finally, it details how the South can achieve status as a nation-state, with a right of self-determination. Softcover, 301 pages, #988, **$25** minus 10% for TBR subscribers.

The Sequel to Appomattox: A Chronicle of the Reunion of the States

By Walter Lynwood Fleming (1919)

When the armies of the Union and of the Confederacy were disbanded in 1865, there were still many problems that pressed for solution. The surviving Confederate soldiers came straggling back to their devastated homes. Everywhere they saw widows and orphans. They found property destroyed, the labor system disorganized and the inhabitants suffering from want. They found the White people demoralized and the Blacks free, bewildered and disorderly. Organized government had lapsed with the surrender of the Confederate armies. Beneath a disorganized society lay a devastated land. The accumulated capital of the South had disappeared in worthless Confederate stocks, bonds and currency. The banks had failed. Two billion dollars invested in slaves was wiped out. Factories had been destroyed by Federal raiders or seized, sold or dismantled because they had furnished supplies to the Confederacy. Mining industries were paralyzed. It was months before courthouses, state capitols, and school buildings were again made available for normal use. How could all of this devastation be undone? Reprint. Softcover, 322 pages, #989, **$21** minus 10% for TBR subscribers.

Ousting the Carpetbaggers from South Carolina

By Henry Tazewell Thompson (1926)

South Carolina has been stigmatized as "the nest wherein was hatched the snake of Secession," and it was the purpose of Reconstruction to mete out retribution upon her people and to ensure victory for the most radical wing of the Republican Party. Thus, at the point of the bayonet, a condition developed without parallel in history: The best and noblest citizens of the state were subjugated to a position of inferiority to their former slaves. This book is a history of the political revolution of 1876 in which South Carolinians, led by Gen. Wade Hampton and his Redshirts, united to throw off the oppressive yoke of "Carpetbagger" government and halt unquenchable Black revenge. Reprint. Softcover, 182 pages, #990, **$21** minus 10% for TBR subscribers.

Ordering from TBR: TBR subscribers may take 10% off prices above. Prices do not include shipping: Inside the U.S. add $5 on orders up to $50. Add $10 on orders from $50.01 to $100. Box 550, White Plains, MD 20695. Call TBR toll free at 1-877-773-9077 to charge, Mon.-Thu., 8-4 ET. You may also purchase the book at TBR's online bookstore: www.BarnesReview.com.

Twelve Years in Hell

Victorian Southerners Expose the Myth of Reconstruction, 1865–1877

In his sweeping work *Twelve Years in Hell: Victorian Southerners Expose the Myth of Reconstruction, 1865-1877*, award-winning historian Lochlainn Seabrook addresses these and hundreds of other issues related to the darkest, most debauched and tragic period in American history. The real story, which contradicts the manufactured one found in conventional history books, is told through the eyes of 125 individuals who lived through Reconstruction—mainly Southern men and women, but also a few Yankees.

Based on eyewitness accounts and divided into two major sections, one comprised of essays, the second containing personal views, this is the only modern, purely Southern, accurate work on Reconstruction.

To aid the reader, Seabrook includes discussions on events that occurred before and after Reconstruction, along with a fascinating in-depth introduction, hundreds of notes, an exhaustive index, an important appendix, a bibliography and rare pictures from the period.

Victorian Southerners correctly viewed and described Reconstruction as a Yankee Communist revolution. This Communist revolution was actually the second stage of a vengeful and vicious two-part war that had been planned far in advance to destroy the South. During Reconstruction, the Democrats (mainly Southerners) were Conservatives and the Republicans (mainly Northerners) were liberals. The original architect of Reconstruction, President Abraham Lincoln, privately planned to subjugate and then totally Northernize the South. After Lincoln's assassination, Reconstruction was taken over by Socialists and Communists, all radical members of the then-left-wing Republican Party.

Southerners considered the 12 years between 1865 and 1877 an actual war, one they referred to as "The War of Reconstruction." As part of Reconstruction, the liberal North repeatedly violated the Constitution while committing countless crimes against the conservative South, including robbery, destruction and seizure of private property, rape and murder.

Simultaneously, honest, well-respected, legally elected Southern officials were thrown out of office and replaced by non-tax-paying illiterates, unscrupulous carpetbaggers and "progressive" thugs. To maintain dictatorial control over Dixie, the new radical left Republican government, headed by President Ulysses S. Grant, illegally weaponized the police, the courts and the military. Unfortunately, the Grant administration intentionally aggravated the situation by establishing a policy of Black supremacism across the South.

In order to defend themselves in this second war of widespread authoritarianism, lawlessness, corruption and misgovernment, the South raised an underground counter-Reconstruction army of 500,000 men of all races, known as the "Invisible Empire."

Thanks to the heroic efforts of traditional Southerners—and even a few Democrat Yankees—the left's radical Reconstruction revolution was cut short.

Many of the social, racial and economic problems plaguing the United States today began during Reconstruction. Now the left is using the same 1870s'-era tactics it did back then for the same goal: the attainment of political supremacy.

Yes, Reconstruction in the South continues into the 21st century by tearing down Confederate monuments, banning Confederate flags, slandering Southern heroes, misrepresenting the motives of Confederate soldiers, desecrating Confederate graves and suppressing factual Southern history books like this one from Sea Raven Press.

Twelve Years in Hell (softcover, 520 pages, #1022, **$35** minus 10% for TBR subscribers plus $5 S&H inside the U.S.) is available from TBR, P.O. Box 550, White Plains, MD 20695. Call 1-877-773-9077 toll free to charge, Mon.-Thu. 8-4 ET or visit our online bookstore at www.BarnesReview.com.

NEW BOOK WRITTEN BY SOUTHERN HISTORIAN COL. LOCHLAINN SEABROOK ...

Two More Civil War Books Just In!

I, Confederate

Why Dixie Seceded and Fought in the Words of Southern Soldiers

If we are to believe conventional history books, the Southern Cause died on April 9, 1865 with Lee's surrender at Appomattox. As with most mainstream history, however, this belief is not only false, the opposite is true. The Southern Cause is flourishing today like never before!

How can this be if the North won the war over a century and a half ago? Just what was and is the Southern Cause? And why were millions of people of all races willing to sacrifice their lives for it? You will find the answers to these questions, as well as discussions on closely associated topics (the Constitution, nullification, sectionalism, slavery etc.) in historian Lochlainn Seabrook's one-of-a-kind volume *I, Confederate*.

In this revealing and vitally important work of history pertinent for today, author Seabrook provides excerpts from the writings, speeches, letters and poems of some 200 Southerners (mostly former C.S.A. soldiers), who describe, in their own words, the reasons why they seceded and took up arms against their Northern cousins. Hint: It ain't slavery.

For added context Seabrook also includes pertinent writings from Southern women, Southern civilians, Northern civilians and even several Union veterans who also supported the momentous campaign that Southerners appropriately referred to as "the bedrock of the Southern Confederacy."

Get the facts about the Southern Cause from the only truly reliable source, Confederate veterans—the men who created it and risked their lives for it—in this historically accurate work that preserves an essential and much neglected aspect of genuine American history. Illustrated with rare Confederate photos from the 1860s, *I, Confederate* includes a preface, introduction, notes, index and bibliography.

I, Confederate (softcover, 376 pages, #1023, **$27** minus 10% for TBR subscribers plus $5 S&H inside the U.S.) is available from TBR, P.O. Box 550, White Plains, MD 20695. Call toll free 1-877-773-9077 to charge, Mon.-Thu. 8-4 ET or visit us online at www.BarnesReview.com.

The Hampton Roads Conference

The Southern View

The most famous and important meeting of the War Between the States took place in Virginia aboard the U.S.S. *River Queen* on February 3, 1865. Yet it receives barely a mention in our mainstream history books, except to say that "it was a futile effort that achieved nothing." Known as the Hampton Roads Conference, in attendance on one side of the table were the Confederates: Vice President Alexander H. Stephens, Assistant Secretary of War John A. Campbell and Sen. Robert M.T. Hunter. On the other side were President Abraham Lincoln and Secretary of State William H. Seward.

According to conventional history, the meeting opened with a "frank, honest, and kind-hearted Lincoln" offering generous promises to the "erring South," including $400 million in compensation for her slaves upon emancipation—if only the seceded states would return to the Union, "our one common country." The Confederate commissioners, however, viewed the meeting as a negotiation between "our two countries," demanding that the North recognize the independence of the Southern states. Lincoln refused to budge and demanded the C.S.A.'s complete surrender.

Four hours later the meeting adjourned in a stalemate. Conventional sources tell us Lincoln bent over backwards to accommodate the South, and that the conference only failed due to the stubbornness of Jefferson Davis. Is that true?

Historian Lochlainn Seabrook has included 32 essays, articles and analyses that set the record straight on the myths surrounding the final meeting in which the two opposing sides would meet face-to-face. Seabrook includes illustrations, a descriptive introduction, complete source notes, a detailed index, a comprehensive bibliography, and helpful appendices.

The Hampton Roads Conference (softcover, 294 pages, #1024, **$25** minus 10% for TBR subscribers plus $5 S&H inside the U.S.) is available from TBR, P.O. Box 550, White Plains, MD 20695. Call 1-877-773-9077 toll free to charge, Mon.-Thu. 8-4 ET or visit www.BarnesReview.com.

Bringing History Into Accord With the Facts in the Tradition of Dr. Harry Elmer Barnes

THE BARNES REVIEW

A JOURNAL OF POLITICALLY INCORRECT HISTORY

May / June 2024 ❖ Volume XXX ❖ Number 3

Table of Contents

The Attack on Washington That Never Came

By Marc Roland

4 In July 1861, the forces of the Confederacy and the Union met in battle just 31 miles from Washington. By the end of the day, the Union forces were frantically skedaddling back to D.C. Had the Confederates acted decisively, the war might have ended that very day.

If They Had Listened to Forrest, They Might Just Have Won

By Gene Andrews

12 Confederate Gen. Nathan Bedford Forrest was one of the most ingenious commanders in American history. Unfortunately, his enemies recognized this, but his own superiors did not. Time and time again, Forrest showed the Rebs how to win—but was rebuffed.

The Confederate Constitution: Was It Better Than Ours?

By Dr. Edward DeVries

24 Upon forming their new nation, leaders of the Confederacy turned to the founding fathers for inspiration. When crafting their own constitution, Southerners, however, sought to fix "errors" in the original document they believed had been abused to expand federal power.

Top Confederate Explains Real Reasons for the War

By Alexander Stephens

32 Alexander Stephens was a small and sickly man, but his words and his pen were mightier than any sword. Here we present his famous "Cornerstone Speech," in which Stephens justifies Southern secession.

Attorney Sam Dickson on the Future of White America

Interview conducted by James Edwards

40 Longtime TBR Contributing Editorial Board member Sam Dickson speaks candidly with TBR's James Edwards about his career, Southern culture, race relations and the future for Whites in 21st-century America.

Slave-Owning Mulattoes in Antebellum South Carolina

By Robert Grooms

50 In previous issues, TBR has brought you articles on the many free Blacks who owned slaves in the South, particularly in Virginia. In this issue, we turn our attention to the surprisingly large number of slave-owning Mulattoes in antebellum South Carolina.

The Impact of the Civil War and Reconstruction on the Indian

By Frank Jackson

56 Having been relocated from the southeast to Indian Territory, the "Civilized Tribes" were caught between opposing sides in the Civil War. Which nation did most choose to support and what did the conflict and impending Reconstruction mean for the American Indian?

The Civil War and the Crusade Against Nazi Germany

By Dr. Charles E. Weber

62 In this article, a respected scholar draws some disturbing parallels between the genocide waged against the South in the Civil War and the WWII crusade to neuter Germany.

There's No Place Like Home: Reflections on the South

By James Edwards

66 What is it about the South that engenders such strong affection for it from those born and raised there? Is it that much different from the North or West? Should Southern states secede to protect their honorable way of life?

Rebel Naval Secretary Tries To Modernize C.S.A. Navy

By Marc Roland

72 At the outbreak of the War for Southern Independence, the naval capacity of the Union was impressive—90 powerful, well made and heavily armed warships. The C.S.A. Navy, on the other hand, was a third as large. It didn't take long, however, for C.S.A. Navy Secretary Stephen Mallory to try to even the score.

PERSONAL FROM THE EDITOR

For the Love of Dixie ...

So many books and magazine articles have been written in the 159 years since the Confederate surrender at Appomattox, it's mind-boggling. Once upon a time, one could still find truthful information about the events, but, since the advent of "political correctness," these sources are now few and far between. Today, any honest book dealing with the real causes and devastating effects of the Civil War could be blacklisted. Hence TBR's interest in continuing to "bring history into accord with the facts" in regard to this seminal period in U.S. history.

To help set the record straight, this May/June issue of TBR contains 10 provocative, Southern-focused articles and interviews on the war. We consider this "For the Love of Dixie" issue to be the new "little sister" of our wildly popular "Defending Dixie" issue published in September/October 2017.

But did the South even have a chance to win the war? Was the cause lost before it began? Could a lightly populated agrarian nation compete in an all-out war with a heavily populated neighbor whose states were filled with modern factories and unlimited access to the natural resources needed for war, such as coal, copper, iron and gun powder? Many say "No. The South had no chance to win. Its independence effort was doomed."

Our first two articles counter that reasoning, insisting that the South could have emerged victorious. Author Marc Roland argues the Confederacy could have won the war in one day had leaders heeded the advice of Stonewall Jackson. Gene Andrews, caretaker of the Gen. Nathan Bedford Forrest Boyhood Home in Tennessee, agrees the South could have won the war—or made it so expensive for the Union to fight, Northerners would have begged for an end to hostilities. All the South had to do, says Andrews, was to adopt the tactics of Gen. Nathan Bedford Forrest.

We also hear from the vice president of the Confederacy, Alexander Stephens, as we offer you his famous "Cornerstone Speech," in which he lays out the history of the conflict and why secession was necessary. You'll also read an article from the previously unpublished files of the late Dr. Edward DeVries, explaining why the Confederate Constitution was superior in many ways to the U.S. Constitution on which it was based.

But that's not all. We also have articles on: the efforts of C.S.A. Naval Secretary Stephen Mallory to modernize the Confederate Navy; the large (and censored) number of slave-owning Mulattoes in antebellum South Carolina; and another about the impact of the Civil War and Reconstruction on the American Indian, who fought on both sides of the conflict.

In addition, author James Edwards offers us his reflections on "the honorable cause" and why Southern traditions must be preserved. He also provides an uncensored interview with famed attorney Sam Dickson, who has been working tirelessly for decades for White rights and the preservation of Euro-American culture. As always, let us know what you think. ❖

—Paul Angel, Executive Editor

Why They Defame 'Secessionists'

Did the South have the right to secede from the United States? That topic has been debated again and again by constitutional and legal scholars since long before the 1860s. At multiple times in American history, states did believe they had this right. Since states had joined the union voluntarily, should they not be allowed to exit in the same fashion—peacefully and on their own accord?

When the original 13 colonies revolted, won and agreed to form a new country, some of them already viewed themselves as independent nations with their own inalienable rights. They were not to be considered mere appendages of an "indissoluble" confederative body, lacking any avenue for members to escape the possibly abusive behavior of a domineering central authority in the future.

But what did the framers of the Constitution believe about secession? *Encyclopedia Britannica* observes:

> While never counseling secession, James Madison and Thomas Jefferson had clearly enunciated the states' rights-compact doctrine in the Virginia and Kentucky Resolutions of 1798. Their political opponents, New England Federalists, briefly considered withdrawing from the union at the Hartford Convention in 1814. …
>
> The 1820 Missouri Compromise temporarily quieted the agitation. South Carolinians, however, went to the brink of secession in the 1830s over the tariff question.

In addition:

> The Kentucky Resolution of 1799 added that, when the states determine that a law is unconstitutional, nullification by the states is the proper remedy. The Virginia Resolutions of 1798 refer to "interposition" to express the idea that the states have a right to "interpose" to prevent harm caused by unconstitutional laws.

The closest any early U.S. document comes to encouraging citizens to revolt against bad government is in our Declaration of Independence, where it clearly says, "whenever any form of government becomes destructive of these ends [that would include life, liberty, and the pursuit of happiness], it is the right of the people to alter or to abolish it, and to institute new government."

That is what Southern states were trying to do when, in 1860-61, they seceded from a nation that, in their view, was despotically overstepping the bounds of its federal powers, illegally usurping authority and stealing wealth from Southern states.

Confederate President Jefferson Davis believed that, once a state seceded from the union, that state's inhabitants were no longer legal citizens of the United States and, therefore, no longer subject to its rules and regulations. Nor were they guilty of treason, as the act of secession voided any national oath of allegiance.

Cynthia Nicoletti, author of *Secession on Trial: The Treason Trial of Jefferson Davis*, says this issue was of central importance to those arguing "seceders" were *not* traitors:

> Treason is a crime of loyalty; in order to commit it, you need to be a U.S. citizen. Everybody thought at the time that the [Davis] case was going to raise the question of whether secession is constitutional, and there was worry about whether Davis was going to be convicted.

It's therefore clear, even Union politicians and judges were concerned that secession could be deemed legal in a U.S. court of law.

All of this seems to have been put to rest four years after the South lost the Civil War, when, in 1869, the U.S. Supreme Court ruled in *Texas v. White* that the United States is "an indestructible union" and, thus, states do not have the right to secede. Part of the High Court's ruling read:

> When Texas became one of the United States, she entered into an indissoluble relation. There was no place for reconsideration or revocation, except through revolution or through consent of the states.

Today, leftist politicians and activists—knowing their anti-American economic, gender, border, race, energy and crime policies could spur justified outrage and secession talk by citizens—began encouraging the destruction of all positive mentions or monuments to "secessionists" and "traitors," i.e., Southern heroes. They had to be smeared, and any pro-secession talk quelled. It's also the reason for the unholy crusade against the "insurrectionist traitors" who protested in D.C. on January 6, 2021.

Despite the anti-secession propaganda campaign carried out since the riots of 2020, public opinion about secession has changed dramatically. Currently, according to You.gov polling, 23% of Americans would support the state they live in seceding. That number jumps to 36% in Alaska and hits 31% in Texas. How about you?

In truth, the only time a state considers secession is when the federal government's actions place that state's citizens, security, finances or way of life in serious peril.

For instance, who can argue that the safety, finances and culture of Texans are *not* under grave threat from the open-borders policies of Joe Biden and his administration?

If, for good reason, a state decides to secede, it should be allowed to go, rather than submit its people to a deranged central government or force them to engage in armed confrontation. It is thus logical and preferable to let "wayward sisters go in peace," rather than force any state to remain in a union whose policies are deemed a bane to its people. ❖

The Attack on Washington, D.C. That Could Have Ended the War

The South had victory within its grasp but lost it —and the chance for independence—in just one day, because Thomas Stonewall Jackson was ignored.

By Marc Roland

America's single most decisive turning point was the Southern War for Independence. All that has happened to our country since then, and everything yet to come, can be traced back to that seminal catastrophe. To clearly see just how this terrible legacy still exerts its influence on today's era of social upheaval and cultural decay, a fresh outlook is needed from an early 21st-century vantage point. Only a new perspective from previously unseen angles and a revision of consensus versions of the past can reveal how the modern United States evolved from Gen. Robert E. Lee's surrender at Appomattox Court House, what subsequently brought us to the present brink of extinction, and whether or not our country has any future as the Land of the Free.

To remain so, it must yet again become the Home of the Brave, as it was when the War for Southern Independence was fought.

The first task of this alternative view is to contend with historians who teach that the fratricidal struggle's end-result was inevitable from its inception, unaffected by any human input. Their conclusion reduces the entire war to the level of a natural disaster. This interpretation was formulated in three words penned by Benito Mussolini in the guestbook of Berlin's Reich Chancellery, on September 27, 1937: "History makes men."

Competent, resolute Brig. Gen. Irvin McDowell was over-burdened with the unrealistic task of defeating the entire Confederate Army of the Potomac, driving it away from Manassas, Virginia, and then turning on the enemy capital at Richmond to conquer it and thus quickly end the War for Southern Independence. His superiors in the Union General Staff had underestimated their opponents.

Beneath, his host Adolf Hitler wrote, "Men make history."[1] Both statements are, in their own way, correct, though the latter observation more applies to, as Walt Whitman called it, the War of Attempted Secession.[2]

But did, in fact, the Confederacy really have any chance of ever coming out on top? Or was it foredoomed from the beginning by the Union's greater numbers of troops and industrial preeminence?

To be sure, these Northern advantages swamped Southern resistance in the end. They needed time, however, to be mobilized and organized. At first, the wheels of both turned very sluggishly.

By contrast, at war's outset, the Confederate States of America (C.S.A.) held the edge in its long tradition of state militias, with better training, allowing for the more rapid formation and swift deployment of greater armies, while the less-prepared Union military was starting virtually from scratch. The C.S.A. generalship and

The War for Southern Independence might have begun and ended in one day had Gen. Joseph E. Johnston, senior Confederate commander at the Battle of First Manassas, not refused the pleas of his men, Stonewall Jackson and even C.S.A. President Jefferson Davis to advance on Washington, D.C. Such an opportunity would never come again. Union military officials thereafter transformed the Northern capital into a fortress. Above: Stonewall Jackson (center) inspects the field after the battle.

its cavalry were far superior, as well.

Until fully instructed Northern divisions could be fielded and its factories converted into arms manufacturers—neither of these basic requirements would be soon forthcoming—the South was allowed an initial grace period to conclude the war on its own terms. As the North's overwhelming resources were steadily brought to bear, the odds for an ultimate Confederate triumph proportionately declined. It was imperative, therefore, that the South conclude operations in good time, while possibilities for doing so to its own advantage were still at hand.

Its leaders had been offered an early window of opportunity that would remain open for the war's first few months. Thereafter, it would close with grave finality. Staff commanders of the Confederate Army clearly recognized that time was on their side, if only temporarily. "Strike while the iron is hot" was the Southern strategy motto.

Most historians cite 1863's clash of arms at Gettysburg as the war's pivotal turning point.[3] Although no one can deny the famous engagement's high importance, it was eclipsed two years before by a much smaller but

more decisive confrontation not even listed by most official sources as a military watershed of any kind. Yet, this previous and earliest major battle in the war against Northern aggression could have been its last. Had this lesser-esteemed engagement been allowed to promptly conclude the war not long after the initiation of hostilities, another 750,000 men would have been spared death, and the Confederate States of America would have achieved independence.

Accordingly, there was no more significant military encounter of the entire conflict than the Battle of First Manassas, recalled with horror in the North as the First Battle of Bull Run. Since the fall of Fort Sumter and the official inauguration of armed conflict three months earlier, very little fighting—mostly small-scale skirmishes—had occurred with few casualties, as Confederate forces took their time digging in just north of Manassas, Virginia. Their close proximity to Washington, D.C. alarmed and outraged Union public opinion, which clamored for evicting the encamped foe, then capturing Richmond, capital of the Rebels, whose treasonous experiment would thereby be immediately terminated.

Napoleon cannon gave the Rebels a distinct edge over their Federal enemies at close quarters.

Under mounting political pressure and popular dissatisfaction with the president's apparent lack of action, Abraham Lincoln assigned Irvin McDowell—an inexperienced West Point graduate—the task of ending the Civil War in a single stroke.

McDowell had his misgivings, complaining that he was not allowed sufficient time to train the newly inducted troops, who received little or no instruction at the brigade and division levels.

"You are green," the president cynically reassured his freshly appointed brigadier general, "it is true. But they are green also. You are all green alike."[4]

Against his better judgment, McDowell led 35,000 troops—the largest field army yet gathered on the North American continent—from Washington, D.C. on the bright morning of

This badly battered wall, fiercely contested during both battles at Manassas (in 1861 and 1862) was the hinge-pin of Confederate defenses along the Potomac River.

From left to right, some of the prominent Confederate commanders present at the Battle of First Manassas (the First Battle of Bull Run): **Gen. Joseph E. Johnston** (who ordered the invasion of D.C. be terminated); **Gen. P.G.T. Beauregard** (who receives undue credit for the victory at Manassas); **Gen. Thomas Jackson** (he earned the nickname "Stonewall" at the battle); and dashing cavalry commander **Gen. James Ewell Brown "Jeb" Stuart**.

July 16, 1861. They comprised more men in United States uniform than had ever been seen before, a sight that attracted a large number of the city's 65,000 residents. Their degree of popular mass-acclaim was likewise unmatched, amounting to an enormous, wildly enthusiastic send-off celebrating certain success, even before the enemy had been engaged.

Wealthy elite among the immense crowds, including congressmen and their families, followed close behind the prematurely victorious U.S. soldiers in a glittering convoy of luxury carriages. Arriving at the anticipated scene of military glory, the upper-crust spectators and their livered servants bearing dinnerware, food and drink, climbed several hilltops from which to observe the inevitable Union triumph, while enjoying a pleasant picnic.[5]

McDowell's forces simultaneously entered Prince William County, where they methodically took up their positions. The cautious pace of his preparations allowed just enough time for Southern reinforcements to arrive by rail from the Shenandoah Valley.

Until their appearance, the understrength Confederate Army of the Potomac (soon to be re-formed into the Army of Northern Virginia) had thinly strung itself out along the south bank of Bull Run Creek, with its left guarding a stone bridge, the hinge-pin of the defenses.

Fighting began on July 21, when 21,000 Federals converged on the Confederate left flank, which was protected by a single brigade of just 1,100 men. Brushing them aside, Col. William Tecumseh Sherman then crossed at an unguarded ford to strike the right flank of the Confederate defenders.

His surprise attack collapsed their line, frightening them into a disorderly retreat. The stampede was halted in its headlong flight by Brig. Gen. Thomas J. Jackson, who combined the shaken soldiers with his Virginia Brigade, reinvigorating their former resistance. He then ingeniously assembled 13 artillery pieces on the crest of a hill. As they fired, their recoil, assisted by gravity, pushed them down the reverse slope, where, naturally shielded, they could be safely and quickly reloaded in alternating, successive rows of continuous, rapid fire. The result was a huge barrage, as relentless, as it was terrific.

Joining in the carnage was a contingent of six-pounder guns and muskets from the Hampton Legion. Combined with Jackson's cannonade, they utterly decimated the 79th New York Infantry Regiment of elite Scottish and Scottish-American volunteers. They suffered virtual annihilation.

Eleven Union cannon were hastily ordered to save what was left of these dwindling Cameron Highlanders by engaging in an artillery duel with Jackson. But the Federals' rifled guns were less effective at the close range chosen for them, with many shots fired over the heads of their targets.

Meanwhile, Confederate smoothbore Napoleon 12-pounder cannon tore up McDowell's abortive rescue effort. Frustrated, he threw 7,000 troops at Southern defenses shielded by Gen. Barnard Elliott Bee Jr.'s men. As they fell back, he cried out, "The enemy are driving us!"

Unmoved, Jackson, standing nearby, calmly responded, "Then, Sir, we will give them the bayonet." Bee was so impressed by the resolute figure, he re-formed his troops by shouting at them, "There is Jackson standing like a stone wall! Let us determine to die here, and we will conquer! Rally behind the Virginians!"[6] Thus was born "Stonewall" Jackson.

As Bee's troops re-entered the fray, Federal cannon opened fire on them. But, by mid-afternoon, the menacing

Scottish Highlanders of New York State's elite 79th Regiment were cut to ribbons by Confederate artillery and musket fire at the Battle of First Manassas. Above, members march in a parade down the streets of New York as part of a recruitment event at the outset of the war. Left, an artist's rendering of a N.Y. Highlander.

artillery position had been overrun by Jackson's 33rd Virginia, which then pummeled the 11th New York Volunteer Infantry Regiment with close-range volleys. The flank of nearby Fire Zouaves assigned to protect the Union artillery was struck by an attack from the cavalry of the famous James "Jeb" Stuart, killing many gunners and scattering the infantry.

Capitalizing on their misfortune, Jackson ordered a pair of regiments to charge what remained of Federal artillery, which was quickly captured. Taking the Union guns turned the tide of battle, although, at the time, McDowell did not realize it. He rushed 15 regiments into a hill fight, outnumbering the Confederates two to one. Jackson continued to press his attacks, commanding soldiers of the 4th Virginia Infantry, "Reserve your fire until they come within 50 yards! Then fire and give them the bayonet! And, when you charge, yell like furies!"[7]

For the first time, Union troops heard the unnerving choruses of the Rebel yell. Around 4 p.m., the last Union troops were pushed off the hill.

As the entire Confederate line began to move inexorably forward, Union troops withdrew under fire. Many started to panic. The retreat degenerated into a rout. Thousands of Federals frantically ran away in the direction of Washington, D.C. Within the hour, the Union Army was unraveling everywhere. Large and small groups or lone individuals fled the area.

McDowell rode around the battlefield, trying to rally shot-up regiments and pockets of frightened soldiers with no success. Unable to stop the mass exodus, he gave orders for a regular infantry battalion near the intersection of the turnpike and Manassas-Sudley Road to act as a rear guard. The unit briefly held the crossroads until its supply wagon, sitting on a bridge spanning Cub Run Creek, was suddenly flipped over and set ablaze by accurate Confederate artillery fire, inciting more terror. The infantry battalion then retreated east-

ward with the remainder of broken Union forces. As its soldiers streamed uncontrollably toward the town of Centreville, discarding their arms and equipment, McDowell ordered a relatively unscathed division to act as a better rear guard. But its officers and men were disheartened and marched off in an opposite direction.

The frenzied Federal retreat was exacerbated by the crowds of noncombatant spectators who had earlier picnicked on the hills outside Manassas to applaud the anticipated Union victory. Now, they were horrified eyewitnesses to its bloody defeat. Horror-stricken and angrily demanding preferential right-of-way, they clogged the only road back to Washington in a traffic jam of fancy carriages, making the army's disorganized retreat all the more problematical and miserable.

Taking advantage of these chaotic conditions, the Confederates casually picked up 1,000 extra prisoners of war. The pell-mell flight from Bull Run became known in the Southern press as "the Great Skedaddle."[8]

Unnerved civilians more usefully, if unknowingly, served the Confederate cause by spreading hysteria wherever they went. Emotional contagion preceded their own arrival in the Union capital, where President Abraham Lincoln and members of the cabinet eagerly waited for news of McDowell's triumph. Instead, they received a terse message dashed off by one of the fleeing congressmen who stopped at the telegraph office in a small town on the route to D.C. just long enough to sound the alarm. The text he sent read, "Gen. McDowell's army in full retreat through Centreville. The day is lost. Save Washington and the remnants of this army!"[9]

Some hours later, another president was sending his own telegram to Richmond: "We have won a glorious but dear-bought victory. Night closed on the enemy in full flight and closely pursued."[10] Jefferson Davis had arrived at the battle site, as the deadly contest, which he witnessed first-hand, was about to climax. The "dear-bought victory" he mentioned had cost his army 387 killed and 1,582 wounded, but just 13 were taken prisoner. The Union Army lost 460 dead and 1,124 wounded, with over 1,300 listed as missing in action, either captured or deserted.[11] Although they compared far less grievously with Civil War battlefield casualties to come, the world was horrified because, in 1861, they were the most deaths incurred during a single engagement on the North American continent since the arrival of the first European settlers.

Brig. Gen. Barnard Elliott Bee Jr., inspired by the unflappable bearing of Gen. Thomas Jackson "standing like a stone wall" amid omnipresent death, successfully rallied his own unnerved men to rejoin the fight. Bee was mortally wounded in the Battle of First Manassas, dying the next day, but not before witnessing the victory won by his reinvigorated troops.

While personally surveying the littered panorama of Union defeat the next morning, Davis urged his general staff to take advantage of the enemy's dire condition by marching on Washington, D.C., a mere 31 miles away. From the conquered Northern capital, he intended to offer extraordinarily generous terms.

These did not even include conditions of surrender, but offered instead an equitable armistice, an immediate end to all further armed confrontations on both sides, and recognition of the Confederate States of America as an independent, sovereign nation.[12]

Despite their unprecedented losses (an overall high of 10%), the officers and men in the Confederate Army of the Potomac fully appreciated the absolute necessity of Davis's call for marching on Washington, D.C. Among

Much to their credit, while the majority of their comrades and officers were running for their lives, a brigade of courageous Union soldiers fought the last action of the Battle of First Manassas, fighting to the death against onrushing Confederate forces where it all began, Bull Run creek.

them was Jackson, even though his brigades sustained over 50% casualties. They had done the largest share of combat at Manassas, where they fought almost alone for more than four hours.[13] Without them and him, McDowell's numerically superior forces could have prevailed.

More certainly, Jackson was by far the battle's finest tactician who, better than anyone else at the time, clearly grasped the overall, fluid strategic conditions before him, with a flare of applied innovation and a preference for bold, even reckless attack that almost always carried the day. As such, he correctly assessed the depth and extent of mass-hysteria that had taken hold of McDowell's forces, which must inevitably spread panic among the rest of the Union capital's defenders and population. Had he known that their apparently formidable forts were in even more deplorable condition than the general knew—especially in terms of insufficient ammunition supplies and lack of trained personnel—his confidence in seizing Washington, would have been complete.

Its occupation would have justified moving almost the entire Confederate Army to the Potomac theater, a necessary relocation for backing up the peace plans of Davis.

In short, if Jackson—among the greatest and most experienced field commanders in military history—believed he had the means to take the city, he could have done so, had he been given the chance. He certainly knew better at that time and place than all his armchair detractors, then and since, who claim his conquest of Washington was not feasible.

Gen. Joseph E. Johnston lacked his fellow officer's aggressive spirit and, only under pressure from his own men and the C.S.A.'s chief executive, half-heartedly took up the chase after the demoralized enemy. Upon learning of defiant if desultory artillery fire erratically sputtering from McDowell's makeshift rear guard—and that a single, under-manned enemy brigade was trying to block the road to Centreville—Johnston called off the pursuit.[14]

These were paltry, even shameful, excuses. Davis never forgave Johnston, and blamed him for losing the war.[15] Johnston went on to dismiss Jackson's urgent request for occupying Washington at a unique moment when its seizure was still very much attainable.

The South's window of opportunity closed at Bull Run. The first and last

chance to take the Union capital and end the war was forever lost. Henceforward, the Rebels would fight only counter-engagements, often victoriously. Lee's considerable generalship was chiefly assigned to the defense of Richmond. But strictly defensive battles never win wars, especially against an opponent with virtually unlimited resources of all kinds. As such, the Battle of First Manassas was the most decisive turning point of the American Brothers' War.

"The winning fighter is not necessarily the strongest or the cleverest," Jackson later observed, "but the opponent who makes the decisive choice."[16] Their bad choice immediately after the battle haunted Confederate commanders for the rest of the war, and for some years thereafter, and justifiably so. The Battle of First Manassas took place at a moment when the Union Army was badly disorganized, untrained, under-equipped and overconfident. The Federals were on the ropes at Bull Run. Their defenses around Washington were inadequate—and they had no Stonewall Jackson of their own.

Had he been ordered to occupy the enemy capital, this author believes he would certainly have succeeded. The results of his conquest would have irrevocably changed the course of American and world history up to the present day. As such, the results of the Battle of First Manassas virtually proved that the outcome of the War for Southern Independence was not a foregone conclusion, and that the Confederacy was not doomed from the beginning.

Had short-sightedness and human weakness not canceled out superior intelligence and willpower, the war could very well have concluded before it grew into a fratricidal catastrophe, the scars of which we still bear more than 160 years after it began. ❖

Confederate President Jefferson Davis as he appeared riding his horse Blackjack at the Battle of First Manassas. The uniform Davis wore was not honorary. Fourteen years earlier, he had been a lieutenant colonel in the 1st U.S. Dragoons.

They Should Have Listened to Nathan Bedford Forrest

Still fought in an era where high-casualty, pitched battles between large armies were the norm, the Civil War was a brutal affair. But one Confederate officer in particular had a novel strategy that involved lightning fast movements of cavalry, infantry and artillery, all brought to bear on strategic focal battle points and, at the same time, minimizing casualties. His name was Nathan Bedford Forrest and, had Southern leaders listened to him, they might have found his method of fighting was the only one that could end in ultimate victory.

By Gene Andrews

As Southerners despair to see more and more of their once beautiful Southland overrun by illegal invaders from the four corners of the Third World, homegrown liberal "domestic terrorists" from the Left Coast and carpetbaggers from the Empire of the North, we lament and ask ourselves, "What would have happened had the South won its war for Southern independence?"

Well, it didn't happen. The South lost. And, since that day, many Southern historians have bravely defended the efforts of the Boys in Gray by insisting that, "It's not at all surprising the South lost the war, but, what's really amazing, though, is that we held out for four whole years! If only *this* or *that* had happened."

They then pontificate on the various turning points they believe guaranteed the downfall of the Confederacy. This always includes the twin disasters of Vicksburg and Gettysburg as the top two that ended the Confederacy's bid for freedom.

But did they?

Gettysburg was looked upon by the Confederate soldiers at the time not as a defeat, but another drawn battle like Sharpsburg, a year before.

NATHAN B. FORREST
Knew how to win.

In fact, the U.S. Army was so badly mauled after three days of hammering by Robert E. Lee's Army of Northern Virginia that Union Gen. George Meade gladly allowed the Confederates to slip back across the Potomac to the safety of Virginia with thousands of head of cattle, hogs, horses, mules and wagon loads of grain and food supplies to see the army through the summer and well into the fall. The U.S. Army declined to launch an offensive campaign against the "defeated" Confederates until May of 1864, a full 10 months later.

In the West, the Trans-Mississippi Department continued with its own government, military structure, arsenals, supply depots and victories after being cut off from the rest of the Confederacy when Vicksburg and Port Hudson fell. "The Father of Waters once again flow[ed] unimpeded to the sea" as Abe Lincoln reminded us.

Then there is the timing of the fall of Atlanta. Many insightful historians say the capture of Atlanta in September of 1864, just before the presidential election, assured pro-war Abraham Lincoln's re-election in November. They insist that, if Atlanta could have hung on for a few more months, an already war-weary Northern public, starved for news of Union victories, would have instead voted for pro-peace Democrat George McClellan.

Those beliefs were fostered by a portion of the 1864 Democratic Party Convention Platform that called for a meeting of the states to discuss a swift end to the war. The party platform also lambasted Lincoln for his violations of the Constitution and more. [For the text of the 1864 Democratic Party Convention Platform, see the item on page 19.—Ed.]

Forrest's raid on Memphis: In the early morning of August 21, 1864, Maj. Gen. Nathan Bedford Forrest led a daring raid on Union-held Memphis. Forrest's plan involved capturing multiple Union generals, releasing Southern prisoners and causing Union forces from northern Mississippi to be diverted to the city to protect it from capture. He did not succeed in those goals, but did capture 500 prisoners and a wealth of supplies. Above, the gunfight at the Gayoso House Hotel in which, legend says, one of Forrest's cavalryman broke through the front doors on horseback demanding the whereabouts of Union officials and officers.

Still other Southern historians insist it was one quirk of fate or the death of one key general here or there that swayed the tide of the war.

And then there are those who complain that the bid for Southern independence was doomed from the start. There was no way the South, with its agrarian-based economy and limited population, could compete with the heavily populated, militarized, industrial North. The war was over before it began, they say.

But, was the war really hopeless from the start? Not in this author's opinion. The South had one officer in the field with a very clear vision of the type of warfare needed to overcome the huge odds the Southern soldier and Confederate Army faced as a whole. It was neither full guerrilla nor partisan warfare, nor did it require huge armies or mountains of supplies. This officer's tactics had been proven successful over and over again in actual combat. This writer is thus convinced that the strategy and overall military intelligence exhibited by Confederate Gen. Nathan Bedford Forrest could have won the war for an independent Southern nation … without British intervention, without huge bloodbaths that the South didn't have the manpower to continue to fight, and without the economic and cultural destruction of the Confederate States of America.

Had the Confederacy adopted the "blitzkrieg" tactics of Forrest, employed with perfect timing and controlled ferocity, the war would not have been worth the Union's time and expense to fight it.

Forrest grew up dirt poor on the rough-and-tumble frontier but, through extremely hard work and determination, by the time the war clouds spread over the South, he had become a very successful businessman in Memphis, Tennessee. Estimates are that Forrest was worth more than $1.5 million—about $40–$45 million in today's money.

Forrest opposed secession as did Robert E. Lee in Virginia but, when Tennessee seceded following Lincoln's demand for Tennessee to invade the other Southern states, "Ole Bedford," like Lee, threw his lot in with the Confederacy. Unlike Lee, however, Forrest enlisted as a private. Forrest neither expected nor required a prestigious military rank or high political office simply due to his status as a wealthy plantation owner. He would work his way up through the ranks.

In four years of hard fighting, this 40-year-old businessman, who never spent a day in the halls of military schools like West Point, the Virginia Military Institute or the Citadel, rewrote the book on lightning-fast mobile warfare—using cavalry, infantry and artillery—still studied in military schools throughout the world.

He never commanded more than 9,000 men at one time, and that was only in one major battle. Forrest usually had an estimated 3,000–5,000 cavalry troopers under his leadership but, by the end of the war, he had commanded over 60,000 different men over those four years.

Forrest proved his innate military

and leadership ability from his first battalion command to the command of an entire cavalry corps. He also proved his contemporary and modern-day critics wrong when he showed how he could successfully and strategically employ the combined potential of multiple military branches.

"Never stand to receive the attack of the enemy. Always take the initiative and get there first with the most men," is probably one of the simplest and most practical military maxims ever conceived, and certainly one of the most often misquoted. Forrest never said get there "firstest with the mostest," but, as Robert Henry points out in his Forrest biography, "our Forrest and South-hating critics will never let us hear the 'lastest' of that."

But how did this unknown lieutenant colonel (promoted at the request of Tennessee Gov. Isham G. Harris) have such a clear vision of the course of action to be taken when professional military experts didn't? This military acumen showed itself early in the war and never waned until his death.

In a book on Forrest titled *Bust Hell Wide Open: The Life of Nathan Bedford Forrest*, Dr. Samuel Mitcham tells us, "In the Western Theater of the war, the professional West Point-trained generals hardly ever won, while Forrest, the untrained amateur, hardly ever lost."

Here are a few examples:

February 1862—Fort Donelson, Tennessee—In the military for less than a year, Forrest was already showing that he had a better concept of soldiering than the high-powered generals and political hacks fumbling away the defense of Tennessee.

Lt. Col. Forrest and his small cavalry battalion delayed and harassed Gen. Ulysses S. Grant's overland route from the fallen Fort Henry on the Tennessee River to Dover and Fort Donelson on the Cumberland River.

Rather than getting trapped in Fort Donelson, the Confederates decided to break out and escape to Clarksville and then on to Nashville. On the morning of February 14, the Confederates launched a dawn attack, catching Grant completely off guard. Forrest was one of the leaders of the surprise attack, capturing artillery and prisoners. Grant's lines were bent back into a sharp V shape. It wouldn't be the last time "Unconditional Surrender" Grant would be frustrated by Forrest.

Now the Confederate commanders had two choices to consider. They could march down the river road to Clarksville, throw everything into an assault on the Union forces fortified there, and, if successful, drive Grant back over the bluff and into the Cumberland River—or they could surrender.

In the end, the officer in charge of Fort Donelson, Gen. John B. Floyd, decided to march his men back into the fort and hunker down, deciding that surrender to the badly mauled U.S. Army was the best option.

> "We're going out of here tonight even if we have to bust hell wide open to do it."

This strategy made no sense to Forrest, and he refused to surrender. He told a room of military-school-trained brigadier generals: "I didn't bring my men here to surrender. We're going out of here tonight even if we have to bust hell wide open to do it."

Brig. Gen. Gideon Pillow agreed. "Cut your way out," he told Forrest. Forrest and about 300 of his men were thus able to scramble up over the breastworks and ride swiftly away, two men to a horse.

Forrest later said, "I am clearly of the opinion that two-thirds of our army could have marched out without loss, and, had we continued the fight the next day, we should have gained a glorious victory."

Instead, the next day, about 15,000 remaining Confederates inside the fort surrendered to Grant. If they had followed Forrest, perhaps the entire army could have been saved. What might those 15,000 soldiers have done to help defend Nashville? Could 15,000 men have come in handy during the Confederate's first-day attack at Shiloh later on?

April 1862—Shiloh (Pittsburg Landing), Tennessee—Again Forrest's cavalry was on the Confederate flank, capturing artillery, prisoners and supplies. That night, Forrest and his scouts crept along the river bank behind U.S. lines at Pittsburg Landing and saw Union Gen. Don Carlos Buell's reinforcements being ferried across the Tennessee River. Forrest then warned the Confederate high command. His warning was ignored. The next day, the significantly outnumbered Confederates were driven from the field in a fight in which they never should have engaged.

July 1862—The Murfreesboro Raid, Tennessee—Buell marched his men toward the vital east-west railroad junction at Chattanooga. Forrest swung around behind the Federals and struck Murfreesboro. There, he captured prisoners, tore up track, burned railroad bridges and freed civilian prisoners about to be executed that morning. With his supply line cut, Buell called off his Chattanooga campaign and returned to Union-occupied and heavily fortified Nashville.

September 1862—Bragg's Kentucky Campaign—Forrest screened Gen. Braxton Bragg's flanking march around Buell so completely that the Yankee general didn't know that a major Confederate force had slipped past him and was now situated between his army and Louisville.

Forrest and Gen. John Breckinridge captured the Federal garrison at Munfordville, Kentucky, while Gen. Kirby Smith and Gen. Patrick Cleburne routed the Union army at Richmond in eastern Kentucky. But Bragg snatched defeat from the jaws of victory and allowed Buell to march past him to Louisville. Bragg then won the

battle at Perryville, Kentucky, but, inexplicably, retreated back into Middle Tennessee rather than press his clear advantage.

Forrest was furious at the lost opportunity and the wasted lives—lives that the outnumbered Southern armies could ill afford to throw away. His criticism offended Bragg, who relieved Forrest of his command and sent him back to Tennessee to raise his second command of the war in just over 12 months.

December 1862—West Tennessee Raid—Forrest took his new command of untrained, poorly armed and equipped raw recruits across the Yankee-patrolled Tennessee River into heavily garrisoned West Tennessee where he completely wrecked the Mobile & Ohio Railroad. This was Grant's main supply line for the northern Mississippi route to take Vicksburg from the land side.

Coupled with Southern Gen. Earl Van Dorn's destruction of the Union supply base at Holly Springs, Mississippi, Grant was forced to call off his overland approach to Vicksburg, retreated to Memphis and waited for the Federal Navy to supply and guard him via the Mississippi River.

Forrest's men fought over a dozen small battles and skirmishes, captured 1,300 prisoners, armed themselves with the best weapons the U.S. Army Quartermaster's Department could supply and seriously hampered the enemy's overall campaign strategy without ever engaging with any much larger forces head to head.

June 1863—Tullahoma Campaign, Tennessee—After winning the first day's battle at Murfreesboro, Bragg falls back about 30 miles to a line along the Duck River. Sam Watkins of Company H, 1st Tennessee Infantry Regiment, gives his soldier's opinion of Bragg in Sam's recollections of the war titled *Company Aytch: A Sideshow of the Big Show*: "Bully for Bragg. He's hell on retreatin'."

Union Gen. William Rosecrans replaced Buell before Murfreesboro as the U.S. commander and, in the late spring and summer of 1863, he managed to maneuver Bragg out of Tennessee while capturing Chattanooga almost without firing a shot. The Confederate Army of Western Tennessee would not return to their home state for 15 months, and then with disastrous results under the command of Gen. John Bell Hood.

August 1863—Forrest's Plan Rejected—Forrest then sent a letter to Adjt. Gen. Samuel Cooper, the highest ranking officer in the Confederate military. Forrest outlined a plan to take his cavalry plus at least two batteries of long-range, rifled artillery to raise troops in western Tennessee, Mississippi and Kentucky, while stopping any re-supply operations by the Union on the Tennessee and Mississippi Rivers. Forrest wanted to strand Rosecrans in Chattanooga while also immobilizing Grant and Sherman, who were still bivouacked around Vicksburg. This was the tactic Forrest used to stop Buell's Chattanooga campaign and Grant's first Vicksburg campaign: simply take out the enemy supply and rail lines. An army without guns and food is an impotent one.

Hearing nothing, Forrest then wrote directly to President Jefferson Davis, who forwarded the letter to Bragg for his opinion. Bragg, who hated Forrest for pointing out his faults as a battlefield commander and going over his head, advised against it. Davis agreed and rejected the plan.

In his book *A Rebel Born: A Defense of Nathan Bedford Forrest*, historian Lochlainn Seabrook, among others, posits that this may have been the worst decision of Davis's career.

September 1863—Chickamauga (a vital rail junction where Georgia, Alabama and Tennessee meet)—Once again, in the thick of it from the start, Forrest's cavalry opened the bloody three-day battle at Reed's Bridge over Chickamauga Creek in Tennessee. The Confederates won a smashing victory, routing the U.S. Army from the field. Unfortunately, Bragg ignored Forrest's urging to finish off the demoralized and disorganized enemy running back to Chattanooga. In *Bust Hell Wide Open*,

Braxton Bragg, a West Point-trained artillery officer, served in the Mexican-American War with distinction. However, he was known as an overly strict disciplinarian, and a contingent of the soldiers under his command evidently loathed him. In 1847, one disgruntled soldier placed an artillery shell under Bragg's cot and detonated it, but Bragg survived the assassination attempt, allegedly without a scratch.

A "disputatious" man, Bragg wrote scathing letters and articles criticizing Gen. Winfield Scott and the U.S. Army for refusing to take his advice and reorganize the general staff. When his superiors ordered him not to testify about his claims before a congressional committee, he did anyway, was court-martialed and suspended without pay for two months. He resigned from the U.S. Army in 1855 and soon purchased a plantation in Louisiana. There, Bragg continued to participate in military matters, functioning as a colonel of state militia. Though against secession, he eventually rose to the rank of major general in the Confederate Army, but was often criticized by subordinates. Many historians consider him to be one of the worst field commanders of the war.

Mitcham quotes German Gen. Erwin Rommel, "Never fight a battle when you gain nothing by winning it." Forrest certainly believed that.

Though considered a victory, Confederate losses at Chickamauga were staggering 18,450 killed, wounded and missing. Forrest was furious with Bragg again: "Why does he fight battles if he does nothing with the victory?" Forrest's pleas to finish off the enemy were ignored. The U.S. Army survived, was reinforced and, in November, drove the Confederates away from Chattanooga and down into Georgia.

Bragg reacted to Forrest's open criticisms by okaying Forrest's request for a transfer. Forrest—the hardest fighting and most successful general in the theater—then went west to the Department of Mississippi, Alabama and Eastern Louisiana to take on an independent command.

However, with his experienced, combat-hardened troops taken away, Forrest was forced to recruit, mount, arm and train yet another command. In just over a month, from November to December 1863, Forrest did just that, forging a cavalry unit composed of men from local guerrilla bands, deserters and even teenaged boys. He was promoted to major general on December 4.

Despite the promotion, it seems the U.S. military had a higher appreciation of Forrest's talents than did the Confederate government. After Grant was transferred east, and Gen. William Tecumseh Sherman took command of the western army, Sherman immediately took notice of Forrest's presence. He was allegedly terrified Forrest would raid into middle Tennessee and take out the Nashville & Decatur Railroad, as well as the Nashville & Chattanooga Railroad, leaving Sherman and his men stranded in northern Georgia.

Sherman was depending on the railroads for vital supplies and reinforcements for his summer campaign against Gen. Joe Johnston and the Confederate Army defending Atlanta. In the summer, the water level along the Tennessee River at Muscle Shoals, Alabama was too low to get large steamboats and barges over the sandbanks to supply a 100,000-man army if the railroads were taken out.

In the spring and summer of 1864, four U.S. armies were thus sent out of Memphis to keep Forrest occupied in northern Mississippi and away from the railroads in Tennessee.

Forrest defeated all four or was able to force them to retreat back to Memphis—but, inevitably, the Yankee advantage in manpower prevailed. In this case, Forrest was unable to turn his forces loose to go after middle Tennessee until September 1864.

It would prove to be too little, too late, but he had tied down multiple Union forces and bought valuable time for the rebels to shore up regional defenses.

> The Union generals had much more respect for Forrest than did his own government.

February 1864—Okolona, Mississippi—Forrest's forces managed to defeat Gen. William Sooy Smith's cavalry, which had been sent south to cover Sherman's flanks during his campaign to destroy the Confederate arsenal and manufacturing center at Selma, Alabama.

With no cavalry to protect him from Forrest's cavalry, Sherman stopped at Meridian, Mississippi, regrouped for a brief time and then scurried back to Vicksburg.

April 1864—Forrest's Third Tennessee Raid—Forrest and his men forayed into western Tennessee and western Kentucky to get horses for Abraham Buford's dismounted cavalry division. Not knowing where Forrest would strike next, Federal troops remained pinned down in all the major garrisons in western Tennessee, tying up a significant number of Union men and resources.

Buford got his horses and the Confederates, who had been raiding for five weeks, headed out of Tennessee and returned to Columbus, Mississippi, on the Tombigbee River. Within 50 miles of their location was Fort Pillow.

The civilians in west Tennessee approached Forrest and begged him to do something about the U.S. war criminals, White and Black, who were coming out of Fort Pillow to rob and attack local civilians, especially the women, in western Tennessee.

Forrest attacked and overran Fort Pillow on April 12. Yankee war propagandists then invented the "Massacre at Fort Pillow," accusing Forrest's men of brutal war crimes committed against the Black soldiers inside the fort. [For the truth about what happened at Fort Pillow, see TBR's September/October 2017 "Defending Dixie" special edition.—Ed.]

April 1864—Forrest's Strategy, Again—Yet again, Forrest sends a letter to Presdient Davis, proposing to destroy Sherman's two railroad lines in Tennessee.

Davis refers Forrest's letter to his new senior military advisor, the now very familiar Braxton Bragg. After the disasters in Chattanooga and Knoxville, Bragg had been kicked upstairs to work for the president rather than be allowed to again command men in the field. Predictably, Bragg rejected the plan of Forrest, his longtime nemesis. So, even as the Union dedicated multiple armies and major resources to account for Forrest's forces, his own government deep-sixed his tried-and-true strategem that had worked numerous times.

June 1864—Brice's Crossroads, Mississippi: "The Perfect Battle"—With only 3,800 men, Forrest managed to rout a Federal force of over 8,000 men under the command of Gen. Samuel Sturgis. Forrest had utilized every possible advantage: timely attacking of under-fed and exhausted U.S. troops; executing unexpected dual flank attacks; developing a deeper and more

secure supply line; and harassing Union supply lines mired in muddy terrain. In addition, Forrest used the sympathetic civilians in the area as reliable and willing sources of vital intelligence. Forrest had thought of everything.

Forrest and his men captured nearly all of the 22 pieces of Union artillery, and took possession of all 250 of the enemy's supply wagons that were being used to steal food and valuables from the Southern civilians of northern Mississippi.

Once Sturgis found safety after retreating to Memphis, he asked to be relieved of his command. He knew he had been outclassed by a much superior military mind. This battle is still studied in military schools across the world today.

July 1864—Harrisburg—Under the command of Gen. Stephen D. Lee, the Confederates suffered heavy losses in a poorly executed attack, but the Yankees panicked and retreated back to the safety of Memphis. That illusion of safety was quickly shattered.

August 1864—The Memphis Raid—Facing a much larger army, Forrest swung around behind the Union forces and launched a surprise raid in downtown Memphis. The Northern brass had to hustle valuable forces back to Memphis to protect the Union armchair generals ensconced there, proving, once again, that lightning raids could result in significant numbers of enemy forces being tied down or captured by smaller, faster-moving units of men.

September 1864—Northern Alabama—Forrest was finally turned loose on Sherman's railroad supply lines, but it was too little and way too late to make much of a difference.

November 1864—Johnsonville—Forrest destroyed the Union supply base at Johnsonville that Andrew Johnson, the Yankee military governor of occupied Tennessee, had named for himself. Showing his strategic understanding of the use of stealth and artillery, Forrest secretly placed cannon on a high elevation on the west side of the Tennessee River and fired down upon the Union steamboats, barges, gunboats and warehouses on the east side of the river. Forrest's batteries were able to destroy millions of dollars in U.S. supplies.

November–December 1864—Hood's Tennessee Campaign—Ordered to cover Gen. John Bell Hood's attempt to liberate Nashville, Forrest spread his cavalry out in front of the advancing Union Army of Tennessee. In clashes with Gen. James Wilson's U.S. cavalry, Forrest's troopers gave the Union horse soldiers a severe beating on a near-daily basis.

Union Gen. John Schofield was then sent south out of Nashville by Gen. George "Rock of Chickamauga" Thomas to slow any Confederate advance. Forrest failed to cut off Schofield on the south bank of the rain-swollen river in Columbia, but managed to halt the Union forces a few miles north in Spring Hill. When his men ran out of ammunition, Forrest was forced to withdraw to re-supply, thwarting a chance for a smashing Confederate victory.

A confused Hood, however, made things much worse. Hood allowed the Yankee army to literally tiptoe past the Confederate lines on the night of November 29, and yet another opportunity for a decisive victory was lost.

November 30, 1864—Franklin, Tennessee—Against the advice of all of his staff officers, Hood decided to attack the entrenched Federal forces at Franklin. Forrest offered to swing around behind the Union troops and plug Hollow Tree Gap, thus trapping Schofield. Forrest had operated across this area in 1863 and knew every road and country lane.

Unfortunately, Hood ignored his offer and sent his army into a slaughter. Hood compounded his poor decision by splitting up Forrest's cavalry and thus rendering his mounted troops ineffective during the battle.

December 1864—Nashville—Moving up the road to Nashville, Forrest strategically placed artillery pieces on the Cumberland River west of Nashville. From December 2 until the first shots in the battle of Nashville were fired on December 15, Maj. D.C.

Two Books on Nathan Bedford Forrest

A Rebel Born: A Defense of Nathan B. Forrest

Gen. Nathan Bedford Forrest was an ingenious Confederate officer who won all but one of the battles he led; a philanthropist who gave generously to family, friends and charities; and a humanitarian who not only spared the lives of numerous Yankees on the battlefield, but who freed his slaves years before Lincoln issued his proclamation. But, according to most authors, Forrest was a violent redneck, a racist, a slave trader, a philanderer, an illiterate hillbilly, the founder of the KKK and "the butcher of Fort Pillow." Softcover, 822 pages, #776, **$35** minus 10% for TBR subscribers.

The God of War: Nathan Bedford Forrest as Seen by His Contemporaries

By Lochlainn Seabrook. Here is the authentic Nathan Bedford Forrest in the words of those who knew him: Confederate soldiers, Union soldiers, military educators, foreigners, writers, politicians, neighbors, even children—all without the bigoted intrusions of politically correct editorializing, South-hating mythology, and absurd left-wing lies. Find out for yourself why Forrest was idolized around the world. Softcover, 358 pages, illustrated, #811, **$20** minus 10% for TBR subscribers.

S&H not included. Inside the U.S. add $5 S&H for one book. Add $10 S&H for both books. Outside the U.S. email Sales@BarnesReview.org for S&H. Order from TBR Book Club, P.O. Box 550, White Plains, MD 20695. Call toll free 1-877-773-9077 to charge, Mon.-Thu. 8-4 ET or visit www.BarnesReview.com.

Kelley, the man Forrest placed in command of the operation, fought 19 battles on the river without a single Yankee ship reaching Nashville.

Hood continued his string of poor decisions by sending Forrest and his men away from the impending battle at Nashville to capture a relatively meaningless supply depot on the railroad at Murfreesboro. In Forrest's absence, Thomas and his Union forces emerged from the forts around Nashville and totally smashed Hood's army.

Hearing of the disaster at Nashville, Forrest immediately headed across country and assumed the rear guard position, protecting Hood's beaten army at Columbia. Snow, freezing rain and brutally cold weather compounded the retreat toward the safety of the Tennessee River in Alabama.

Fortunately, Forrest's cavalry was able to keep the Yankee pursuers at bay, saving the barefoot and freezing Confederate Army.

CONCLUSION

How many times did Nathan Bedford Forrest advise the professional West Point generals how to win battles? How many times did Forrest tell the Richmond government how to defeat a much larger army—and showed them how to do it? And how many times was he ignored?

Could his hit-and-run tactics—always avoiding pitched battles whenever possible and hitting the invading army's supply lines hard—have changed the course of the war in the Western Theater and beyond? That strategy certainly makes more sense than the antiquated tactics of most of his superiors, who had been trained in outmoded methods of warfare.

But, time and again, they insisted on waging massive pitched battles, throwing waves of indispensible Southern soldiers against larger and better-equipped Union armies that had an endless stream of on-command cannon fodder living in the large population centers of the Northern states.

Rather than heed Forrest, they ignored him and, today, we are forced to live in an occupied country, listen to their falsified versions of history, see our monuments torn down and endure the vandalization of Confederate gravesites.

Jefferson Davis was imprisoned from 1865 to 1867 and, for a year after that, was in legal limbo. On December 25, 1868, President Andrew Johnson finally issued an amnesty proclamation pardoning all persons who had participated in the "rebellion." Only then did Davis become a truly free man.

After the war, Jefferson Davis said he was misled by others about Forrest's abilities and did not recognize his potential until it was too late.

Forrest saw the big picture—the overall, full-dimensional concept of the war that the Confederate government and most of its West Point-trained generals couldn't see. If the South was going to win the war, a new form of modern warfare would have to be employed, one that gave the defenders a chance against a better-equipped, numerically superior invading army: Deprive that army of the food and supplies it needed to fight and lose as few men as possible doing it.

Unfortunately, it was his enemies who recognized Forrest's serious threat to their overall war plan. He was rarely recognized by his own superiors until it was far too late. If only they had listened to Nathan Bedford Forrest, the South might have been able to frustrate and outlast Lincoln's invaders. ❖

Gene Andrews was born and raised in Nashville, Tennessee. He served as a first lieutenant with the Third Marine Division in Vietnam in 1969. He taught history in high school while also coaching football and track. He worked for his brother Don for 25 years, providing medical coverage for drivers and crew members in Indy Car, NASCAR and the American Le Mans racing series. He is now retired but works "almost full time" as the caretaker of the Nathan Bedford Forrest Boyhood Home near Chapel Hill in middle Tennessee.

1864 Democratic Convention & Platform

George McClellan
1864 Democratic
Presidential Nominee

On Aug. 29, 1864, the Democratic National Convention assembled in Chicago, Ill., and nominated Gen. George McClellan for the presidency on the following declaration of principles:

Resolved, that, in the future, as in the past, we will adhere with unswerving fidelity to the Union under the Constitution as the only solid foundation of our strength, security and happiness as a people, and as a framework of government equally conducive to the welfare and prosperity of all the states, both Northern and Southern.

Resolved, that this convention does explicitly declare, as the sense of the American people, that, after four years of failure to restore the Union by the experiment of war, during which, under the pretence of military necessity or war power higher than the Constitution, the Constitution itself has been disregarded in every part, and public liberty and private right alike trodden down, and the material prosperity of the country essentially impaired, justice, humanity, liberty and the public welfare demand that immediate efforts be made for a cessation of hostilities, with a view to an ultimate convention of the states or other peaceable means, to the end that, at the earliest practicable moment, peace may be restored (former on the basis of the federal union of the states.

An 1864 Democratic campaign poster shows presidential candidate George B. McClellan (former commanding general of the U.S. Army, 1861–1862, left) and Democratic vice presidential candidate Rep. George H. Pendleton of Ohio (right).

Resolved, that the direct interference of the military authorities of the United States in the recent elections held in Kentucky, Maryland, Missouri and Delaware was a shameful violation of the Constitution and a repetition of such acts in the approaching election will be held as revolutionary, and resisted with all the means and power under our control.

Resolved, that the aim and object of the Democratic Party are to preserve the federal union and the rights of the states unimpaired; and they hereby declare that they consider the administrative usurpation of extraordinary and dangerous powers not granted by the Constitution; the subversion of the civil by the military laws in states not in insurrection; the arbitrary military arrest, imprisonment, trial and sentence of American citizens in states where civil law exists in full force; the suppression of freedom of speech and of the press; the denial of the right of asylum; the open and avowed disregard of state rights; the employment of unusual test oaths, and the interference with and denial of the right of the people to bear arms in their defense, as calculated to prevent a restoration of the union and the perpetuation of a government deriving its just powers from the consent of the governed.

Resolved, that the shameful disregard by the administration of its duty in respect to our fellow citizens who are now and have long been prisoners of war in a suffering condition, deserves the severest reprobation on the score alike of public policy and common humanity.

Resolved, that the sympathy of the Democratic Party is heartily and earnestly extended to the soldiers of our Army and the seamen of our Navy, who are and have been in the field under the flag of their country; and, in the event of its attaining power, they will receive all the care, protection and regard that the brave soldiers and sailors of the republic have so nobly earned. ❖

CIVIL WAR HISTORY

The Sequel to Appomattox: A Chronicle of the Reunion of the States

By Walter Lynwood Fleming (1919). When the armies of the Union and of the Confederacy were disbanded in 1865, the war really didn't end. The surviving Confederate soldiers came straggling back home. Everywhere they saw widows, orphans, destroyed property, the labor system disorganized, White people demoralized, and a devastated land. The accumulated capital of the South had disappeared. The banks had failed, factories were gone, mining industry was paralyzed and schools burned down. How could this devastation be undone? Reprint. Softcover, 322 pages, #989, **$21**.

Ousting the Carpetbaggers from South Carolina

By Henry Tazewell Thompson (1926). South Carolina had been stigmatized as "the nest wherein was hatched the snake of Secession," and it was the purpose of Reconstruction to mete out retribution. At the point of the bayonet, the noblest citizens of the state were relegated to inferiority by their former slaves. This is the history of the revolution of 1876 in which South Carolinians, led by Gen. Wade Hampton and his Redshirts, united to throw off the oppressive yoke of "Carpetbagger" government and halt unquenchable Black revenge. Reprint. Softcover, 182 pages, #990, **$21**.

The Honorable Cause: A Free South—Twelve Southern Essays

Here is a collection of 12 essays written by pro-Southern and pro-secession activists. It places into context what it means to be "Southern" and why Southern identity is so important. It explores secession and how to achieve political and social liberation for the South. Is a free and independent Dixie the most honorable outcome for a unique people? *The Honorable Cause* details how the South can achieve status as a nation-state, with a right of self-determination for its people. Softcover, 301 pages, #988, **$25**.

Vintage Southern Cookbook: 2,000 Delicious Dishes from Dixie

By Lochlainn Seabrook. In his campaign to preserve authentic Southern history, Seabrook has compiled thousands of recipes from America's Southland. Spanning 1838 to 1924, the book's recipes detail a wide variety of Southern victuals—most endemic to Dixie, but many borrowed from places as diverse as New England, the West Coast, Europe and Russia. 28 chapters. Softcover, 588 pages, #923, **$33**.

The Unholy Crusade: Lincoln's Legacy of Destruction in the American South

What is the true legacy of Lincoln's War? Historian Lochlainn Seabrook reveals it was Lincoln's illegal, unnecessary, and merciless destruction of the South and her people. This book provides hundreds of 19th-century photos and drawings of the North's four-year demolition of Dixie, ranging from the ransacking and burning of thousands of private Southern homes and businesses to the bombing of countless mills, factories, trains, ships, roads, depots, forts, docks, bridges, communications, warehouses, churches, banks and even cemeteries. Southern libraries, universities, hospitals, livestock and even family pets were wantonly destroyed by Union troops as well. Also many incidents of the unlawful arrest, abuse, torture, rape, and murder of scores of innocent Southern civilians. Softcover, 216 pages, #925, **$20.**

A Short History of the Confederate States of America by Jefferson Davis

By President Jefferson Davis. Written by the man who was at the center of the C.S.A. and who held its highest office, this remarkable history tells the story of the rebel republic from its very beginning to its bitter end and the events of those times as experienced by Davis. The author deals with the fundamental issue of states' rights, slavery and the usurpation of the U.S. Constitution. The author shows that the Confederacy was adhering to the original U.S. Constitution, and this was an important reason why he was never brought to trial: opponents feared he would prove this in court. The majority of the book then describes the tumultuous events from 1861 to 1865 as he experienced them. Now completely reset in crystal-clear text with 203 brand new footnotes and annotations explaining things to the present-day reader, and 67 new and ultra-rare illustrations and photographs. Softcover, 552 pages, #921, **$30**.

The Great Partnership: Robert E. Lee, Stonewall Jackson, and the Fate of the Confederacy

By Christian Keller. The story of the unique relationship between Lee and Jackson, two leaders who chiseled a strategic path forward against the odds and almost triumphed. Why were Lee and Jackson so successful in their partnership? What was it about their styles, friendship, even their faith, that cemented them together into a fighting machine that consistently won despite overwhelming odds? It has been over two decades since any author attempted a joint study of the two generals. Softcover, 368 pages, #914, **$18**.

Everything You Were Taught About American Slavery Is Wrong, Ask a Southerner!

This important 1,000-page work by Lochlainn Seabrook decimates the deceitful view of slavery annually churned out by Yankee mythologists. Lavishly illustrated with over 500 intriguing images, a helpful "world slavery time line" and a detailed index of significant historical figures, Seabrook lays out the truth about slavery that will shock you. Contains 3,500 notes and a 2,000-book bibliography. The foreword is by black educator Barbara G. Marthal. Softcover, 1,020 pages, #749, **$45**.

Everything You Were Taught About African-Americans and the Civil War Is Wrong, Ask a Southerner!

Genuine slavery was never practiced in the South. Jefferson Davis planned on abolishing slavery nearly a year before the Union. Lincoln intended the Emancipation Proclamation to be temporary. A thousand other little-known facts are presented by historian Col. Lochlainn Seabrook, who divides his book into three sections: "African-Americans Before Lincoln's War," "African-Americans During Lincoln's War," and "African-Americans After Lincoln's War." Includes information on indigenous African slavery, White American slavery and the birth of Black American slavery in the North to Black Confederates, Black KKK members and the birth of abolition in the South—not the North. Much, much more! Softcover, 475 pages, #900, **$25**.

Everything You Were Taught About the Civil War is Wrong, Ask a Southerner!

By Lochlainn Seabrook. Learn the truth about the causes of the war, the secession movement, African-American slavery, conditions of the slaves, Blacks who supported their masters, abolition, the Confederacy, the Union, Jefferson Davis, Abraham Lincoln, Reconstruction, liberals vs. conservatives, the real Emancipation Proclamation, conduct of Union and Confederate soldiers and more. The foreword is by African-American educator Nelson W. Winbush. Includes over 1,000 endnotes, a 700-book bibliography and is indexed. Softcover, illustrated, 266 pages, #729, **$20**.

The Field of Blood: Violence in Congress and the Road to Civil War

Joanne B. Freeman shows that the Capitol was rife with conflict in the decades before the Civil War. Legislative sessions were often punctuated by mortal threats, canings, flipped desks and all-out slugfests. When debate broke down, congressmen drew pistols and waved knives. One representative killed another in a duel. Many were beaten and bullied into compliance—one nearly beaten to death with a cane in the halls of Congress. Softcover, 480 pages, #908, **$25**.

Confederate Monuments

Subtitle: *Why Every American Should Honor Confederate Soldiers and Their Memorials.* Why is the Left targeting Confederate monuments for destruction? These efforts are an insult to the honor and memory of Confederate soldiers. Throughout this illustrated work, the author sprinkles scores of additional Confederate images from the Victorian era, along with poems, quotes and inscriptions from statues, all of which add value to this primer. Softcover, 432 pages, #807, **$22**.

Blood Money: The Civil War & the Fed

John Graham chronicles the divisive antagonism between North and South, finally erupting in 1861, and how they were deliberately agitated by international banking houses with the goal of provoking secession. These private interests set up a huge financial empire centered on Wall Street, using public debt as the source of their wealth. This book explores the economic causes of the war, revealing how the Civil War would not have happened had it not been planned and fomented by greedy Northern capitalists. Softcover, 96 pages, #507, **$15**.

The Day Dixie Died: The Occupied South 1865-1866

By historians Thomas and Debra Goodrich. Starting with the assassination of Lincoln, the authors trace the history of Reconstruction, the death, destruction, crime, starvation, exile and anarchy that pervaded those terrible years. Few books give you the actual truth about this period in time, but this one does—in graphic detail. Many photos. Possibly the best book on the subject ever written. Softcover, 320 pages, #273, **$22**.

MORE CIVIL WAR HISTORY

Confederate Flag Facts: What Every American Should Know About Dixie's Southern Cross

Is the Confederate battle flag truly a symbol of "hatred, racism and slavery," as leftists insist—or is it a symbol of Christian brotherhood and freedom? It's a sacred emblem of Southern heritage, says the author, one of history and honor and one which every Southerner should be rightfully proud of. Lochlainn Seabrook corrects the falsehoods about the South's most famous ensign: the Starry Cross. Softcover, 356 pages, #730, **$22**.

The Memoirs of Col. John Singleton Mosby

These are the uncensored memoirs of John Singleton Mosby, the legendary Confederate cavalry leader who bedeviled the Union army for four years. With only a few thousand men, Mosby's ability to strike fast and then melt away before an effective pursuit could be organized earned him the nickname "the Gray Ghost." Loyal to the end to his commander J.E.B. Stuart, Mosby also answered accusations that Stuart's mistakes cost Lee the battle of Gettysburg. But Mosby was more than just a cavalry genius, he was also a brilliant writer. Softcover, 262 pages, #659, **$25**.

Lincoln's War: The Real Cause, the Real Winner, the Real Loser

Read the most important "Civil War" book in decades and learn the truth about the war. Learn from Col. Lochlainn Seabrook the authentic facts about Civil War-era Republicans and Democrats, the true origins of the war, and who really won and lost. Who believes, for example, that millions of men, women, and children (on both sides) risked their lives to destroy or save slavery? Who accepts the idea that Lincoln was justified in killing hundreds of thousands of people and bankrupting the U.S. to "preserve the Union"? This book is packed with once-suppressed testimonies. Softcover, 347 pages, #757, **$21**.

Rebel Private—Front & Rear: Memoirs of a Confederate Soldier

William A. Fletcher's recollections of life as a Confederate soldier are vivid, and his ability to command the imagination and give the reader a real you-are-there experience is impressive. *Rebel Private* sheds a light on the everyday concerns of a "rebel" soldier, from the plight of the wounded to taking food from women and children in Union territory and scavenging from the dying to taking a human life. Softcover, 128 pages, #769, **$15**.

The Ultimate Civil War Quiz Book

Think you're an expert on the War of 1861? Test yourself! But don't expect to find entries about Jefferson Davis' birthday or the names of Abraham Lincoln's parents, because this is not your typical question-and-answer trivia book! Col. Lochlainn Seabrook calls it the "ultimate" quiz book because it contains vital but seldom discussed information you need to know before you can truly understand the most important struggle in U.S. history. Softcover, 148 pages, #823, **$14**.

A Thousand Points of Truth

During his life, Col. John Singleton Mosby was the subject of thousands of newspaper articles covering his exploits in the Civil War, his postwar career and his death. Yet, even after death, the public thirsted for tales of his exploits. V.P. Hughes took it upon herself to get to know Mosby better than any other researcher by reading every one of the thousands of newspaper articles written about Mosby over the span of 150 years. Softcover, 790 pages, illustrated, #756, **$39**.

Lincoln Was a Liberal, Davis Was a Conservative

Lochlainn Seabrook explains that, in the 1860s, the platforms of the two main political parties were the reverse of what they are today. At the time, big-government advocate Lincoln and the Republican Party were liberals, while small-government proponent Davis and the Democratic Party were conservatives. This fact transforms the Civil War from what pro-North writers assert was a battle over slavery, to what it really was: a massive contest between liberalism and conservatism. Softcover, 246 pages, #840, **$19**.

Red Republicans and Lincoln's Marxists: Marxism in the Civil War

Was Abraham Lincoln influenced by Communism? That's precisely what Walter Kennedy and Al Benson assert in this book. The pair reassess this time in American history, exposing the politically correct view of the Civil War as nothing less than the same observation

announced by Marx himself. Kennedy and Benson also investigate the validity of today's federal government and why its role seems so much larger than ever before. Softcover, 269 pages, #569, **$25**.

The Real Lincoln

Thomas J. Dilorenzo shows Lincoln as he truly was, a mentally unstable despot bent on dragging the nation into years of fratricide. A side of Lincoln few ever knew existed is exposed. The book argues convincingly that Honest Abe was a calculating politician who subverted the Constitution, disregarded states' rights and achieved the closest thing to a totalitarian dictatorship yet seen on U.S. soil—even worse than FDR! Softcover, 361 pages, #427, **$18**.

Too Afraid to Cry: Maryland Civilians in the Antietam Campaign

By Kathleen Ernst. What might you do if you woke up in the morning and found a hundred corpses on the front lawn? What about the marauding armies from both sides who might be coming to steal your food, burn your home or even murder you and threaten your womenfolk? Where would you go? Where would you hide? Could you escape? This book recounts the experiences of ordinary people caught up in the events at Antietam. Softcover, 320 pages, #777, **$25**.

Memoirs of the Confederate War for Independence: A Prussian in Stuart's Cavalry

By Heros von Borcke. This is a highly detailed personal memoir of Heros von Borcke's adventures with dashing cavalry leader Gen. J.E.B. Stuart. A giant of a man, the Prussian von Borcke carried a huge broadsword, was in the thick of every scrum and was entrusted with secret missions by Stuart. Von Borcke was an extremely intelligent man who was also a brilliant writer. In the midst of the war, von Borcke's multifarious interests come through as he writes not only about war, but the flora and fauna around him as well as making many cogent comments about life in general. Softcover, 399 pages, #516, **$23**.

The Darkest Dawn: Lincoln, Booth & the Great American Tragedy

Many books have discussed the killing of Lincoln, but few have shown us the immediate aftermath of the president's assassination: the public panic, the news that other members of the cabinet had been targeted or attacked, the massive manhunt for Booth, the arrest of the alleged conspirators and a populace begging for revenge—all of this happening even as a war was still raging. This story has never been told with the power of *The Darkest Dawn*. Author Tom Goodrich brings to this narrative the gripping accounts of eyewitnesses, from the moment of the assassination—seen through the eyes of attendees—right up through the manhunt for Booth, the executions of the conspirators and more. Softcover, 376 pages, #842, **$22**.

The Southerner: The Real Story of Abe Lincoln

Did Abraham Lincoln have other plans in mind for the racial integrity of America? Have we misinterpreted his intentions in regard to the freeing of slaves? Contrary to the Hollywood myth, Lincoln's greatest desire was to free Blacks from slavery and send them all back to Africa or Latin America. Only an assassin's bullet halted him from implementing these plans, as revealed in this work from Thomas Dixon Jr., author of the "Reconstruction Trilogy." Softcover, 351 pages, #649, **$26**.

The Old Rebel: Robert E. Lee As He Was Seen by His Contemporaries

To aid us in better understanding the stunning power of Lee's life, Lochlainn Seabrook has gathered together nearly 400 footnoted entries from the general's 19th-century contemporaries, including both his admirers and former enemies. The book is divided into chapters covering everything from Lee's birth, childhood and family life to his service in both the U.S. military and the Confederate States military as well as his time as president of Washington College. Personal notes and Victorian illustrations lend historical context, helping make this edition an indispensable work for all those interested in Confederate history. Softcover, 260 pages, #876, **$20**.

Heroes of the Southern Confederacy: The Illustrated Book of Confederate Officials, Soldiers & Civilians

By Lochlainn Seabrook. Here is your glimpse into the heart of the Old South. With some 1,200 antique photographs and drawings of Confederates, this visual volume humanizes the traditional 19th-century Southerner: who they were, what they believed and why they fought. Includes images of 430 Confederate generals and a complete list of all 474 Reb generals, as well as images of an assortment of both Confederate civilians and lower-ranked Confederate soldiers (many still unidentified). Additionally, the author has provided a detailed introduction and appendices. Indexed with huge bibliography. Softcover, 328 pages, #924, **$24**.

Robert E. Lee and the Southern Confederacy, 1807-1870

In 1897, Henry Alexander White penned this masterpiece on Lee, compiled from original sources including the Library of Congress, Harvard, the Virginia Historical Society and more. Chapters cover the Lee family in Virginia, his youth, education, marriage, West Point, Mexican War, time on the frontier, secession and slavery debates, John Brown crisis, withdrawal from the U.S. Army, appointment as leader of the Confederate Army, the battles, Lee's postwar career, and time as president of Washington College. Softcover, 467 pages, indexed, 41 illustrations, photos and maps, #883, **$26**.

The Confederate Constitution: Was It Superior to Ours?

LAW SCHOOLS TEACH THAT THE CONSTITUTION MEANS whatever a majority of Supreme Court Justices say it does, so that document's real history clearly gets short shrift in most law schools. Even less studied are the important contributions to constitutional theory bequeathed to us by our Southern forebears. We are writing, of course, about the Constitution of the Confederate States of America.

By Dr. Edward DeVries

Dr. Clyde Wilson, who, for years, was a renowned professor at the University of South Carolina, was basically forced into retirement for daring to teach his students that the goal of the Southern states was to preserve the original republic as it had been handed down by the founding fathers. For the most part, that is, the Confederate Constitution was largely a reiteration of the U.S. Constitution from which it borrowed heavily.

Wilson said:

> The founders of the Confederacy had no argument with the U.S. Constitution, itself: Their argument was with the manner in which the Constitution had been misinterpreted and misapplied by unscrupulous Northern politicians and jurists. Thus, many of the "changes" they made in drafting the Confederate Constitution were in fact clarifications.

By 1861, Southerners had lived under the U.S. Constitution for 72 years and had seen the ambiguities of the document exploited for decades by unprincipled men. Hence, the changes found in the Confederate Constitution were intended to make the wording in the new Southern document more consistent with the intentions of the original framers.

DR. CLYDE WILSON
Honest historian.

In the few instances where new wording was introduced, it was to correct portions of the original Constitution of 1787.

Unfortunately, the original wording had failed to work as the framers intended. As Wilson told his students, "The changes represent a heritage of very seriously considered reactions to their practical experience with the Constitution of 1787."

Today, much lip service is given to the U.S. Constitution being a living and breathing document. Every day we read of activist judges and politicians who twist its words to concoct novel legal doctrines, undreamt of by the framers. Believe it or not, Yankee judges and politicians had already engaged in the same practice in the Antebellum period. The corrections made by Confederate statesmen in drafting their constitution were intended to make such exercises futile. For that reason, a study of the Confederate Constitution is extremely valuable today.

There were three primary concerns in drafting the Confederate Constitution.

The first was to preserve the rights of individual states as full parties to the Confederacy and as creators of its constitution.

Montgomery, Alabama, March 11, 1861: Delegates form a new nation and formulate a constitution.

The second was an attempt by the framers of the Confederate Constitution to strictly limit the power of any central government and, in particular, that of the president.

Third, Southerners wanted to clarify certain provisions of the U.S. Constitution, correcting deviations of interpretation in the original.

With this, let us briefly consider the significant changes between the Confederate Constitution and the U.S. Constitution:

THE PREAMBLE

First, let's take a quick look at the Preamble to the more familiar U.S. Constitution:

> We the people of the United States, in order to form a more perfect union, establish justice, ensure domestic tranquility, provide for the common defense, promote the general welfare, and secure the blessings of liberty to ourselves and our posterity, do ordain and establish this Constitution for the United States of America.

The Confederate Constitution's Preamble reads:

> We, the people of the Confederate States, each state acting in its sovereign and independent character, in order to form a permanent federal government, establish justice, ensure domestic tranquility, and secure the blessings of liberty to ourselves and our posterity—invoking the favor and guidance of Almighty God—do ordain and establish this Constitution for the Confederate States of America.

You will notice three things about this preamble.

First, the "general welfare" clause is omitted. Like us moderns, the South had seen firsthand how this phrase opened the door to a great deal of mischief and federal intervention. How much unlawful expansion of federal power has been justified by the general welfare clause? As a result, Southern statesmen purposely omitted it for that very reason.

Also noteworthy is the phrase "to form a more perfect union," which was replaced by the phrase "to form a permanent federal government."

The problem here is understanding what constitutes either "welfare" or a "more perfect union." Because these phrases are ambiguous and open to endless interpretation, they have no business in a document that was to be the foundation of a nation's laws.

The phrase "a more perfect union" was frequently mis-interpreted by the Radical Republicans in the North to justify centralization and expansion of their power and authority.

Thus, the Southerners thought it best to use more specific language that was more compatible with the intentions of the original framers of the U.S. Constitution.

The third feature of the Confederate Preamble is its specific acknowledgment of "Almighty God." The nature of the original republic as a biblically grounded government was clearly implied in our federal Constitution, but not stated overtly.

Over the years, many Christians criticized the U.S. Constitution for its lack of an explicit acknowledgment of the God of scripture within its text.

Thus, the Confederate Constitution made explicit what had been merely implicit in the U.S. Constitution. Unfortunately, the drafters of the Confederate Constitution did not follow the suggestion of Dr. James Henley Thornwell. He wanted acknowledgment of the lordship of Jesus Christ.

Toward the end of the Confederate Constitutional Convention, Thornwell withdrew the suggestion after being told that such wording would necessarily exclude non-Christians from government, which, in 1861, would have applied to Jews and American Indians.

Thornwell replied to that objection by saying that:

> It would not necessarily exclude Jews or non-Christians, nor would it imply that the state would persecute them unnecessarily or unlawfully, or exclude them from civil privileges. … A Jew might even be our chief magistrate, provided he would come under the obligation to do nothing in the office inconsistent with the Christian religion.

The First Amendment's prohibition against "an establishment of religion"— which Thornwell was always careful to affirm—is a very different thing from mandating a purely secular state. Like America's founders, our Southern founders insisted upon fidelity to Christian traditions and to Christendom, in general, without persecution of non-Christians. This was not a controversial view in the South at the time.

IMPEACHMENT

Regarding the power of impeachment, Article I, Section II of the Confederate Constitution states:

> The House of Representatives shall choose their speaker and other officers; and shall have the sole power of impeachment; except that any judicial or other federal officer, resident and acting solely within the limits of any state, may be impeached by a vote of two-thirds of both branches of the legislature thereof.

The Confederate Constitution, like the U.S. Constitution, gives the power of impeachment to the House of Representatives, but with one exception.

When federal judges or other federal officials resided or operated within a state in a manner that was "abusive" or contrary to the Confederate Constitution, that state's government did not need to depend upon the federal Congress to impeach them. The people of the Southern states had the authority to impeach such federal officers and expel them from office through the vehicle of their own legislatures.

> Our Southern founders insisted upon fidelity to Christian traditions and Christendom.

Just imagine the legislatures of Texas, Florida or Tennessee having the power to impeach activist federal trial judges who routinely tyrannize their respective states.

COOPERATION

Section VI of the Confederate Constitution gives Congress the prerogative of granting the floor to members of the president's cabinet to discuss any measure of concern to the office of the president or any legislation he wants passed. The purpose of this was to expedite discussion and ensure good communication and understanding between the executive and legislative branches.

LINE ITEM VETO

In Section VII, the Confederate Constitution states:

> The president may approve any appropriation and disapprove any other appropriation in the same bill. In such case, he shall, in signing the bill, designate the appropriations disapproved; and shall return a copy of such appropriations with his objections to the house in which the bill shall have originated; and the same proceedings shall then be had as in case of other bills disapproved by the president.

Many state governors have this ability today, and it is called a "line item" veto. Every president from Richard Nixon onward has asked for a constitutional amendment to allow for this very practical power.

Currently, the president has only two options: He can either sign or veto a spending bill, a situation that gives Congress a great deal of leverage against him. This conundrum simply did not exist under the Confederate Constitution.

Among other things, it would severely limit the time-honored practice of "Christmas tree" legislation, where the Congress hangs all manner of wasteful, glitzy appropriations on an essential bill and then forces the president to either veto or approve it. If he vetoes the whole thing, he gets slammed for vetoing an otherwise good bill, but all he is actually trying to do is remove the more wasteful "ornaments."

TAXES AND TRADE

In Section VIII, several things need to be noted in regard to the power of the Confederate Congress to lay and collect taxes and to make appropriations from the national treasury. The purposes for which taxes could be collected were these:

> To lay and collect taxes, duties, imposts and excises for revenue, necessary to pay the debts, provide for the common defense and carry on the government of the Confederate States; but no bounties shall be granted from the Treasury; nor shall any duties or taxes on importations from foreign nations be laid to promote or foster any branch of industry; and all duties, imposts,

and excises shall be uniform throughout the Confederate States.

No room for federal redistribution plans there. We also see very real "fair trade" with very little wiggle room, if any, for the protectionist or punitive tariffs that were popular with Yankee politicians and their commercial interests. For that reason, this clause has no parallel in the U.S. Constitution.

Tariffs were not outlawed by the Confederate Constitution, but their prohibition as a technique to shelter domestic industry from foreign competition was very important to the South because of the extent to which the North had used tariffs to protect their own industries at the expense of Southern citizens.

Section IX also provided taxes on exports, but required a two-thirds vote of both houses of the legislature to go into effect, a difficult majority to achieve.

The Confederate Congress was also prohibited from appropriating money for internal improvements.

> To regulate commerce with foreign nations, and among the several states, and with the Indian tribes; but neither this, nor any other clause contained in the Constitution, shall ever be construed to delegate the power to Congress to appropriate money for any internal improvement intended to facilitate commerce; except for the purpose of furnishing lights, beacons and buoys, and other aids to navigation upon the coasts, and the improvement of harbors and the removing of obstructions in river navigation; in all which cases such duties shall be laid on the navigation facilitated thereby as may be necessary to pay the costs and expenses thereof.

The original founding fathers believed that Congress did not have the right to appropriate money to finance any programs within individual states. We take this practice for granted, but it had actually just begun shortly before the Southern states seceded. Southerners were familiar with how Yankee congressmen had

The Unquotable Abraham Lincoln

The President's Quotes They Don't Want You to Know!

If we're to believe the nearly 20,000 books that have been written about President Lincoln by pro-North and "New South" historians, he was an ardent abolitionist, a Bible-believing Christian and a Constitution-loving conservative who headed the most ethical administration in U.S. history, preserved the Union, ended American slavery, and became the Black man's greatest champion by granting him full civil and equal rights. In fact, according to Lincoln's own words, nothing could be further from the truth. After reading the eye-opening book *The Unquotable Abraham Lincoln* by award-winning historian Col. Lochlainn Seabrook, you'll know that the real Lincoln has been carefully concealed from us by his faithful worshipers, some of whom are simply uninformed, while others will stop at nothing to keep you from learning the facts about our 16th chief executive and his unconstitutional, unnecessary and unjustifiable war.

In this handy book, Seabrook examines the politically incorrect statements they don't want you to know. Included here, among 230 footnoted entries, are Lincoln's controversial—even un-American—views on his presidency, the government, the U.S. Constitution, state rights, the Union, his war on the South, abolition, slavery, colonization, African-Americans, Mexicans, "mulattoes," the Confederacy, the Southern people, his famed Emancipation Proclamation, Jesus Christ, the Bible, Christianity and even more.

Softcover, 150 pages, #778, ***$13*** minus 10% for TBR subscribers plus $5 S&H inside U.S. Order from THE BARNES REVIEW, P.O. Box 550, White Plains, MD 20695. Call 1-877-773-9077 toll free to charge, Mon.-Thu. 8-4. Order also at www.BarnesReview.com. Outside the U.S. please email Sales@BarnesReview.org for S&H.

abused the appropriations process. To remedy the problem in the South, they simply prohibited the Confederate Congress from doing so.

There is a provision in Section X allowing states to enter into compacts with one another to improve such matters as interstate navigation. In other words, it would be proper for states to make individual agreements to improve a river that would run along their borders or to maintain a road that connected them. Such improvements would be paid for by the citizens of the states that benefited from such "public" works.

In the rare cases when Congress was authorized to clear a harbor or make a river navigable, the commercial enterprises that utilized a particular road, river or body of water—as the primary beneficiaries—would bear the costs of the improvement, later reimbursing the government for the costs involved.

POST OFFICES & POSTAL ROADS

Another limitation on the power of the Confederacy's central government is found in regard to post offices and postal roads. Under the U.S. Constitution, the government was authorized to confiscate land under the pretense that mail might potentially be carried over it.

The Confederates did not want their government confiscating or forcing citizens to sell their land, so the Confederate government was permitted to establish postal routes but not "postal roads."

In other words, a citizen could not deny access to his land for the transportation of mail, but the government could not take his land for this purpose. The obvious reason was to preserve the freedom and rights of individual citizens.

Further, the Confederate Constitution stated:

> [B]ut the expenses of the Post Office Department, after the first day of March in the year of our Lord eighteen hundred and sixty-three, shall be paid out of its own revenues.

In other words, after 1863, the Confederate Post Office would no longer be subsidized by the Confederate Congress. The obvious implication here is that it would ultimately be financially self-sustaining.

SLAVERY

While the U.S. Constitution established and enabled slavery, Section IX of the Confederate Constitution effectively did away with it.

First, the Confederate Constitution improved upon the U.S. Constitution by prohibiting the slave trade. At the time, the U.S. Constitution did not outlaw the slave trade. It left that issue up to the discretion of individual states to outlaw or continue its practice, and, so, it continued. But that was no longer possible under the Confederate Constitution, which not only prohibited the slave trade but actually gave Congress the authority to enact laws that effectively outlawed the practice.

> The C.S.A. Constitution authorized Southern states to abolish slavery whenever they so chose.

Look at the language:

> The importation of Negroes of the African race from any foreign country, other than the slaveholding states or territories of the United States of America, is hereby forbidden; and Congress is required to pass such laws as shall effectually prevent the same. … Congress shall also have power to prohibit the introduction of slaves from any state not a member of, or territory not belonging to, this Confederacy.

So they went ahead and mandated that Congress must prevent the foreign importation of slaves, and empowered Southern states to pass and legally enforce whatever laws were deemed necessary to prevent their importation in the future.

Both constitutions permitted slave ownership and protected the rights of the owner. In contrast to the U.S. Constitution, however, the eventual end of slavery was ensured only by the Confederate Constitution.

Surprisingly to many Northerners, many Southerners were open to the idea that, after the Confederate Constitution was ratified, any children born of slave parents would be considered free people. These Southerners believed that, when the current Southern stock of slaves eventually died out, there would be no legal way to import more and the institution would die with them.

In addition, while the U.S. Constitution prevented the government from abolishing slavery, the Confederate Constitution authorized individual Southern states to abolish slavery within their borders at any time.

A handful of delegates to the Southern Convention rose to oppose these provisions, arguing that the document should require all Southern states to recognize slavery as a matter of constitutional law. They were quickly and overwhelmingly defeated because the Confederate Constitution was purposely designed to facilitate the abolition of slavery and, even more to the point, to permit the individual states to maintain their independence even within the scope of the Confederate nation.

HONEST GOVERNMENT

In addition to slavery, Section IX would simply eliminate much of the uncontrolled spending that typifies today's Congress:

> Congress shall appropriate no money from the Treasury except by a vote of two-thirds of both houses, taken by yeas and nays, unless it be asked and estimated for by one of the heads of departments and submitted to Congress by the president; or for the purpose of paying its own expenses and

contingencies; or for the payment of claims against the Confederate States, the justice of which shall have been judicially declared by a tribunal for the investigation of claims against the government, which it is hereby made the duty of Congress to establish.

Appropriations required a two-thirds vote of both houses, rather than a simple majority. And the vote had to be an open or "roll call" vote, where every congressman had to put his name on the record. This provision could only be set aside when the president requested it or the legislature needed to pay for its own expenses and contingencies.

Our Confederate founders also sought to prohibit open-ended commitments, including entitlement programs:

> All bills appropriating money shall specify in federal currency the exact amount of each appropriation and the purposes for which it is made; and Congress shall grant no extra compensation to any public contractor, officer, agent or servant after such contract shall have been made or such service rendered.

That provision eliminates one of the greatest boondoggles of modern government. It is called the "cost over-run" provision. In our present situation, government contracts mean nothing. The contractor always has a provision allowing for cost overruns to fall back upon and, not surprisingly, almost always has cost overruns.

In short, the Confederate Constitution guards the integrity of contracts. It says the contractor cannot be paid any more than he contracted for, and the Congress agreed. If he has a cost overrun, he bears the cost. That simply means honesty in contracts, which is something we desperately need in this country today.

The same section has another extremely happy provision—the "anti-Christmas tree" (mentioned earlier) bill: "Every law, or resolution having the force of law, shall relate to but one subject, and that shall be expressed in the title."

Legislation measured in thousands of pages and with endless provisions that are rarely read by anyone would have to be broken up into hundreds of individual bills. Each of these would have to be debated, voted on and signed to become law. Imagine our modern-day Congress having to operate under these restraints? Omnibus spending bills—monstrous and deceitful additions to legitimate funding initiatives—were all prohibited by this provision.

TERM LIMITS

In Article II, Section I, the Confederate Constitution gave the president and the vice president a single six-year term. Period. The president was not allowed to be re-elected. With this length of term, he would have an additional two years to put his particular policies into effect. What would be eliminated, however, would be the temptation to waste time by trying to secure one's re-election so quickly after assuming the office. As we know today, presidents more or less start campaigning for re-election nearly the minute they set foot in the Oval Office.

Gone was the great fear of a president becoming a candidate and ingratiating himself to special interests and party politics to ensure his next term in office. It was "one and done" with the Confederate Constitution.

The Confederate Constitution did give a great deal of independence to the chief executive, and some people have argued against it for that reason.

But, at the same time, it also protected people from a multi-term president misusing the power and authority of his office. Imagine how much better our nation might have been had some of our worst presidents been limited to only six years in office instead of eight or more?

CHECKING THE JUDICIARY

In Article III, the Confederate Congress was empowered to establish a Confederate Supreme Court. However, the war prevented the Confederates from enacting the enabling

The Honorable Cause

A Free South—Twelve Southern Essays

The Honorable Cause: A Free South is a collection of 12 essays written by pro-Southern and pro-secession activists.

In many ways, this is a 21st version of "I'll Take My Stand: the South and the Agrarian Tradition." These are Southerners who advocate a free and independent South. This book explains their ideological positions in their own words. It explains a unique Southern identity born within these United States. Finally, it lays out a vision as to how the South can achieve a free and Independent status as a Nation-State, with a right of self-determination for its people.

It places into context what it means to be "Southern" and why Southern identity is so important. It explores secession and how to achieve political and social liberation for the South. This book is intended to inspire both emotion and thought. The authors want the reader to internalize the content and see a free and independent Dixie as the most honorable outcome for a unique people

Includes essays from Rick Dirtwater, Harry Bluff, Rebecca Dillingham, James Edwards, Padraig Martin, Dr. Michael Hill, Jude Ruffin, Anne Wilson Smith, Dixie O'Hara, Neil Kumar, Father O'Dabney and one under the pen name "Harmonica." Softcover, 301 pages, #988, $25 minus 10% for TBR subscribers plus $5 S&H inside the U.S. from TBR, P.O. Box 550, White Plains, MD 20695. Call 1-877-773-9077 toll free to charge, Mon.-Thu. 8-4 ET. Order also online at www.BarnesReview.com.

legislation to establish that high court. Thank goodness the Confederate States of America never had its own national supreme court.

This meant that each state's supreme court became the final court of appeal. This possibility had been discussed during the drafting of the U.S. Constitution. The Federalists ultimately forced the issue of a superpowerful Supreme Court for fear that 13 "supreme courts" (one for each state) would result in constitutional chaos. But, in fact, the way it worked out in the Confederacy was quite the opposite.

Contrary to the theoretical fears of the Federalists, the Confederate arrangement worked very well. It did not result in judicial chaos. Rather, in case after case, the state high court judges functioned as the expounders of the Constitution and, rather than causing judicial chaos, it gave occasion for the people of the Southern states to reaffirm, through their state judiciary, their obligatory compliance with the laws of the nation.

AMENDMENTS

Lastly, in Article V, there was provision for amendments to the Confederate Constitution. This provision differed from the U.S. Constitution in two important aspects. First of all, with great ease, a state can convene a constitutional convention. Contrary to the original U.S. Constitution, the Confederate Constitution allowed for any three states to demand a constitutional convention.

> Upon the demand of any three states, legally assembled in their several conventions, the Congress shall summon a convention of all the states, to take into consideration such amendments to the Constitution as the said states shall concur in suggesting at the time when the said demand is made.

The second difference was that there was a requirement of a two-thirds vote for approval of the amendment, rather than the three-fourths vote required by the U.S. Constitution. Thus, if the amendments agreed to were to become part of the Constitution, it required their ratification by two-thirds of the state legislatures or conventions in each state.

The U. S. Constitution requirement of a three-fourths vote is a stiffer requirement for amending the U.S. Constitution. Thus, the Confederacy made the constitutional amendment process easier to achieve. My guess is that, if the Confederate States had been allowed to exist as a separate nation, about every four or five years there would eventually have been a constitutional convention and it would have evolved in a rational manner.

> The Confederates wanted to prevent possible abuses by a power-hungry government.

A two-thirds majority ensures that the perceived problem was legitimate, and not just one state's paranoia, but the majority is not so large that one section of the country could trample upon the legitimate concerns of another section of the country as we see happening today.

CONCLUSION

At every point, the Confederate Constitution attempted to prevent abuses of the U.S. Constitution by a power-hungry central government. In that regard, the Confederate Constitution is the legitimate heir to the constitutional tradition of our nation's founding fathers.

The tradition of liberty, the rights of individual states, of limited government and of true justice were precisely what the patriots of 1776 were determined to secure and defend. Likewise, in 1861, the Southland went to war to defend those very "blessings of liberty."

As Marshall DeRoser wrote in *The Confederate Constitution of 1861*:

> From a Southerner's perspective, what they abandoned in 1861 was the degradation of American constitutionalism, a deterioration initiated and sustained by their political rivals in the North.

In July of 1861, Alexander H. Stephens, vice president of the Confederacy, claimed on behalf of the South: "We simply wish to govern ourselves as we please. We simply stand where our Revolutionary fathers stood in 1776."

The issue was, "will we continue as a voluntary union with a constitutional government, or will we become a union held together by the bayonet?" Was the system founded by the original framers to be maintained or to be swept away?

The men who fought for the South sought to maintain their ancient liberties, like their fathers and their grandfathers had done. They thought of themselves as pursuing nothing less than what their fathers had died for in the Revolutionary War with Great Britain.

They were fighting for independence and self-rule free of central government abuse.

With the defeat of the South, this tradition suffered a grievous defeat, but, God willing, that defeat may only be temporary. ❖

The Cornerstone Speech

Southern VP Explains Why the South 'Revolted' Against the North

ALEXANDER H. STEPHENS

In his March 21, 1861 "Cornerstone Speech," Confederate Vice President Alexander H. Stephens presented what he believed were the reasons for Souther rebellion or, what he termed, a "revolution." This revolution resulted in the American Civil War. Stephens's speech is remembered by many for its defense of slavery, its outlining of the perceived differences between the North and the South, and the racial rhetoric used to demonstrate the differences between Whites and Blacks. On April 12, 1861, three weeks after the speech, Confederate forces fired on Fort Sumter in Charleston Harbor, initiating the Civil War.

By Alexander H. Stephens
Savannah, Georgia
March 21, 1861

When perfect quiet is restored, I shall proceed. I cannot speak so long as there is any noise or confusion. I shall take my time. I feel quite prepared to spend the night with you if necessary. I very much regret that everyone who desires cannot hear what I have to say. Not that I have any display to make, or anything very entertaining to present, but such views as I have to give, I wish all, not only in this city, but in this state, and throughout our Confederate republic, could hear, who have a desire to hear them.

"[W]e are passing through one of the greatest revolutions in the annals of the world. … This revolution has been signally marked, up to this time, by the fact of its having been accomplished without the loss of a single drop of blood."

—ALEXANDER H. STEPHENS

Three weeks before the attack on Fort Sumter

I was remarking that we are passing through one of the greatest revolutions in the annals of the world. Seven states have within the last three months thrown off an old government and formed a new. This revolution has been signally marked, up to this time, by the fact of its having been accomplished without the loss of a single drop of blood.

This new constitution, or form of government, constitutes the subject to which your attention will be partly invited. In reference to it, I make this first general remark: It amply secures all our ancient rights, franchises and liberties. All the great principles of *Magna Carta* are retained in it. No citizen is deprived of life, liberty or property, but by the judgment of his peers under the laws of the land.

The great principle of religious liberty, which was the honor and pride of the old [U.S.] constitution, is still maintained and secured. All the essentials of the old constitution, which have endeared it to the hearts of the American people, have been preserved and perpetuated.

Some changes have been made. Some of these I would have preferred not to have seen made; but other important changes do meet my cordial approbation. They form great improvements upon the old constitution. So, taking the whole new constitution, I have no hesitancy in giving it as my judgment that it is decidedly better than the old.

Allow me briefly to allude to some of these improvements. The question of building up class interests or fostering one branch of industry to the prejudice of another under the exercise of the revenue power, which gave us so much trouble under the old constitution, is put at rest forever under the new. We allow the imposition of no duty with a view of giving advantage to one class of persons, in any trade or business, over those of another.

All under our system stand upon the same broad principles of perfect equality. Honest labor and enterprise are left free and unrestricted in whatever pursuit they may be engaged. This old thorn of the tariff, which was the cause of so much irritation in the old body politic, is removed forever from the new.

Again, the subject of internal improvements, under the power of Congress to regulate commerce, is put at rest under our system. The power claimed by construction under the old constitution was at least a doubtful one; it rested solely upon construction. We of the South, generally apart from considerations of constitutional principles, opposed its exercise upon grounds of its inexpediency and injustice. Notwithstanding this opposition, millions of money from the common treasury had been drawn for such purposes.

Our opposition sprang from no hostility to commerce or to all necessary aids for facilitating it. With us, it was simply a question upon whom the burden should fall. In Georgia, for instance, we have done as much for the cause of internal improvements

Alexander Stephens had an impressive career as a U.S. and C.S.A. politician, proudly and ably serving both nations during his times in office. In 1863, as the C.S.A.'s vice president, he tried unsuccessfully to negotiate prisoner-of-war exchanges with the Union. In February 1865, he negotiated—also unsuccessfully—with President Abraham Lincoln to make a peace pact with the South. After the war, Stephens spent five months in a Northern prison, but eventually served again in the U.S. Congress. Above he is shown, circa 1875, being helped into Congress by a former slave working at the U.S. Capitol. Stephens was plagued by ill health most of his adult life.

as any other portion of the country, according to population and means. We have stretched out lines of railroads from the seaboard to the mountains; dug down the hills and filled up the valleys at a cost of not less than $25 million. All this was done to open an outlet for our products to the interior, and those to the west of us, to reach the marts of the world.

No state was in greater need of such facilities than Georgia, but we did not ask that these works should be made by appropriations out of the common treasury. The cost of the grading, the superstructure and the equipment of our roads was borne by those who had entered into the enterprise. Nay, more not only the cost of the iron, no small item in the aggregate cost, was borne in the same way, but we were compelled to pay into the common treasury several millions of dollars for the privilege of importing the iron, after the price was paid for it abroad. What justice was there in taking this money, which our people paid into the common treasury on the importation of our iron, and applying it to the improvement of rivers and harbors elsewhere?

The true principle is to subject the commerce of every locality to whatever burdens may be necessary to facilitate it. If Charleston harbor needs improvement, let the commerce of Charleston bear the burden. If the mouth of the Savannah River has to be cleared out, let the sea-going navigation which is benefited by it bear the burden. So with the mouths of the Alabama and Mississippi rivers. Just as the products of the interior, our cotton, wheat, corn and other articles have to bear the necessary rates of freight over our railroads to reach the seas. This is again the broad principle of perfect equality and justice, and it is especially set forth and established in our new constitution.

Another feature to which I will allude is that the new constitution provides that cabinet ministers and heads of departments may have the privilege of seats upon the floor of the Senate and House of Representatives and may have the right to participate in the debates and discussions upon the various subjects of administration. I should have preferred that this provision should have gone further and required the president to select his constitutional advisers from the Senate and House of Representatives. That would have conformed entirely to the practice in the British Parliament, which, in my judgment, is one of the wisest provisions in the British constitution. It is the only feature that saves that government. It is that which gives it stability in its facility to change its administration.

Ours, as it is, is a great approximation to the right principle.

Under the old constitution, a secretary of the Treasury, for instance, had no opportunity, save by his annual reports, of presenting any scheme or plan of finance or other matter. He had no opportunity of explaining, expounding, enforcing or defending his views of policy; his only resort was through the medium of an organ. In the British Parliament, the premier brings in his budget and stands before the nation responsible for its every item.

> The Confederates made sure they dealt with the tariff issue in their new constitution.

If it is indefensible, he falls before the attacks upon it, as he ought to. This will now be the case to a limited extent under our system. In the new constitution, provision has been made by which our heads of departments can speak for themselves and the administration on behalf of its entire policy without resorting to the indirect and highly objectionable medium of a newspaper. It is to be greatly hoped that, under our system, we shall never have what is known as a government organ.

Another change in the constitution relates to the length of the tenure of the presidential office. In the new constitution, it is six years instead of four, and the president rendered ineligible for a re-election. This is certainly a decidedly conservative change. It will remove from the incumbent all temptation to use his office or exert the powers confided to him for any objects of personal ambition. The only incentive to that higher ambition, which should move and actuate one holding such high trusts in his hands, will be the good of the people, the advancement, prosperity, happiness, safety, honor and true glory of the Confederacy.

But not to be tedious in enumerating the numerous changes for the better, allow me to allude to one other, though last, not least. The new constitution has put at rest, forever, all the agitating questions relating to our peculiar institution. African slavery as it exists amongst us is the proper status of the Negro in our form of civilization. This was the immediate cause of the late rupture and present revolution.

[Thomas] Jefferson in his forecast, had anticipated this, as the "rock upon which the old Union would split." He was right. What was conjecture with him is now a realized fact. But, whether he fully comprehended the great truth upon which that rock stood and stands may be doubted.

The prevailing ideas entertained by him and most of the leading statesmen at the time of the formation of the old constitution were that the enslavement of the African was in violation of the laws of nature; that it was wrong in principle—socially, morally and politically. It was an evil they knew not well how to deal with, but the general opinion of the men of that day was that, somehow or other in the order of Providence, the institution would be evanescent and pass away.

This idea, though not incorporated in the constitution, was the prevailing

idea at that time. The constitution, it is true, secured every essential guarantee to the institution while it should last, and, hence, no argument can be justly urged against the constitutional guarantees thus secured because of the common sentiment of the day. Those ideas, however, were fundamentally wrong. They rested upon the assumption of the equality of races. This was an error. It was a sandy foundation, and the government built upon it fell when the "storm came and the wind blew."

Our new government is founded upon exactly the opposite idea. Its foundations are laid, its cornerstone rests upon the great truth that the Negro is not equal to the White man; that slavery subordination to the superior race is his natural and normal condition. This, our new government, is the first in the history of the world based upon this great physical, philosophical and moral truth.

This truth has been slow in the process of its development, like all other truths in the various departments of science. It has been so even amongst us. Many who hear me, perhaps, can recollect well that this truth was not generally admitted, even within their day. The errors of the past generation still clung to many as late as 20 years ago. Those in the North who still cling to these errors with a zeal above knowledge we justly denominate fanatics. All fanaticism springs from an aberration of the mind from a defect in reasoning. It's a species of insanity.

One of the most striking characteristics of insanity, in many instances, is forming correct conclusions from fancied or erroneous premises; so with the anti-slavery fanatics. Their conclusions are right if their premises were. They assume that the Negro is equal, and, hence, conclude that he is entitled to equal privileges and rights with the White man.

If their premises were correct, their conclusions would be logical and just but, their premise being wrong, their whole argument fails.

I recollect once of having heard a gentleman from one of the Northern

THE NESTOR OF THE CONFEDERACY

Born in 1812, Alexander Stephens served as a U.S. representative for Georgia from 1843 to 1859. When Abraham Lincoln was elected, Stephens worked with fellow Georgian lawmakers to craft the state's response. Though very much an anti-secessionist, Stephens sided with Georgia when it seceded. In 1862, Stephens became vice president of the Confederacy. He was captured and jailed in the spring of 1865. Though the Georgia legislature elected him as a U.S. representative in 1866, his status as an "insurrectionist" prevented him from assuming office. However, he was legally elected to the House in 1873, resigning in 1882 to become governor of Georgia. He died in 1883, just four months later. The above 1882 illustration "Alexander H. Stephens: The Nestor of the Confederacy" comes from the North's *Puck* magazine. Nestor was an elderly soldier in Homer's *Iliad* and *Odyssey* who often gave tediously lengthy and unwanted advice to other characters.

states, of great power and ability, announce in the House of Representatives with imposing effect that we of the South would be compelled, ultimately, to yield upon this subject of slavery, that it was as impossible to war successfully against a principle in politics as it was in physics or mechanics. That the principle would ultimately prevail. That we, in maintaining slavery as it exists with us, were warring against a principle, a principle founded in nature, the principle of the equality of men.

The reply I made to him was that, upon his own grounds, we should, ultimately, succeed and that he and his associates in this crusade against our institutions would ultimately fail. The truth announced, that it was as impossible to war successfully against a principle in politics as it was in physics and mechanics, I admitted; but told him that it was he, and those acting with him, who were warring against a principle. They were attempting to make things equal which the Creator had made unequal.

In the conflict thus far, success has been on our side, complete throughout the length and breadth of the Confederate States. It is upon this, as I have stated, our social fabric is firmly planted; and I cannot permit myself to doubt the ultimate success of a full recognition of this principle throughout the civilized and enlightened world.

As I have stated, the truth of this principle may be slow in development, as all truths are and ever have been, in the various branches of science. It was so with the principles announced by Galileo; it was so with Adam Smith and his principles of political economy. It was so with [William] Harvey, and his theory of the circulation of the blood. It is stated that not a single one of the medical profession living at the time of the announcement of the truths made by him admitted them.

Now, they are universally acknowledged. May we not, therefore, look with confidence to the ultimate universal acknowledgment of the truths upon which our system rests?

It is the first government ever instituted upon the principles in strict conformity to nature, and the ordination of Providence, in furnishing the materials of human society. Many governments have been founded upon the principle of the subordination and serfdom of certain classes of the same race; such were and are in violation of the laws of nature. Our system commits no such violation of nature's laws.

With us, all of the White race, however high or low, rich or poor, are equal in the eye of the law. Not so with the Negro. Subordination is his place. He, by nature, or by the curse against Canaan, is fitted for that condition which he occupies in our system. The architect, in the construction of buildings, lays the foundation with the proper material—the granite; then comes the brick or the marble. The substratum of our society is made of the material fitted by nature for it, and by experience we know that it is best, not only for the superior, but for the inferior race, that it should be so. It is, indeed, in conformity with the ordinance of the Creator.

> He, by nature, or by the curse against Canaan, is fitted for that condition which he occupies.

It is not for us to inquire into the wisdom of His ordinances or to question them. For His own purposes, He has made one race to differ from another, as He has made "one star to differ from another star in glory." The great objects of humanity are best attained when there is conformity to His laws and decrees, in the formation of governments as well as in all things else. Our confederacy is founded upon principles in strict conformity with these laws. This stone which was rejected by the first builders "is become the chief of the corner," the real "cornerstone," in our new edifice.

I have been asked, what of the future? It has been apprehended by some that we would have arrayed against us the civilized world. I care not who or how many they may be against us when we stand upon the eternal principles of truth. If we are true to ourselves and the principles for which we contend, we are obliged to—and must—triumph.

Thousands of people who begin to understand these truths are not yet completely out of the shell; they do not see them in their length and breadth. We hear much of the civilization and Christianization of the barbarous tribes of Africa. In my judgment, those ends will never be attained but by first teaching them the lesson taught to Adam that "in the sweat of his brow he should eat his bread," and teaching them to work, and feed and clothe themselves.

But to pass on: Some have propounded the inquiry whether it is practicable for us to go on with this confederacy without further accessions? Have we the means and ability to maintain nationality among the powers of the Earth?

On this point I would barely say that, as anxious as we all have been and are for the border states, with institutions similar to ours, to join us, still we are abundantly able to maintain our position, even if they should ultimately make up their minds not to cast their destiny with us. That they ultimately will join us, be compelled to do it, is my confident belief; but we can get on very well without them, even if they should not.

We have all the essential elements of a high national career. The idea has been given out in the North, and even in the border states, that we are too small and too weak to maintain a separate nationality. This is a great mistake. In extent of territory, we embrace 564,000 square miles and upward. This is upward of 200,000 square miles more than was included within

Alexander Stephens is shown in a photo snapped circa 1860.

the limits of the original 13 states. It is an area of country more than double the territory of France or the Austrian Empire. France, in round numbers, has but 212,000 square miles. Austria, in round numbers, has 248,000 miles. Ours is greater than both combined. It is greater than all France, Spain, Portugal and Great Britain, including England, Ireland and Scotland, together.

In population we have upward of 5 million, according to the census of 1860; this includes White and Black. The entire population, including White and Black, of the original 13 states, was less than 4 million in 1790, and still less in 1776, when the independence of our fathers was achieved. If they, with a less population, dared maintain their independence against the greatest power on Earth, shall we have any apprehension of maintaining ours now?

In point of material wealth and resources, we are greatly in advance of them. The taxable property of the Confederate States cannot be less than $220 billion. This, I think I venture but little in saying, may be considered as five times more than the colonies possessed at the time they achieved their independence. Georgia alone possessed last year, according to the report of our comptroller-general, $672 million of taxable property.

The debts of the seven Confederate states sum up in the aggregate less than $18 million, while the existing debts of the other of the late United States sum up in the aggregate the enormous amount of $174 million dollars. This is without taking into account the heavy city debts, corporation debts and railroad debts which press, and will continue to press, as a heavy incubus upon the resources of those states. These debts, added to others, make a sum total not much under $500 million.

With such an area of territory as we have—with such an amount of population—with a climate and soil unsurpassed by any on the face of the Earth—with such resources already at our command—with productions which control the commerce of the world—who can entertain any apprehensions as to our ability to succeed, whether others join us or not?

It is true, I believe I state but the common sentiment, when I declare my earnest desire that the border states should join us. The differences of opinion that existed among us anterior to secession related more to the policy in securing that result by cooperation than from any difference upon the ultimate security we all looked to in common.

These differences of opinion were more in reference to policy than principle, and, as Mr. Jefferson said in his inaugural in 1801, after the heated contest preceding his election, that there might be differences of opinion without differences on principle, and that all, to some extent, had been Federalists and all Republicans. So it may now be said of us, that, whatever differences of opinion as to the best policy in having cooperation with our border sister slave states, if the worst came to the worst, that as we were all cooperationists, we are now all for independence, whether they come or not.

In this connection, I take this occasion to state that I was not without grave and serious apprehensions that, if the worst came to the worst, and cutting loose from the old government should be the only remedy for our safety and security, it would be attended with much more serious ills than it has been as yet. Thus far we have seen none of those incidents which usually attend revolutions. No such material as such convulsions usually throw up has been seen. Wisdom, prudence and patriotism have marked every step of our progress thus far. This augurs well for the future, and it is a matter of sincere gratification to me that I am enabled to make the declaration.

Of the men I met in the Congress at Montgomery, I may be pardoned

for saying this: An abler, wiser, a more conservative, deliberate, determined, resolute and patriotic body of men I never met in my life. Their works speak for them; the provisional government speaks for them; the constitution of the permanent government will be a lasting monument of their worth, merit and statesmanship.

But to return to the question of the future: What is to be the result of this revolution?

Will everything, commenced so well, continue as it has begun? In reply to this anxious inquiry, I can only say it all depends upon ourselves. A young man starting out in life on his majority, with health, talent and ability, under a favoring Providence, may be said to be the architect of his own fortunes. His destinies are in his own hands. He may make for himself a name of honor or dishonor, according to his own acts. If he plants himself upon truth, integrity, honor and uprightness, with industry, patience and energy, he cannot fail at success. So it is with us.

We are a young republic, just entering upon the arena of nations; we will be the architects of our own fortunes. Our destiny, under Providence, is in our own hands. With wisdom, prudence and statesmanship on the part of our public men, and intelligence, virtue and patriotism on the part of the people, success, to the full measures of our most sanguine hopes, may be looked for. But, if unwise counsels prevail, if we become divided, if schisms arise, if dissentions spring up, if factions are engendered, if party spirit, nourished by unholy personal ambition, shall rear its hydra head, I have no good to prophesy for you. Without intelligence, virtue, integrity and patriotism on the part of the people, no republic or representative government can be durable or stable.

We have intelligence and virtue and patriotism. All that is required is to cultivate and perpetuate these. Intelligence will not do without virtue. France was a nation of philosophers. These philosophers became Jacobins. They lacked that virtue, that devotion to moral principle, and that patriotism which is essential to good government organized upon principles of perfect justice and right-seeking amity and friendship with all other powers.

I see no obstacle in the way of our upward and onward progress. Our growth, by accessions from other states, will depend greatly upon whether we present to the world, as I trust we shall, a better government than that to which neighboring states belong. If we do this, North Carolina, Tennessee and Arkansas cannot hesitate long; neither can Virginia, Kentucky and Missouri. They will necessarily gravitate to us by an imperious law.

> Without intelligence, virtue, integrity and patriotism … no republic can be durable or stable.

We made ample provision in our constitution for the admission of other states; it is more guarded, and wisely so, I think, than the old constitution on the same subject, but not too guarded to receive them as fast as it may be proper. Looking to the distant future, and, perhaps, not very far distant either, it is not beyond the range of possibility, and even probability, that all the great states of the northwest will gravitate this way, as well as Tennessee, Kentucky, Missouri, Arkansas, etc. Should they do so, our doors are wide enough to receive them, but not until they are ready to assimilate with us in principle.

The process of disintegration in the old Union may be expected to go on with almost absolute certainty if we pursue the right course. We are now the nucleus of a growing power which, if we are true to ourselves, our destiny and high mission, will become the controlling power on this continent. To what extent accessions will go on in the process of time, or where it will end, the future will determine. So far as it concerns states of the old Union, this process will be upon no such principles of reconstruction as now spoken of, but upon reorganization and new assimilation. Such are some of the glimpses of the future as I catch them.

But, at first, we must necessarily meet with the inconveniences and difficulties and embarrassments incident to all changes of government. These will be felt in our postal affairs and changes in the channel of trade. These inconveniences, it is to be hoped, will be but temporary, and must be borne with patience and forbearance.

As to whether we shall have war with our late confederates, or whether all matters of differences between us shall be amicably settled, I can only say that the prospect for a peaceful adjustment is better, so far as I am informed, than it has been. The prospect of war is, at least, not so threatening as it has been. The idea of coercion, shadowed forth in President Lincoln's inaugural, seems not to be followed up thus far so vigorously as expected.

Fort Sumter, it is believed, will soon be evacuated. What course will be pursued toward Fort Pickens and the other forts on the gulf is not so well understood. It is to be greatly desired that all of them should be surrendered.

Our object is peace, not only with the North but with the world. All matters relating to the public property, public liabilities of the Union when we were members of it, we are ready and willing to adjust and settle upon the principles of right, equity and good faith. War can be of no more benefit to the North than to us. Whether the intention of evacuating Fort Sumter is to be received as an evidence of a desire for a peaceful solution of our difficulties with the United States, or the result of necessity, I will not undertake to say. I would feign hope the former. Rumors are

afloat, however, that it is the result of necessity. All I can say to you, therefore, on that point is, keep your armor bright and your powder dry.

The surest way to secure peace is to show your ability to maintain your rights. The principles and position of the present administration of the United States, [led by] the Republican Party, present some puzzling questions. While it is a fixed principle with them never to allow the increase of a foot of slave territory, they seem to be equally determined not to part with an inch "of the accursed soil."

Notwithstanding their clamor against the institution, they seemed to be equally opposed to getting more or letting go what they have got. They were ready to fight on the accession of Texas, and are equally ready to fight now on her secession. Why is this? How can this strange paradox be accounted for?

There seems to be but one rational solution and that is, notwithstanding their professions of humanity, they are disinclined to give up the benefits they derive from slave labor. Their philanthropy yields to their interest. The idea of enforcing the laws has but one object, and that is a collection of the taxes, raised by slave labor, to swell the fund necessary to meet their heavy appropriations. The spoils are what they are after, though they come from the labor of the slave.

That as the admission of states by Congress under the [U.S.] Constitution was an act of legislation, and in the nature of a contract or compact between the states admitted and the others admitting, why should not this contract or compact be regarded as of like character with all other civil contracts liable to be rescinded by mutual agreement of both parties?

The seceding states have rescinded it on their part; they have resumed their sovereignty. Why cannot the whole question be settled, if the North desires peace, simply by the Congress, in both branches, with the concurrence of the president, giving their consent to the separation and a recognition of our independence? ❖

Abe Call Up the Militias

MONDAY, APRIL 15, 1861.
BY THE PRESIDENT OF THE UNITED STATES:

A PROCLAMATION.

WHEREAS the laws of the United States have been, for some time past, and now are opposed, and the execution thereof obstructed, in the states of South Carolina, Georgia, Alabama, Florida, Mississippi, Louisiana and Texas, by combinations too powerful to be suppressed by the ordinary course of judicial proceedings, or by the powers vested in the marshals by law.

Now, therefore, I, ABRAHAM LINCOLN, president of the United States, in virtue of the power in me vested by the Constitution and the laws, have thought fit to call forth, and hereby do call forth, the militia of the several states of the Union, to the aggregate number of 75,000, in order to suppress said combinations and to cause the laws to be duly executed.

The details for this object will be immediately communicated to the state authorities through the War Department.

I appeal to all loyal citizens to favor, facilitate and aid this effort to maintain the honor, the integrity and the existence of our National Union, and the perpetuity of popular government; and to redress wrongs already long enough endured. I deem it proper to say that the first service assigned to the forces hereby called forth will probably be to repossess the forts, places and property which have been seized from the Union; and in every event, the utmost care will be observed, consistently with the objects aforesaid, to avoid any devastation, any destruction of, or interference with, property, or any disturbance of peaceful citizens in any part of the country.

And I hereby command the persons composing the combinations aforesaid to disperse, and retire peaceably to their respective abodes within 20 days from this date.

Deeming that the present condition of public affairs presents an extraordinary occasion, I do hereby, in virtue of the power in me vested by the Constitution, convene both houses of Congress. Senators and representatives are therefore summoned to assemble at their respective chambers, at 12 o'clock noon, on Thursday, the fourth day of July next, then and there to consider and determine such measures as, in their wisdom, the public safety and interest may seem to demand.

By the President:

ABRAHAM LINCOLN
[and] WILLIAM H. SEWARD
Secretary of State

Pro-White Lawyer Offers Candid Remarks to TBR

Sam Dickson speaks with TBR about career, Southern heritage, thoughts on race relations and the future of all White America

In the following interview, TBR's James Edwards speaks candidly with Sam Dickson, an Atlanta-based attorney and well-known orator, author and lifelong advocate for White rights and the preservation of Euro-American culture.

* * *

James Edwards: You have a pretty remarkable family lineage. Please tell us a little about your genetic heritage.

Sam Dickson: I am descended from two very famous people. Their names were Adam and Eve, our original parents. I'm sure all your readers will have heard of them.

My Confederate genealogy is also close to unique. As far as I can tell, I am about the only person who is descended from a private in the Army of Northern Virginia. Everybody else's ancestors were at least colonels.

I am very grateful to my father who was contemptuous of genealogical snobbery. He said such people were essentially saying that their best people were in the graveyard. The only import of having some nice ancestors was that you had no excuses.

Everyone has the blood of princes and paupers flowing in their veins. Geneticists say that almost one-third of the indigenous White population in Great Britain is related to the royal family.

I am glad that, as far as I can tell, my ancestors were all respectable, hard-working, relatively well-educated people who lived productive lives and stayed out of jail. We should all live our lives in such a way that we can be ancestors and not descendants.

SAM DICKSON
Advocate for White rights.

Edwards: Your entry into political activism came early when you were in your mid-teens. You were later involved with a variety of different causes and organizations in the 1960s and 1970s and beyond, and even mounted a widely publicized campaign for lieutenant governor of Georgia in 1978. Many people romanticize those bygone days. Was there ever really a chance that governors such as Orval Faubus, George Wallace and others could have prevented what has happened to the United States?

Dickson: Sadly, there was never the slightest chance that people like Faubus, Wallace or Strom Thurmond could have prevented what has happened.

For one thing, they themselves didn't really believe in their own cause. Their defense of segregation never involved what mattered—science and sociology. They talked in code words like "our Southern way of life" etc.

Many of them, Thurmond being the most conspicuous example, were completely in thralldom to our enemies through blackmail. How could someone who had sired an illegitimate Black child, as Thurmond did, been able to lead us? And there are many others like Thurmond.

Edwards: Having been fighting on behalf of the same cause for more than 60 years, it would be easy to list the myriad ways in which our situation has worsened. In what ways do you believe things are better for dissident activists now?

Dickson: Our situation in fact is vastly better now than it was when I first caught on and got involved in our people's cause back in the 1960s.

We have won the battle in the realm of science. The facts of race, heredity and genetics are now firmly

established. Our enemies have been crushed in the laboratories. This isn't spoken of publicly, of course, but it is a fact. Scientific truth is very powerful. Those who sat at the head table of their time could threaten to burn Galileo at the stake and could force him to recant and give lip service to their official position that the Sun revolved around Earth but, eventually, science and truth prevailed.

The same is true today in the fields of race and genetics.

Moreover, our enemies' triumphs have turned to ashes. They won. Massive race-mixing programs have been enforced nationwide. The experiment has been tried. The results are in. There is no evidence that mixing the races has improved academic performance of minority groups. Quite the contrary. In the field of housing, Black home ownership is lower today than it was back in 1965 when the Fair Housing Act was passed. The utter failure of these "solutions" is very good for us as it opens eyes.

Finally, as is widely noted, the internet has enabled us to get our information out to an enormously larger audience than when I was a kid in the 1960s. Back then, the number of people who were aware of our ideas was tiny. The only way you could get dissident information was by subscribing to a small number of virtually underground newsletters that had a small subscriber list. *The Spotlight* newspaper, the predecessor of American Free Press, was the largest such newspaper. My guess is that the percentage of people who share our beliefs and understand what is happening and why is now in the double digits. This is a colossal breakthrough.

Edwards: Fast-forwarding to our present-day Tower of Babel situation, you speak often about the enemies of the historic American people making every mistake you would want them to make. What do you mean by that?

Dickson: They cannot control

THURMOND'S INDISCRETION

South Carolina Sen. Strom Thurmond (D) was a hardline segregationist during the majority of his nearly 50 years as a U.S. senator. He is best known for his 24-hour filibuster of the 1957 Civil Rights Act. It is still the longest single-person filibuster in Senate history. Despite his condemnation of integration, when 22 years old, Thurmond impregnated a 16-year-old Black servant who then gave birth to a daughter, Essie Mae Williams. He helped Williams financially during his life, but never officially recognized her as his progeny.

themselves. They are consumed with hate. They are driving the car over the cliff. A smart enemy of our people, culture and history would say, "Hey, guys, things have really turned out great for us and things are getting better and better. We need to cool it. We need to sit back and let things ripen."

But they don't do that, and they cannot do that. They are slaves to their own hate-filled emotions. They don't know when to stop. They are driving a car with no brakes, just an accelerator. Their answer to the ever-more apparent failure of their theories is to step on the gas.

They are persecuting Whites. They will persecute Whites even more as time goes by. The suffering they are inflicting on Whites will eventually force us to become what we always should have been and to do what we always should have done.

Edwards: Of all the issues that plague our nation, which ones must be immediately remedied and why?

Dickson: The first thing that must happen is that we must win at least a small fraction of the elite, the ruling classes, to our side. From my reading of history, it seems that no revolution has ever occurred without at least a portion of the ruling class breaking ranks.

The next thing is that we need a correct ideology. That ideology must be racially based. We must stop pandering to gimmick issues like Barack Obama's birth certificate, Bill Clinton's tryst with Monica Lewinsky etc. We must stop talking nonsense about "returning to the Constitution" and going back to the 1950s. We must think "post-America." The old order didn't work. The Constitution didn't protect us. We need a very new experiment other than the one that was launched at Independence Hall in Philadelphia in 1787, the French Enlightenment document called "the Constitution."

Then and only then can we deal with the most critical issue: demographics—stopping immigration, commencing repatriation and creating our own ethnostate like the one Israel has carved out for Jews in the occupied Holy Land.

Edwards: Over the decades, you have witnessed the rise and fall of so many different individuals and organizations that have shared our concerns. Why does the candle seem to burn so quickly on our side, and what qualities should leaders be able to demonstrate?

Dickson: The reasons why we so often have poor human material to work with—with numerous resplendent exceptions—apply to not only many who have been in leadership positions, but also to the nature of our movement at large.

First, people are *not* drawn to our cause because adhering to our movement will bring personal advantages to them. No one is going to get a cushy job, contract or a federal judgeship by signing on with us..

No one is going to get a cushy job, contract or a federal judgeship by signing on with us.

All of us have come to this cause out of idealism. We run against the grain. We are not going with the flow. We are swimming upstream, against a strong current.

Such people act out of noble and sacrificial motivations, but their highly principled personalities mean that, in general, they are not team players. They often "don't play well with other children," as the saying goes.

I don't like to use the famous words of the odious Winston Churchill, who was, in my opinion, the most destructive prime minister our mother country has ever produced, but the words themselves are fine and they fit: "We have nothing to offer but blood, sweat, toil and tears."

The people who join us know that and, as I said, they often are noble in character but, as the cliché goes, getting them to work together is like herding cats.

What we need most of all are team players: people who can get along with and function well with other people. But we don't get the back-slapping fraternity boys on the corporate career path. We need some people like those back-slappers, but ones who are loyal to their people, men who know who they are. They need to "know thyself," to use one of the phrases on the Altar of Apollo at Delphi in ancient Greece.

Another reason we so often have had problematical leaders is that those who want and seek leadership are often not the people in the ranks who should step forward. The best have too much to lose and are cautious. The foolish rush forward. They are often full of enthusiasm, but they lack the qualities we need.

Which brings me to my final point in addressing this important question.

The qualities we need but are often lacking include attention to tedious, boring details of work. Just having the ability to answer the mail, balance the bank account, fill out the forms and file the necessary annual corporation reports with the secretary of state are unglamorous but, if we had more leaders who would just mind the shop and avoid catastrophes, we would be much farther ahead in the game.

Edwards: As an officer of the court, you have a front-row seat inside the so-called justice system. What advice would you give dissidents who still believe that judges and juries are bound by certain rules and ethics to uphold the law, regardless of what their personal opinions might be?

Dickson: The most important advice? Stay out of court! Courts are the enemy's home turf. There are some fine judges, but the unhappy fact is that judges are usually political appointees who are selected by politicians in the executive branch of government and approved again by

politicians in the legislative branch. Most judges engage in what has been called "legal realism." They decide which side is the "right" side—the side that can most help the judge in his career—and they work from that calculation backward to come up with their rulings.

Judges don't change and become straight arrows by putting on a black robe. Courts are dangerous places, and being in court is expensive.

There are ways to minimize one's exposure to courts. One way is to put compulsory arbitration provisions in your contracts, leases etc. Prenuptial contracts are another way that people entering marriages can minimize the role of the courts and the judges.

Young males in our movement who are getting married are taking great risks. They are often starry-eyed as grooms and brides ought to be. But they need to realize over 50% of all marriages end in divorce. A divorce for one of our people is unusually difficult. The other spouse can (and usually does) make an issue of their husband's "hateful" racial or other views. This works magic in the courtroom, and the racially loyal spouse is likely to emerge from court effectively ruined. Do not entertain the delusion that you can file a court case and get justice. Stay away from the courts.

Sometimes, as we have seen in cases like the conspiracy kangaroo court case in Charlottesville, Virginia, one gets sued—possibly into bankruptcy—and doesn't initiate the suit.

We should all have umbrella insurance policies for such situations. Umbrella policies are surprisingly cheap. The greatest advantage to us in such policies is that the insurance company is required to provide the insured with a lawyer. This usually means a lawyer from a powerhouse insurance defense firm, a firm that the judges are afraid of and will be reluctant to mess with.

The judge in the Charlottesville case granted the motion of the richest defendant and dismissed the case against him. I suspect that this was because both the court and the plaintiff's attorneys did not want a lawyer from one of Virginia's most prestigious law firms sitting in the courtroom and obstructing the railroading of the defendants.

People with our views have a very difficult time getting lawyers to agree to represent us. An umbrella policy will solve this problem.

Antifa will harass lawyers who represent genuine dissidents in America. Lawyers puff themselves up about how they will represent unpopular people but, the fact is, most lawyers are cowardly and aren't about to touch a case involving someone whose views are offensive to the entrenched minority in our society. I have personally experienced this in my own life.

Edwards: Many voters also believe that simply winning the White House or retaking Congress is a quick fix, but the idea of sending Mr. Smith to Washington and "retaking" America from sea to shining sea seems like a fool's errand today. You often talk about the system that is working against us at all points. Please explain.

Dickson: There is no hope in the system. Keep reciting this mantra until it penetrates your skull. Mr. Smith is not going to Washington. Such people are few and far between. If one of them does try to go to Washington, he isn't going to make it. For one thing, he won't get any financial support. For another, he will get the silent treatment. He won't get any publicity and will not be heard.

If, somehow, Mr. Smith breaks through and attracts significant support from the voters, he will be smeared. The system will find former girlfriends who will step forward and become celebrities by claiming that he raped them when he was in college. The system will find ways to indict him, as they are doing with Donald J. Trump.

And, finally, the votes just aren't there. Over 40% of the voters are now members of racial minority groups that are pampered and petted by the system. They are plundering America. They hate us. They blame us for all their problems. They will always vote

The War Against Whites: The Racial Psychology Behind the Anti-White Hatred Sweeping the West

Arthur Kemp reveals that the Black Lives Matter ideologues do not seek "racial equality," but rather the total destruction of White civilization. Kemp says they are driven by a deep mass psychosis which falsely blames White people for all problems encountered by non-Whites trying to fit into a First World society. Kemp deals with unalterable genetic traits—IQ, character, psychology and behavior—and shows they are the true causes of racial disparities in crime, socio-economic status, education and health. Starting with a complete review of the George Floyd incident, this work covers it all! Dissects the myth that police in the U.S. are "hunting Blacks"; shows through official global crime records that Whites are overwhelmingly the victims of non-White criminal attacks; and provides the only solution through which racial conflict can be avoided and all can exist in peace and harmony. Softcover, 290 pages, 473 footnotes, 79 illustrations, three tables, indexed, #885, **$25** minus 10% for TBR subscribers plus $5 S&H inside the U.S. from TBR, P.O. Box 550, White Plains, MD 20695. Call 1-877-773-9077 toll free to charge, Mon.-Thu. 8-4 ET. Order also online at www.BarnesReview.com.

The Aryan Race: Its Origins and Its Achievements

A beautiful cultural history of the Indo-European peoples. The author, Charles Morris, a classical scholar, defines "Aryan" as a "linguistic race" spanning the areas occupied by the great Indo-European invasion, reaching from India to Ireland, and proceeds to analyze all aspects of the cultures across this vast region. Along the way, he proves that the broad family of Indo-European language speakers had a common origin at some distant point in the past. It includes an overview of the development of ancient Indo-European households, farming, legal systems, culture, religion, language and political development. Read of the tales from the Rig-Vedas, their similarity to Greek myths, and the parallels with the Norse Eddas. It's a treasure trove of facts and myths that reflects the genius of the Indo-Europeans. Softcover, 252 pages, #829, **$25** minus 10% for TBR subscribers plus $5 S&H inside the U.S. from TBR, P.O. Box 550, White Plains, MD 20695. Call TBR toll free at 1-877-773-9077 to charge, Mon.-Thu. 8-4 ET.

as a bloc for the Democratic Party. They are in the Democratic Party's corral. There's nothing even the limp-wristed, sell-out Republicans can do or say that will ever pry them away from a dependable source of give-aways and preferential treatment that the Democratic Party represents.

This bloc is getting bigger all the time by demographics. It grows by about 1% a year, and the pace is picking up. The United States of America will soon be a one-party state.

As I said before, we must think about the concept of a post-America. Free yourself from system delusions.

There is no hope in the system. Keep saying it until you get it.

Edwards: Cliches like "demographics are destiny" and "politics is a racial headcount" are true. The Great Replacement is real. You were one of the earliest advocates of the creation of an ethnostate for White Christian Europeans on the North American continent. Is there a scenario in which such a thing could realistically develop?

Dickson: Yes. The creation of a homeland for White Europeans on the North American continent is the only possibility for survival. Anything less than that is death for us. Thinking big is the only way to think realistically. And it can be done.

For one thing, the system is doomed. As I said, the system has no brakes. It will keep on hounding and persecuting White European Americans until we cease to exist—or until people have had enough. The system has never faced a real test in a century. Times have been good, generally speaking—no droughts, no famines, no real depressions, no catastrophic wars.

But times can change. The test is coming. The system will not survive the test. The system will collapse. The system's death will be our opportunity for life itself. We can be grateful that the one group that never fails us is our enemies. They are doing everything I would want them to do. When the crack-up comes, as it inevitably will, then living in our own ethnostate will be the only way out.

Americans are like gypsies. They left their mother countries because they were gypsies, and they are still gypsies today. The average American moves every four years, so White Americans will have no difficulty moving. People naturally want to live with their own kind and do not want to live with people too different from themselves. European-Americans will want to move into an ethnostate.

Finally, the concept of an ethnostate was a refreshing breakthrough. We have to give people answers. We can't just keep telling them how awful things are.

Edwards: You have a home library that rivals those in small towns. If you could recommend just two books for people to read, what would they be?

Dickson: Questions like, "Which are the two greatest books you have ever read?" or "What two books would you recommend?" are difficult to answer, but I'll make an attempt to reply. I can't confine myself to two, so I'll go a little beyond that number.

I'd first recommend *The Dispossessed Majority* by the great and good Wilmot Robertson of blessed memory. Wilmot was the greatest of all the movement figures I've known. He was a towering man. Those who did not know him cannot imagine how great he was. His book is the best summation of the plight we White Americans are in and who put us there.

Secondly, I'd recommend *How to Win Friends and Influence People*. Yes, I know people will laugh. But our people would profit by learning how to get along with others.

Finally, I'd recommend *The Richest Man in Babylon*. This is a very short book on personal finances. It has a practical program that can be implemented. If you follow the principles in that book, you will be financially independent in 20 years. ❖

James Edwards is a member of TBR's Board of Contributing Editors and the outspoken host of *The Political Cesspool*, one of America's most potent talk radio programs. He has made numerous television guest appearances and his work as a political commentator over the past two decades has been the subject of articles in hundreds of print publications and media broadcasts around the world. ANTELOPE HILL PUBLISHING

Professionally publishing new translations, original works and reprints since 2020

Antelope Hill Publishing seeks to ensure history, culture, and revolutionary ideas will be preserved in the written word and made easily accessible, fairly priced, and professionally published. The best refutation of historical revisionists is a clear statement of primary accounts—fighting the battle for minds from the printed page, instead of locked away in secret hard drives and foreign languages. Antelope Hill translates, transcribes, and republishes existing works in print and eBook format. We are also looking for the authors who will tell the story of the current generation so that we can publish the words that will inspire us to victory. Our efforts are endorsed by The Barnes Review.

HISTORY YOU MAY HAVE MISSED

A digest of interesting historical news items gleaned from various sources around the world that most likely did not appear in your local newspaper or on your mainstream television broadcasts.

✠ ✠ ✠

Remnants of War

Everywhere there was a Civil War battle, danger still lurks. On the second day of the Battle of Gettysburg in 1863, a Confederate artillery unit fired its cannon at a Union position, but the shell did not explode. More than 160 years later, in 2023, the shell was uncovered by an archeologist who carefully placed it right back where he found it and scampered away, realizing the shell might still be operational. The local bomb squad came in and detonated the shell safely, says *Smithsonian* magazine. This incident was repeated in South Carolina on the Congaree River when a "trove of grapeshot, canister shots, 10-inch artillery shells and a sword" were found. The lesson? Be careful when exploring Civil War battlefields. It can be a real blast, but not necessarily the kind you want.

✠ ✠ ✠

Stonewall Jackson Murdered?

There are allegedly many mysteries surrounding the evening when Gen. Stonewall Jackson was killed by friendly fire in the woods around Chancellorsville, Virginia in 1862. Some have even wildly speculated he was murdered by his own men. Wanting to know just what the nighttime conditions were when Jackson was shot, two astronomers traced the phases of the Moon back to that fateful night. Turns out, the astronomers say, "the Moon was so dim, it would only have revealed his silhouette. When the fatigued, frightened soldiers were startled by this mysterious soldier-shaped shadow, they instinctively opened fire … only to find to their horror that they had felled their own commander." This merely reinforces what we already knew about the death of Jackson: It was a tragic, history-changing mistake.

✠ ✠ ✠

Confederate Flying Machine

Lucky for the North, the invention of Confederate sympathizer Dr. Finley Hunt never came to fruition. During the war, he wrote a letter to Confederate President Jefferson Davis pitching a novel idea: a steam-powered flying machine that could drop bombs on Union positions. At the time, of course, both armies were experimenting with "state-of-the-art" aerial reconnaissance balloons, so such a concept as a flying bomber was decades ahead of its time. (The Wright Brothers would not even successfully fly their first plane until 1903.) The flying machine proved too difficult to bring to fruition at the time for the Confederate Engineer Bureau, and the plan was abandoned. The Confederates, however, were allegedly excited about the idea of using steam to power war machines. The war ended before any more air- or land-based steam-powered weapons of war were invented by the South. The South did, of course, manufacture steam-powered ironclad vessels.

✠ ✠ ✠

Solving the Army Itch

During the Civil War, tens of thousands of soldiers on both sides experienced what was called Army Itch, a skin condition website *Listverse* called a "dermatological terror" for soldiers. Army Itch was a "mysterious condition that caused men's skin to swell and blister, to the point where they became a mass of sores and painful, pus-oozing lacerations. … [T]heir entire skin itched constantly and uncontrollably. Some men's hands swelled so badly that their fingers couldn't touch each other." So what was Army Itch? That question was answered in 2006, when medical researchers determined its true cause was epidemic scabies, a mite infection. Human itch mites thrived in the poor hygienic conditions in which the soldiers were forced to live at the time. The mites would burrow into the upper layer of the skin where they would live and lay eggs, causing incessant discomfort to the host.

✠ ✠ ✠

A General's Loving Wife

According to history writer Karen Abbott, during the Civil War era, "convention decreed that a woman mourn her child's death for one year, a brother's death for six months, and a husband's death for two-and-a-half years. She progressed through prescribed stages of heavy, full and half mourning, with gradually loosening requirements of dress and behavior. By contrast, a widower was expected to mourn for only three months, simply by displaying black crepe on his hat or armband." Flora Stuart, wife of Gen. JEB Stuart, put those conventions to shame, remaining in heavy mourning for 59 years, until she died in 1923. Her famous cavalry-leader husband was killed in 1864 at the Battle of Yellow Tavern by a Union infantryman. Stuart's last words on the battlefield were uttered as he was being carried from the battlefield. Noticing retreating Confederate troops, he yelled at them, "Go back, go back and do your duty, as I have done mine, and our country will be safe. Go back, go back! I had rather die than be whipped."

✠ ✠ ✠

Strange Glowing Wounds

Smithsonian magazine ran an interesting item on strange, glowing wounds experienced by injured men in both armies during the Battle of Shiloh, fought April 6–7, 1862. *Smithsonian* reports some "soldiers lay in

the mud for two rainy days, and many of them noticed that their wounds glowed in the dark. In fact, the injured whose wounds glowed seemed to heal better than those that did not." In 2001, two Maryland teenagers solved the mystery. It turns out that many of the wounded suffered from hypothermia in the cold spring weather. Thankfully, their lowered body temperatures "made ideal conditions for a bioluminescent bacterium called *Photorhabdus luminescens*, which inhibits pathogens."

✠ ✠ ✠

Women in the Civil War I

Not only men care about the future of their nation. Our womenfolk do, as well, as shown by the number who refused to follow the conventions of the era and, instead, insisted on fighting and risking death on the frontlines for both North and South. According to American Battlefield Trust (ABT), multiple "disguised women fought at the Battle of Antietam. … Of the eight [female] fighters at Antietam, one woman had an arm amputated; one was shot in the neck. Another survived that battle and the Battle of Fredericksburg, where she was promoted to sergeant, only to give birth a month later." (See item below.) In addition, ABT says, "There are confirmed accounts of five women fighting at Gettysburg. One lost her leg and two marched in the infantry assault called Pickett's Charge."

✠ ✠ ✠

Women in the Civil War II

Some women can dress in a military uniform made for a man and, depending on their build, succeed in hiding the body parts that would obviously signal she is not a man. But one thing she cannot hide for too long is pregnancy. One Northern gal, fighting on the Union side, caused quite a stink when she, masquerading as a he, gave birth. Members of the Union brass were not amused, one writing, "The general commanding directs me to call your attention to a flagrant outrage committed in your command. … [A]n orderly sergeant … was today delivered of a baby—which is in violation of all military law and the army regulations. No such case has been known since the days of Jupiter."

✠ ✠ ✠

Women in the Civil War III

Despite such incidents as the one mentioned in the previous item, the U.S. military totally denied that any woman ever made it into the U.S. Army and, thus, none was deserving of a pension or recognition. This irked famed author, reporter and crusader Ida Tarbell who, in 1909, formally asked the U.S. Army's adjutant general if he had a record of the number of women who enlisted and served as soldiers in the Civil War. According to website *The Conversation*, Tarbell received the following back in reply: "I have the honor to inform you that no official record has been found in the War Department showing specifically that any woman was ever enlisted in the military service of the United States … during the period of the Civil War. It is possible, however, that there may have been a few instances of women having served as soldiers for a short time without their sex having been detected, but no record of such cases is known to exist in the official files." That's an insult to all those women who bravely fought alongside the men during the Civil War.

✠ ✠ ✠

Secession Feelings

According to MSN, Americans are increasingly talking about civil war. "In August [2023], after the FBI raided Donald Trump's Florida home, Twitter [now called X] references to 'civil war' jumped 3,000%. … Perhaps most troubling, Americans on both sides of the political divide increasingly state that violence is justified." In late 2022, more than 40% of people polled said "they believed civil war was at least somewhat likely in the next 10 years." Before Joe Biden was elected, few Americans were seriously talking about a second Civil War. Today, it is becoming quite common. See more about that in our editorial on page 3 of this issue which explains why Democrats continue to incessantly push the narrative that any American who would consider secession is a traitor.

✠ ✠ ✠

Trump and the KKK

As we all know by now, Special Prosecutor Jack Smith has charged former President Donald Trump with violating multiple federal laws for his alleged attempt to overturn the results of the 2020 election and for any role he may have played in the riotous protests that occurred at the U.S. Capitol that temporarily obstructed the certification results on January 6, 2021. Interestingly, the fourth charge, alleging Trump "injured, oppressed, threatened and intimidated one or more persons in the free exercise and enjoyment of a right and privilege secured to them by the Constitution and laws of the United States—that is the right to vote, and to have one's vote counted"—is based upon the Ku Klux Klan Acts of the 1870s (officially known as the Enforcement Acts). The Enforcement Acts empowered the U.S. federal government to ensure the Civil War amendments to the U.S. Constitution—13th, 14th and 15th—that freed the slaves, guaranteed equal protection of the laws and the right to vote were obeyed. Charging Trump via such an antiquated, emotionally charged law is yet another way to convince voters Trump is in the same mold as those "treasonous," "racist" "insurrectionist Confederates" they still go on and on about who are accused of terrorizing innocent Blacks in the South through the auspices of the Ku Klux Klan. (See the full-color page in the front inside cover of this issue of TBR for an honest history of the KKK.—Ed.)

Authentic History: Ku Klux Klan, 1865–1877

By Susan Lawrence Davis

The only officially authorized history of the original Ku Klux Klan, written by the daughter of the founder of that organization in Alabama. Written to counteract the misrepresentations made about the original KKK and its activities, this now-suppressed book contains many astonishing "insider" insights, such as:

- The KKK was financed from England by the Jewish former Secretary of State for the Confederacy Benjamin P. Judah (who fled the South at the end of the Civil War);
- The KKK's chief chaplain was a Roman Catholic;
- The KKK's chief Justice was North America's 33rd Degree Masonic leader;
- The hood—for which the KKK became famous—was in fact outlawed by the original organization because so many people were using its disguise to commit crimes in the name of the KKK;
- The original KKK's primary activity was political in nature, and their officers in various legislative bodies—reaching as high as the U.S. Senate—were focused on restoring White rule to the Southern states;
- When official KKK posses were formed, they were under strict orders never to dispense mob justice or engage in whippings, lynchings or other abuses;
- When rogue elements and non-KKK members started performing atrocities in the KKK's name, the leadership ordered the organization permanently disbanded, citing such abuse of its name as the primary reason for its closure.

Written in a racially paternalistic style, this work also clearly reveals the mindset that lay behind the slave-owning era: a false belief that the Blacks were "content" and "loyal" under White rule—and that only a few Southerners understood and supported the view of President Abraham Lincoln. He believed, namely, that the Black presence posed a long-term demographic threat and that they needed to be repatriated to Africa, rather than stay under White rule in America.

It's a sensational historical document, vital for anyone wishing to gain a proper understanding of the Southern resistance to "Reconstruction."

This edition has been completely reset, contains all the original images (digitally restored) and includes an index. *Authentic History: Ku Klux Klan, 1865-1877* (softcover, 229 pages, #1020, $25 minus 10% for TBR subscribers plus $5 S&H inside the U.S.) is available from TBR, P.O.Box 550, White Plains, MD 20695. Call 1-877-773-9077 toll free to charge, Mon.-Thu. 8-4 ET or visit TBR's online book and video store at www.BarnesReview.com.

Authentic History: Ku Klux Klan, 1865-1877

Preface
I: Introduction
II: Tennessee, Pulaski
III: Alabama, Athens
IV: The First Convention
V: Fourth of July Parades
VI: Tennessee anti-Ku Klux Law
VII: President Johnson's Policy
VIII: The Federal Ku Klux Acts
IX: The Union League of America
X: Conditions From 1870–1877
XI: The District of Columbia
XII: Virginia
XIII: Mississippi
XIV: Georgia
XV: North Carolina
XVI: Texas
XVII: Missouri
XVIII: Arkansas
XIX: Florida
XX: South Carolina
XXI: Louisiana
XXII: Close of the Ku Klux Klan
Index

ANOTHER CENSORED BOOK SAVED FROM THE MEMORY HOLE!

The Impending Crisis of the South: How to Meet It (1857)

By Hinton Rowan Helper

One of the most influential anti-slavery books in pre-Civil War America, this book was written by a Southerner who not only opposed White supremacy, but also clearly understood the relationship between race, civilization, culture, political power and demographics.

By assembling official statistics from slave-owning and non-slave-owning states, the author proved conclusively that the presence of Black African slaves was not, as the South's leaders claimed, vital for their economy but, in fact, exactly the opposite.

Helper showed that by all measures—economic, social, political, agricultural yield per square mile, education, literacy, infrastructure and many other indicators—the use of Black slaves by the South was an impediment upon economic growth that had severely retarded the entire development of all the Southern slave states.

The book conclusively proves that slavery—and the presence of large numbers of Africans in the South—was a significant barrier to the economic advancement of Whites. In addition, Helper compiled the most detailed statistics on slavery, showing exactly how many slaves there were, and the precise number of slaveowners—and that the vast majority of white Southerners did not own slaves but were conned into supporting a jingoistic fake "Southern Nationalism" orchestrated by a small clique of immoral ultra-capitalists.

Helper's conclusive economic and social arguments against slavery were backed up by his heartfelt moral objections to the idea of "owning" another person—but he was no bleeding heart liberal.

This work, which became a Republican Party election propaganda piece in the U.S. presidential election of 1860, also revealed that the officially-endorsed abolitionist movement had two goals—the emancipation of African slaves—and their immediate deportation back to Africa or somewhere else where they would be permanently geographically isolated from white America.

As expected, this book and its ideas caused a storm in the South, where it was banned and its possession and distribution outlawed. In Arkansas, three men were hanged after being arrested for being in possession of this book. Nonetheless, between 1857 and 1861, nearly 150,000 copies of the book were circulated, despite it being blamed for heightening the tension which led to the Civil War, which was, inevitably, spurred by the issue of slavery.

It was without question the most influential and powerful abolitionist book ever written. Its reasoning and judgment remain sound throughout the years and, if anything, Helper's warnings about the long-term effect of the presence of massive numbers of non-Whites in White America has come true more than a thousand times over.

"Freesoilers and abolitionists are the only true friends of the South; slaveholders and slave-breeders are downright enemies of their own section. Anti-slavery men are working for the Union and for the good of the whole world; pro-slavery men are working for the disunion of the states, and for the good of nothing except themselves.

"Patriotism makes us a freesoiler; state pride makes us an emancipationist; a profound sense of duty to the South makes us an abolitionist; a reasonable degree of fellow feeling for the Negro makes us a colonizationist."

Slave-Owning Mulattoes in the Antebellum South

CONTRARY TO POPULAR MYTH, only a small percentage of Southern Americans before the War for Southern Independence owned slaves. Not all the slaves were Black, and not all of the owners were White. A year before the start of the war, the 1860 federal census reports show there were 27 million White people in the United States, including 8 million in the South. Slave owners that year numbered 385,000. Even if all slave holders had been White, which is not the case, that would calculate to only 4.8% of Southern Whites being slaveowners.

By Robert M. Grooms

There were Blacks, as well as Whites and Mulattoes, who owned slaves in the Old South [TBR, September/October 2017.—Ed.]. In fact, you could accurately say that owning slaves was more a Black than a Caucasian phenomenon. According to the census, in 1860, there were 261,988 free non-Whites in the Southern states, and many owned slaves. Typical of these states was South Carolina, where:

- 61% of non-White heads of households listed slave property in 1790;
- 64.4% in 1800;
- 51.6% in 1810;
- 47.1% in 1820;
- 51.6% in 1800
- 57.8% in 1830;
- 47.7% in 1840
- 64.3% in 1850; and
- 71.3% in 1860.

In short, the percentage of free non-Whites owning slaves was much greater than that of Whites.

Mulattoes figured prominently among non-White slave owners. In Louisiana, for example, over 70% of non-White slave owners were Mulattoes. And some of them owned sizable numbers of slaves. In 1860, Louisiana had six non-Whites who owned 50 or more slaves. They were Marie Meteyer, who owned 58 people, Augusto Donatto of St. Landry Parish who owned 70 slaves, Andrew Dunford who owned 74, Ciprien Ricaird and her son Pierre who, together, held 168, and Antoine Dubuclet who owned over 200 slaves.[1] Additionally, 13 members of the Meytoier family of Natchitoches owned a total of 215 slaves.

ANTOINE DUBUCLET
Owned more than 200 slaves.

All these owners were Mulattoes. Mulattoes made up over 60% of the non-Whites who owned slaves throughout the South and were represented at a much higher percentage among those who owned 10 or more slaves.

South Carolina also had a high percentage of Mulatto slave owners. Prominent among them was William Ellison, a cotton producer in Sumpter County, who had purchased his own freedom at age 27 and, by the time of his death in 1861, owned 63 slaves. His sons owned an additional nine.

Other prominent Carolina non-White slave owners include Jean and Margaret Peagler of St. Stephen Parish who owned 48 slaves in 1860; Justus Angel of St. John's Parish and Mistress L. Horry of St. Bartholomew Parish who each owned 84 slaves in 1830.

A rambunctious slave market in 1856 Charleston, South Carolina.

In the port city of Charleston, there were over 125 non-White slave-owning families in 1860. Notable among the rice-growing plantation owners in the Charleston area were the Pendarus, Garden, Holman and Collins families. Let us consider them in detail.

When the first federal census was conducted in 1790, the children and grandchildren of an African-born slave woman owned several rice plantations and more than 310 slaves in the Charleston area. Joseph Pendarus, a White man, never married. Instead he cohabited with an African-born slave, Parthena.

The union produced seven children: James, Brand, William, John, Thomas, Mary and Elizabeth. When Joseph died in 1763, his estate included slaves and 1,009 acres of land near the Beach Hill Plantation in Colleton County. Joseph's will provided for land and slaves to go to each of his Mulatto children, with James, the eldest, receiving the bulk of the estate.

James Pendarus was described as being "dark-skinned" with noticeable African features. He married a White woman, Catherine, daughter of planter Peter Rumph. They had four children, William, Joseph, Ann and Elizabeth Mary. All four married White spouses. Ann wed Samuel Perry, and Elizabeth married planter Thomas Smith Jr.

In 1786, Joseph Pendarus's grandson William Pendarus Jr. became gravely ill. He asked his father to manage his Walnut Plantation in the event of his death until such time as he could sell the land and slaves, with the proceeds going to his wife Mary for his minor son William III. According to the 1790 census, James owned 123 slaves and 3,250 acres of land in Charleston County.

The same year, the estate of his recently deceased son William included 45 slaves. Joseph owned 45 and Thomas two. James died in 1798, leaving an estate valued at 5,987 pounds sterling and 15 shillings. His estate consisted of two rice plantations, Leggs Plantation and Beach Hill Plantation, and 3,000 acres in the Horse Savannah and Spoon Savannah area. His estate also included 155 slaves (134 adults and 21 children), two horses, 99 head of cattle and 107 oxen.

James willed most of his estate to his grandchildren. He gave his grandson William III Beach Hill and the slaves on the plantation. And he gave the children of his daughter Ann Perry the land and slaves at the Horse Savannah and Spoon Savannah sites.

In 1800, William Pendarus's namesake and grandson owned the Walnut Plantation and 144 slaves. James's estate held 156 slaves, while Joseph owned nine and John one. Three slaves were owned by another family member, Josiah Pendarus. By 1810, the only Pendarus family members in South Carolina listed as owning slaves

were Josiah, three, and Joseph, six.

Little is known about John Garden's early years. His father was a Negro and his mother Flora of Black-Amerindian mix. John married Susan Elizabeth Gardiner, daughter of the Mulatto couple Ruth and George Gardiner. John and Susan had five children: Ruth, Ellen, Francis, Elias and John Jr.

How Garden accumulated his early wealth is unknown. But, according to the 1790 census, when he was age 23, John Gaden owned six slaves. In 1810, he owned a rice plantation in the Georgetown District and 40 slaves. By 1820, he had purchased the 382-acre Hermitage Plantation, located on the Pon Pon River in St. Paul, and held 35 slaves, nine of whom he kept at his townhouse at Charleston Neck. In both 1830 and 1840, he had 52 slaves at Hermitage and 10 at his townhouse.

In February 1842, John Garden died at the age of 75, having five children. He willed his townhouse to his wife, in addition to two slaves, Vix Clarissa and Hannah. Elias Garden, the eldest son, sold Hermitage Plantation and 60 slaves in accordance with his father's will. The plantation was sold to William Westcoat for $8,000. Westcoat also purchased 40 slaves for $13,179.

In 1853, Elias Garden, 37, died after a long illness. He left his wife Henrietta and five children his eight slaves, three of whom had to be sold by the family to defray outstanding expenses.

John Holman Jr. and Samuel Holman were likely the only African-born slave traders to establish themselves as slave-owning planters in North America. Sometime between 1764 and 1768, the original John Holman (of the same name) left his homeland in England and sailed to the west coast of Africa as an agent for a British merchant involved in the slave trade with the Americas.

By the late 1780s, Holman was firmly established as an independent merchant. At his fortress on the Rio Pongo, a river located to the north of modern-day Guinea, he conducted a brisk trade with the indigenous people who were all-too-willing to capture, enslave and sell their racial brethren.

Holman exchanged supplies obtained from England and the United States for slaves and other native items (African deer, leopard skins, ivory and gold), which he, in turn, sold to the planters of South Carolina.

As Holman's wealth increased, he became extremely dissatisfied with his life in Africa. He visited South Carolina in 1787 and bought the Blessing Plantation from Archibald Brown for 2,500 pounds sterling. One of the reasons Holman wanted to leave Africa was his concern for the safety of his children.

> Mulattoes made up over 60% of all the non-Whites who then owned slaves throughout the South.

Sometime around 1765, he had taken an African slave woman named Elizabeth as his mistress. She gave birth to five children: John Jr., Samuel, Esther, Elizabeth and Margaret. He also had four other sons by another slave woman: John, Cameron, Richard and William. While in Africa, John Holman's Mulatto children were raised as free persons. His eldest son John Jr. was sent to Liverpool, England to be educated.

When he returned to Africa from England at age 16, John Holman Jr. joined his father in the slave-trading business. By the time he was 20, he had sufficient experience and supplies to trade on his own with other Africans for slaves. Within a few years, he had acquired 13 slaves and used them to assist him in his slave-trading business up and down the Pambia River. John's brother Samuel and his half-brother William also prospered as slave traders in Africa. By 1796, William had become the most prominent slave trader of the Rio Pongo area.

In January 1790, John Holman (père) and his first family boarded a vessel for Charleston. The four sons he had by his second slave mistress did not accompany them. About three months later, the slave trader and his family arrived at the port city.

Holman could not leave the ship with his slaves for fear that local authorities might seize them as he was in violation of a newly enacted state law that banned importation of slaves into South Carolina. He spent eight months in Georgia until associates in Charleston obtained a waiver of the law for him.

In February 1791, Holman moved his family and slaves to the Blessing Plantation on the Cooper River in St. Thomas and St. Dennis Parish. He used the slaves to cultivate and harvest rice, and lived there until his death in July 1792. In his will, John Holman left his eldest son John Jr. half his estate, his son Samuel and daughters Esther, Elizabeth and Margaret each one-eighth. He also used his will to formally free his woman slave Elizabeth as well as her children and his sons back in Africa. Although he considered his children free, he had to formally declare them as such in order to ensure they would not, at some later date, be determined to be slaves.

Holman's estate was appraised in January 1793 as being worth 3,451 pounds sterling and three shillings, but it was not until May 1808 that the estate was officially divided. By then, there were 70 slaves as part of the estate. John Jr. received 37 slaves, Samuel nine and Elizabeth, Esther and Margaret eight each. On March 24, 1794, John Jr. took operational control of the Blessing Plantation. He worked the plantation from that date until January 1798. The annual revenue from the rice plantation decreased yearly from $6,237 to $3,508.

In 1798, John Jr. sold the Blessing Plantation to pay outstanding debts and moved to a rented plantation in

On the island of Hispañiola in the Caribbean, two nations now exist: Haiti and the Dominican Republic. TBR readers well know that every White and Mulatto of Haiti (then called Santo Domingo) was either massacred or fled to the eastern half of the island after the 1790s' slave revolts. These refugees eventually populated the prosperous Dominican Republic. Haiti, on the other hand, as one can see in the news today, is and has been, since the exodus of the pale skins, a dysfunctional state. As TBR goes to press, it is led by a vicious gang leader named Barbecue. Above, "Free Women of Color With Their Children and Servants, Dominica" (c. 1764–1796), an oil painting by Italian artist Agostino Brunias, shows the elevated status Mulattoes could achieve in the Caribbean—and also in America's Southland.

the Georgetown District. In August 1803, he agreed to purchase the Santee Plantation on the North Santee River for $25,000 extended over three years. He used his 128 slaves as collateral. On August 16, 1803, he made the first payment of $10,000 plus interest.

In November 1803, John Jr. left South Carolina for the west cost of Africa. He temporarily returned to Charleston in January 1805 and returned to Africa in May of that year. Samuel was placed in charge of the Santee Plantation during John Jr.'s absence.

In 1807, Samuel also traveled to his native land in Africa. Soon after Samuel set sail, John Jr.'s principal creditor, George Parker, seized the Santee Plantation and all the slaves on it (including Samuel's) for failure to make the second and third payments on the $25,000 loan. Following a 10-year court battle, John Jr. lost the Santee Plantation and 128 slaves. Samuel Holman was able to get 42 slaves back.

In January 1806, Samuel mortgaged 42 slaves to secure a $24,000 loan. He took out a second mortgage on his slaves to pay the first payment of $16,600 on July 1, 1806. The final payment was due one year later. On July 9, 1807, he forfeited 13 slaves because he could not pay the second mortgage debt. Over the years he continued to sell his slaves or lose them for failure to make good on loans.

By 1819, he returned to his homeland on the Rio Pongo.

Back in Africa, John Jr. once again became involved in the slave trade. He died in 1821. Blaming his brother for mismanaging his property in South Carolina, his will provided that "one shilling and no more" was to go to Samuel and to each of his three sisters. The rest of his estate was left to his wife Sally, a slave, and his nephew Samuel Holman back in Africa. In his will, he officially freed his wife.

Robert Collins, an unmarried White man, had nine children with a Black slave, Susanna. Collins owned a rice plantation in the St. Thomas and St. Dennis Parish of the Charleston District. When Robert died, he bequeathed to Susanna and her children (Nelly,

White America: The American Racial Problem as Seen in a Worldwide Perspective

RESCUED—Here is a survey by Ernest Sevier Cox of the relationship between racial homogeneity and the preservation of civilization, described against a sweeping historical backdrop which includes Egypt, India, South America, South Africa and, finally, the U.S.A. In this book, the author proves how "diversity" has in every case led to the collapse of the original founding civilization, and that the only solution to the problem is not segregation but total physical geographical separation. The only solution for America, this work argues, is the repatriation of its non-White population to the continents of their origin. Written in the 1930s, the fulfillment of the predictions of what would happen if a policy of separation was not followed makes the book's thesis more urgent. This new edition has been edited and the text completely reset. It contains the full original text, nine new illustrations and a complete index. New cover. Softcover, 250 pages, #610, **$25** minus 10% for TBR subscribers plus $5 S&H inside the U.S. from TBR, P.O. Box 550, White Plains, MD 20695. > The percentage of free Blacks and Mulattoes that owned slaves was much greater than the percentage of Whites who owned slaves.

Robert, Rachel, Charlotte, Rebecca, Graham, Elias, Robert and Jonathan) his 545-acre rice plantation. The family continued to live on the farm and manage the plantation.

Robert Collins married Margaret Holman, African-born Mulatto daughter of Robert Holman. Elias Collins married Margaret Holman's sister Elizabeth. James Anderson, cousin of Robert and Elias, married the third Holman daughter, Esther.

In 1808, each of the Holman girls inherited land and nine slaves from their father's estate.

Robert Collins used his wife's slaves to work the acreage he jointly shared with some of his siblings. In 1810, the federal census showed James Anderson as owning 71 slaves, and a rice-producing plantation in St. Thomas and St. Dennis Parish. According to the 1800 census, Elias Collins owned 68 slaves and a thriving 821-acre rice plantation.

In 1804, he used a slave named Andrew to secure a $900 loan from James Cotton. A decade later, he used several of his slaves as collateral for a $1,200 loan from Sarah Boone. In 1817, he mortgaged four slaves to Anthony Chanet for $4,800. With the various loans over the years he purchased additional lands and slaves. By 1820, Elias owned 84 slaves. In 1843, he purchased a second plantation, the 3,500-acre Northampton Plantation in St. Thomas and St. Dennis Parish.

In 1844, Elias Collins unexpectedly died. His will provided that his wife should receive her slaves and the smaller acreage, and requested that the remainder of his slaves and the Northhampton Plantation be sold and the proceeds divided among his four children. Two of the children, Jonathan and Elizabeth, were excluded as legal heirs because they and their mother were slaves and could not inherit property. Consequently, Elias Collins's estate was divided between his two remaining children. Margaret Collins Mitchell received three-fourths of the estate, and her half-brother Robert Michael Cotton one-fourth. Margaret received the larger share because Elias Collins was married to her mother at the time of her conception. Margaret received 21 slaves from her father's estate; her half-brother seven. Northhampton was sold for $750.

Margaret's mother, Elizabeth Holman Collins, purchased the Santee Plantation, formerly owned by her father, for $4,050. In 1844, she died. By 1846, Margaret Collins Anderson Harris, recent bride of Mulatto Randall Harris, owned 37 slaves, 21 from her father's estate and 16 from her mother's. When her mother died, Margaret inherited the Santee Plantation.

With the American Civil War approaching, on January 7, 1860, Margaret sold Thomas Ryan the majority of her slaves, 44, and discontinued cultivating rice. She was 60 years old at the time and used the money to buy stocks and bonds. ❖

ENDNOTE:

1. Typical prices for slaves in this era were about $1,500 for a young, healthy male and $700-$1,000 for a female. The mean wealth of Southern White men in 1860 was $3,978.—Ed.

LINCOLN'S WAR

The Real Cause, the Real Winner, the Real Loser

By Marc Roland

Many readers of THE BARNES REVIEW are especially interested in the Southern War for Independence—more widely known to the broader, less well-informed public as the "Civil War"—not merely because it is "interesting" or just an important part of history. Rather, their passionate interest is due mainly to the fact that this struggle was a decisive event-horizon that clearly separated our once constitutional republic from a domineering federal police state that replaced it in the aftermath of the war.

In accordance with a familiar maxim "history is written by the victors," for the last six generations, our fellow citizens have been taught that Black slaves were liberated by mostly White soldiers in combat against the forces of Southern slaveowners, all of them evil White men. But in *Lincoln's War*, author Lochlainn Seabrook, a respected historian and prolific writer on Confederate and Southern history and culture more broadly, points out that only about "5% of the Southern population owned slaves."

"In 1861," Seabrook notes, "the South's 300,000 White slave owners made up only 1% of the total U.S. White population of 30 million people. Thus, while only one Southern White out of every 300,000 owned slaves, one Black out of every four Blacks owned slaves (25%). In other words, far more Blacks owned Black (and Mulattoes and sometimes White) slaves than Whites did."

Throughout the book, Seabrook dispels one myth after the next. "In the spring of 1861, there were 315,000 slave owners in the Yankee military, but only 200,000 in the South's military,"

the author notes, adding, "500,000 to 1 million slaves still lived and worked in the 'abolitionist North'."

Seabrook quotes the newly elected president, the widely revered Abraham Lincoln, as having unequivocally declared to his Inauguration Day audience that he had "no purpose, directly or indirectly, to interfere with the institution of slavery in the states where it exists."

"I believe I have no lawful right to do so, and I have no inclination to do so," Lincoln continued. "My paramount object in this struggle is to save the Union, and not to either save or destroy slavery. If I could save the Union without freeing any slave, I would do it."

Seabrook documents how "for the first two years of his war, Lincoln barred Blacks from joining his armies." In explaining his motive for later having done so, Lincoln said, "I thought that whatever Negroes can be got to do as soldiers, leaves just so much less for White soldiers to do in saving the Union" from dissolution.

The Confederacy's defeat in 1865 was even then inaccurately described by the Northern press as "a triumph for Lincoln's War of Liberation."

Since Confederate Gen. Robert E. Lee's capitulation in central Virginia, America's endless series of self-described "wars of liberation" are invariably wars of domination, from the Spanish-American War in 1898 to current American meddling in the Middle East and other far-flung corners of the world. Lee later told the governor of the state of Texas:

> If I had foreseen the use of these people designed to make of their victory, there would have been no surrender at Appomattox Courthouse. No, sir, not by me. Had I foreseen these results of subjugation, I would have preferred to die at Appomattox with my brave men, my sword in this right hand.

While he may not have foreseen the depths of the enemy's postwar savagery, Lee prophetically described how "the consolidation of the states into one, vast republic, sure to be aggressive abroad and despotic at home, will be the certain precursor of that ruin which has overwhelmed all those that have preceded it."

Acquainting modern readers with such visionary statements from America's tragic if glorious past is part of Seabrook's achievement—namely, describing the hidden causes for the War for Southern Independence and their far-reaching implications for our country's present condition. ❖

The Impact of the Civil War and Southern Reconstruction on the American Indian

WITH THE CURRENT LIONIZATION AND SENTIMENTALIZATION of the American Indian by leftists, New Agers, lovers of "the noble savage" and fuzzy thinkers of all persuasions, it might come as something of a shock to them to learn that so many Red men leaned more toward the gray than the blue, and many held slaves. After the war ended, however, these Indians, like the people of the South, had to be "reconstructed."

By Frank Jackson

Between 1865 and 1877, every state that seceded from the United States of America was brought back into the fold. With some states, the process was relatively brief. In others, it was protracted. In some, it was relatively peaceful. In others it was violent. While this process was grinding away in the former Confederate states, the U.S. federal government also paid a great deal of attention to the Indian Territory, a region today better known as Oklahoma.

The government could not offer a return to statehood to the denizens of the Indian Territory, since such a status had never existed. Occupation by U.S. troops had been the norm before the Civil War, and their return after the war was not as irksome as it was in the seceded states.

While conflict between Indians and Whites had been a fact of life from the late 15th through the 18th centuries in America, by the 19th century, it was obvious that the latter would prevail. Their numbers were growing, and their technology was superior. It was simply a matter of time before Manifest Destiny manifested itself.

Chief John Ross, who was one-eighth Indian, served as principal chief of the Cherokee nation from 1828 to 1866, a tumultuous time for all of the "five civilized tribes."

Anticipating eventual relocation of Indian tribes, Fort Gibson, near present-day Okmulgee, was established in 1824. Andrew Jackson, who took office in 1829, advocated the relocation of all Indians living east of the Mississippi River. Actually, the preferred term in those days was not "relocation" but "removal," a rather stark but accurate term, though not as colorful as the latter-day term of "ethnic cleansing."

The Indian Removal Act was signed by Jackson on May 28, 1830. Through a series of treaties, the uprooted tribes were compensated for their land in the southeastern United States.

The treaties, however, were suspect since the Supreme Court ruled on March 1, 1831 that Cherokees were "domestic dependents" and not a foreign nation. In that respect, any treaty, by definition, would appear to be invalid. Nevertheless, the U.S. federal

Above, Gen. Douglas H. Cooper, head of Confederate forces in the Indian Territory. Before the war, Cooper had been an Indian agent for the Choctaw and Chickasaw tribes, and led a united militia of those tribes against hostile Comanches.

Gen. Stand Watie is shown surrendering his sword to Lt. Col. Asa Matthews at Doaksville, Oklahoma, 1865.

government picked up the tab for the abandoned real estate, improvements and the actual move. The deal involved the acquisition of approximately 100 million acres east of the Mississippi at a cost of 32 million acres west of the Mississippi and $68 million.

The purpose of the territory was to provide a homeland for Indians who were deemed unassimilable, even though they had learned enough of the White man's ways to be dubbed "the Five Civilized Tribes." The Seminole, Cherokee, Choctaw, Creek and Chickasaw tribes were uprooted en masse and moved to a large area west of the Mississippi, north of Texas and south of Kansas that was labeled "Indian Territory."

In all, some 45,690 Indians were relocated during the two terms of Jackson's presidency, though some renegades stayed behind in the Southern states and took to the wilderness where they could live off the land with relatively little chance of being identified and captured.

The Cherokees, led by John Ross, were the last to relocate. Having attempted to "work" the federal legal system to avoid removal, the Cherokees finally succumbed in October 1838 (during the Martin Van Buren administration). Approximately 17,000 were rounded up into a proto-concentration camp before beginning their 800-mile journey, better known today by mainstream historians as the Trail of Tears, to their new home.

Despite the hardships of the journey, by the dawn of the Civil War, the survivors were well established in the Indian Territory—and arguably enjoyed more liberty and prosperity than they would have had they remained in the Southeast. Though the land was sparsely populated (approximately 53,000 Indians, 3,000 Whites and 8,376 Black slaves in 1860), the Indians built schools, farms and churches and established governments. The Indian Territory had plenty of Confederate and Union sympathizers—and some who changed sides during the war—as well as a goodly number who thought neutrality was the best policy. Was the squabbling about slavery, after all, a disagreement among White men?

In many respects, loyalties in the Indian Territory were not terribly different from those in the border states of Kentucky, Maryland and Missouri. The main difference was that the Indian Territory was not a state and the dominant race was not White. Given their treatment at the hands of the U.S. government, as well as by the state governments where they had previously resided, it was perfectly understandable that many Indians would adopt a "plague on both your houses" attitude.

But some of the "Indians" who had been removed were as much White men as they were Red men.

Many had slaves of their own, which they had taken with them to the Indian Territory. In truth, the five tribes traced their roots to Southern states. Not surprisingly, the pure-blooded Indians were most enamored of traditional ways. The entrepreneurial class—the farmers, businessmen and landowners—were more likely of mixed blood and were more likely to own slaves, and hence more likely to favor the Confederacy.

As was the case with Southern Whites, most Indians were not slaveowners, and those who were owned but a few. For example, the Chickasaws, who numbered about 5,000 in 1861, owned 1,000 slaves, but only 200 Chickasaws were affluent enough to own any. A relatively small number of Indian "aristocrats," such as Cherokee Chief John Ross, owned large numbers of slaves.

Most "Southern" of the tribes were the Chickasaws and Choctaws (these two tribes owned approximately 60% of the slaves), whose homeland was in the southeastern corner of the territory, sandwiched between the seceded states of Texas and Arkansas.

Southern sympathy was strongest in this part of Oklahoma because "Rebel" influence was closest. Even after the war, Southern culture and morés were consciously promoted in southeastern Oklahoma. Even today, this region is still sometimes referred to as "Little Dixie." The town of Atoka has a Confederate memorial museum and cemetery, and the Atoka County Historical Society hosts periodic reenactments of the Battle of Middle Boggy, which occurred near Atoka on February 13, 1864.

By contrast, the Indian tribes in northern Oklahoma were as divided as the nearby border states of Missouri and Kansas. The Seminoles and Creeks were pretty much split down the middle. The Creeks, for example, sent 1,675 men to the Union Army and 1,575 men to the Confederate Army. The Cherokees were mostly loyal to the Union, with an estimated two-thirds of their number fighting on the Union side.

That so many Indians leaned toward the Confederacy could have been due to abandonment by the Union. Once the war started, Lincoln pulled the troops out of forts Washita, Arbuckle and Cobb for the battles to come farther east. Annuities for tribal government and schools were halted to make sure the money wouldn't fall into Rebel hands. Once the federal presence abated, the Confederacy filled the vacuum, as President Jefferson Davis sent in agents (most of whom had previously worked for the Union in similar capacities) to work out treaties with the five tribes.

Perhaps the best known of these agents was the mercurial Albert Pike, whose biography lists teacher, poet, lawyer, planter, journalist and explorer as his professions. Today, Pike is probably better known for his book on Freemasonry, *Morals and Dogma of the Ancient and Accepted Scottish Rite of Freemasonry*, and his role with the Ku Klux Klan in Mississippi during Reconstruction. As a Confederate general, the Boston-born Pike trained Indians to fight for the South and led them on the battlefield—though without any notable triumphs.

Confederate Gen. Albert Pike trained Indians to fight for the South and led them in battle.

The Indian Territory's importance to the war effort lay in its productivity—grain, beef, hides, horses, oxen, salt and lead—which eventually drew the Union forces back to the region. Though Confederate Indians had secured the Indian Territory by late 1861, the following year saw the tide turn back to Union forces, culminating in their victory at Honey Springs on July 17, 1863. Union soldiers solidified their hold on the Indian Territory, and the Confederate Indians then resorted to guerrilla tactics through the duration of the war.

The Cherokee Mounted Rifles, who served in more battles west of the Mississippi than any other unit, were led by a charismatic native general, Stand Watie, who was so adept at guerrilla warfare that he became known as the "Indian Swamp Fox," after Francis Marion, the Revolutionary War hero. Watie also had the distinction of being the last Confederate officer to lay down his arms,which he did at Doaksville on June 23, 1865.

Though none of the storied battles of the war had been fought in Oklahoma, the Indian Territory did not avoid the destruction that was visited upon the Southern states. As in the states, the conflict absorbed almost all able-bodied men. No matter which side the Indians fought on, there was little to come home to after the war.

The Indian Territory had as many widows, orphans and derelict farms as any Southern state. One estimate held that 300,000 head of cattle had been driven off.

Of the 3,530 Indians who fought on the Union side, 1,018 of them had been killed. The total dead can only be estimated at approximately 33% of the Indian population.

But "help" was on the way. The U.S. government had been looking for an excuse to wriggle out of previous treaties. As with the aftermath of the War of 1812, when Indians had allied with the British, the United States decided that such an action was enough to nullify all existing treaties. So, on July 5, 1862, Congress abrogated all treaties they had entered into with the Five Civilized Tribes.

By war's end, the Indian Territory was of particular interest to the federal government for a number of reasons.

First of all, the government needed a dumping ground for Indians from Midwestern states who had been removed to make way for White settlers. In Kansas, Nebraska, Michigan, Wisconsin and Minnesota, White settlers were flooding in and Indians were

shuttled out. Also, the railroad industry barons, aching to push westward, needed a legal way to extend their empires across Indian lands.

On September 8, 1865, a council opened at Fort Smith, Arkansas, the closest federal court to Indian Territory. Delegates from the Five Civilized Tribes (as well as representatives from the smaller numbers of Osage, Seneca, Shawnee, Wyandot and Quapaw Indians who lived in the territory) who had all officially surrendered were present.

Representing the federal government were Commissioner of Indian Affairs Dennis N. Cooley, Chief Clerk of the Indian Office Charles E. Mix, Superintendent of Fort Smith Elijah Sells, Pennsylvania Quaker Thomas Wistar, Gen. W.S. Harney and Seneca Indian Col. Ely S. Parker. Behind the scenes, one of the most influential government figures was James Harlan, who President Andrew Johnson had named secretary of the Interior. As a Kansas senator, he had promoted removal of Indians from Kansas.

The negotiations were basically one-sided. The government informed the Indians of Congress's 1862 decision to nullify the old treaties and that new ones would have to be hashed out. The Indians reasoned that the dissolution of the Union had absolved them from their old obligations. Legally, this might have been tenable but, realistically, it was superfluous. The Union had won the war, so the federal government was holding all the cards.

The Indians were basically forced to accept the return of territorial government by the United States—but with less territory. The Five Civilized Tribes were given the eastern half of the territory, while the western half was given to Indians who were removed from other states. They were ordered to consolidate their tribal governments into one territorial entity. They were ordered to allow the construction of railroads through the state. They were ordered to abolish slavery (but since they were in a territory, they had nothing to say about

THE CHOCTAWS IN THE CIVIL WAR

Top: Choctaw men shortly after the American Civil War. Their dress typifies the appearance of Choctaw Nation soldiers, most of whose regiments had no standard uniform. Below that is shown a photo of members of Thomas's Legion, Cherokee Nation, who attended a large Confederate Reunion in 1903 in New Orleans. The Indian Territory was hit hard by the war, as was all of the South. For instance, the Trans-Mississippi Theater saw Indian settlements reduced to rubble. Few people realized American Indians were so involved in the war until 1900, when Mississippi Choctaw Samuel G. Spann popularized the topic in a widely distributed book about his wartime experiences.

The Sequel of Appomattox:

A Chronicle of the Reunion of the States

By Walter L. Fleming (1919)

When the armies of the Union and the Confederacy were disbanded in 1865, the war really didn't end. Surviving Confederate soldiers came straggling back home. Everywhere were widows, orphans, destroyed property, the labor system disorganized, White people demoralized, and the land devastated. The accumulated capital of the South was gone. The banks had failed, factories burned, the mining industry paralyzed and schools razed to the ground. Our story begins after Gen. Robert E. Lee's surrender at Appomattox and goes on to address these questions and more: Were abuses by the Union occupational forces tolerable? How did Freedmen treat disenfranchised Whites? What kind of terrorism was waged by Radical Republicans and the Union League? What, exactly, were carpetbaggers and scalawags doing? This is an excellent generalized overview of the Reconstruction-era South and the harsh, vindictive misrule of those who imposed an unjust, unconstitutional peace—by their own private admissions—on the vanquished states. Reprint. Softcover, 322 pages, #989, **$21** minus 10% for TBR subscribers plus $5 S&H inside the U.S. from TBR BOOK CLUB, P.O. Box 550, White Plains, MD 20695. Call 1-877-773-9077 toll free to charge, Mon.-Thu. 8-4 ET.

the ratification of the XIIIth Amendment) and to admit freed slaves to full tribal rights or give them compensation in land. Tribal lands were sold, and the proceeds were used to settle freedmen on their own farms. This rather questionable practice was upheld as constitutional by a Supreme Court decision in 1904.

In fact, Commissioner Cooley's language even sounded very "great White fatherish": "The president is willing to hear his erring children in extenuation of their great crime," he pontificated. The ex-Confederate Indians were recalcitrant enough to slow down the proceedings. The treaty was not formalized until April 28, 1866 in Washington.

The end of the war, however, did not mean that the conflict was over. Within each tribe, the split between Yankee and Confederate sympathizer created internecine friction for generations. Michiganders fighting Mississippians had been bad enough, but at least they could go their separate ways after the war. Cherokees who had fought Cherokees had no such refuge. The Southern-leaning Chickasaws and Choctaws blamed the Blacks for the South's defeat.

Even so, Reconstruction—if that term can be applied to a non-state—was rapid in the Indian Territory. The strategic location spurred economic development, which largely languished in the former Confederate states. Sitting at the crossroads of the continent, the Indian Territory was an appealing location, not just to the railroads, but to Texas cattlemen, who drove their herds northward through Oklahoma along the great cattle trails.

Some fees were realized by Indian land owners who rented out their property for grazing privileges to the cattlemen. Raw materials—timber and mining—were important for the growth of the nation. All of these enterprises brought more money into the Indian Territory—but they also brought more White men, as did the famed Great Land Run of 1889 and the opening of the Cherokee Strip (along the Kansas border) in 1893.

The first oil well—perhaps the most significant harbinger of things to come in the 20th century—was drilled in Bartlesville in 1897 by Frank Phillips, founder of Phillips Petroleum. Statehood beckoned, though Oklahoma was not formally admitted to the union as the 46th state until 1907. It was the last chunk of real estate acquired in the Louisiana Purchase—more than a century before—to become a state.

Today there are at least 60 different tribes (only a few are indigenous) represented within the state's Indian population. Their political influence is negligible, but Indian imagery still plays a big part in the state's tourist literature.

While the federal government was going about the business of dispossessing Southern Whites after the war, the Indians of the Five Civilized Tribes could claim "been there, done that." But a case could be made that they fared better than Southern Whites during Reconstruction. Either way, the history of the Indian Territory shows that the ill effects of the American Civil War plagued not only Northern and Southern states, but the territories, as well. ❖

A Short History of the Confederate States of America

Written by the man who was at the very center of the C.S.A. and who held its highest office, this remarkable history written by Jefferson Davis tells the story of the rebel republic from its very beginning to its bitter end. It is not an exhaustive story of the War between the States, but rather the events of those times as experienced by Davis. The author deals with the fundamental questions which caused the rupture: the issue of states' rights, slavery and the usurpation of the U.S. Constitution. Although he denies that slavery was the real cause of the war, he does readily admit that the constitutionally guaranteed right of individual states to practice slavery was the fundamental constitutional issue over which the division came. The author shows that the Confederacy was adhering to the actual letter of the original U.S. Constitution, and this was doubtless an important reason why he was never brought to trial, as opponents feared he would prove this point in court.

The majority of the book then describes the tumultuous events from 1861 to 1865 as he experienced them: the decision to open hostilities, the total unpreparedness of the South for a war of any sort, the reports from the front lines of the decisive turning point battles, and much more. Along the way he deals with many of the long-mythologized aspects of the Confederacy: the use of Black slaves to fight for the C.S.A., the truth behind the so-called Fort Pillow Massacre, the agonizing wartime decisions and much more.

An extremely valuable historical document for anyone interested in a first-hand account of the C.S.A. from the president himself. Although titled a "short" history, it is anything but. Now completely reset in crystal-clear text with 203 brand new footnotes and annotations explaining personalities and events to the present-day reader plus 67 new and ultra-rare illustrations and photographs. Softcover, 552 pages, #921, *$26* plus $5 S&H inside the U.S. from TBR, P.O. Box 550, White Plains, MD 20695. The Civil War and the Crusade Against Nazi Germany, 1939-45: Some Noteworthy Parallels

THE AMERICAN CIVIL WAR and World War II—the war to destroy Germany—were nearly 80 years apart and fought in two different hemispheres. Close examination of these bloody conflicts reveals remarkable parallels that have been lost to historical memory.

By Charles E. Weber, Ph.D.

During September 23-27, 1990, the Public Broadcasting System (PBS) transmitted an 11-hour series on the American Civil War of 1861-65. There seems to have been a considerable interest in the series. It was well documented and of considerable merit with regard to cinematography. To give an appearance of balance, a White author with a strong Southern accent was often used as a commentator, while a Black female historian was rather frequently to be seen on the screen.

There were a good many sequences that dealt with the role of Blacks in the Union Army. Indeed, they were probably given a disproportionate amount of attention. A sensitive, patriotic American must have found the film sobering and even depressing, for it showed clearly the stark tragedy of the war, both in terms of blood and treasure.

Much time was devoted to the suffering of the wounded and even to the medical techniques of that time used in their care. Many of the illustrations, largely derived from photographs, could be described as depressingly gruesome, but they were depictions of the reality of war and were quite properly included.

"BIRTH OF A NATION"
Poster featured KKK rider.

The greatest lack of balance in the series was a result not of what was shown but rather the absence of a treatment of the postwar period, notably the absence of detail about the "Reconstruction" that followed the war, a kind of continuance of the war by other than military means for a decade or so after 1865, a topic effectively and dramatically presented in one of the greatest of all American films, *The Birth of a Nation* (1915).

This film made such an effective use of motion picture techniques at the time that it is still fascinating viewing. It portrays the aftermath of the most costly war in American history—a war that involved a greater loss of military personnel than all of the other wars fought by the United States combined, and fought when the population of the country was far smaller than it was in 1917 or 1941. To have given real balance, PBS should have followed the series with a showing of *The Birth of a Nation*.

In spite of the depressing nature of the series, this writer viewed it carefully. My paternal grandfather, who was born in Baden, Germany and migrated to this country as a boy, was a member of the 57th Ohio Volunteer Regiment and was wounded at the Battle of Kennesaw Mountain west of Atlanta in 1864. My maternal grandmother, born in 1853, was terrorized by Brig. Gen. John Hunt Morgan's raiders in Brown County, Ohio.

As a participant in World War II and a student of its history, I could not avoid noting the rather many parallels between the American Civil War and World War II, at least in the case

of its European phase.

Both the Civil War and World War II persist in being active factors in the American mind. The terrible destruction of the Civil War and the sadistic "Reconstruction" that followed are still a psychological reality for Americans nearly 160 years after 1865. This is particularly so for Americans who grew up in the former Confederate states, even though there were some attempts at reconciliation during the 1920s and 1930s, and even though the last veterans of the Civil War have been dead for nearly 70 years.

The awareness of World War II is kept alive in the American mind not only because a portion of its veterans are still alive, but because various aspects of the war, notably the suffering, real or imagined, of the Jews in Europe is constantly being employed for the attainment of various objectives. Many public schools provide for courses that deal with that particular aspect of the war, as if the suffering of hundreds of millions of Europeans and half-a-million American soldiers was of relatively little importance.

Several wars fought by the United States were supposedly fought for the benefit of non-Whites. This is true of both the Civil War and World War II. One was fought allegedly to free Black slaves and the other allegedly for Jewish freedom from "death camps."

At least two other major wars fought by the United States were supposedly fought to defend non-White countries, namely those fought in Korea and Vietnam.

Considerable gains were made by the races for which the Civil War and the war against Germany were fought at the cost of huge amounts of White blood. The need to rationalize psychologically the costs of these wars and the cruel treatment of brother peoples during and after them has been of immeasurable social, economic and psychological advantage to both Blacks and Jews. The change

At top is a photo of Dresden, Germany after the Allied firebombings of 1945. Dresden, and dozens more German cities, were, in effect, burned to the ground, more as a psychological terror weapon than for pure strategic military benefit. At bottom is a period illustration titled "Destruction of the Depots, Public Buildings and Manufactories at Atlanta, Georgia, November 15, 1864" from *Harper's Weekly Magazine*, January 7, 1865. Sections of Atlanta and other Southern cities and plantations were completely destroyed for no other reason than to make the civilian population suffer.

of status and increase of power of Jews since 1945 is, quite frankly, incredible. Whatever wrongs Jews might commit are now countered by mention of "Jewish suffering" during World War II and charges of "anti-Semitism" whenever the slightest, logical, factual criticisms are made.

Economic envy seems to have been an important factor in the causation of both wars—the envy of New England abolitionists of the wealth of Southern plantation owners, and British envy of the economic success of National Socialist Germany.

In an ethnic sense, both the European phase of World War II and the Civil War might well be described as fratricidal or even racially suicidal. Germany, England and the United States had populations that were largely Germanic and Keltic. (Many localities in Germany still bear Keltic names to this day.)

Neither the Civil War nor the American participation in the war against Germany (which had started as a naval war quite some time before the Japanese attack on Pearl Harbor) was necessary or beneficial for White nations. Without the Civil War, the Union and the Confederacy could have lived in peace, with customs and monetary unions that would have incurred no economic disadvantages to the two nations. Southern states had a right to withdraw from the Union if they so desired.

Many years ago, in the huge capitol building in Austin, Texas, I noticed a display that contained documents demonstrating that Texas had a legal right to withdraw from the Union. Several years ago, that display was placed in an inconspicuous location or removed, I am not sure which.

During the Civil War, the Confederate states made attempts to negotiate peace with the Union, just as German leaders attempted to negotiate a peace with England, including the famous flight of Rudolf Hess to Scotland on May 10, 1941 after German intelligence became aware of Josef Stalin's military preparations for an advance into eastern Europe. Finally, in an address to

Why was Abraham Lincoln so desperate to keep the Southern states from seceding, which—many scholars insist—was their legal right under the U.S. Constitution?

National Socialist party leaders in November 1941, Hitler declared that he had ceased his attempts to negotiate peace because they would only be taken as a sign of weakness.

In general, Abraham Lincoln's conduct of the war was uncompromising toward the Confederacy. It must be assumed that he knew very well about the conduct of his troops during Gen. William Tecumseh Sherman's March to the Sea. [TBR September/October 2017.—Ed.] At the Hampton Roads Conference on February 3, 1865, Lincoln demanded, in effect, the unconditional surrender of the Confederacy, just as unconditional surrender was demanded of the anti-Comintern powers by Franklin Roosevelt and Winston Churchill in January 1943.

This was an irresponsible act that no doubt prolonged the war and made it more costly for both sides. One can hardly escape the impression that Roosevelt and Churchill, as well as Lincoln, derived considerable personal gratification from their roles as wartime leaders, and that they were not eager to end their roles as such.

At the end of the war, Confederate paper money and bonds became worthless. (See Arlie R. Slabough, *Confederate States Paper Money*, Racine, 1958.) The Reichsmark sank to such low levels of value that a package of cigarettes brought over 100 Reichsmarks on the black market before the Deutschemark was finally introduced in June 1948, which the Soviet Union used as a pretext to start the blockade of Berlin.

Both the Confederacy and Germany made attempts against overwhelming odds to change the course of the war by the introduction of radically new types of weapons. The Confederacy attempted to break the Union blockade with ironclad naval vessels and the development of submarines, while Germany pinned its hopes on the development of ballistic rockets, called *Vergeltungswaffen* (retribution weapons). Experience with these rockets helped put Americans on the Moon exactly 25 years later to the day after the attempted assassination of Adolf Hitler of July 20, 1944.

In both wars, blockades played important roles. Both the Confederacy and Germany had decidedly inferior naval forces at the outset of the war. Enemy blockades resulting in food shortages which helped ensure the defeat of the Confederate states and Germany—and made civilians suffer.

The last desperate counteroffensive by Germany (the Battle of the Bulge) took place under the command of Field Marshal Gerd von Rundstedt in December 1944. This counteroffensive had some parallels to the desperate and daring attempt of Gen. John Bell Hood to revive Confederate fortunes by attacking Sherman's rear late in 1864, almost 80 years earlier to the day.

There are also some parallels in the treatment of POWs. Conditions under which prisoners of war were confined both in the Confederacy and

the Union were often terrible, and the number of deaths in the prisons was considerable, especially from dysentery. In the final phases of World War II, a lack of food, medication and the opportunity to transport them led to rampant epidemics, especially of louse-borne typhus, throughout the German concentration camp system.

In both wars, disease and malnutrition took heavy tolls. However, nearly all American soldiers taken prisoner by German forces survived the war (in contrast to those taken by the Japanese), but, after the war, huge numbers of German prisoners died in Allied prison camps as a result of inhumanely bad conditions, as described in James Bacque's important book *Other Losses* (Toronto, 1989). Bacque proved Gen. Dwight D. Eisenhower was responsible for the deaths of as many as 2 million German soldiers and non-combatants.

After some initial victories, both the C.S.A. and Germany fought largely defensive actions in order to retain their territories. Both wars might be described as wars of attrition after their initial phases. In addition, their populations were far smaller than those of their adversaries.

The wanton destruction of Southern estates and cities, especially in Georgia, without any military objectives has a striking parallel with the destruction of Dresden and other German cities in spring of 1945. These bombings resulted in an enormous loss of life which has never been ascertained with absolute certainty. Dresden, for instance, was full of civilians who had fled the terror of the Red forces advancing into East Prussia and Silesia. Atlanta was set on fire even after it was captured in September 1864.

By the end of the wars, the Confederate and German governments retained only remnants of the territories that they had held. The final defeats of the Confederacy and Germany took place in springtime.

After both the Civil War and World War II, the victorious powers attempted to bring about changes in the thinking and way of life of the defeated populations, namely by "Reconstruction" after the Civil War and by "re-education" and "de-Nazification" after World War II.

Following World War II, the American government abandoned legal principles honored in Europe since ancient times and embodied in the U.S. Constitution (e.g., *nulla poena sine lege* [no punishment without law]) in order to collaborate with the Soviet government in the show trials in Nuremberg. On trial were 23 leading figures of the defeated German government, of whom 10 were hanged in 1946.

To his eternal credit, Sen. Robert Taft of Ohio protested against these trials.

After the Civil War, Jefferson Davis was jailed, and the commandant of Andersonville Prison was hanged on November 10, 1865. (For details, see the January-February 1989 issue of *Confederate Veteran*, 22-31, "The Trial of Henry Wirz: A National Disgrace.")

We referred above to economic envy as a causative factor in both the Civil War and World War II. Postwar behavior of the victors had a strong tendency to confirm the importance of the economic factor. The exploitation of the Southern states by means of tariffs unfavorable to the South was continued for almost 80 years after the war. (See *The Journal of Historical Review*, VII, 3, 330.) Likewise, the economic objectives of the war against Germany were demonstrated by postwar Allied policies. German goods were kept off world markets by dismantling factories (continued for about five years), and by causing a considerable paralysis of the German economy by delaying a currency reform until 1948. ❖

Dr. Charles Weber, a highly respected Revisionist historian who produced a wide-ranging variety of original published papers, has also been responsible for providing numerous excellent translations of rare foreign works never before available in the English language. He was also the author of *The Holocaust: 120 Questions and Answers*, no longer in print.

TWO BOOKS ON RECONSTRUCTION

Ousting the Carpetbaggers from South Carolina

By Henry T. Thompson (1926)

South Carolina had been stigmatized as "the nest wherein was hatched the snake of Secession," and it was the purpose of Reconstruction to mete out retribution upon her people and to ensure victory for the radical portion of the Republican Party. Thus, at the point of the bayonet, a condition developed without parallel in history—the best and noblest citizens of the state were subjugated to a position of inferiority to their former slaves. This book is a history of the political revolution of 1876 in which South Carolinians, led by Gen. Wade Hampton and his Redshirts, united to throw off the oppressive yoke of "Carpetbagger" government and halt unquenchable Black revenge. Reprint. Softcover, 182 pages, #990, **$21** minus 10% for TBR subscribers.

The Day Dixie Died

The Occupied South 1865-1866

By historians Thomas and Debra Goodrich. Starting with the assassination of Lincoln, the authors trace the history of Reconstruction, the death, destruction, crime, starvation, exile and anarchy that pervaded those terrible years. Few books give you the actual truth about this period in time, but this one does—in graphic detail. Many photos. Softcover, 320 pages, #273, **$22** minus 10% for TBR subscribers.

S&H not included. Inside the U.S. add $5 for one or both books. Order from TBR, P.O. Box 550, White Plains, MD 20695 or call TBR toll free at 1-877-773-9077 to charge, Mon.-Thu. 8-4 ET.

There's No Place Like Home: Reflections on the South

"The South is a land that has known sorrows; it is a land that has broken the ashen crush and moistened it with tears; a land scarred and riven by the plowshare of war and billowed with the graves of her dead; but a land of legend, a land of song, a land of hallowed and heroic memories. To that land every drop of my blood, every fiber of my being, every pulsation of my heart, is consecrated forever. I was born of her womb; I was nurtured at her breast; and when my last hour shall come, I pray God that I may be pillowed upon her bosom and rocked to sleep within her tender and encircling arms."

—U.S. Sen. and Tennessean Edward Ward Carmack

By James Edwards

It was a beautiful spring morning in 2007 when I walked out the front door to find a limousine waiting in my driveway. It had been sent by CNN. The network had arranged first-class car and air transportation to New York City, as well as posh hotel accommodations in Central Park, for what would be the first of a series of appearances that I would make for them as a television commentator. On that night, I was being brought on to participate in an hour-long panel debate about self-segregation.

Primetime. Live. 8:00 p.m. EST; their most popular show at the time. Back in those days, I was still introduced simply enough as a conservative talk radio host.

After it was over, my driver asked me where I wanted to go, so I asked him to take me to Times Square. I still vividly recall more than 15 years later walking to a restaurant in Manhattan and thinking about the red dirt hills of Pontotoc County, Mississippi. I don't know why the birthplace of my maternal grandparents came to mind in that moment, but the thought was warm and comforting. I'd have much rather been there.

EDWARD WARD CORMACK

That might sound strange to some people who can't understand our unwillingness to abandon our customs, folkways and symbols. But this is who I am and it's personal. I cannot be separated from it, and I want my three children to cherish our Southern heritage and love the land from whence we came as much as I do. In fact, I make a point to take annual day trips with my family to visit the rural Southern towns that gave birth to their great-grandparents. The first thing we do upon any given arrival is visit Confederate Square to see the beautiful monument that is proudly featured at its center.

There are hundreds of such monuments that serve as the heart of town and county squares across Dixie, but, in Pontotoc, the inscription reads, "Love's tribute to the soldiers who marched beneath the stars and the bars and were faithful to their duty, this monument is erected in grateful remembrance." The front simply reads, "Our Heroes: 1861-1865." The sentry atop the monument stands faithfully on his eternal watch.

I never feel more at peace than when I am there. Life moves at a

slower pace. There is an almost otherworldly calm that comes from talking with the rural townspeople and eating dinner at one of the family-owned diners before visiting the town museum, which is free of charge and located inside the small post office.

After spending time in town, we make the 10-minute drive over to the community of Thaxton, which is essentially comprised of just a handful of buildings: a town hall, a small grocery store with a single gas pump, and a couple of churches. I am extraordinarily proud of my family's history and way of life. I am always taken back to my childhood when I revisit the tiny community center at which so many of our reunions used to be held, before so many of my kin went on to receive their heavenly reward. The place still looks as it did in some of my earliest memories. The 1950 senior class photo of my grandmother remains hanging on the wall. There is a basketball court with wooden backboards that hover over the same floor that my grandfather played on so many decades prior. There is something bittersweet and endearing about visiting a place where time stands still. It puts my spirit at ease.

My grandparents, who were born in Thaxton before moving to Memphis to find work, were the children of poor sharecroppers. They themselves also picked cotton before and after school. During the winters, my grandfather huddled with his brothers and sisters while they slept to stave off the cold. He told me stories of being able to see the stars through the roof of their ramshackle house. The world would have me believe that this is White privilege.

There is no virtue in poverty, but there is in sacrifice and hard work. This generation engaged in harder work than I have ever known, which is just one of the reasons I take great pride in being able to visit the land that they farmed before paying

Shown is the monument to Confederate soldiers in the center of Pontotoc, Mississippi. A full-length figure of a uniformed Confederate soldier stands atop a tiered base on a four-sided shaft. Facing west, the figure holds his rifle in front of him, butt on the ground, hands on the barrel. Decorative reliefs on the column include a waving Confederate flag and a dove flying downward with an olive branch in its mouth. Inscriptions on the monument include: "Love's tribute to the soldiers who marched beneath the Stars and the Bars and were faithful to their duty, this monument is erected in grateful remembrance" and "Our Heroes: 1861-1865."

respects at the graves of my great-grandparents. Even though my children can never know them, it means so much to be able to teach them about who they were and raise them in the same traditions and ethics that were handed down to me.

These were great people who left a legacy, and it is vitally important to me that my children be raised to love one another and their ancestors. A deep reverence for our people is fundamental, and my wife and I have instilled it in each of them since birth. Sons and daughters of the South are never too young to learn about heroes, especially the ones in our own family tree who fought for the Confederacy. To be directly descended from this line of brave and fighting Christian men is a patrimony that is worthy of preservation and honor.

Yes, the South was right, but so, too, have others been throughout history. It's not simply the right and the wrong that compels me to stand for my people. It's the birthright of having blood in my veins that flowed from the last group of men who fought that way on this continent. Now that's something special.

I thank God for having seen fit to allow me to come into this world as a Southern man, and to have been born and raised in Dixie. What is love if not sacrificing for your family and standing at the ready to defend their honor?

I routinely hear friends and acquaintances mention the high-ranking Confederate officers in their lineage. So much so that I often joke about being descended from the only private in the Confederate army. On my paternal side, my great-great-great-grandfather was a private in Mississippi's 4th Cavalry Battalion. As a young boy, my parents would regularly take me to visit that set of great-grandparents in Corinth, Mississippi. I was even lucky enough to have seen the blood-stained saddle that belonged to my heroic ancestor so many years prior.

It was from Corinth that he marched to Shiloh. During that legendary battle, he shared the field with one of Dr. Michael Hill's ancestors, the longtime leader of the League of the South.

I got my start in politics by working on Pat Buchanan's presidential campaign in 2000. Years later, Buchanan shared with me a story about one of his own great-great-grandfathers. Cyrus Briscoe Baldwin was a first lieutenant in the 31st Mississippi Infantry. He lived in Okolona, Mississippi, and died in service on June 26, 1862. Okolona is situated practically within walking distance of both Thaxton and Corinth. Hill once remarked to me during a radio interview that his ancestral memory was stirred the moment he first visited Scotland. I sometimes wonder whether those of us who are committed to keeping the flame alive aren't predestined to find one another during our lifetimes.

> "It is a feeling that only a Southerner can know, and it transcends time and space."

I was born 115 years after Gen. Robert E. Lee's surrender at Appomattox, and I tell you that my eyes swell with emotion whenever I hear "Dixie" being played, or when I read accounts of the gallant attempt those men made in their war to protect their loved ones from federal oppression and tyranny. It is a feeling that only a Southerner can know, and it transcends time and space.

Speaking of family, some years ago, one of my listeners mailed to me a copy of a letter sent by the comptroller of the state of Florida to his great-grandmother, who was, by that time (December 20, 1933), a widow. Her husband had been a Confederate veteran and the letter accompanied his pension check:

Mrs. Sarah [last name redacted]
December 20, 1933
Tampa, Florida

Dear Friend:

I consider it quite fortunate on my part in being selected as the official charged with the responsibility of mailing you the enclosed pension check. It is a rare privilege and a pleasure to forward you this token of appreciation of the great state of Florida.

I sincerely wish you and yours a very Merry Christmas and a surprisingly Happy New Year.

Personally, I feel the debt of gratitude owing you by the commonwealth of this state cannot be estimated in material wealth and, therefore, cannot be composed by mere payment of money. It is a liability that cannot be expressed in dollars; but it can be enshrined in the sacred archives of tradition; and by teaching the succeeding generations that, by your actions, experience and devotion to a sacred principle, you have proved that God does not force us into deep water to drown us, but to cleanse us.

And that adversity is the trial of principle without which one hardly knows whether or not he is honest; unless, like those who fought for the "Lost Cause," he is sorely tried, smelted, polished and glorified in the furnace of our tribulation. If we remain true to our ideals and steadfast to our principles, as exemplified by those who followed the "Stars and Bars," we are reminded that honor is likened to certain herbs and flowers; they send forth their most delightful odors only after they have been crushed and broken.

Therefore, we should, all of us, profit from the experience and example of you brave souls who have conquered discouragement and despair and have, Phoenix-like, risen from the dead ashes of destitution and want to the heights of honor, peace and tranquility.

May that One, in whose honor we observe Christmas, comfort and keep you.

Very Sincerely,
J.M. Lee
Comptroller

How could the world so ardently hate a people capable of composing such awe-inspiring sentiments? Jesus told us that, since they hate Him, they will also hate us. (John 15:18-25) But, most immediately, because the faith of our fathers makes us effective opponents of those who desire to enslave people to debt and to governance that does not produce societies fostering industry, accomplishment, justice, safety and courage—all of which are hallmarks of traditional Southern culture. If they can purge faith and family from our hearts, then it's only a matter of time before they can dominate and destroy us. With their toughest opposition out of the way, they can dominate the world.

However, when one is tethered to eternal truths you will feel the same willingness to sacrifice yourself for your people that Paul did: "For I could wish that myself were accursed from Christ for my brethren, my kinsmen according to the flesh." (Romans 9:3)

You'll feel the same imperative to protect your genetic line, as Abraham did when he told his servant, "But thou shalt go unto my country, and to my kindred, and take a wife unto my son Isaac." (Genesis 24:4) And you'll fear the displeasure of God, who said through Paul, "But if any provide not for his own, and specially for those of his own house, he hath denied the faith, and is worse than an infidel." (1 Timothy 5:8)

Now middle-aged, when looking back on my life up to this point, I grow more thankful each day that I was born into a family with a father and mother who raised me in church. I spent every weekend during the early years of my life either marinating on a pew or visiting relatives in the Magnolia State. The lessons learned in both places on those formative Sundays made me a better man and a more effective advocate.

Our lifelong pastor also played an important role in my development, and we are still dear friends to this day. It all still holds a special place in my heart, and I shudder to think what paths I might have taken had it not been for the solid foundation upon which my upbringing was built. I was very fortunate to have had the stability of a nuclear family, parents and grandparents who always let me know how much I was loved, the importance of our cultural and spiritual heritage and the difference between right and wrong. In this nest, I flourished. These are the communities and the homes that we seek to restore in the South.

By the time I reached adulthood, I knew that serving as an advocate for our people group—what I consider to be my extended family—bridges the gap between our distant ancestors and our future progeny. We fight for our past, present and future and such a connection gives our finite time on this earth fulfillment. How utterly meaningless the life of the average, vapid American consumer must be.

Even struggle can be animating and fulfilling. The attacks and defamations that we suffer should be welcomed because it builds character. As that letter I shared with you stated, without adversity you don't know whether or not you're honest. As a friend of mine recently opined, great men are never made except through great trials. Adversities aren't obstacles, but rather our greatest opportunities—to get better, forge our character, work harder, become smarter and prove our worth.

You won't know what you're made of until your time comes and you face a decision.

Our Southern forebears knew it all too well. When you face a challenge with steadfast resolve, you have honored your ancestors and solidified your standing as a man. The immortal words of Gen. Patrick Cleburne have oftentimes steeled my own resolve. As he put it, "If this that is so dear to my heart is doomed to fail, then I pray heaven may let me fall with it, while my face is toward the enemy and my arm is battling for that which I know to be right."

I'm not going to tell you that those who hate us are incapable of harming us. They can, and they do. They will libel you, slander you and even cause

Maj. Gen. Patrick Cleburne is remembered for his intelligence, courage and military acumen. He was also prescient. Shortly before the war began, he predicted:

> I am with the South in life or death, in victory or defeat. I believe the North is about to wage a brutal and unholy war on a people who have done them no wrong, in violation of the Constitution and the fundamental principles of government.
>
> They no longer acknowledge that all government derives its validity from the consent of the governed. They are about to invade our peaceful homes, destroy our property, and murder our men and dishonor our women. We propose no invasion of the North, no attack on them, and only ask to be left alone.

In regard to the catastrophe that would come from a Confederate surrender, Cleburne prophesied:

> Surrender means that the history of this heroic struggle will be written by the enemy; that our youth will be trained by Northern school teachers; will learn from Northern schoolbooks their version of the war; will be impressed by all the influences of history and education to regard our gallant dead as traitors, and our maimed veterans as fit subjects for derision.

Above, Cleburne is shown in a painting by M.D. Guillaume (1816-92).

you economic distress. But there is one thing they cannot take from you, and that is your dignity and self-respect—unless you put it on offer. As Davy Crockett once remarked, "Be always sure you are right—then go ahead."

We must never apologize or capitulate about things we know to be true to those who seek our destruction and ruin. We dishonor ourselves and bring shame to our name by shrinking from our duties during times of hardship. It should also be remembered that the sacrifices we must make pale in comparison to the sacrifice of blood and bone that were given by our betters.

One Southern woman, whose name is only remembered by God, gave such a sacrifice. On June 3, 1864, Robert Audry of Company B, 111th Illinois Infantry, mailed a letter to his father, describing some recent action his unit had seen.

> Dear Father,
>
> I take pen in hand to let you know that I am well. We are encamped near Dallas, Georgia, where we found the enemy in force on the 26th. The 111th was in the front line of the breastworks, and we drew a hot fire from the Rebs until about 4 o'clock when the enemy viciously charged our works. We poured hot fire into their ranks and several times their lines broke, but they rallied again and came on with guns blazing and flags waving. They fought like demons and we cut them down like dogs. Many dead and dying Secesh fell prisoner.
>
> I saw three or four dead Rebel women in the heap of bodies. All had been shot down during the final Rebel charge upon our works. One Secesh woman charged to within several rods of our works waving the traitor flag and screaming vulgarities at us. She was shot three times but still she came. She was finally killed by two shots fired almost simultaneously by our boys.
>
> Another SheDevil shot her way to our breastworks with two large revolvers dealing death to all in her path. She was shot several times with no apparent effect.
>
> When she ran out of ammunition, she pulled out the largest pigsticker I ever seen. It must have been 18 inches in the blade. When the corporal tried to shoot her, she kicked him in the face, smashing it quite severely. Then she stabbed three boys and was about to decapitate a fourth when the lieutenant killed her. Without doubt, this gal inflicted more damage to our line than any other Reb. If Bobby Lee were to field a brigade of such fighters, I think that the Union prospects would be very gloomy indeed, for it would be hard to equal their ferocity and pluck.
>
> Our regimental losses were about six killed and 10 wounded, including Lt. Col. Black, who was slightly wounded, I believe in the thigh. Please give my best regards to all inquiring friends and love to the family.
>
> Your Devoted Son,
> Robert Audry

W.E.B. DuBOIS
Pan-African activist.

Perhaps it was such a tale that led American sociologist, socialist, historian and Pan-Africanist civil rights activist W.E.B. Du Bois to famously write that, "Across this path stands the South with a flaming sword."

One thing I do know is that a man who refuses to defend his family's name is no man at all. How dare the vandals of multiculturalism assume that they can cast aspersions on our people and our folkways. Of course, having a separate culture from that of your surrounding geographical areas is the very prerequisite for being a separate nation. Still, to this day, the South does possess that, especially the rural South.

We still have unique traditions, faith, heroes, history and even our own suffering, which is especially important because a group of people that suffers together is bound together. Each component is essential to the uniqueness of the Southern nation. It's personal and, if you allow yourself to become separated from all of that, all the things that make you who you are, then you're already dead. You may be breathing. You may be going to and from work and performing various tasks. But that's not the same as being truly alive.

Thankfully, those who read *The Honorable Cause: A Free South*, from which this essay was reprinted, are not yet dead in either body or soul. *Dum spiro spero* from Latin reads, "While I breathe, I hope." I hope that our people will rise up and reclaim their destiny. I believe that we still can. Dixie and everything about her must endure for our posterity.

It's our home, after all, and there is no place like it. ❖

James Edwards is the host of *The Political Cesspool*, a syndicated AM talk radio program. When not interviewing newsmakers, Edwards is no stranger to making news himself, having appeared as a commentator many times on national television. Over the course of the past two decades, his groundbreaking work has also been the subject of articles in hundreds of publications around the world. Edwards' book *Racism, Schmacism: How Liberals Use the "R" Word* was published in 2010. In 2016, Edwards was listed by a well-funded leftist "media watchdog group" alongside Ann Coulter as one of the "Top 20 right-wing media fixtures" responsible for Donald Trump. Hillary Clinton later named him as an "extremist" who could shape our country. This article is from chapter one of *The Honorable Cause: A Free South* (softcover, 301 pages, #988, $25 minus 10% for subscribers plus $5 S&H inside the U.S.), now available from TBR Book Club.

Classic Historic Films in Remastered DVDs!

Hitlerjunge Quex (Hitler Youth Quex)

The year is 1931, and young Heini Volker has a problem. His unemployed father demands he joins Berlin's young Communists. But his heart belongs to the Hitler Youth. How Heini resolves this quandary is the story of *Hitlerjunge Quex*, a movie that became central to the moral instruction of young Germans in the Nazi years. Produced in 1933, *Hitlerjunge Quex* drew from the real story of Herbert Norkus, a Hitler Youth killed by Communist street-fighters in 1932. The film pulls few punches in its depiction of Depression-era misery. The film became a Nazi propaganda staple for years. Produced by Karl Ritter. Directed by Hans Steinhoff. Music by Hans-Otto Borgmann. Special features include: historical slide show, original promo materials, interactive scene selection, switchable English subtitles. NOTE: Distribution prohibited in Germany, Italy, Austria and France. B&W, 1933, 87 minutes, German dialogue, English subtitles, #1001, **$25**. (NTSC Region 0 encoding—entire world.)

Red Storm Over the Village: Frisians in Peril

"Nazi cinema's most venomous anti-Soviet propaganda film!" Few political films made during the Third Reich were accorded the distinction of being distributed by the Goebbels Propaganda Ministry. Peter Hagen's *Friesennot* (*Frisians in Peril*) was awarded that distinction in 1935. Peter Hagen was a film reviewer for Goebbels's newspaper and then joined the Propaganda Ministry. There, he became a leading film critic. *Red Storm Over The Village: Frisians in Peril* dramatizes the plight of peaceful Germans from Friesland who lived in an isolated village on the Volga in Russia for generations. Their bucolic existence is shattered by the invasion of a cavalry detachment of the Red Army. A brutal Red Guard rapes and kills a young village girl. Then, when drunken troops desecrate the village's house of worship, the outraged Germans revolt. Multiple special features. German, 1935, 96 minutes, English subtitles, #1002, **$30**. (NTSC Region 0 encoding—entire world.)

Diesel: The Life of Rudolf Diesel —Inventor of the Diesel Engine

This is the story of Rudolf Diesel, the German inventor who created an internal-combustion engine that conquered maximal thermal efficiency, but whose obsession almost killed him. Young Diesel (Willy Birgel) dreams of becoming an engineer. He builds an ammonia steam engine, but it fails to produce the power he seeks. Diesel knows the engine he envisions will revolutionize the world. Several patents later—and now financed by industrialist Heinrich von Buz—Diesel is allowed to test his ideas. Von Buz enlists the additional support of the Krupp firm. Diesel atomizes the fuel and it works, and it's almost three times as powerful as a steam engine. The picture ends on a jubilant note of victory, with an impressive montage sequence of tractors, trucks, airplanes, ships and submarines—all powered by Diesel's engines. Germany, 1942, B&W, German dialogue, English subtitles, 90 minutes, #1004, **$25**. (NTSC Region 0 encoding—entire world.)

Kolberg: The Restored 1945 Epic

Filmed over late 1943 and 1944, *Kolberg* drew upon the historical resistance of East Prussian townsmen against Napoleon in 1807 in arguing its case for total war against the WWII Allies. Its bone-jarring climax, showing Kolberg bombarded into rubble by French artillery, evokes Allied bombing raids across Germany at the time. Even as the Nazi regime was entering its last phases, it devoted lavish resources to *Kolberg*'s spectacular battle scenes, detonating tons of explosives and diverting thousands of soldiers from the front. Released amidst the chaos of 1945, *Kolberg* was shown in Germany's few still-intact movie houses. This new DVD edition features better subtitles, restored sound and restoration of the original color. Directed by Veit Harlan. Music by Norbert Schultze. Multiple special features. Color, 104 minutes, German dialogue with switchable English or Spanish subtitles, #1005, **$25**. (NTSC Region 0 encoding—entire world.)

Die Frontschau (The Front Show)

An amazing collection featuring nine films on one DVD! Nearly three hours long with new English narration track. Includes six never-before-seen films! One of the rarest cinematic documents to survive the war, Germany's "Front Shows" offer a unique perspective of Hitler's 1941 Russian campaign. Skillfully blending German frontline footage and captured Soviet combat film, the programs depict the German soldier in battle, on forced marches, building forts and shelters and coping with climatic hardships. Censored from the public, the features were shown to recruits to help prepare them for the realities of the east. Germany, 1940s, B&W, 158 minutes, English voice-over, #1006, **$20**. (NTSC Region 0 encoding—entire world.)

Disasters of the 20th Century

Here are the disasters, natural and man-made, that have marked our turbulent 20th century. In addition to dramatic footage from the San Francisco earthquake of 1906, the Miami hurricane of 1926, the eruption of Mount Saint Helens in 1980, and other natural disasters, you'll see the crash of the dirigible Hindenburg, historic fires, and other man-made disasters that have taken hundreds of lives. This program also includes film relating to the assassinations of Gandhi, the Kennedys and Martin Luther King, Jr. Color and B&W, 60 minutes, #1007, **$15**. (NTSC Region 0 encoding—entire world.)

Stephen Mallory, Ironclads and the Future of Maritime Warfare

THE CONFEDERATE NAVY SECRETARY knew the era of all-wooden warships was over, but was there time for him to modernize the C.S.A. Navy before it was too late?

By Marc Roland

Prospects for victory did not seem particularly favorable when Stephen Mallory took his place as the Confederate States secretary of the Navy, shortly after the opening of hostilities, on April 12, 1861. For the previous 10 years, he had been chairman in Washington, D.C. of the Committee on Naval Affairs, where his expertise and foresightedness in warship modernization won accolades from fellow senators for his well-informed determination to upgrade the U.S. Navy. As an advocate of sea power, Mallory was certainly the best man for the job. But the resources available to him were wholly inadequate.

Against 90 Union vessels, the Confederate States Navy possessed only a third as many. And, of these, just 14 were seaworthy. Although Mallory eventually increased this number to 101 ships, he realized they could never achieve numerical parity with the outproducing Yankees. Their coastal blockade was steadily reducing Southern commerce to 5% of its prewar levels, while enemy control of inland riverways and coastal navigation continuously overloaded the Confederacy's limited railroads to a point of near collapse. The situation was rendered especially hopeless by far too few and smaller shipyards for construction and repairs in the South.

Only a few days after his appointment, however, Mallory's seemingly irredeemable predicament was miraculously transformed overnight, when control of the largest, most up-to-date naval facility of its kind on the North American continent dropped into his hands.

STEPHEN MALLORY
C.S.A. Navy secretary.

During a surprise attack on the morning of April 20, Confederate militia seized Fort Norfolk with its magazine of more than a quarter of a million pounds of gunpowder at the Gosport Navy Yard, in Portsmouth, Virginia. Its capture netted the Confederacy 1,195 modern heavy cannons, as part of a tremendous windfall of war materiel soon to be employed on many other fronts. Gosport's large drydock was relatively undamaged and soon restored by its new owners. Ammunition stores, rifles and small arms were retrieved in abundance.

As vital as were these significant gains, far more important was the loss suffered by the Union of its best shipyard and its powerful addition to the Confederate States Navy, which now had a real chance at victory. Virtually all of Gosport's torched and scuttled vessels were handily refloated and repaired, then renamed and recommissioned under the flag of the Stars and Bars. The most important of these salvaged retrievals bore the name *Merrimack*.

Mallory saw the wreck—rechristened CSS *Virginia*—as an exciting opportunity to reconstruct the vessel with all the innovative designs modern naval engineers could conceive, not to restore her to original condition. He wanted her transformed from a 19th-century frigate of sails and wood into a futuristic, steam-powered ironclad. As such, her mission was no longer to defend newly conquered Gosport, but to destroy Abraham Lincoln's blockade.

To meet this challenge, *Virginia* was subjected to an extreme makeover, leaving only the sturdy hull mostly untouched. Superstructure and masts were swept clean away, replaced by a single, long casemate, a large enclosure for officers and crew made with several courses of oak and pine and overlaid with two-inch-thick iron plate, built up in two layers. These were ingeniously angled at precisely

The Battle at Hampton Roads: The USS *Monitor* (right) tries to catch CSS *Virginia* (left) in a crossfire.

36 degrees from horizontal to optimally deflect enemy shell hits. Four-inch iron plating spread over the decks.

In contrast to the *Virginia*'s innovative refitting, her bow featured a four-foot-long rostrum, a metal ram that once allowed *naves longae*—ancient Roman warships—to punch holes in the hulls of enemy vessels.

More modern weapons included four muzzle-loading Brooke rifles, superior to their equivalent in the Union Navy arsenal. A pair of bow and stern pivot rifles were seven-inch caliber. One of them would fire the shot that determined the outcome of *Virginia*'s final action. Another two were 6.4-inch cannon, one on each broadside.

Nine-inch Dahlgrens, mounted three to a side, could fire a 72.5-pound shell up to a range of 1.9 miles. Two anti-boarding/personnel 12-pounder Howitzers were positioned on the upper casement, which had 14 gunports, three each in the bow and stern, with exterior iron shutters installed to protect cannon and crew, in addition to four gun ports on each broadside.

One of *Virginia*'s few weaknesses was her steam power plant. Both engines, already worn out when slated for replacement by their former Federal owners, had been salvaged from the original *Merrimack* and were still in poor working order even after reconditioning and upgrading by C.S.A. Navy mechanics. They were only able to coax five or six knots (5.8 to 6.9 miles per hour) from the 4,100-ton leviathan until a novel, two-blade propeller—custom-made by naval architects—raised top speed to nine knots, a little over 10 miles per hour. Even so, the overweight warship needed about 45 minutes and one mile to complete a full circle.

After the *Merrimack* was salvaged on May 30, subsequent inspections found the wreck in good enough condition for restoration as a floating wonder weapon, and an engineering team drew up specification plans by early summer. But the project stalled for lack of replacement engines potent enough to power the heavy warship.

At the best available facility, the Tredegar Iron Works in Richmond, building new motors from scratch would take at least a year. Delays were compounded when searches for sufficient quantities of quality iron dragged on through summer. Meanwhile, the Union blockade held firm. Mallory had hoped to attack it in mid-autumn with his unconventional ironclad, but the year came and went, with the *Virginia* far from ready.

Only by late winter 1862 was the vessel finally nearing completion. Even as she got under way for her maiden cruise on March 8, workers were still aboard, laboring on a variety of unfinished necessities. She went into battle with only half of the iron shutters that were required for protecting otherwise open gun ports. This left her gunners exposed to enemy fire.

By the standards of the time, the warship seemed as strange as she was huge. At 275 feet long, with a beam of 52 feet, two inches, forward and aft main decks and fantail were designed to stay submerged, making her casement appear to float upon the surface of the water. She needed no less than 320 officers and men to handle her machinery, navigate her movements and operate her guns.

During the previous nine months, an otherwise meticulous Mallory had

been guilty of an appalling lapse in security. Far from keeping his advanced vessel under wraps as a military secret, he opened its ongoing construction to the general public. The project was even a subject of several newspaper accounts, whose authors openly relished the coming vengeance *Virginia* would inevitably visit upon the Yankee blockaders.

As a consequence, Federal spies sent regular progress reports describing *Virginia*'s ongoing refurbishment back to Washington, D.C., where she was dismissed as a propaganda hoax until August 1861.

By then, the growing pile of espionage missives finally convinced Union authorities that the super-ship was not a mythical construct after all, but represented a literal threat to be taken seriously. In a joint chiefs of staff meeting, Lincoln expressed his anxiety at seeing the enemy warship come steaming within cannon range of the White House, and requisitioned as many carriages as his troops could lay their hands on for the purpose of dumping them into the Potomac. This formed a more desperate than effective barrier against the expected intruder.

Gideon Welles, the United States secretary of the Navy, assured him that the *Virginia*'s 22-foot draft prevented her from entering the river.

The wary president cautioned:

> You may be correct, Father Neptune, but, if her captain lightens the monster by discarding a few guns, it could ride higher in the water enough to safely navigate just above the bottom. If a landlubber like myself could figure out such an alternative, you can be sure Johnny Reb' has already beaten me to it.

Secretary of War Edwin M. Stanton sent telegrams to various governors and mayors of the coastal states, warning them to be on guard for the enemy ironclad. Lincoln then offered to cover all construction costs and promised generous cash bonuses to any mechanical engineer who could build the most promising countermeasure within 90 days. He received 17 proposals, but a Navy review board rejected them all.

Among the spurned schemes was an eccentric proposition submitted by an inventor recognized for his failed attempts at innovation. The Union commander-in-chief overrode their objections, claiming, "It's just crazy enough to work," and awarded the much-sought-after contract to John Ericsson.

"The sea shall ride over her," Ericsson boasted in a pronounced Swedish accent, "and she shall live in it like a duck." The metaphor was not particularly encouraging, conjuring images of tail feathers raised above water, head submerged beneath.

When his promised design was launched into the East River on January 30, 1862, more than a week after the 90-day deadline, it was heralded in the Northern press as the most advanced weapon of its kind afloat.

> The heavy turret's momentum kept it revolving, forcing gunners to shoot on the fly.

To be sure, the USS *Monitor* prefigured future battleships, especially with its revolving turret. But the ironclad was actually an unseaworthy rush job, as demonstrated when she almost foundered while being towed into combat. Although Ericsson's ship employed over 40 patented inventions, many of these ultramodern, untested precedents broke down when put into actual maritime practice.

Entering below-decks living quarters was not unlike descending into a 100-plus-degree furnace for lack of adequate ventilation, creating a toxic atmosphere in the engine room that eventually spread throughout the ship. Leather belts connected blowers to their engines, but these would stretch when wet, often disabling the fans and boilers.

When not in use, the turret rested on a brass ring intended to form a watertight seal. In service, however, it leaked heavily, despite caulking by the crew. Pumps were steam-operated, and water would accumulate in the ship if the pumps could not get enough steam to work.

I addition, the shallow, 10-foot-six-inch draft made the vessel unstable in rough water. The 163-ton turret of "Ericsson's Folly," as his ship was sarcastically caricatured by some New York newspapers, made the ship top heavy and prone to capsize, especially in heavy seas, which was, in fact, to be *Monitor*'s fate before long.

Rather than take responsibility for his numerous design flaws, Ericsson later accused the crew of having been drunk during the storm that sank the ship, blaming them for her loss. A surviving officer vigorously rebuked the inventor's slander, stating that he "covers up defects by blaming those that are now dead."

Monitor's guns were prevented from firing directly ahead by the presence of a forward pilot house from which the captain's commands to the gunners and engine room crews went unreceived after its speaking tubes proved worthless. Once set in motion, the heavy turret's momentum kept it revolving, forcing gunners to shoot on the fly, as it were, each time the cannon's position came around to face their opponent. A full rotation required 22.5 seconds.

Fire control was further impeded by a lack of brakes on the twin steam engines that operated the turret, thus sighting on a target could only be made through gun ports. When the guns were not in use, or withdrawn for reloading during battle, heavy iron port stoppers would swing down into place, closing the gun ports to view.

This large, cylindrical turret mounted amidships above the low-freeboard upper hull was nonetheless the vessel's most prominent and original—even revolutionary—feature.

Ericsson's prototype was mostly plated with eight inches of armor, 11 inches in front at the gun ports. It was equipped with twin 280 mm Dahlgren guns weighing 16,000 lbs. each. They were capable of firing a 136-pound round shot or shell up to

a range of 3,650 yards, more than two miles beyond the range of *Virginia*'s main armament.

Each gun was crewed by eight men. The top of the armored deck, protected by two layers of one-half-inch wrought iron, was less than 20 inches above the waterline. Sides of the raft-like hull consisted of three to five layers of one-inch iron plates, backed by 30 inches of pine and oak.

Power in the form of a single-cylinder, 320 horsepower steam-engine drove a giant nine-foot propeller on a three-inch-diameter shaft Ericsson promised would provide a top speed of eight knots. *Monitor* actually ran two knots slower, granting her Confederate opponent a more than three mile-per-hour speed performance advantage, despite the *Virginia*'s far greater tonnage and wonky engines.

Weighing in at 776 tons, with an overall length of 179 feet and a 41-foot-six-inch beam, *Monitor* was a featherweight challenger to the Confederate heavyweight, which was bigger and faster and had seven times as many guns. Aware of these discrepancies, *Monitor*'s all-volunteer crew of 49 officers and enlisted men set out from New York's Brooklyn Navy Yard.

While still en route, their nemesis was steaming 380 miles away into Hampton Roads during the early morning of March 8, 1862 in an attempt to break the Union blockade that had cut off Virginia's largest cities and major industrial centers, Norfolk and Richmond, from international trade. Trailing behind her were five smaller, conventional gunboats.

The ironclad's aggressive commander, Capt. (later, Admiral) Franklin Buchanan, wasted no time in making straight for the five Union warships waiting for him. Their captains eagerly anticipated his arrival, sure the combined cross-fire of 250 heavy cannon would obliterate the innovative foe, despite all of its armor. As soon as the Southern warship came within easy range, she was subjected to a massive barrage, as ferocious as it was accurate. But every hit ricocheted or bounced off the metal plating.

Churning ahead at full speed, the *Virginia* plunged her ram deeply into the USS *Cumberland*'s port bow, smashing a cavity wide enough through which to drive a horse and buggy, according to a sailor aboard the stricken vessel. But, as *Cumberland* began to go down, she was taking her attacker with her to the bottom of the river. The *Virginia*'s ram had become stuck fast in the enemy's wooden hull.

Buchanan ordered reverse propeller at top speed, the old engines smoking and straining with prolonged extra effort. They seemed on the verge of burning out when the Confederate warship slid from her mortally wounded victim, which sank almost immediately thereafter, drowning 121 of the 376 men aboard.

> As she began to go down, *Congress* almost took her attacker with her to the bottom.

Cumberland's swift destruction sent shock waves through the entire blockade fleet, which disintegrated. Union ships fled the scene in all directions, some of them running aground, making themselves easy pickings for Buchanan. One of these was USS *Congress*, among the most powerful frigates in the Union Navy, with 480 officers and enlisted personnel manning four 203 mm cannon and 48 32-pounder guns. None had the slightest impact on the *Virginia*, which pummeled *Congress* with impunity for an hour before the Federal captain hoisted the white flag of surrender.

By then, the Rebel's James River Squadron had caught up with the **Virginia** to help rescue Union survivors and administer medical aid. In the midst of their humanitarian assistance, a Northern battery inexplicably opened fire on the Confederate relief effort.

Buchanan was so enraged, he stood exposed on his ship's upper deck with a rifle, randomly shooting at the Federals before a musket ball caught him in the upper left thigh.

His executive officer, Lt. Catesby ap Roger Jones, took over command. He revengefully ordered a fusillade of cannonballs heated at extreme temperatures fired into the *Congress*. Continuous volleys of the incendiary "hot-shot" at once transfigured the pride of the Union Navy into an inferno of flaming wood and molten metal.

Meanwhile, the James River Squadron was blasting apart USS *Minnesota*, which, due to the angle caused by her beaching on a sandbar, was unable to train her ship's guns on the attacking gunboats. Fires broke out on the last of Hampton Roads's Federal capital ships, and *Virginia* came about to finish the job. But, by the time she neared firing range, the tide was going out, threatening her with running aground herself. Moreover, diminishing daylight conditions were making accurate navigation more hazardous by the minute. Jones rounded up his squadron and steamed back into the Elizabeth River, vowing to return and add the crippled *Minnesota* to the tally of destroyed enemy vessels the next morning. The Union blockade of Richmond and Norfolk was broken.

An overnight respite allowed repair crews to patch up *Virginia*'s thoroughly holed smokestack, replace a pair of disabled guns and tighten several minor armor plates. These were the only damages she incurred. It was remarkable, considering the combined barrage of enemy cannon fire the vessel passed through virtually unscathed.

Two *Virginia* crewmen had been killed by flying rivets traveling like fired bullets when dislodged by direct hits on the outer casemate. In contrast, the Federals lost more than 250 dead. Near midnight, flames touched off the magazine of the smoldering *Congress*, and it erupted into a massive explosion that thundered across Hampton Roads. What was left of her sank stern first, with 110 men killed or missing, presumed drowned. Another 26 were wounded, of whom 10 died over the next few days.

Two of the Union's foremost warships had been destroyed, plus three

more run aground, one of them badly damaged in what was the greatest defeat in the history of the U.S. Navy to date. It would remain so until World War II's Pearl Harbor debacle.

The new commander, his officers and men rested, sure of more victories to come with the dawning of March 9. Steaming into the sunrise, they were gratified to see that their target, the beat-up *Minnesota*, had not budged from her disabling sandbar, despite strenuous efforts by labor gangs throughout the previous night to oust the 48-gun frigate.

Opening fire from more than a mile away, *Virginia*'s gunners demonstrated their shooting skills, lobbing several hits on the hapless foe. It was then when Jones observed what he initially took for a floating boiler, probably blown out of the exploded *Congress*. "No, Sir," a crewman exclaimed. "It's the *Monitor*!"

TheUSS *Monitor* then circled around to the south in an attempt to catch *Virginia* in a crossfire between it and the *Minnesota*. *Monitor* commanding officer Lt. John Lorimer Worden was apparently unaware that the beached U.S. warship was still unable to train its guns. He opened the confrontation at 8:45 a.m. with a single shot that flew over the *Virginia*, scoring a direct hit on the grounded ship Worden had come to protect.

Jones endeavored to put an end to this farce by leveling a full broadside at the unconventional ironclad, with no effect. For almost three hours, the metallic behemoths continuously circled around each other, often separated by only a few yards, unremittingly firing at such close range, often point-blank, they collided five times.

While the long-sided *Virginia* was hard to miss, *Monitor*'s nine-foot-high, 21-foot, six-inch-diameter turret proved a more difficult target. Additionally, the 41 hits it took to the *Virginia*'s 97 hits were harmlessly deflected by the tower's rounded shape.

At 11 a.m., Worden broke off the inconclusive duel after it exhausted his stores of ammunition and a gunport cover had been jammed shut by an enemy hit, leaving him with a single cannon. Jones did not pursue the defenseless *Monitor*, but turned away to complete his original objective after gunning down an armed tugboat, USS *Dragon*, that got in his way, almost as an afterthought.

Virginia had resumed bombarding the *Minnesota* into oblivion when the replenished *Monitor* unexpectedly reappeared. Instead of mopping up the grounded frigate, Jones was distracted by another pointless engagement with his Northern counterpart. Yet again, they went round and round, ineffectually banging away at each other until Worden sought to disable the *Virginia*'s steering mechanism by attacking her stern.

As the more nimble *Monitor* skirted the *Virginia*'s fantail, a seven-inch shell struck the forward side of the pilot house directly beneath the viewing slot through which Worden was observing the action.

"My eyes," he cried out, "I'm blind!" His injuries had been inflicted by shell fragments and gunpowder residue from the explosion. As the unresponsive *Monitor* drifted idly away, Jones steamed back toward the *Minnesota*, determined to annihilate her once and for all. But, as he reached the lopsided vessel, the tide was quickly going out yet again, threatening the deep-draft *Virginia* with running aground, so she returned to her berth in the Elizabeth River.

The historic confrontation—the first between iron warships—was heralded as a victory by both sides, although the James River Squadron captured three valuable merchant ships and destroyed or disabled multiple Union warships.

In fact, repercussions from the *Virginia* rampage extended far beyond Hampton Roads. The warship's mere presence was sufficient to close the James River against Federal incursions, and her success impacted the Peninsula Campaign then being mounted by the Union Army under Gen. George B. McClellan. His positions on the York River appeared threatened by the dangerous Confederate warship, as the ironclad threat continued to bedevil McClellan throughout the fighting.

No one, however, appreciated the battle at Hampton Roads more clearly than Mallory. Although tactically a draw, he knew that it was the most definitive naval action of the war. He rejoiced that a dramatic precedent had been set for the future development of new ironclads better equipped for oceangoing operations against the enemy blockade and to seriously wound the North's merchant fleet, with fatal consequences for its economic life.

Mallory believed by attacking the merchant shipping that carried trade to Northern ports, he could force the Union's own taxed fleet to abandon its blockade and force them to engage his raiders. Other ironclads designed with shallower drafts could ultimately advance unchallenged on Washington, D.C. itself, up the Potomac River and to other seaboard cities, shelling ports along the coast and riverfronts with decisive economic and military consequences.

Mallory's high hopes, had they been shared by his superiors at the Confederate capital in Richmond, might have conceivably turned the tide of the war in the South's favor. Instead, they did the precise opposite by changing shipbuilding policy from one that stressed offensive warships to emphasis on limited defensive measures.

The allocation of funds to the C.S.A. Navy was drastically cut, and the improved and evolved ironclads Mallory envisioned were so poorly constructed, and took so long to build, they had little effect on the outcome of the war. Mallory was further left with insufficient funding to create enough gunboats for the defense of New Orleans, the South's most vital port.

The capture of New Orleans by the Federals effectively sealed off the Mississippi River as a trade route from the outside world. This catastrophe was seconded by another naval defeat—the loss of Mobile Bay—that closed off the largest port left in the Gulf of Mexico.

It is clear, then, that the outcome of the War for Southern Independence depended from its beginning upon the development and deployment of advanced warships for ultimate victory. Unfortunately, the Confederates were not able to attain this goal. ❖

LETTERS TO THE EDITOR

IMMIGRANT INVASION

The invasion from our Southern border is active warfare and will result in the genocide of the European stock of America. Some people don't seem to have a problem with that. I do.

May those behind this scheme to replace America's founding stock be damned with ill health and die a long, slow, painful, miserable death, all the while getting all of their vaccines and having to take satisfaction surveys through their online patient portal as to the quality of care they are given through their HMO and their insurance!

I do believe that this "Ukraine war" with Russia is a pivotal point in world history. It doesn't seem important to most Americans, but it really is a battle between Jews and Gentiles and, unfortunately, our government and our tax dollars are on the wrong side.

Putin should call out the Jewish involvement in all of this. But, if he did, he'd be called "another Hitler" even more than he is now and, I think, some people in our government would have a sense of carte blanche to then escalate things to an even deadlier degree.

SORRY MOM!

I have had a subscription to TBR for a couple of years and I have purchased a couple of books through your sales department including *Sorry Mom, I Was Wrong About the Holocaust* by Monika Schaefer.

I loved the book, as I have read quite a lot of books about the Holocaust.

She made the statement on page 270 of the book about the worldwide population of Jews in 1938 and 1949. I have been trying to access the *World Almanac* archives to verify her claim, but it has proven to be quite the challenge.

To have that information in print from those years would be overwhelming evidence proving the absolute fabrication of the 6 million murdered Jews narrative.

Bill Calhoun
Via email

A PERFECT PAIRING

I enjoyed the articles on Fr. Leonard Feeney and the St. Benedict Center in TBR's January/February 2024 and March/April 2024 issues. I never met Fr. Feeney, but I have been a member of the St. Benedict Center in Still River, Massachusetts for decades now. Great group of people who attend Mass there. It has an ever-expanding school housing grades 1 to 12. Lots of young families attend, representing many different vocations. The folks there do a wonderful job, and I have been invited to numerous states to help with their summer camps. They teach and embrace truth—a perfect pairing with The Barnes Review!

Tony Puccio

THANKS FOR YOUR PUBLICATION

A friend of mine told me of The Barnes Review recently. He said I would probably like it. So, several months ago I called your offices and requested a sample issue. I read the entire magazine. It was wonderful! Most magazines and journals over the last couple of decades have gone out of the print business. My eyes don't like reading online, so I don't read as much as I used to. But your publication is special, and needed more than ever, as it takes controversial issues and gives them credibility while informing the reader at a deeper level. It is a treasured remnant from a different time while reminding people of what good scholarship looks like.

Thank you for managing and editing such a wonderful publication.

Gordon Cruickshank
Virginia

WHAT IS NATIONAL SOCIALISM?

I enjoyed reading your four-part series on National Socialism in America by Karl Haemers. I think it would have been much better had you explained exactly what National Socialism is. What are National Socialism's planks? Why is it different from other "socialisms"? I would like to know the basic tenets and goals of Fascism, National Socialism (Naziism), Communism, Bolshevism, European Socialism—the similarities and difference between them all. Also, an analysis of exactly what our American system is today. It has changed drastically since the days of the founding fathers.

Gordon Bakken
Via email

[In response, I have asked the author of that series to craft something to help explain the basic tenets of those systems.—Ed.]

PACK UP AND LEAVE

I am deeply saddened by the news that Israel is resuming its massive and indiscriminate bombing campaign against Gaza Palestinians. My interpretation of Israeli tactics is that they are deliberately targeting women and children—maybe even more so than Palestinian men.

The point of this tactic itself appears to be to exacerbate Gaza Palestinian suffering *in extremis*, withhold water and food and destroy the sanitation system in order to spread dysentery and cholera among the Gazans, especially young Palestinians, in order to get them to pack up and leave—or die.

Continued on page 78

Continued from page 77

But, even more, the main tactic is to absolutely destroy the homes of Gazan Palestinians and their apartment dwellings so there is absolutely no shelter for them whatsoever anymore in Gaza—especially with the onset of bad weather.

This will force neighboring Arab states to take in destitute Gazan Palestinians since Israel, obviously, is not going to do that. Of course, the American media will not air this transparently obvious Israeli strategy and tactic.

In other words, to repeat, the deliberate inhuman barbarism the Israel Defense Forces are visiting on the Gazans is being done in order to get neighboring Arab states (in particular, Egypt) to relent and force them to have to take in Gazan Palestinians on humanitarian grounds in order to avoid civil unrest in Cairo. The Machiavellian Israeli goal, then, is to behave as inhumanely as possible toward Gazans in order to orchestrate genocidal and decisive ethnic cleansing and clear Gaza once and for all of all non-Jewish Palestinians.

As I already said, I do believe that part of the strategy of Israel's calculated inhumanity is to deliberately target women and children (like the infamous Deir Yassin massacre). That will get their fathers and brothers, the heads of their families, to give up and, once and for all, finally relinquish their claims to land in Occupied Palestine and resettle their families in relatively safe, newly established refugee camps in Egypt. Egypt no doubt is aware of the Israeli strategy, and that is why Egypt is balking at opening up its border with Gaza to take in destitute, homeless and brutalized Gazan Palestinians.

Israel is hoping pro-Palestinian sentiment in Egypt will force Egyptian President Gen. Abdel Fattah el-Sisi to relent and agree to have all the Gazan Palestinians transferred to Egyptian territory.

The Gazan Palestinians are mere sacrificial pawns in this whole brutal game of realpolitik. Anyway, that is what I think is really going on there right now.

My heart bleeds for all Gazan Palestinians (especially the cruelly targeted and homeless women, children and infants). I pray for a quick end to the fighting.

PERSISTENT PROPAGANDA

In regard to the article "Does Poland Really Deserve Reparations from Germany?" in the March/April 2024 issue of TBR, I thought it was an excellent job by John Wear. But it brought the following thoughts to my mind. War in Europe had been decided upon by the Western democracies by the spring of 1939, if not earlier, hence, Britain's guarantee to Poland. War was to be forced on Germany; diplomatic correspondence of the period confirms that. Chancellor Adolf Hitler could do nothing to avoid it. He did not want war, but could not stand by and ignore the mass murders of ethnic Germans in Poland.

His repeated attempts at negotiations with Poland were ignored. As the unresolved issues with Poland were the last remaining issues from the Versailles Treaty to be remedied, the Allies may have thought this was their last chance to provoke a war, blame it on Germany, and then completely destroy it.

It seems to me that the real reason for the war against Germany is to be found in its striking economic resurgence once it broke free of the bonds of international finance and debt-based currency. Two plutocracies, the United Kingdom and the United States (bear in mind FDR's behind-the-scenes prodding and goading of Britain and France to go to war against Germany), could not provide prosperity for their citizens in peacetime and, thus, wanted war with Germany, a nation that could and did provide prosperity for its citizens in peacetime.

Hitler is the most vilified and demonized person in history. What most people do not know is that Hitler is the most lied about person in history. It logically follows that he is the most wrongfully vilified person in world history. To maintain this evil image of Hitler, the most thorough and persistent propaganda campaign in history continues today, nearly 80 years after the war's end.

THE DANCING ISRAELIS

Cui bono? I wonder if enough information could be researched regarding the "Dancing Israelis" who were arrested and released as they were watching on 9/11 as the Twin Towers collapsed in flames?

Gary Prices
South Dakota

[A very interesting topic. An interview was conducted by American Free Press (AFP) newspaper with Officer Scott DeCarlo, one of the policemen who stopped the van carrying the "Dancing Israelis" and arrested those inside. They were quickly sent packing back to Israel, where one of them appeared on an Israeli talk show and said he had been "sent to document the events." How did he know the World Trade Center would be a target? Since then, we do not know what has happened to these Mossad agents. We do know, however, that the interview was banned by YouTube administrators for "violating their terms of service," i.e., providing controversial yet factual material. That video is available on the web at AmericanFreePress.net.—Ed.]

SMEARING DAVID IRVING

I heard rumors that David Irving passed away, then I heard it wasn't true soon after. He is very ill, either way, and ain't gonna be here much longer or in any condition to write

books, lecture and tour. I hope someone secures all his stuff to be published and preserved. Can TBR please do some deep dives into his writings and conclusions on homicidal gas chambers and everything else "WWII," warts and all? It may even be a memorial issue by then, I'm afraid. They tried to ruin Irving many times and, if I remember correctly, they did in the end bankrupt him.

The kosher forces claim he is a pervert who was trying to sleep with a translator or secretary. Who cares? Was she an adult? Did he use force or violence?

Meanwhile Bill Clinton and Ehud Barak each went to Epstein's Island dozens of times. They are child rapists and they haven't been bankrupted, canceled and publicly shamed. But a respected author, historian. lecturer and academic with a non-threatening demeanor honestly says he can't find the "kill all Jews in gas chambers order form" from Hitler, and "gas chambers here are recreations" (which they were) and they persecute him and torment him. I feel like I'm a kid attending "Opposite Day" at school for a gag. The world gets more and more absurd every day.

At least most of the Blacks around me are not "woke" in the least bit and don't hate Whites as much as this new generation does. Ironically, it's Whites who are egging them on to hate other Whites! It's retarded and self-defeating.

Ernie M.
Michigan

SUICIDAL CONFLICT

The greatest calamity ever to befall the White race in modern times was World War II. This suicidal conflict led us directly to the racial and moral chaos that is consuming the West today. Every racially conscious White person must understand what that war was really about and what really happened.

Most Americans do not know that World War II was really a German-led war in the *defense* of Europe from Soviet Bolshevism and also from the overwhelming might of the Zionist-controlled nations, mainly Great Britain and the U.S.A.

Celebrating the Allied victory does not mean celebrating "freedom" and "democracy," but paying obeisance to a brutal, world-destroying tyranny. Wake up White man. You lost your country and you have thrown your birthright into the sewer. Get active. Get political. Run for office. Third parties are a waste of time.

John Q. Doe
New York

KILLED FOR FLYING A FLAG

White patriots and nationalists should never forget that, during America's troop escalation in the Vietnam War following the Gulf of Tonkin Resolution (August 7, 1964), several White non-commissioned officers—including Sgt. Smith of Mississippi—were targeted and murdered by Black troops simply because they openly flew the great symbol of Anglo-Saxon heritage and freedom, the Confederate battle flag.

Jordan N. Gollub
Mississippi

SERBIAN ORTHODOX CHRISTIANS

I would like to recommend a subject for The Barnes Review to explore. This is the ethnic and racial origin of the perpetrators of 1 million Serbian Orthodox Christians during World War II.

I mentioned in a previous letter that, from what I see, the Ukrainians are starting to act like Jews, claiming they were the only ones who suffered through terror famines just as Jews claim they are the only ones who suffered in World War II.

One million Serbian Orthodox Christians were martyred at the Jasenovac concentration camp but, unfortunately, many people do not know about this atrocity for political reasons. During the civil war in the Balkans, the Serbs were labeled the "Nazis" and the Bosnians and Albanians were the "victims."

What follows is not a conspiracy theory, but backed up by hard facts.

Many Revisionists are now, thankfully, aware of the Sabbatean Zionist role in the Armenian Holocaust during World War I. The founder of the Serbophobic Nazi Party in Croatia was a Jewish "convert" to Roman Catholicism by the name of Josip Frank. His followers were known as Frankists, and they carried out pogroms against the Serbian Orthodox Christians in 1898, 1902 and 1904.

(It is interesting to note that, in 17th-century Poland, there lived another false Jewish messiah by the name of Jacob Frank who converted to Catholicism. His followers were also known as Frankists.)

Josip Frank's grandson was Eugene Dido Kvartenik. He was the Ustashe police commander who was responsible for the deportations of Serbs and Roma gypsies during World War II. The Jasenovac concentration camp was far worse than Auschwitz, as what happened at Jasenovac has been proven with facts, not manufactured from myth.

The reason people do not know about the Jasenovac concentration camp is because the victims were "unchosen" ones and the perpetrators were "chosen" ones.

For more information on the Jewish origin of the Ustashe Party and the role of Jews in the Ustashe movement, please see the book *Honorary Aryans: National-Racial Identity and Protected Jews in the Independent State of Croatia* by Nevenko Bartulin.

MARCH OF THE TITANS: VOLUME I

The Rise of Europe

From the Earliest Times to the Fall of Rome

By Arthur Kemp

The original *March of the Titans* (530 pages) has been significantly expanded, rewritten and improved with new information and full color photos. The expanded text—with every chapter having been fully rewritten and updated, and with many new chapters added as additional archaeological discoveries and facts have emerged—has now been divided into **four separate volumes**, each addressing a specific era. Note that, at this time, only ***Volume I—The Rise of Europe*** is available—with more coming. This volume is **$42** minus 10% for subscribers.

March of the Titans: Volume I—The Rise of Europe from the Earliest Times to the Fall of Rome includes the latest archeogenetic evidence on the origin of the White race and concludes with the fall of the Roman Empire. *This volume alone contains 581 full-color illustrations.*

Volume I—The Rise of Europe from the Earliest Times to the Fall of Rome begins with three brand new chapters that reveal: 1) How modern science has conclusively proven that race is determined by genetics alone; 2) how race influences the rise and fall of civilizations; and 3) the precise archeogenetic origins of the White race.

Utilizing the most recent archaeological findings, it offers a comprehensive overview of prehistory, including the Upper Paleolithic and Neolithic Ages.

It then thoroughly examines the Old

European civilizations in Europe, presenting new archeogenetic and archeological evidence that elucidates their racial origins and notable achievements.

The subsequent section reviews the Indo-European invasions of Europe, the Middle East and the Far East, accompanied by new genetic evidence that traces the migrations of these peoples from their homeland above the Black Sea to the farthest corners of Europe—and to present-day China.

Following this, ***Volume I—The Rise of Europe from the Earliest Times to the Fall of Rome*** thoroughly examines the fate of the Indo-Europeans in the Middle East, presenting irrefutable DNA evidence and detailing how this affects the current regional racial composition.

Ancient Egypt is then explored, starting with groundbreaking archeogenetic findings that clearly show the founders of ancient Egypt were a White population. This civilization later declined after becoming genetically diverse due to a significant influx of Semitic and African blood. The full-color illustrations in this detailed chapter highlight this racial transition in Egyptian society.

The narrative then shifts to Classical Greece. Leveraging the latest genetic evidence, this section reveals the racial origins of the prominent Grecian civilization, the Mykenaeans. Furthermore, it explains how the Classical Grecian civilization emerged and eventually declined due to racial fatigue from constant warfare and the substantial importation of racially alien slaves.

Next, the period of Macedonian dominance over Greece, initiated by King Philip II, and over the entire Middle East by his son Alexander the Great, is detailed. This expanded section reinforces the multi-racial composition of Alexander's empire and elaborates on its fragmentation into rival race-based factions following his passing.

The subsequent sections cover the Roman Republic era, the Roman Empire, its bifurcation into Eastern and Western domains, and the collapse of both segments in various new and augmented chapters.

Additional chapters discuss Roman civilization and culture; the transitions led by Julius Caesar and Octavian Augustus from a republic to an empire; and a pivotal new chapter on Rome and the onset of Christianity. There are also

Sample pages from this gorgeous new edition!

considerable enhancements to the chapters on Rome's interactions with the Kelts, Germans, and the Middle East—with the later ringing the racial death-knell for the Roman Empire.

The narrative then moves to the first significant non-White invasion of Europe, detailed in a revised chapter on the invasions of the Huns and their atrocities in Europe, which occurred a few decades prior to the Western Roman Empire's fall.

The chapter titled "Death Through Diversity: The Fall of Rome" stands out in ***Volume I—The Rise of Europe***. New and compelling archeogenetic evidence illustrates how racial diversity precipitated the Roman Empire's downfall, evidenced by the doubling of Y and mtDNA haplogroups from the republic's inception to Rome's fall. In addition, the scientific evidence shows that, just before the Western Roman Empire's collapse, a staggering 80% of Rome's inhabitants were of Middle Eastern racial origin.

To conclude ***March of the Titans: Volume I—The Rise of Europe***, an enlarged section on the Eastern Roman (Byzantine) Empire narrates its history until its fall in 1453. A remarkable addition to this section is an archeogenetic study that unveils the Byzantine Empire's racial composition, which mirrored the racial demographic shift in Rome during the Western Empire's final days to that of a minority White population.

Order your copy of ***March of the Titans: Volume I—The Rise of Europe (The Prometheus Edition)*** from TBR. This volume is hardcover, full color interior, laminated cover, high-quality gloss interior stock, 8.5" x 11", 300 pages, item #1015, **$42** minus 10% for TBR subscribers. Inside the U.S. add $5 S&H. Order from THE BARNES REVIEW, P.O.Box 550, White Plains, MD 20695. Call 1-877-773-9077 toll free to charge, Mon.-Thu. 8-4 ET. NEW FROM TBR PUBLISHING

Legends of the Shawangunk

By Philip H. Smith (1887)

The Shawangunk Mountains (also known as Shawangunk Ridge) in New York State form part of the easternmost section of the Appalachian Mountains. In New Jersey, they are known as the Kittatinny Mountains. In Pennsylvania, the mountain chain becomes the Blue Mountains. Historical events across this region formed an integral part of the history of colonial America.

Legends of the Shawangunk by Philip H. Smith is one of the all-time classic narratives of the thrilling stories related to the Shawangunk territory. A great compendium of information on the tension between the Hudson and Delaware River Valley Indians and early European settlers, it details the tremendous hardships of frontier life which can hardly be imagined by Americans today.

This edition is not scanned from an old copy but completely reset in crystal-clear type. It contains all original footnotes and illustrations, including eight that filled a whole page and were not reproduced in other publishers' various editions.

The book contains 46 chapters and a short bibliography. With this book, you can immerse yourself in the true tales that recount the heroic deeds of our colonial ancestors. These are accounts that could never be included in any modern-day, politically correct history book. Thus, you will find Smith's unvarnished depictions of the indigenous people and the pioneers of the era quite refreshing.

Chapters cover the Delaware (Lenape) Indians, the First and Second Esopus wars detailing the conflict between Dutch settlers and the local Indians, the trouble between the British and the Nederlander settlers, armed border battles between the colonists of New Jersey and the people of the Shawangunk region, the finding of mastodon bones, Catherine DuBois—the heroine of Wildwyck, the brutal Battle of Minisink, the massacre at Fantinekill, friction between Tories and American patriots, the Tories after the Revolution, the midnight journey of Miss Land, little-known adventures of "Indian Slayer" Tom Quick, Kortright's expedition, the early pioneers of the Shawangunk region, relations with the Indian tribes, hunting bear and panther in the region and much more.

Softcover, 229 pages, #1018, **$25** plus $5 S&H in the U.S. Order from TBR, P.O. Box 550, White Plains, MD 20695. Call 1-877-773-9077 toll free to charge, Mon.-Thu. 8-4 ET or purchase online at: www.BarnesReview.com.

A NEW BOOK FROM TBR'S OPERATION BOOK RESCUE!

Alfred Rosenberg Political Essays

The National Socialist movement has hitherto been dismissed as an ad hoc racialist movement that had no serious political philosophical foundation. But one has only to read the numerous political writings of the chief ideologue of the movement, Alfred Rosenberg (1893-1946), to discover not only a clear philosophical account of what the regenerative movement of National Socialism sought to achieve in the Third Reich through its doctrine of racial worth and power, but also the ideological bases of the foreign political aims of the Reich during WWII.

The present collection of essays published by Rosenberg during his career as editor of the *Völkischer Beobachter* and as director of ideological indoctrination, will shed light also on the underlying reasons for the anti-Jewish policies adopted by the Reich in internal German politics as well as in European politics. Both the National Socialist movement, in general, and the war that was waged on the continent are properly understood only in the context of the German need to neutralize a perceived enemy that was characterized by a desire to consolidate its international financial power through the corruption and disintegration of European society and culture.

Essays include: Jewish World Politics; Against the Jewish Bank Plague; Self-Unmasking of the Jewish Defense Troops; Observations on Democracy; Thoughts on the Nature of British Politics; Jewish Bolshevism; Stock-Exchange Bolshevism; The Red and Golden International; Stock-Exchange and Bolshevism; National Socialist Efforts in France?; An Anti-Semitic International?; The German Idea; National Socialism; The State of the Teutonic Order; Germany and the League of Nations; United States of Europe?; In the Event of a League of Nations; On Germany's International Position; The Jewish Question in the World Battle; Europe's Revolution; Extract from *Letzte Aufzeichnungen*: "National Socialism"; Extract from *Letzte Aufzeichnungen*: "Worldviews." Includes extensive chapter notes and a lengthy bibliography.

Softcover, 181 pages, #1010, **$20** minus 10% for TBR subscribers plus $5 S&H inside the U.S. from TBR, P.O. Box 550, White Plains, MD 20695. Call 1-877-773-9077 toll free to charge, Mon.-Thu. 8-4 ET or visit us online at www.BarnesReview.com.

Ready for Some Real History?

THE BARNES REVIEW magazine is dedicated to bringing history into accord with the facts—facts most Americans are not getting …

REAL history is under attack. As you read this, fake history is being written by the minions of the "woke" elite in the same way they create fake news. Our once great heroes are now oppressors. The creators of Western civilization are genocidal colonizers. Our own Founding Fathers are reduced to no more than cruel and bigoted slavemasters. Worse, certain topics remain beyond the pale of discussion at all. This "new history" is a compulsory narrative, the very bedrock of politically correct Marxist propaganda. He who controls the present dictates the past—and the future. But there is a cure for this sickness.

In THE BARNES REVIEW (TBR) magazine, you get uncensored facts, free from the poison of political correctness. You'll see vignettes of man's history from the Paleolithic era to the present, explore ancient enigmas, learn about forgotten civilizations, get a view from "the other side" about our most costly wars and read insightful analyses of the momentous events that have shaped our world.

No cause is more important to the survival of civilization than the presentation of REAL history. Our purpose—to bring history into accord with the facts—was enunciated by our namesake, Dr. Harry Elmer Barnes. It was Barnes who began the crusade to accomplish this goal. And today, we need truth more than ever. Your subscription to TBR supports this vital work so we can help prevent the day when the purposeful distortion of history produces its certain result—the nightmarish mental tyranny dreamt of by George Orwell, a scenario now approaching fruition.

Subscribe to TBR today. One year inside the U.S. (six print issues) is $56; two years (12 print issues) are $88. Canada and Mexico are $75 per year. All other nations are $90 per year. We also have a PDF option. A one-year PDF subscription—*TBR Online*—is just $36 per year. Download the PDF on your electronic device anywhere in the world—a great option for foreign subscribers. You can also print the PDF issue at home if you prefer a hard copy. (Need email address for *TBR Online.*) To subscribe, write TBR, P.O. Box 550, White Plains, MD 20695 or call 1-877-773-9077 toll free, M.-Th. 8-4 ET, to charge. See also BarnesReview.com.

Communism With the Mask Off

PLUS *Bolshevism in Theory and Practice* all in one booklet!

These two dramatic speeches, made by German Minister of Propaganda Joseph Goebbels at the famous Nuremberg rallies of 1935 and 1936, sum up the National Socialist interpretation of Communism and Bolshevism and its threat to the world.

In *Communism With the Mask Off*, Goebbels describes in detail the Jewish origins of Marxism and Communism, and lists the leaders and instigators of that ideology in Russia, Germany, many European nations and even China. "As far as we ourselves are concerned, we have completely overcome this menace. Indeed, perhaps, outside of his work in Germany, the greatest service which our Führer has rendered the world is that, here in Germany, he has set up a barrier against world Bolshevism upon which the waves of this vile Asiatic-Jewish flood break in vain."

In part 2, *Bolshevism in Theory and Practice*, he discusses the practical social, political and economic consequences of Marxism—and how Germany had broken that menace. "We have proved under the most unfavorable circumstances that Bolshevism can be overcome if one wishes to do so, if one uses the proper means, and if one is determined to oppose the powers of destruction with all one's strength and all one's manly courage."

About the author: Paul Joseph Goebbels (1897–1945) was an early member of the Nazi Party and reputedly had the highest IQ in the party. He obtained a Ph.D. from Heidelberg University in 1921. He then went on to work as a journalist. By 1924, he had joined the NSDAP and, two years later, was appointed leader of the party in Berlin to wrest political control of that city from the Communists—an objective he attained.

Elected to the Reichstag in 1928, Goebbels took an active part in Hitler's rise to power, and was appointed minister of "propaganda." He killed himself at the end of the war rather than fall into Allied hands.

This 64-page square-bound booklet retails for $12 plus $5 S&H, but can be yours FREE when you subscribe for one year at $56 to The Barnes Review magazine!

New, expanded, full-color hardback deluxe edition!

MARCH OF THE TITANS: VOLUME I

The Rise of Europe

From the Earliest Times to the Fall of Rome

By Arthur Kemp

The original *March of the Titans* (530 pages) has been significantly expanded, rewritten and improved with new information and full color photos. The expanded text—with every chapter having been fully rewritten and updated, and with many new chapters added as additional archaeological discoveries and facts have emerged—has now been divided into **four separate volumes**, each addressing a specific era. Note that, at this time, only ***Volume I—The Rise of Europe*** is available—with more coming. This volume is **$42** minus 10% for subscribers.

March of the Titans: Volume I—The Rise of Europe from the Earliest Times to the Fall of Rome includes the latest archaeogenetic evidence on the origin of the White race and concludes with the fall of the Roman Empire. *This volume alone contains 581 full-color illustrations.*

Volume I—The Rise of Europe from the Earliest Times to the Fall of Rome begins with three brand new chapters that reveal: 1) How modern science has conclusively proven that race is determined by genetics alone; 2) how race influences the rise and fall of civilizations; and 3) the precise archeogenetic origins of the White race.

Utilizing the most recent archaeological findings, it offers a comprehensive overview of prehistory, including the Upper Paleolithic and Neolithic Ages.

It then thoroughly examines the Old

European civilizations in Europe, presenting new archeogenetic and archeological evidence that elucidates their racial origins and notable achievements.

The subsequent section reviews the Indo-European invasions of Europe, the Middle East and the Far East, accompanied by new genetic evidence that traces the migrations of these peoples from their homeland above the Black Sea to the farthest corners of Europe—and to present-day China.

Following this, ***Volume I—The Rise of Europe from the Earliest Times to the Fall of Rome*** thoroughly examines the fate of the Indo-Europeans in the Middle East, presenting irrefutable DNA evidence and detailing how this affects the current regional racial composition.

Ancient Egypt is then explored, starting with groundbreaking archeogenetic findings that clearly show the founders of ancient Egypt were a White population. This civilization later declined after becoming genetically diverse due to a significant influx of Semitic and African blood. The full-color illustrations in this detailed chapter highlight this racial transition in Egyptian society.

The narrative then shifts to Classical Greece. Leveraging the latest genetic evidence, this section reveals the racial origins of the prominent Grecian civilization, the Mykenaeans. Furthermore, it explains how the Classical Grecian civilization emerged and eventually declined due to racial fatigue from constant warfare and the substantial importation of racially alien slaves.

Next, the period of Macedonian dominance over Greece, initiated by King Philip II, and over the entire Middle East by his son Alexander the Great, is detailed. This expanded section reinforces the multi-racial composition of Alexander's empire and elaborates on its fragmentation into rival race-based factions following his passing.

The subsequent sections cover the Roman Republic era, the Roman Empire, its bifurcation into Eastern and Western domains, and the collapse of both segments in various new and augmented chapters.

Additional chapters discuss Roman civilization and culture; the transitions led by Julius Caesar and Octavian Augustus from a republic to an empire; and a pivotal new chapter on Rome and the onset of Christianity. There are also

Sample pages from this gorgeous new edition!

considerable enhancements to the chapters on Rome's interactions with the Kelts, Germans, and the Middle East—with the later ringing the racial death-knell for the Roman Empire.

The narrative then moves to the first significant non-White invasion of Europe, detailed in a revised chapter on the invasions of the Huns and their atrocities in Europe, which occurred a few decades prior to the Western Roman Empire's fall.

The chapter titled "Death Through Diversity: The Fall of Rome" stands out in ***Volume I—The Rise of Europe***. New and compelling archeogenetic evidence illustrates how racial diversity precipitated the Roman Empire's downfall, evidenced by the doubling of Y and mtDNA haplogroups from the republic's inception to Rome's fall. In addition, the scientific evidence shows that, just before the Western Roman Empire's collapse, a staggering 80% of Rome's inhabitants were of Middle Eastern racial origin.

To conclude ***March of the Titans: Volume I—The Rise of Europe***, an enlarged section on the Eastern Roman (Byzantine) Empire narrates its history until its fall in 1453. A remarkable addition to this section is an archeogenetic study that unveils the Byzantine Empire's racial composition, which mirrored the racial demographic shift in Rome during the Western Empire's final days to that of a minority White population.

Order your copy of ***March of the Titans: Volume I—The Rise of Europe (The Prometheus Edition)*** from TBR. This volume is hardcover, full color interior, laminated cover, high-quality gloss interior stock, 8.5" x 11", 300 pages, item #1015, **$42** minus 10% for TBR subscribers. The Mystery of Doggerland

Did it inspire the legends of a "lost continent"?

A scientific exploration of the advanced ancient civilization known as Doggerland that was engulfed by the North Sea thousands of years ago ...

New marine archaeological evidence has revealed the remains of a large landmass to the north and east of Britain that hosted an advanced civilization 1,000 years before the recognized "first" civilizations of ancient Egypt, Mesopotamia, or India. Entwined in Keltic legends as Tu-lay, and referred to by geologists as Doggerland (also known as Fairland), this civilization began at least as early as 4,000 B.C. but was ultimately destroyed by rising sea levels, huge tsunamis and a terrible viral epidemic released from melting permafrost during a cataclysmic period of glacial recession.

Exploring the latest archaeological findings and recent scientific analysis of Doggerland's underwater remains, Graham Phillips shows that this ancient culture had sophisticated technology and advanced medical knowledge. He looks at evidence detected with remote sensing and seismic profiling of many artificial structures, complex settlements, gigantic earthworks, epic monoliths, and huge stone circles dated to more than 5,500 years ago preserved beneath the ground and on the ocean floor. He also looks at the small part of the Fairland landmass that still exists: Fair Isle, a tiny island some 45 miles north of the Orkney Islands of Scotland. Phillips shows how, when Fairland sank beneath the waves around 3000 B.C., its last survivors traveled by boat to settle in the British Isles, where they may have established the megalithic culture that built Stonehenge.

Revealing the vast archaeological evidence in support of the existence of Doggerland, as well as its threads of influence in early cultures around the world, Phillips also shows how the fate of this sophisticated ancient culture is a warning from history: the cataclysmic events that happened to the first civilizations could happen again as the world continues on yet another unstoppable climate cycle.

Softcover, 224 pages, item #1016, **$20** minus 10% for TBR subscribers plus $5 S&H inside the U.S. Use the form on page 80 of this issue and mail to TBR Book Club, P.O. A NEW BOOK FROM TBR'S OPERATION BOOK RESCUE!

Alfred Rosenberg Political Essays

The National Socialist movement has hitherto been dismissed as an ad hoc racialist movement that had no serious political philosophical foundation. But one has only to read the numerous political writings of the chief ideologue of the movement, Alfred Rosenberg (1893-1946), to discover not only a clear philosophical account of what the regenerative movement of National Socialism sought to achieve in the Third Reich through its doctrine of racial worth and power but also the ideological bases of the foreign political aims of the Reich during WWII.

The present collection of essays published by Rosenberg during his career as editor of the *Völkischer Beobachter*, and as director of ideological indoctrination, will shed light also on the underlying reasons of the anti-Jewish approaches adopted by the Reich in internal German as well as in European politics. Both the National Socialist movement in general and the war that was waged on the continent are properly understood only in the context of the German need to neutralize a perceived enemy that was characterized by a desire to consolidate its international financial power through the corruption and disintegration of European society and culture.

Essays include: Jewish World Politics; Against the Jewish Bank Plague; Self-Unmasking of the Jewish Defense Troops; Observations on Democracy; Thoughts on the Nature of British Politics; Jewish Bolshevism; Stock-Exchange Bolshevism; The Red and Golden International; Stock-Exchange and Bolshevism; National Socialist Efforts in France?; An Anti-Semitic International?; The German Idea; National Socialism; The State of the Teutonic Order; Germany and the League of Nations; United States of Europe?; In the Event of a League of Nations; On Germany's International Position; The Jewish Question in the World Battle; Europe's Revolution; Extract from Letzte Aufzeichnungen: 'National Socialism'; Extract from Letzte Aufzeichnungen: 'Worldviews.' Includes extensive chapter notes and a lengthy bibliography.

Softcover, 181 pages, #1010, **$20** minus 10% for TBR subscribers plus $5 S&H inside the U.S. from TBR, P.O. Box 550, White Plains, MD 20695. Call 1-877-773-9077 toll free to charge, Mon.-Thu. 8-4 ET or visit us online at www.BarnesReview.com.

The Cause of World Unrest

The Conspiracy to Produce Revolution, Communism and Anarchy

"There have been innumerable occasions when the loyalty of a new citizen to his new state has been admirable. On the other hand, both [in Europe] and in America, we have found that race instincts have been stronger than oaths of allegiance. In the case of the Jews, we find a people that have preserved both religious and racial ideals intact through many generations of cruel persecution. A race which has persisted in spite of such terrific pressure, constantly applied and often without mercy or justice, must be so knowledged to be a great and virile nationality in the mere fact of its persistence.

"But, when we consider that this race has not merely persisted but has achieved enormous power and influence in every civilized country, our admiration is easily aroused. Yet, there is another side to the picture. How are you to regard these strangers in your midst? Are they Americans, Jewish Americans or American Jews? The answer to this question is the solution of the Jewish problem."—Howell Arthur Gwynne, from the foreword.

This compilation of overtly anti-Semitic articles evidently served as a chief inspiration for America's most influential anti-Semitic newspaper, *The Dearborn Independent*, which was funded by the magnate Henry Ford in the 1920s.

Gwynne (far left) with Rudyard Kipling (far right) in South Africa, ca. 1900. Also pictured are Julian Ralph (second from left) and Perceval Landon.

The Cause of World Unrest is a 1920 book by British author and journalist Howell Arthur Gwynne that deals with the so-called Jewish Question, particularly in relation to the development of the then-contemporary ascent of Bolshevism under Lenin. The book is based upon a series of articles that appeared in *The Morning Post* which referenced the infamous Protocols of the Learned Elders of Zion.

The book charts the political development of the subversive movement through Freemasonry, the Illuminati, the various Jacobin and Carbonari sects, before eventually ending up at Bolshevism. An editor of *The Morning Post* newspaper, one of its journalists in Russia at the time Victor E. Marsden—who helped Arthur Cherep-Spiridovich to escape—witnessed the events and had reported back the Jewish demography of the Bolsheviks who were overthrowing the state.

It was released in the United States the same year by George Haven Putnam's publishing firm G.P. Putnam's Sons. The ADL of B'nai B'rith, a Jewish Freemasonic organization, led a campaign of intimidation, however, and, after a struggle for freedom of the press, Putman gave in and had the remaining copies recalled. He cited the fact that all other publishers, who had published the Protocols, which was a companion to *The Cause of World Unrest*, had been hit with financial attacks soon after. In any case, it is similar to *The Dearborn Independent* articles of Henry Ford, released soon after. Softcover, 312 pages, #1011, **$25** minus 10% for TBR subscribers.

Recommended companion: *Protocols of the Elders of Zion: The Definitive Edition*. Edited by Thomas Dalton. As mysterious as they are notorious, "The Protocols" have been called the most influential piece of anti-Semitic literature in history. Here we find an express desire for world domination, along with a plan to attain it. In the Protocols' world-to-come, there will be a Jewish king of the world who will guide all humanity on behalf of their interests. Serving at his behest will be the detested *goyim*, who will gratefully submit. Written in the form of meeting minutes, this document purports to be a transcription of a talk by an unnamed influential Jew, speaking around the year 1900. It first appeared in Russia in 1902 and then, in its final version, as part of a book by Sergei Nilus. But little beyond this is certain. It was denounced as a "forgery" in 1922—but is it? And what does that mean in this context? This new English translation includes commentary from Henry Ford, Alfred Rosenberg, Julius Evola and others. Softcover, 278 pages, #997, **$20** minus 10% for TBR subscribers.

A cartoon of Gwynne in later life.

THREE BOOKS NO OTHER PUBLISHER WOULD TOUCH!

Brutally Blunt Historical Treatises

The Talmudic Jew

Here is the first English-language edition of this valuable historical document! The author, August Rohling (1839–1931), was a German Catholic theologian, professor and author of critical studies of the Talmud, Judaism and Protestantism. *The Talmudic Jew* is his most famous work, first published in 1871 in Münster. Immediately after its appearance, a smear campaign against the book and its author was launched, even though all Rohling did was quote directly from the Talmud. Its translator and editor was A. Pontigny, who also wrote an introduction and a conclusion and who greatly expanded the text, mostly from Rohling's other publications.

Édouard Drumont, a French journalist, author and politician, contributed the preface.

In his introduction, Pontigny says: "For more than six centuries, numerous scholars from all of Europe have been trying to reveal the mysterious dogmas and laws of the Talmud to their contemporaries. But perhaps no other book has shed so much light on this important subject as *The Talmudic Jew*, published several years ago by August Rohling, professor at the University in Prague. The author's rare writing talent, his deep knowledge of the rabbinical language, literature and antiquities, his valiant frankness, and, last but not least, the general interest in this topic, more actual today than ever, ensured a sparkling success to this book, which quickly became a bestseller." This book will be of great use to anyone interested in the history of Judaism. Softcover, 113 pages, #1017, **$13**.

Why the Jews Should Be Kept Out of England

William Prynne (1600–1669) was an English lawyer, author, polemicist, political figure and a prominent Puritan opponent of church policy under Archbishop of Canterbury William Laud. Prynne became known in the 1640s as an Erastian, arguing for overall state control of religious matters. In 1656, a proposal was made in the Parliament of England to lift the 13th-century residency ban for Jews. This prompted Prynne to write a remarkable legal treatise against the proposal. It was printed in 1656 shortly before the Whitehall Conference and became influential in swaying public opinion.

The return of the Jews to England was heavily promoted by Manasseh ben Israel, the famous Portuguese rabbi, while Oliver Cromwell desired their conditional readmission. In the end, the Parliament did not support any such proposal. The Jews only came back to England in large numbers with the restoration monarchy of Charles II (1660–1685).

In his treatise, Prynne was reciting from the uncontested legal record of England and other nations. He cited ruinous Jewish usury, forgery of coins and royal charters, general criminality, ritual murders, etc. as main reasons why the 1290 expulsion had happened and why the Jews should not be readmitted in his time. This publication will be of interest to anyone fascinated by Puritanism, Protestantism or Jewish history in particular and Revisionist history in general. Softcover, 220 pages, indexed, #1014, **$23**.

The Blood Mystery

In *The Blood Mystery*, you get the full translation of Henri Desportes' most renowned work, translated in English as *The Blood Mystery Among the Jews of All Times*, a seminal study of ritual murder that was published in 1890. Desportes (Célestin Henri Déporte) was a Catholic priest born in 1865 in France. He died in 1939.

In *The Blood Mystery*, Desportes performs a historical dissection of the ritual murder phenomenon, then dives into specific historical cases and answers the claims of critics. Desportes claims: "All the revelations, the ancient chronicles, the records of the Trent and Damascus trials, the book of the Moldovan Rabbi, etc. tell us about … the custom of using Christian blood. … It already existed before the total scattering of the Jewish nation, it continued to be practiced … in compliance with Talmudic and rabbinical laws." This edition contains a preface by Édouard Drumont, the famous French journalist. Softcover, 271 pages, indexed, #994, **$30** minus 10% for TBR subscribers.

Communism With the Mask Off

PLUS *Bolshevism in Theory and Practice* all in one booklet!

These two dramatic speeches, made by German Minister of Propaganda Joseph Goebbels at the famous Nuremberg rallies of 1935 and 1936, sum up the National Socialist interpretation of Communism and Bolshevism and its threat to the world.

In *Communism With the Mask Off*, Goebbels describes in detail the Jewish origins of Marxism and Communism, and lists the leaders and instigators of that ideology in Russia, Germany, many European nations and even China. "As far as we ourselves are concerned, we have completely overcome this menace. Indeed, perhaps, outside of his work in Germany, the greatest service which our Führer has rendered the world is that, here in Germany, he has set up a barrier against world Bolshevism upon which the waves of this vile Asiatic-Jewish flood break in vain."

In part 2, *Bolshevism in Theory and Practice*, he discusses the practical social, political and economic consequences of Marxism—and how Germany had broken that menace. "We have proved under the most unfavorable circumstances that Bolshevism can be overcome if one wishes to do so, if one uses the proper means, and if one is determined to oppose the powers of destruction with all one's strength and all one's manly courage."

About the author: Paul Joseph Goebbels (1897–1945) was an early member of the Nazi Party and reputedly had the highest IQ in the party. He obtained a Ph.D. from Heidelberg University in 1921. He then went on to work as a journalist. By 1924, he had joined the NSDAP and, two years later, was appointed leader of the party in Berlin to wrest political control of that city from the Communists—an objective he attained.

Elected to the Reichstag in 1928, Goebbels took an active part in Hitler's rise to power, and was appointed minister of "propaganda." He killed himself rather than fall into Allied hands.

This 64-page square-bound booklet retails for $12 plus $5 S&H, but can be yours FREE when you subscribe for one year at $56 to The Barnes Review magazine!

Bringing History Into Accord With the Facts in the Tradition of Dr. Harry Elmer Barnes

THE BARNES REVIEW

A JOURNAL OF POLITICALLY INCORRECT HISTORY

March / April 2024 ❖ Volume XXX ❖ Number 2

Table of Contents

Belgian Pays Heavy Price for Anti-Communist Cartoons

By Mike Mains

4 Georges Remi was an anti-Communist cartoonist operating in Nazi-occupied Belgium who created one of the most popular characters in comic book history: Tintin. Tintin was read by people of all ages across the free world, but that could not protect the Belgian from accusations of "collaboration with the Nazis" for exposing the horrors of life under Red rule.

The Gouzenko Affair and the Origins of the Cold War

By Rémi Tremblay

8 It is an open secret that the Soviet Union ran a very effective spy network in the United States, eventually convincing dozens of U.S. citizens to pass nuclear and other secrets to their Red masters. These revelations eventually spurred the Cold War. Interestingly, however, the Cold War did not start in the United States, but in the Canadian capital of Ottawa.

An Analysis of the Career of Henry Alfred Kissinger

By Philip Giraldi

16 Former CIA field analyst Philip Giraldi offers TBR readers an unbiased look at Henry Kissinger and the career of this infamous advisor to U.S. presidents and politicians. Kissinger has been characterized by some as an international foreign policy genius and by others as a stone-cold war criminal. As you will see, the truth lies somewhere in the middle.

Does Poland Really Deserve Reparations from Germany?

By John Wear, J.D.

20 In September 1939, Adolf Hitler invaded Poland to stop the slaughter of his ethnic brethren by the post-World War I Polish army and Marxist/Jewish assassination squads. More than 58,000 ethnic Germans were killed in 1939 alone, spurring Hitler to act. Now, Poland is demanding reparations from Germany for alleged crimes. But who owes whom is the real question. Researcher John Wear answers that in detail.

Black, Brown, Asian & Slavic Volunteers in Hitler's Army

Interview With Veronica Kuzniar-Clark

36 Adolf Hitler hated all who were not of pure Aryan blood, those blond, blue-eyed people exemplified by the Nordic race. This characterization of National Socialist dogma is, however, completely false, as you will see in this unexpurgated interview with the courageous author of the eye-opening—and suppressed—book *Hitler's Black Nazis*.

Who Were the Red Paint People Of Ancient North America?

By Marc Roland

46 Five millennia ago a group of people throve along the northeast coast of North America. Unlike any other American Indian group until thousands of years later, these people had unparalleled deep-water maritime fishing skills, hunting shark, whale and swordfish. Interestingly, they covered their dead in red ochre as did ancient Europeans. If they were not American Indians, then who were they?

Fr. Leonard Feeney and the St. Benedict Center Revisited

Conclusion—By Antonius J. Patrick

62 Fr. Leonard Feeney was a courageous, honest and outspoken Catholic priest who, despite the threats to his career, could not sit by silently as perversion infected the church, and Marxist beliefs engulfed America. For this, he was shunned, shamed and silenced—all for telling the truth. Here is part two of our story on Fr. Feeney and the St. Benedict Center.

TBR Interviews Prominent Critic of Jewish Power

Interview With Dr. Kevin MacDonald

72 TBR likes to give voice to those who have been smeared by the mainstream and let them tell their side of the story. In this issue, author and radio host James Edwards interviews Dr. Kevin Macdonald, whose books on Jewish survival strategy have gotten him in hot water with his fellow academicians.

PERSONAL FROM THE EDITOR

Speaking Truth to Power

Thank you for taking the time to read The Barnes Review. A magazine without readers is a worthless pile of paper. Remember, we do what very few are "crazy" enough to do: bring history into accord with the facts in an era where doing so can be accompanied by unpleasant repercussions.

Our lead story this issue is from author Mike Mains, who offers us a biography of Georges Remi, aka Hergé, an anti-Communist cartoonist active during Germany's occupation of Belgium during WWII. Though Remi was responsible for creating one of the most popular fictional characters in history—Tintin—his dislike for Communism was not appreciated by the post-WWII masters of the universe: the USSR, the United States, France and the United Kingdom. The Red propagandists, infiltrators and agitators who infected the West during the era insisted Josef Stalin was our great ally, and Communism a harmless—even beneficial—political system. These kinds of useful idiots still exist today in politics, the news media and academia. Despite attempts to destroy Remi's career, he continued to criticize Communism until he died in 1983. (See page 4.)

Pertinent to those interested in relations between the USSR and the United States in the mid-20th century is an article by Canadian historian Rémi Tremblay. He insists the Cold War did not start in the U.S.A. but in Canada. It was, after all, Igor Gouzenko, a talented Soviet cipher clerk working in the Russian Embassy in Ottawa, who blew the lid off the massive spy network that managed to steal high-level Western military secrets—including nuclear tech. These revelations derailed UN attempts to curtail global nuclear proliferation. (See page 8.)

In this issue we also discuss the career of Henry Kissinger, who died last year at the ripe (one might say rotten) old age of 100. And, while most media outlets eulogized him as either a saint or a demon, with no grey area in between, we here at TBR reject such simplified analyses. Thus we enlisted Philip Giraldi, a former CIA counter-terrorism specialist and military intelligence officer quite familiar with 20th-century history, to craft what we believe is an evenhanded and honest biography of Kissinger. Be sure to let us know what you think. (See page 16.)

Recently, as we reported in a previous issue of TBR, Poland has demanded reparations from Germany for alleged war crimes. In response to this clamor, TBR author John Wear makes the case that it may actually be Poland that owes Germany billions of dollars in reparations. See his analysis starting on page 20.

There's much more in this edition of TBR, including a fascinating article on the origins of the Red Paint People of the ancient northeast coast of North America, but, as you read this issue, ask yourself: "Where else can I get this kind of information?"

If you agree that TBR is unique, please consider making a donation of any amount to our efforts. Needless to say, in this day and age, we can't continue to do it without you . ❖

—Paul Angel, Executive Editor

Slaughterhouse Palestine

Mohammad al Yazji of Gaza, Palestine, gets up at four in the morning to scrounge for food. Mohammad has a great weight upon his shoulders, even though he is only 13 years old. It is he who is now responsible for the welfare of his seven siblings, the youngest of whom is but six months old. Tragically, but not surprisingly, Mohammad's mother and father have been sent to their graves by Israeli airstrikes.

Mohammad is worried. The baby won't drink the formula he was able to acquire and the child is growing thin and sickly. His younger brothers and sisters don't look well, either. They are dehydrated, starving and traumatized. Neighbors try to bring what food they can to the pile of rubble where Mohammad and his siblings now live, once their simple, loving home in Gaza.

But Mohammad's story is not unique. There are unknown thousands of orphans roaming the streets, struggling to survive. Kudos to ABC News for actually bringing this story to the public. It seems, finally, after decades of complete silence, people across the world are awakening to what Israel is doing to the people of the Holy Land.

In years past, only a very few brave souls would dare to discuss Zionist crimes in Palestine. Most were too scared to be labeled "anti-Semitic." They know being tagged with that moniker comes with nasty repercussions including possible loss of job, reputation, political office, social media privileges, and even the loss of friends and family—too scared to be associated with an "anti-Semite."

Thankfully, that term is losing its power. Millions have been roused from their stupor. They have finally found an issue of great importance that moves them to action. That is stopping the erasure of all *goyim* in Palestine.

In Yiddish, *goyim* means "non-Jews," according to *Webster's*. That is a sanitized definition. In reality it means "insentient beast" or "idiot," one without the capacity for thought.

This kind of thinking is at the heart of the Zionist mind. Although there have been dozens of cultures that have lived in the Holy Land over the past seven millennia—Canaanites, Babylonians, Assyrians, Nabateans, Egyptians, Christians, Muslims and many more—the Zionists believe only Jews have a right to "own" that piece of real estate. All standing between them and this goal are pests to be exterminated.

But the world is noticing and millions are shocked that any modern nation could so energetically violate the most sacrosanct rules of "civilized" war (if there is such a thing): heavily armed militaries must not target civilians. Armies are obliged, instead, to go beyond what is required to ensure innocents are not victims of war.

However, if invading soldiers considers these civilians to be nothing more than beasts of burden, mindless brutes and "unchosen ones," then their consciences may remain clear. These people are thought of the same way a farmer thinks of his livestock when it's time to take his flock to the butcher.

Mere words can hardly describe how the people of Palestine have suffered under Zionist rule since the creation of the state of Israel in 1948. It is estimated that more than 5 million non-Jewish inhabitants of Palestine have died as a direct result of the Israeli occupation, either from bombs, bullets, starvation or lack of medical care. Many more millions have been chased at gunpoint to neighboring nations, homeless, penniless refugees.

Numbers, then, are perhaps a better way to explain the massive disparity in total casualties suffered by Israelis and non-Israelis in Palestine over the last 75 years. According to Wikipedia, which could never be accused of skewing numbers in favor of non-Jews, this is how many Israeli soldiers and police have died fighting since 1948: 6,000 (Arab-Israeli War, 1948); 231 (Sinai War, 1956); 776 (Six-Day War, 1967); 1,424 (War of Attrition, 1967-71); 2,656 (Yom Kippur War, 1971); 18 (Operation Litani, 1978); 657 (First Lebanon War, 1982-85); 256 (Security Zone in Lebanon Campaign, 1985-2000); 60 (First Intifada, 1987-1993); 170 ("Palestinian Political Violence," 1993-2000); 332 (operations Defensive Wall, Rainbow and Days of Penitence, 2000-2008); 147 (Operation Cast Lead, 2000 to 2009); 67 (Operation Protective Edge, 2014); and 515 so far in the Israel-Hamas war.

Along the way it is estimated that tens of thousands of Israeli civilians have been wounded, many critically, in "terror" attacks and wars since 1948. As military service in Israel is compulsory, it's sometimes hard to distinguish between civilians and soldiers.

That's a total of 13,242 Israeli soldiers and policemen killed since 1948, says Wikipedia. To be fair, Israel claims that number is more like 22,000.

That's a lot. However, news outlet *Vox*, also tracking these stats, points out: "Since 2005, 23 out of every 24 conflict deaths have been Palestinian." That means, says *Vox*, that "87% of the deaths" are non-Jewish Palestinians. Israelis call this "mowing the grass."

In short, more Palestinian civilians have been killed—estimated at 28,000—in the five months since the Hamas attack on Israel of 2023 than the number of Israeli soldiers who have died fighting in the last 75 years!

Is this a war or a slaughterhouse?

I suppose if you look upon these people as insects to be squashed, then who cares? Well, judging from the massive anti-Israel rallies taking place around the world, people do care. And they are finally raising their voices in disgust and dismay after years of self-imposed silence.

The problem is, until the United States stops funding, arming and enabling Israel, this ethnic cleansing will not end until all the "cattle" are chased off or butchered. But the one thing we must not do is remain silent. ❖

—Paul Angel, Executive Editor

Belgian Pays Heavy Price for Anti-Communist Cartoons

One of Belgium's most popular anti-Communist cartoonists and authors, Georges Remi, developed the comic strip character Tintin, whose adventures brought smiles and laughs to millions of readers.

By Mike Mains

It's not often that a cartoonist achieves worldwide fame. In fact, I can only think of three who have done so: Charles M. Schulz, creator of the comic strip *Peanuts*; Scott Adams, author and creator of the *Dilbert* comic strip; and Georges Remi, who wrote and drew under the pen name Hergé, and created of one of the most popular comic strip characters of all time—Tintin.

Tintin, the young, rosy-cheeked Belgian reporter with a tuft of orange hair and his faithful dog Snowy have entertained both children and adults for almost a century. The Tintin comic strips have been reprinted in book form and published in over 70 languages with sales of more than 250 million copies.

Tintin's adventures span the globe. Published in vibrant color (all except one) and before television was invented, *The Adventures of Tintin* books served as a window to the world for young readers. A world of exotic mystery mixed with danger, wonder and excitement, all from the imagination of a single man.

Tintin collectibles are still popular.

But what many people don't know about Tintin's creator is that Remi was a devout Catholic, an avowed anti-Communist and a unique man who held a front row seat to two world wars.

A CARTOONIST IS BORN

Remi was born on May 22, 1907, in Belgium and grew up speaking French. At the age of 14, he became a member of the Belgium Boy Scouts, where he earned the nickname "Curious Fox," and it was during this time that he developed his lifelong love of drawing. Some of his earliest cartoons were published in his high school scouting magazine, and, soon after that, in *Le Boy-Scout Belge*, the monthly scouting magazine published in Belgium.

Remi received criticism later in life because many of his early sketches portrayed German soldiers. But, for a boy growing up and learning how to draw in Belgium during World War I, seeing German soldiers up close and in uniform would be a very attractive subject.

In 1925, Remi was hired by the Belgian newspaper *Le Vingtième Siècle*, a conservative Catholic publication, to work in the subscription department. In 1926 he created his first comic strip called Totor, Patrol Leader of Les Hannerons in *Le Boy-Scout Belge*. Totor was a young boy scout who embarked on a series of humorous adventures, an early forerunner to Tintin.

Totor proved popular with readers and helped Remi earn a position as

chief editor of *Le Petit Vingtième*, a weekly children's supplement to *Le Vingtième Siècle*. It was here that Tintin first appeared, making his debut on January 10, 1929. The comic strip was an immediate success.

TINTIN GOES TO RUSSIA

Children loved Tintin and couldn't get enough of the comic strip, so the stories were reprinted in book form. The first Tintin book came out in 1930 and is called *Tintin in the Land of the Soviets*. It's the only Tintin book that isn't in color, and in this writer's opinion, it's the best in the series of 23 books.

Tintin is sent to Russia to report on the policies of the Bolshevik government and immediately finds himself in danger from the Soviet secret police who are out to kill him. Told with a heavy dose of slapstick humor, the story lampoons, in a true way, the daily horrors of Communism and Soviet Russia.

In one memorable scene, Tintin and Snowy encounter a trio of Communist goons addressing a crowd of peasants. "Comrades," says one of the goons, "you have three lists before you. The first is that of the Communist Party. All those who oppose this list raise their hands!"

The three goons then draw their guns and point them. "Now, who says no to this list?" The crowd of peasants lowers their heads and remains silent, prompting one of the Communist thugs to joyously announce, "Nobody? Then I declare the Communist Party list elected unanimously!"

In another scene, Tintin and Snowy look sadly upon the countless orphaned and abandoned Russian children, many roaming the country and reduced to begging for food. The parents of these children were no doubt murdered by the Bolsheviks.

Scenes such as this permeate the story and deftly portray the routine sadism, cruelty and duplicity of the

Georges Remi (1907-1983) is perhaps one of the most notable comic strip cartoonists in Western history. A highly talented artist, Remi, who signed his drawings using the pseudonym Hergé, a reversal of his initials "R.G." as pronounced in French, established his career with the introduction of Tintin and his sidekick Snowy in January 1929. In 1934, Remi met Chang Chong-Chen, a young Chinese student, who convinced him of the importance of developing a sound storyline for his cartoons and comic strips. Marking a turning point in his career, Remi began taking his passion for art and storytelling seriously, engaging in extensive research and preparation for his stories.

Communists in a way that children (and adults) can understand. At the end, after dodging numerous attempts to arrest or kill him, Tintin returns home to a hero's welcome. The book was an instant hit.

Tintin's second adventure book was titled *Tintin in the Congo* and featured the young hero and his faithful dog visiting the former Belgian colony, where they encountered diamond smugglers, big game hunters and wild animals. Activists tried to get the book banned for "racism" in 2007, but a Belgian court rejected their claim.

After that, it was *Tintin in America* and then off to see the rest of the world. Tintin and Snowy even went to outer space to visit the Moon.

WORLD WAR II AND AFTER

During the German occupation of Belgium in World War II, Remi worked for *Le Soir*, Belgium's largest French language newspaper, and continued churning out Tintin comic strips and adventure books. Some of his best work was completed during this time, including *The Crab With the Golden Claw* and *The Secret of the Unicorn*.

After the war, jealous competitors, aided by Communists, tried to have Remi jailed and executed for collaborating with the enemy. They claimed by continuing to draw the Tintin comic

strips and books during the occupation, he was guilty of treason.

Remi was arrested five times, but none of the charges stuck. Still, Remi's reputation was damaged, and he was reduced to submitting new non-Tintin cartoons to various publications under the pseudonym of Olav. Sadly, none of them sold. The threat of imprisonment or even death that Remi faced took a toll on his mother, who suffered a nervous breakdown and had to go into a psychiatric hospital.

The many false charges filed against Remi also put a strain on his marriage, and his wife left him.

However, Remi managed a professional comeback and, in 1950, he formed Studios Hergé, consisting of a team of artists to assist him in reestablishing Tintin. This led to the book *Tintin in Tibet*, Remi's personal favorite among all his books.

Remi continued to work on the Tintin stories for the next 26 years, finishing the final book in the series, *Tintin and the Picaros*, in 1976.

In 1979, Remi became ill and required weekly blood transfusions. He died on March 3, 1983. His death received front-page coverage in newspapers all across Europe.

After Remi's death, his art gained new followers, and a museum in Belgium was established in his honor. Tintin's adventures have been made into numerous movies, television shows, books and plays.

Georges Remi was a simple man who loved children, hated Communism and inspired millions of people around the world. ❖

Mike Mains is a researcher and author of numerous books including *The Impostor Sister Lucy: The True Story of Our Lady of Fatima*. He focuses primarily on the hidden history of America, the history of the Catholic church, and the sinister forces controlling Hollywood.

Classic Historic Films in Remastered DVDs!

Hitlerjunge Quex (Hitler Youth Quex)

The year is 1931, and young Heini Volker has a problem. His unemployed father demands he joins Berlin's young Communists. But his heart belongs to the Hitler Youth. How Heini resolves this quandary is the story of *Hitlerjunge Quex*, a movie that became central to the moral instruction of young Germans in the Nazi years. Produced in 1933, *Hitlerjunge Quex* drew from the real story of Herbert Norkus, a Hitler Youth killed by Communist street-fighters in 1932. The film pulls few punches in its depiction of Depression-era misery. The film became a Nazi propaganda staple for years. Produced by Karl Ritter. Directed by Hans Steinhoff. Music by Hans-Otto Borgmann. Special features include: historical slide show, original promo materials, interactive scene selection, switchable English subtitles. NOTE: Distribution prohibited in Germany, Italy, Austria and France. B&W, 1933, 87 minutes, German dialogue, English subtitles, #1001, **$25**. (NTSC Region 0 encoding—entire world.)

Red Storm Over the Village: Frisians in Peril

"Nazi cinema's most venomous anti-Soviet propaganda film!" Few political films made during the Third Reich were accorded the distinction of being distributed by the Goebbels Propaganda Ministry. Peter Hagen's *Friesennot* (*Frisians in Peril*) was awarded that distinction in 1935. Peter Hagen was a film reviewer for Goebbels's newspaper and then joined the Propaganda Ministry. There, he became a leading film critic. *Red Storm Over The Village: Frisians in Peril* dramatizes the plight of peaceful Germans from Friesland who lived in an isolated village on the Volga in Russia for generations. Their bucolic existence is shattered by the invasion of a cavalry detachment of the Red Army. A brutal Red Guard rapes and kills a young village girl. Then, when drunken troops desecrate the village's house of worship, the outraged Germans revolt. Multiple special features. German, 1935, 96 minutes, English subtitles, #1002, **$30**. (NTSC Region 0 encoding—entire world.)

Diesel: The Life of Rudolf Diesel —Inventor of the Diesel Engine

This is the story of Rudolf Diesel, the German inventor who created an internal-combustion engine that conquered maximal thermal efficiency, but whose obsession almost killed him. Young Diesel (Willy Birgel) dreams of becoming an engineer. He builds an ammonia steam engine, but it fails to produce the power he seeks. Diesel knows the engine he envisions will revolutionize the world. Several patents later—and now financed by industrialist Heinrich von Buz—Diesel is allowed to test his ideas. Von Buz enlists the additional support of the Krupp firm. Diesel atomizes the fuel and it works, and it's almost three times as powerful as a steam engine. The picture ends on a jubilant note of victory, with an impressive montage sequence of tractors, trucks, airplanes, ships and submarines—all powered by Diesel's engines. Germany, 1942, B&W, German dialogue, English subtitles, 90 minutes, #1004, **$25**. (NTSC Region 0 encoding—entire world.)

Kolberg: The Restored 1945 Epic

Filmed over late 1943 and 1944, *Kolberg* drew upon the historical resistance of East Prussian townsmen against Napoleon in 1807 in arguing its case for total war against the WWII Allies. Its bone-jarring climax, showing Kolberg bombarded into rubble by French artillery, evokes Allied bombing raids across Germany at the time. Even as the Nazi regime was entering its last phases, it devoted lavish resources to *Kolberg*'s spectacular battle scenes, detonating tons of explosives and diverting thousands of soldiers from the front. Released amidst the chaos of 1945, *Kolberg* was shown in Germany's few still-intact movie houses. This new DVD edition features better subtitles, restored sound and restoration of the original color. Directed by Veit Harlan. Music by Norbert Schultze. Multiple special features. Color, 104 minutes, German dialogue with switchable English or Spanish subtitles, #1005, **$25**. (NTSC Region 0 encoding—entire world.)

Die Frontschau (The Front Show)

An amazing collection featuring nine films on one DVD! Nearly three hours long with new English narration track. Includes six never-before-seen films! One of the rarest cinematic documents to survive the war, Germany's "Front Shows" offer a unique perspective of Hitler's 1941 Russian campaign. Skillfully blending German frontline footage and captured Soviet combat film, the programs depict the German soldier in battle, on forced marches, building forts and shelters and coping with climatic hardships. Censored from the public, the features were shown to recruits to help prepare them for the realities of the east. Germany, 1940s, B&W, 158 minutes, English voice-over, #1006, **$20**. (NTSC Region 0 encoding—entire world.)

Disasters of the 20th Century

Here are the disasters, natural and man-made, that have marked our turbulent 20th century. In addition to dramatic footage from the San Francisco earthquake of 1906, the Miami hurricane of 1926, the eruption of Mount Saint Helens in 1980, and other natural disasters, you'll see the crash of the dirigible Hindenburg, historic fires, and other man-made disasters that have taken hundreds of lives. This program also includes film relating to the assassinations of Gandhi, the Kennedys and Martin Luther King, Jr. Color and B&W, 60 minutes, #1007, **$15**. (NTSC Region 0 encoding—entire world.)

The Gouzenko Affair and the Origins of the Cold War

A Soviet defector's evidence and testimony reveal the duplicity of Josef Stalin's regime, sparking the decades long standoff between the nations of the West and Soviet Union.

By Remi Tremblay

The Cold War was the most decisive factor in shaping the world map in the second half of the 20th century, yet very few know how it all started and how America's "gallant ally," the Soviet Union, came to embody a real-life boogeyman. Most would be surprised to learn that the Cold War did not start in Washington, D.C. or in Moscow, but in Ottawa, Canada.

And it started with a single man—a cipher clerk in the Soviet embassy in Ottawa.

Meet Igor Sergeyevich Gouzenko, the man who changed the course of history.

BACKGROUND

In 1945, the world was "made safe for democracy," or so we were told. With Germany utterly defeated and Japan finally capitulating on September 2, 1945, the dream of a long-lasting peace finally seemed possible. After all, it is what motivated the Western powers to allow Josef Stalin and the Union of Soviet Socialist Republics to enslave half of Europe.

But, before long, the dream of a world brotherhood came to a halt, as some ostensible allies were not as well intentioned as it seemed.

IGOR GOUZENKO

It is what Gouzenko revealed to the world in the fall of 1945. The quest for peace and universal brotherhood would have to wait.

Until that fateful fall, Gouzenko had been working for the Soviet Main Intelligence Directorate (GRU), the foreign military intelligence agency of the Soviet Union. Officially employed by the embassy, his work was to cipher and decipher secret communications for the GRU.

A brilliant student, he had been recruited by the infamous People's Commissariat for Internal Affairs—the NKVD—when World War II started and had been dispatched to Ottawa in June 1943 for his first and last foreign mission. There, he worked under the direction of Col. Nikolai Zabotin, officially the Soviet military attaché for Canada but actually working undercover as the ringleader of a Soviet espionage operation.

Gouzenko learned in September 1944 that he would be repatriated to the Soviet Union. Fearful of being subjected to the excesses of Soviet tyranny—torture or imprisonment or even being banished to the notorious gulags for errors he had committed, like forgetting a confidential document on the ground, a mistake that had been reported by a cleaning lady at the embassy—Gouzenko resisted.

Col. Mikhail Mil'shtein, a GRU officer who had come to control the embassy's operations, had voiced suspicions about Gouzenko because he did not live in the same quarters as the other Soviet employees, but on his own with his wife and baby. Due to his suspicions, Mil'shtein led the charge to have Gouzenko sent back to Moscow. However, Zabotin was

Igor Gouzenko, a cipher clerk for the Soviet Embassy in Canada, dons a pillow case to hide his face during a media interview. In 1945, three days after World War II ended, Gouzenko left the embassy with Soviet code books and decryption materials. The woman at left holds a copy of one of his novels.

able to postpone the repatriation for many months.

With his return to Russia put on hold, Gouzenko and his wife Anna decided to defect, regardless of the risks to their personal safety. Gouzenko, however, decided not to rush his decision and to allow himself sufficient time to gather information and documents that would be valuable to the Canadian government. The information and documents he would offer to Canadian authorities would be his guarantee of protection.

Unfortunately for him, there was not much in Canada in the way of secrets. The Kremlin had focused its intelligence collection on the atomic bomb, and Canada played a small role in its development. Still, Soviet agents liked to exaggerate their work in order to stay in advanced Western nations. Had they failed to gather intelligence, they would have been repatriated to the Soviet Union where life was far less pleasant.

Soviet agents in Canada had managed to get mundane information on explosive plants, radar systems, radio tubes and microwaves. But there was one exception who proved to be a very valuable spy: a British scientist who was part of the Canadian ring. His name was Alan Nunn May. He managed to steal information on the atomic bomb and Uranium-233.

DEFECTION

On September 5, 1945, Gouzenko and his pregnant wife, along with their 15-month-old infant, officially defected to the West. The former clerk absconded with a briefcase full of Soviet secrets—a total of 109 important documents.

Gouzenko first went to the *Ottawa Journal*, but was too scared to talk to anyone. He went home, gathered himself and came back a second time. Under intense stress, he had difficulty expressing himself clearly in his broken English and, not understanding what he really wanted, the journalists sent him to the Royal Canadian Mounted Police (RCMP) office, located in the same building as the Ministry of Justice. There, Gouzenko asked to talk to the minister himself, but he was told to come back the following morning. Though fearing for his life and that of his family, he had no other option but to return to his apartment.

The following day, the minister refused to see the Soviet defector, so he went back to the *Ottawa Journal*. The story he told them seemed too far-fetched and it could create diplomatic problems, so they refused to run it and sent him again to the RCMP.

Unprepared to consider such a testimony, the police refused to help him. They also thought that he was lying, and that simply interacting with him could cause a severe diplomatic rift with the Soviets.

The Dancer and the Devil: Stalin, Pavlova and the Road to the Great Pandemic

By John E. O'Neill and Sarah C. Wynne. Communism must kill what it cannot control. So, for a century, it has killed artists, writers, musicians and even dancers. It kills them secretly, using bioweapons and poison to escape accountability. Among its victims was Anna Pavlova, one of history's greatest dancers. She defied Josef Stalin and, for that, she had to die. Her death in Paris in 1931 was a mystery until now. *The Dancer and the Devil* traces Marxism's century-long fascination with bioweapons, from the Soviets' leak of pneumonic plague in 1939 that nearly killed Stalin to leaks of anthrax at Kiev in 1972 and Yekaterinburg in 1979; from the leak of a flu in northeast China in 1977 that killed millions to the catastrophic Covid-19 leak from biolabs in Wuhan, China. Brave souls have suffered mysterious "natural" deaths, including dancers, writers, saints and heroes. *The Dancer and the Devil* tracks a century of Soviet and then Chinese Communist bioweapons through their development and intentional use on dissidents then tracks leaks of bioweapons from the 1930s to the modern era. Hardback, 320 pages, $30 minus 10% for TBR subscribers plus $5 S&H inside the U.S. from TBR, P.O. Box 550, White Plains, MD 20695. Call 1-877-773-9077 to charge, Mon.-Thu. 8-4 ET. Purchase online at www.BarnesReview.com.

Just as he had predicted, his testimony was met with doubt and suspicion. However, the documents he had gathered would erase any doubts, if only someone would listen to him.

On the evening of September 6, 1945, Gouzenko and his wife hid in their apartment. Worries increased when they saw two men watching their home and heard knocking and a voice at the door. Gouzenko recognized the voice of another Soviet agent. They ran to the home of a neighbor, a member of the Royal Canadian Air Force (RCAF), to seek refuge. The RCAF member offered to get help from the police.

Two officers from the Ottawa police department arrived and questioned Gouzenko, who told them that he was in possession of secret information extremely important to the Soviets. The agents agreed to surveille the building overnight. Just before midnight, shadows and lights were seen in Gouzenko's apartment. Police intervened and found four Soviet employees, including the second secretary, inside the apartment.

On the following morning, puzzled by what had happened during the night, the RCMP officers finally agreed to interview Gouzenko and to examine his documents. Immediately, the RCMP decided to contact the British and American secret services.

INTRIGUES

The revelations laid before the Canadian policemen were shocking and went beyond Canada's own national security. They also hoped to get some guidance on how to handle a defector, as it was the first time they had dealt with such a delicate situation.

Immediately, the FBI dispatched an agent to conduct a counter-interrogation of Gouzenko. FBI Director J. Edgar Hoover had always suspected Soviet infiltration, and thought President Harry Truman was too soft on Communism. But Gouzenko seemed to have the evidence he needed.

As for the British, it was Kim Philby from MI6 who received the information. Being himself a Soviet agent, Moscow learned right away that their agent in Canada had defected.

After first trying to get Gouzenko back by force with a squad of men, the Soviet embassy then tried to use diplomatic channels, claiming Gouzenko had stolen money and that he should be arrested and deported to the USSR as a "capital criminal." To buy time, the RCMP explained the Gouzenkos had been very unstable and had run away. They issued information to apprehend them. However, the Soviets were not duped: Philby was constantly tipping them off, and the diplomatic game that was being played fooled no one. From that moment, Gouzenko became "Corby," a pseudonym used by the RCMP.[1]

Gouzenko first revealed that obtaining information regarding the atomic bomb was the priority of Soviet espionage in Lesovia, the Soviet code name for Canada. He also detailed the recruitment of homegrown traitors, and also how Soviet spies could easily enter the country without fear of detection. Until then, no one in Canada, in the United States or in Great Britain realized how sophisticated and extensive the Soviets' spying operations in the West truly were.

"This revelation gives one a new and more appalling outlook on the world than one has ever had before," Canadian Prime Minister William Lyon Mackenzie King wrote in his diary on September 11, days after Gouzenko's defection. "I cannot believe that this information has come to me as a matter of chance."

The documents Gouzenko provided detailing the spy ring contained several codenames, making it difficult to know who was who. Luckily, Gouzenko was able to provide the real identity of many operatives hidden behind these code names.

SCALE OF ESPIONAGE

According to Gouzenko's documents, in Canada alone, 20 public servants were working for Moscow. Despite having various profiles, King noted in his diary: "It is a rather extraordinary thing that most of those

From left to right, Brits busted for turning nuclear secrets over to the Soviets: **George Blake** (sentenced to 42 years in prison); **Alan Nunn May** (sentenced to 10 years in prison); **Klaus Fuchs** (theoretical physicist sentenced to nine years in prison); and **William John Vassall**, a blackmailed admiralty clerk who passed secrets to the Soviets after being photographed in compromising situations with other homosexuals (sentenced to 18 years).

caught in this present net are Jews or have Jewish wives or are of Jewish descent." Richard Nixon would later make similar comments about the "Jewishness" of the Communist espionage plot in America.

As part of the massive spy ring, which extended as far as Switzerland, Gouzenko also identified a British scientist working in Canada who had worked at the University of Chicago on the enriching of uranium. He also revealed there was a Soviet spy embedded in British intelligence going by the codename "Elli."

The British scientist turned out to be Alan Nunn May, who had been recruited as a spy in Canada, but had become a Communist in his younger years at Cambridge, like Philby and several others. His Communist leanings were not unknown. He had even gone to Leningrad with other Cambridge graduates but had nevertheless been able to join the British atomic program in 1942.

On September 10, Canadian authorities started following May, considered to be the most dangerous of those on the suspect list. He went back to England and remained free but under surveillance. MI5 was hesitant to arrest him without any evidence, but they monitored him constantly, trying to catch him red-handed. Philby had warned May to avoid any contact with Soviet agents. Still, when he was finally arrested, May was completely at a loss as to how his identity as a spy had been discovered.

AMERICAN REVELATIONS

The Canadian web also extended to the United States. In the ring operating in the United States, one spy was a top aid to the assistant secretary of state. For the FBI, it could not be anyone other than Alger Hiss, a New Dealer who was already on the FBI watchlist. After thorough investigations, the FBI was sure of Hiss's involvement with Moscow, but was only able to have him condemned for perjury, just like another Soviet spy named William Remington, a former employee of the War Production Board.

But, just like the British, Hoover wanted to wait until he had enough evidence to make arrests. That allowed Ignacy Witczak, who was on the list provided by Gouzenko, to escape surveillance and eventually vanish.

The information revealed by Gouzenko was kept secret. The RCMP and its U.S. counterparts wanted to double-check the information and gather evidence that would allow them to arrest and prosecute more spies.

Politically, it was also a boiling-hot potato as the USSR was still officially a Western ally. Surely, such news would have an impact on public opinion and diplomatic relations.

So, everything was kept secret. King traveled to Washington to meet Truman, and he also visited British PM Clement Attlee. Interestingly, Winston Churchill, who had been voted out of office, had been warned and declared he was not surprised by the revelations. Nevertheless, it may have helped shape his famous Fulton speech in which the "Iron Curtain" analogy was used for the first time.

ELIZABETH BENTLEY

A new chapter began when, on November 7, 1945, Elizabeth Bentley, a Soviet spy based in New York, contacted the FBI for the third time. She had not been taken seriously the two previous times. This time, however, in light of Gouzenko's revelations, the FBI took a keen interest in her story. She pointed to Fred Rose as an agent working in Canada, but also Hazen Sise, a Jewish architect based in Montreal, both of whom were targeted by the Gouzenko inquiries.[2]

Like Gouzenko, she also gave vague information on Hiss, information that was also confirmed by another

defector, Whittaker Chambers.

Other top guns mentioned by both Gouzenko and Bentley were Harry Dexter White and scientist Dr. Arthur Steinberg.[3] They were both put under constant surveillance by the FBI. Truman baffled many when he appointed White to the newly established International Monetary Fund despite Hoover's many warnings that White was a Soviet mole.

The FBI later lied to Prime Minister King about the scope of Bentley's revelations as they distrusted him and found him weak. And they were right. While tensions were increasing, King sought to ease those tensions with the Soviets and openly met Ambassador Georgii Zarubin to discuss Soviet espionage in Canada, offering him the chance to repatriate diplomats who were spies. This move infuriated Washington and London. The Russians then knew exactly what cards the West had in its deck. In King's defense, with Philby acting as a double agent, the Soviets always knew everything the Western powers were planning.

Using time to their advantage, the Communist agents halted their activities. In December, Russian spies, like Pavel Mikhailov, the head of the GRU based in America, were sent back to Russia where they would be safe from Western retaliation. Gouzenko had hoped that other Soviet spies would follow his example and defect, but most feared the possibly deadly repercussions for their families at home. A wife or mother left behind could have been sent to the gulag in retaliation—or "disappeared." The spies then left for New York and then Leningrad. After having been discovered, they were obviously no longer useful.

But homebred spies were not as clever. After learning of Gouzenko's defection, Soviet spy Fred Rose told everyone to remain calm. According to him, nothing would happen. Reassured, the network became dormant but no one fled. And they were reassured: The investigation was dragging on, and the U.S. intelligence services were seemingly stymied.

On February 3, 1946, Drew Pearson, a popular American journalist, broke the story, forcing the various governments to react swiftly. Who leaked the information to Pearson? Many suspect Hoover. He had fed Pearson info on pro-Germans during WWII, and he was scared of King's strategy, believing inaction played against them. By tipping off Pearson, Hoover wanted to force the issue by making it public. A week later, Pearson discussed the matter again and linked spying in Canada to spying in the U.S.

On February 15, Canada finally arrested 11 spies. The following day, two more were arrested. (In an obvious display of his weak leadership skills, the first thing King did after the initial arrests was to apologize personally to the Soviet ambassador!)

> Igor Gouzenko's revelations killed any chance of a United Nations commission on atomic weapons.

At that moment, it became clear to everyone that the Soviet Union was not a friend, but a formidable foe. Friends don't spy on each other and the fact that the Soviets wanted to acquire the secrets of the atomic bomb frightened the world public.

It is this case that put an end to global cooperation on the atomic bomb. Why would the U.S. share its secrets with such an untrustworthy partner?

Until then, Canadians considered Stalin's USSR a friend, and several societies in favor of strong bonds between Moscow and Ottawa had flourished during the war. The Eaton chain store, a Canadian predecessor of Walmart, even flew the hammer and sickle on its facade. In Ottawa's diplomatic circles, the Soviet diplomats were sought-after guests, especially Zabotin, the GRU's ringleader.[4]

In fact, it was widespread sympathy for the Soviet Union and Communist ideology in general that allowed Soviet agents to recruit new spies, as their recruitment pools were Communist front organizations like the League Against Fascism and the Civil Liberties Union.

Mathematician Israel Halperin, who went by the code name "Bacon," was one of those Communist sympathizers who became a traitor. Rare were the real traitors from the start, like McGill University's Prof. Raymond Boyer,[5] who openly joined the Communist Party before becoming a spy at the request of his friend Fred Rose. It is at McGill that Boyer recruited many other spies, sometimes with the help of his wife. After learning that six of the spies arrested were McGill graduates, a Quebec newspaper commented with a zest of humor: "You send your boy to McGill a Canadian democrat, and he graduates an international Communist."

The revelations surrounding the case horrified the population. The sough-after peace mirage was vanishing as a new threat was emerging.

The Cold War, to use Walter Lippmann's expression, had just started.

COLD WAR BEGINS

In Canada a Royal Commission was set up to investigate the spy case and hear from the different actors involved. After this investigation, several spies were charged for not respecting the Official Secrets Act, but accusations of treason were difficult to prove.

Some were prosecuted and jailed, like Boyer, who was sentenced to two years behind bars for breaking his oath of secrecy and revealing to the Russians the composition of the RDX explosive. Harold Gerson, a geological engineer, was sentenced to five years in prison.[6] In Great Britain, May was sentenced to 10 years of hard labor.

The most interesting cases though may have been the ones of Rose,[7] codenamed "Debouz," and Sam Carr, two leadings members of the Communist Party. Interestingly, like B'nai

B'rith activist Avedis Desrounian in the United States, they had smeared rightwing patriots like Fr. Charles Coughlin and Fr. Lionel Groulx before the war, labeling them "Hitler's agents" or "Nazis." While none of the men they accused of spying for Germany had done such a thing, they themselves spied for the Soviets.

Unfortunately, Gouzenko had not provided enough evidence to arrest Rose. However, the spies arrested testified that Rose was a Soviet handler who had been recruiting for and transmitting information to the GRU.

Rose's case made headlines worldwide. Here was the first public case of an elected official spying for the Soviets. The fact he was a Communist Party leader demonstrated how dependent on Moscow were the so-called "national" Communist parties.

The Rose trial was the first public appearance of Gouzenko. After only 30 minutes of deliberation, the jury found Rose guilty. He was sentenced to six years in prison. In a desperate last resort, he complained that anti-Semitism played a role in his verdict "and hardly a year after the victory over the Nazi barbarians who murdered 6 million Jews."[8]

Meanwhile, Carr, born Schmil Kogan in Ukraine, was another big player targeted by the inquiry. When the scandal broke, he vanished and went into hiding until the FBI arrested him in New York in 1949. Carr had long been a Communist agitator. A member of the Canadian Communist Party, he had studied at the Lenin University in Moscow and had been jailed for about three years for his subversive activities.

He was eventually sentenced to six years for procuring a forged passport.[9]

Still, only seven out of the 13 spies targeted for prosecution were found guilty in court.

In the U.S., the fear of Soviet espionage grew with these revelations. Soon, the House Un-American Activities Committee (HUAC), which had been used to prevent the growth of Fascism in the U.S., seized upon the question of the loyalty of Communists.

As guests were leaving the iconic Soviet embassy in Ottawa on Sunday, January 1, 1956, following an afternoon of New Year's Day festivities, a fire broke out on the third floor of the mansion, the former home of a wealthy Canadian lumber baron. Several neighbors who lived near the embassy noticed the fire and attempted to contact Soviet officials. An electrical short circuit on the third floor was the apparent cause of the fire, the floor that housed the Soviet embassy's secret communications room.

Once officials at the embassy realized a fire had broken out, they attempted to quell the flames themselves, rather than call the fire department. For nearly 30 minutes, Soviet officials unsuccessfully used hand extinguishers and a small fire hose.

Eventually, Ottawa's fire department, led by Fire Chief John Foote, was called and responded to the scene. Upon arriving, embassy staff refused to allow the firefighters to enter the building to deal with the now-raging inferno, claiming diplomatic immunity. A Soviet official was even alleged to have physically struck Foote, who ordered his men to tackle the blaze from the outside. Soviet officials then began removing files, boxes and cabinets of documents, loading them into two cars. They then quickly sped away.

Eventually, Foote declared a state of emergency and ordered more firemen to the scene. Around midnight, the fire was finally brought under control, but the interior of the embassy was gutted. Nearly 100 firemen had fought in frigid conditions even as Soviet officials and embassy staff had fled the scene with their secret documents. Igor Gouzenko argued that embassy officials were more concerned with maintaining the secrecy of their orders from Moscow and the list of names of Soviet agents operating in Canada, the United States and Western nations than with the fire.

Gouzenko's revelations killed any chance of international cooperation on the atomic bomb. In America, the military was given control of this project. The endeavors of a UN Atomic Energy Commission fell through.

CONCLUSION

As for Gouzenko, he remained hidden under RCMP protection for a few years, but no one tried to murder him. Stalin, who had just won the war against Germany and managed to enslave half of Europe, saw any attempt to kill the spy as a mistake.

Gouzenko changed his name to Krysac, ironically meaning mole or rat in Czech, and invented a new life story. He pretended to be of Czech origin and resumed a normal life in Canada. His eight children only learned of their Russian heritage in their late teenage years. Gouzenko lived under police protection until the 1960s.

Gouzenko was interviewed once more by the FBI in 1950, but not by the HUAC, despite their attempts to get in touch with him. The Canadian government agreed to give his confessions and once-secret documents to the HUAC, as long as they remained private and would not be published.

Gouzenko also got involved in the fight against Communism in Canada, authoring a pamphlet titled "Trudeau: A Potential Canadian Castro," in which he argued that Lester B. Pearson and Pierre E. Trudeau (Justin Trudeau's father) were Communist sympathizers, accusations based on fact.

Gouzenko became a famous author, publishing his autobiography in 1948,[10] a book he co-authored with Mervyn Black, and a novel, *The Fall of a Titan*, which received the Governor General Award in 1954. This novel depicted the evils of the Soviet regime. Later, Gouzenko lost his eyesight due to diabetes and died of a heart attack in June 1982. The West owes this unsung hero a debt of gratitude for exposing the extent of Soviet spying in the United States and Canada. Had he not done so, no one knows how many more secrets of vital national security would have been lost. ❖

Former Soviet NKVD spymaster Elizabeth Bentley is shown testifying in 1945 before the United States Congressional House Un-American Activities Committee about her role as a handler for some of the most effective Soviet moles working in the United States. She had been working as a spy since 1935 and was integrally involved in the "Silvermaster group." After threatening to reveal Soviet spies in the U.S. while drunk, she became concerned for her life and contacted the FBI. Eventually, she named 150 Soviet spies operating in the U.S.—of whom 37 were federal employees.

ENDNOTES:

1. The code name comes from the Corby Distillers box used by the RCMP to hide the documents related to Gouzenko.

2. Sise was not mentioned by Gouzenko himself but appeared in Israel Halperin's address book. Today is he hailed as a "humanitarian" but his involvement in the Spanish Republican forces and his years as a spy for the Soviet Union have been completely erased from official sources.

3. Steinberg had come to lecture at McGill University and had become a friend of Raymond Boyer. He returned to the U.S. in 1944 and worked for the Office of Scientific Research and Development of the U.S. Navy.

4. Another spy ring led by Vitalii Pavlov was linked to the NKVD. Pavlov had been sent to Ottawa in 1942 as consul. Friendly and welcoming, he would invite other diplomats for drinks and would relay information he gathered from such social encounters directly to Moscow.

5. He was already on the RCMP's watchlist for his work for the Canadian Association of Scientific Workers, a Communist front.

6. Knight, Amy. *How the Cold War Began: The Igor Gouzenko Affair and the Hunt for Soviet Spies*. New York: Carroll & Graf Publishers, 2005, p. 142.

7. In 1920, this Polish Jew immigrated from Lublin to Montreal under the name Fred Rosenberg. After joining the Soviet-led Young Communist League in 1925, he became a propagandist for the Community Party. In 1930, he spent 6 months in the USSR for training. Upon his return, he became a full-time activist, paid by the Party directly. He was soon charged for inciting a riot and spent a year in jail but came out as defiant as ever. He started promoting the Soviet Union and denouncing imperialist powers like the U.S., the UK, and Canada. He went into hiding at the beginning of the war. In 1942, he became involved with the GRU, and the following year was elected to Parliament.

8. Released in 1951, he returned to Montreal, but was no longer popular. After two years, he moved back to Poland.

9. After being released, he joined the United Jewish Peoples' Order.

10. The Canadian version was titled *This Was My Choice* while the American version was titled *The Iron Curtain*.

Rémi Tremblay is the editor of the French-Canadian magazine *Le Harfang* as well as the author of a book on the plight of the Acadians: *Les Acadiens: du Grand Dérangement au Grand Remplacement*. Tremblay is also a popular freelance journalist.

A Revisionist Look at Henry Kissinger

Questions about his legacy follow him to his grave

By Philip Giraldi

Henry Kissinger is best known for having served as both secretary of state and national security advisor under presidents Richard M. Nixon and Gerald Ford between 1969 and 1977. Afterward, as head of Kissinger Associates, a private security company named after him, he advised American presidents and foreign politicians, business leaders and the media about the complexities of the Cold War world and its subsequent development that he had done so much to help create. Upon his death on November 29, 2023, Kissinger could take credit for having been a major influence on U.S. foreign policy for nearly seven decades.

Born in Bavaria, Germany in 1923, Heinz Alfred Kissinger came to the United States in 1938 as a German-Jewish refugee. Though his family, consisting of a schoolteacher father and homemaker mother, was not particularly religious, they suffered under the Nazis with his father losing his job and young Heinz being denied higher education.

On arrival in the United States, Heinz changed his first name to Henry. Kissinger served in the U.S. Army during World War II starting when he was drafted in 1943, winding up as a sergeant in the Counter Intelligence Corps, where he was awarded a Bronze Star. After the war, he entered City University of New York and then Harvard University under the GI Bill. There he quickly established a reputation as a top scholar and successfully obtained his Ph.D.

HENRY KISSINGER
Inspired a generation of neocons.

He was then rewarded with a teaching position in government studies at the university where he soon became a widely known source on European history and diplomacy, with a particular focus as an expert on the development of nuclear weapons and the implication thereof on post-World War II foreign policy. He developed a way of thinking about the nuclear world that was eventually described as *Realpolitik*, combining actual national interests with the need to deal pragmatically and objectively with other global power centers and competitors.

Critics would point out that "realism" is remarkably devoid of any concerns that might be described as "idealistic" or overly sensitive to "human rights," but Kissinger would think of such considerations as largely irrelevant to politics among great powers. From his beginning at Harvard, Kissinger often was called upon to serve as a paid consultant to government agencies and think tanks as well as for the presidential campaigns of both Democrats and Republicans to include Nelson Rockefeller, John F. Kennedy, Hubert Humphrey and Nixon.

Some, however, are dismissive of Kissinger's meteoric rise to power, noting how he initially gained fame within the establishment by saying what the politicians wanted to hear, arguing, for example, that President Dwight D. Eisenhower needed to accept that "limited nuclear war" in Europe might be necessary to protect the United States and its allies from the growing power of the Soviet Union. Be that as it may, his concept and promotion of *Realpolitik* was a

well-packaged message that was welcome to those in power and Nixon rewarded Kissinger by appointing him special advisor for National Security Affairs in 1969. The appointment was, at the time, somewhat controversial as Kissinger spoke English with a noticeable German accent.

The relationship between Kissinger and Nixon was, of course, central to the power that the national security advisor derived from having the ear of the president. They were an odd couple that complemented each other perfectly. Kissinger was European in demeanor, oozing the charm, grace and intellectual-establishment respectability that Nixon did not have but, nevertheless, both disdained yet aspired to.

Kissinger was a genuine international citizen who was fluent in many languages and understood foreign cultures. Nixon was very much a typical middle-class American. Kissinger had something like a worldview that helped him understand developments while Nixon was hard-nosed and pragmatic with a strategic vision that shaped the government's policies. Both were, at the core, ruthless self-made men full of strengths and weaknesses, ambitions and passions.

Opinion of Kissinger's overall record as secretary of state and national security advisor is generally positive, though there are plenty of critics of what is seen as the dark side of some of his actions. Most historians would agree on the policies that Kissinger promoted that might be regarded as successful and effective from the point of view of Washington and the West more generally, particularly as he was careful to avoid violent or sudden shifts in policy that would provoke an equally violent response.

He developed the policy of détente with the Soviets, convinced Nixon to open normal diplomatic relations with China, supported the "shuttle diplomacy" in the Middle

Was Henry Kissinger a War Criminal?

According to journalist Bevan Hurley, writing for the UK *Independent* in an article headlined "From Cambodia to Bangladesh: A Brief History of Henry Kissinger's Alleged War Crimes":

> Henry Kissinger sided with military dictators and genocidal regimes in his pursuit of projecting U.S. power during the Cold War, resulting in the deaths of millions of innocents.
>
> In his eight years at the helm of U.S. foreign policy, Henry Kissinger's unique brand of *Realpolitik* diplomacy was blamed for genocides, massacres, rape and torture on an industrial scale. The architect of U.S. efforts to contain the Soviet Union during the Cold War, Kissinger prioritized ideology over morality, and was responsible for the deaths of 3 to 4 million people between the years 1969 and 1976, according to experts including Yale University historian Greg Grandin, the author of *Kissinger's Shadow*.
>
> As secretary of state under the [Richard] Nixon and [Gerald] Ford administrations, he pursued an interventionist approach to world affairs that shaped the thinking of a generation of neocons who would come after him.
>
> In his 2001 book *The Trial of Henry Kissinger*, legendary British author Christopher Hitchens methodically laid out the case for the grand old U.S. statesman to be prosecuted for conspiracy to commit murder, kidnap and torture.

Nations in which he is said to have orchestrated war crimes include Cambodia, East Timor, Chile, Argentina and Bangladesh.

East that ended the so-called Yom Kippur War involving Israel and its neighbors, and was lead negotiator of the Paris Peace Accords, which brought to a close America's engagement in the Vietnam War. His key role in ending the Vietnam War led to his being awarded the 1973 Nobel Peace Prize.

The uncertainty created by the Paris Peace "ceasefire " that basically was an instrument to allow the United States to disengage from Southeast Asia was clear to many observers. The American press also joked about the Nobel Prize award with *The New York Times* calling it the "Nobel War Prize." *The Washington Post* quoted former senior diplomat George Ball's quip that "the Norwegians must have a sense of humor." Comedian and political satirist Tom Lehrer added that "political satire became obsolete when Henry Kissinger was awarded the Nobel Peace Prize."

When the award was announced, hostilities in Vietnam were continuing, leading to the eventual fall of Saigon to the North Vietnamese in 1975. An embarrassed Kissinger did not attend the Nobel award ceremony in Oslo over concern that he would be targeted by anti-war protesters. He donated the prize money to a scholarship fund for U.S. servicemen killed or missing in Indochina and sought to return the medal, an offer refused by the Nobel Committee.

More criticism developed when it was learned that the United States, assiduous in honoring its soldiers by boasting of "bringing them all home living or dead," turned out to be making an exception for Vietnam, where as many as 1,500 American prisoners apparently missing in action were left behind for purely political reasons.

Nixon and Kissinger wanted to make sure that everyone understood the war was over and asserted, falsely, that all captives had been returned, even though it was a statement that contradicted what Nixon had said months before.

Kissinger, who played a direct role in prolonging the Vietnam War despite his clearly stated awareness that the war could not be won, was once described by Christopher Hitchens as a "one-man rolling crime wave," and his actions as "the wickedest thing ever done in American political history."

He was also associated with other controversial U.S. government policies, including his "personal approval" of the notorious 3,875 "carpet bombing" raids on Cambodia from 1969-1970, a country the U.S. was not at war with. Those raids killed between 150,000 and 250,000 Cambodian civilians. It also helped unleash a civil war inside Cambodia afterward that led to the rise of the Khmer Rouge and Pol Pot, a dictator whose regime killed as many as 2 million to 3 million more Cambodians.

> Henry Kissinger shaped the thinking of a generation of neocons who would come after him.

There was also direct involvement in the 1973 Chilean coup d'etat that replaced President Salvador Allende with Gen. Augusto Pinochet, who went on to kill 3,000 "leftists" and whose regime is accused of torturing and raping an estimated 400,000 more Chileans, according to some modern estimates.

And then there was support for Argentina's military junta in its "Dirty War" that "disappeared" 30,000 civilians, support for Indonesia in its invasion of East Timor that killed 100,000 to 200,000 people, and support for Pakistan during the Bangladesh Liberation War and Bangladesh genocide, that may have killed 3 million.

Kissinger was accused of war crimes for the civilian death toll due to the policies he advanced, his role in facilitating U.S. support for dictatorial regimes, and his willful ignorance toward human rights abuses committed by the United States and its allies. Kissinger clearly believed these atrocities were a price worth paying, both to stop the spread of Soviet Communism and to support American interests and its credibility as an ally to other nations in the world.

Amidst all the slaughter in a world at war, Kissinger, who did not practice Judaism, had some apparent issues, especially when around his boss, Nixon, who was a borderline anti-Semite. Nixon "ordered his aides to exclude all Jewish-Americans from policymaking on Israel," including Kissinger. One White House insider quoted Nixon as saying "get K. [Kissinger] out of the play. Let [Alexander] Haig handle it."

Despite claims to the contrary, Kissinger was not himself too exercised about either Israel or Jewish issues. In 1973, he did not feel that pressing the Soviet Union concerning the plight of Jews who allegedly faced some discrimination there should be a function of U.S. foreign policy. In a conversation with Nixon shortly after a meeting with then-Israeli Prime Minister Golda Meir on March 1, 1973, Kissinger stated, "The emigration of Jews from the Soviet Union is not an objective of American foreign policy, and, if they put Jews into gas chambers in the Soviet Union, it is not an American concern. Maybe a humanitarian concern."

Kissinger even had a negative view of American Jews who lobbied to assist Soviet Jews, calling them "bastards" and "self-serving." He went on to state that, "If it were not for the accident of my birth, I would be anti-Semitic." Even more provocatively, Kissinger once declared that "any people [Jews] who has been persecuted for 2,000 years must be doing something wrong."

In September 1973, Nixon fired William P. Rogers as secretary of state and replaced him with Kissinger. Kissinger would later state he had not

Some of the world leaders in power during Kissinger's time as a high-ranking U.S. official, left to right: Egypt's Anwar Sadat, Cambodia's Pol Pot, Israel's Golda Meir, Chile's Augusto Pinochet and Indonesia's Suharto.

been given enough time to know the Middle East as he settled into the State Department. In what was to become a major blunder, Kissinger later admitted that he was so engrossed with the Paris talks to end the Vietnam war that he and others in D.C. completely missed what was going on in the Middle East.

Egyptian President Anwar Sadat had expelled Soviet advisors from Egypt in May 1972, sending a message to the United States that he was ready to disentangle Egypt from the Soviet sphere of influence. Kissinger responded by offering secret talks on a comprehensive settlement for the Middle East, though nothing of substance developed.

In March 1973, a disappointed Sadat turned back to his alliance with the Soviets. He obtained a large arms package for Egypt from the USSR and allowed for the return of Soviet military personnel and advisors to Egypt. It was a major setback for the United States that led to the Yom Kippur War pitting Israel against all its neighbors, a war that began on October 6, 1973.

After leaving government, Kissinger founded Kissinger Associates, a top-level international geopolitical consulting firm. Over his career, he authored over a dozen books on diplomatic history and international relations. His advice was sought by American presidents and senior officials coming from both political parties as well as the international media.

Kissinger never engaged in any personal reflection about his role in American diplomatic history and geopolitical affairs. Foreign policy guru Matt Duss has noted how:

> [Kissinger] largely invented—and certainly perfected—the art of transmuting government service into a lucrative post-government career. To that end, he kept himself in the limelight, occasionally even peddling lies about his record, including an absurd suggestion, in 2014, that U.S. drone warfare had resulted in more deaths than the Cambodian bombing campaign.

And he had also been wrong on some other major issues. He was an early supporter of NATO expansion, for example, a decision that other observers correctly foresaw would produce not enduring peace in Europe but rather something like the current direct clash with Russia over Ukraine. Kissinger also supported the 2003 invasion of Iraq—surely one of the biggest strategic blunders in U.S. history based on deliberately fabricated intelligence—and opposed the 2015 nuclear agreement with Iran.

Henry Kissinger spent little time regretting some of the things that he did in his climb to power in official Washington. Some critics have attributed that to his apparent lack of a conscience, but, instead of being punished for that shortcoming, Washington's elite spent the final decades of Kissinger's life celebrating him.

Kissinger served as an informal advisor to numerous presidents and presidential aspirants, as well as secretaries of state and foreign policy heavyweights, even long after he left the government. He was always welcome at Washington's top-level dinner parties, feted by leaders of both major political parties and all the large think tanks, and given generous well-remunerated platforms to offer his advice and insider's perspective on American military crusades in the pages of the country's most prominent newspapers and on the broadcasts of its leading television and radio networks.

But there was always the dark side. As Harvard Professor Stephen Walt puts it:

> Kissinger was also a ruthless bureaucratic infighter and accomplished practitioner of the darker political arts. He had clearly read his Machiavelli, who taught that to preserve order a prince "must learn how not to be good." Machiavelli also thought successful leaders "must have a mind disposed to adapt itself according to the wind," and, when necessary, be "a great feigner and dissembler." Such characteristics fit Kissinger to a "T."

That perfectly sums up one of America's most notable diplomats, geopolitical strategists and public figures who played a key role in shaping U.S. foreign policy for nearly 50 years. He died on November 29, 2023 at the age of 100. ❖

Does Poland Really Deserve Reparations from Germany?

Do the taxpayers of Germany owe the nation of Poland reparations as a result of World War II? What follows is a critical look at the hefty demands of the Polish government and whether or not it is Germany or Poland who should be paying the reparations bill.

By John Wear

The November/December 2022 issue of The Barnes Review had an item in the "History You May Have Missed" section about the Polish government's formal demand for $1.2 trillion from Germany "for the damages from the Nazi invasion and occupation during World War II."[1] This article examines whether Poland deserves to receive such reparations from Germany.

POLISH REPORT

Poland released a report on September 1, 2022 titled, "The Report on the Losses Sustained by Poland as a Result of German Aggression and Occupation During the Second World War, 1939–1945."[2] The foreword to this report states that it "is Poland's first and indispensable step on the road to obtain the reparations and due compensation which the Polish state has the right to claim for the devastation and injuries it suffered during the Second World War."

The introduction to this report goes on to explain that it "is the outcome of a project carried out by the Parliamentary Group for the Estimation of the Amount of Compensation due to Poland from Germany for Damage Caused During the Second World War. The group was established by the Polish Sejm in its 8th term, on September 29, 2017, and consists of members of parliament and a team of experts."[3]

JÓZEF BECK
Got "blank check" from Brits.

The introduction further states:

> During the Second World War, Poland sustained the largest human and material losses of all European countries in relation to its total population and national assets. These losses were caused not only by German military operations, but, above all, by a German policy of occupation motivated by the conviction of racial inferiority of the Polish population.
>
> The Germans exterminated people in the occupied territories in a deliberate and organized manner, and intensively exploited Polish society, both through forced labor and the willful devastation of property, including the complete destruction of Warsaw, Poland's capital city, along with thousands of Polish cities, towns and villages.[4]

Of course, the authors state that "the present report is undoubtedly an underestimate in all the areas it addresses, with its underlying principles rooted in the most conservative estimates possible."[5] The authors make it clear that Poland deserves far more compensation from Germany than they are requesting in the report.

The German air force and, subsequently, ground troops nearly leveled the Polish capital of Warsaw.

The report also clearly states that German aggression was the sole cause of the war:

> Poland was the first country to resist the territorial and political demands of the Third Reich, refusing to grant concessions to Germany which would have resulted in the loss of independence on the international arena and subordination to Berlin. [Adolf] Hitler decided to resolve the conflict which he himself had caused, by military means and, on September 1, 1939, the Wehrmacht invaded Poland without declaring war.[6]

Thus, German military aggression is the primary reason why Germany owes reparations to Poland, according to the report. First, we will examine why Germany attacked Poland on September 1, 1939.

POLAND'S PROVOCATIONS

Polish Foreign Minister Józef Beck accepted an offer from Great Britain on March 30, 1939 that gave an unconditional unilateral guarantee of Poland's independence. The British Empire agreed to go to war as an ally of Poland if the Poles decided that war was necessary. In words drafted by British Foreign Secretary Lord Halifax, British Prime Minister Neville Chamberlain spoke in the House of Commons on March 31, 1939:

> I now have to inform the House … that, in the event of any action which clearly threatened Polish independence and which the Polish government accordingly considered it vital to resist with their national forces, His Majesty's government would feel themselves bound at once to lend the Polish government all support in their power. They have given the Polish government an assurance to that effect.[7]

Great Britain's unprecedented "blank check" to Poland led to increasing violence against the German minority in Poland. The book *Polish Acts of Atrocity against the German Minority in Poland* explains why the Polish government allowed such atrocities to happen:

> The guarantee of assistance given Poland by the British government was the agent which lent impetus to Britain's policy of encirclement. It was designed to exploit the problem of Danzig and the Corridor to begin a war, desired and long prepared by England, for the annihilation of Greater Germany.
>
> In Warsaw, moderation was no longer considered necessary, and the opinion held was that matters could be safely brought to a head. England was backing this diabolical game, having guaranteed the "integrity" of the Polish state. The British assurance of assistance meant that Poland was to be the battering ram of Germany's enemies.
>
> Henceforth, Poland neglected no form of provocation of Germany and, in its blindness, dreamt of "victorious battle at Berlin's gates." Had it not been for the encouragement of the English war clique, which was stiffening Poland's attitude toward the Reich and whose promises

> led Warsaw to feel safe, the Polish government would hardly have let matters develop to the point where Polish soldiers and civilians would eventually interpret the slogan to extirpate all German influence as an incitement to the murder and bestial mutilation of human beings.[8]

American historian David Hoggan wrote that German-Polish relationships became strained by the increasing harshness with which the Polish authorities handled its German minority. More than 1 million ethnic Germans resided in Poland, and these Germans were the principal victims of the German-Polish crisis in the coming weeks. The Germans in Poland were subjected to increasing doses of violence from the dominant Poles. Ultimately, many thousands of Germans in Poland paid for this crisis with their lives. They were among the first victims of Britain's war policy against Germany.[9]

On August 14, 1939, Polish authorities in East Upper Silesia launched a campaign of mass arrests against the German minority. The Poles then proceeded to close and confiscate the remaining German businesses, clubs and welfare installations. The arrested Germans were forced to march toward the interior of Poland in prisoner columns.

The various German groups in Poland were frantic by this time, and they feared that the Poles would attempt the total extermination of the German minority in the event of war. Thousands of Germans were seeking to escape arrest by crossing the border into Germany. Some of the worst Polish atrocities included the mutilation of Germans. The Poles were warned not to regard their German minority as helpless hostages who could be butchered with impunity.[10]

William Lindsay White, an American journalist, recalled that there was no doubt among well-informed people that, by August 1939, horrible atrocities were being inflicted every day on the ethnic German minority of Poland. White said that a letter from the Polish government claiming that no persecution of the Germans in Poland was taking place had about as much validity as the civil liberties guaranteed by the 1936 constitution of the Soviet Union.[11]

Donald Day, a well-known correspondent for the *Chicago Tribune*, reported on the atrocious treatment the Poles had meted out to the ethnic Germans in Poland:

> I traveled up to the Polish Corridor where the German authorities permitted me to interview the German refugees from many Polish cities and towns. The story was the same. Mass arrests and long marches along roads toward the interior of Poland.
>
> The railroads were crowded with troop movements. Those who fell by the wayside were shot. The Polish authorities seemed to have gone mad.

Those who fell by the wayside were shot. The Polish authorities seemed to have gone mad.

> I have been questioning people all my life, and I think I know how to make deductions from the exaggerated stories told by people who have passed through harrowing personal experiences. But, even with generous allowance, the situation was plenty bad. To me the war seemed only a question of hours.[12]

Hoggan wrote that the leaders of the German minority in Poland repeatedly appealed to the Polish government for mercy during this period, but to no avail. More than 80,000 German refugees had been forced to leave Poland by August 20, 1939, and virtually all other ethnic Germans in Poland were clamoring to leave to escape Polish atrocities.[13]

British Ambassador Nevile Henderson in Berlin was concentrating on obtaining recognition from Halifax of the cruel fate of the German minority in Poland. Henderson emphatically warned Halifax on August 24, 1939 that German complaints about the treatment of the German minority in Poland were fully supported by the facts. Henderson knew that the Germans were prepared to negotiate, and he stated to Halifax that war between Poland and Germany was inevitable unless negotiations were resumed between the two countries. Henderson pleaded with Halifax that it would be contrary to Polish interests to attempt a full military occupation of Danzig, and he added a scathingly effective denunciation of Polish policy. What Henderson failed to realize is that Halifax was pursuing war for its own sake as an instrument of policy. Halifax desired the complete destruction of Germany.[14]

On August 25, 1939, Ambassador Henderson reported to Halifax the latest Polish atrocity at Bielitz in Upper Silesia. Henderson never relied on official German statements concerning these incidents, but instead based his reports on information he had received from neutral sources. The Poles continued to forcibly deport the Germans of that area and compelled them to march into the interior of Poland. Eight Germans were murdered and many more were injured during one of these actions. Henderson deplored the failure of the British government to exercise restraint over the Polish authorities.[15]

Hoggan wrote that Hitler was faced with a terrible dilemma. If Hitler did nothing, the Germans of Poland and Danzig would be abandoned to the cruelty and violence of a hostile Poland. If Hitler took effective action against the Poles, the British and French might declare war against Germany. Henderson feared that the Bielitz atrocity would be the final straw to prompt Hitler to invade Poland. Henderson, who strongly desired peace with Germany, deplored the failure of the British government to exercise restraint over the Polish authorities.[16]

Dutch historian Louis de Jong

wrote that, by mid-August 1939, the Poles proceeded to arrest hundreds of ethnic Germans. German printing shops and trade union offices were closed, and numerous house-to-house searches took place. Eight ethnic Germans who had been arrested in Upper Silesia were shot to death on August 24 during their transport to an internment camp.[17]

Hitler invaded Poland to end these atrocities against the German minority in Poland. American historian Harry Elmer Barnes agreed with Hoggan's analysis. Barnes wrote:

> The primary responsibility for the outbreak of the German-Polish War was that of Poland and Britain, while for the transformation of the German-Polish conflict into a European War, Britain, guided by Halifax, was almost exclusively responsible.[18]

The Germans in Poland continued to experience an atmosphere of terror in the early part of September 1939. Throughout the country the Germans had been told, "If war comes to Poland, you will all be hanged." This prophecy was later fulfilled in many cases.[19]

Hitler had planned to offer to restore sovereignty to the Czech state and to western Poland as part of a peace proposal with Great Britain and France. German Minister of Foreign Affairs Joachim von Ribbentrop informed Soviet leaders Josef Stalin and Vyacheslav Molotov of Hitler's intention in a note on September 15, 1939. Stalin and Molotov, however, sought to stifle any action that might bring Germany and the Allies to the conference table. The Soviet leaders told Ribbentrop that they did not approve of the resurrection of the Polish state. Aware of Germany's dependency on Soviet trade, Hitler abandoned his plan to reestablish Polish statehood.[20]

Hitler's invasion of Poland was forced by the Polish government's intolerable treatment of its German population. Germany did not invade Poland for *Lebensraum* or any other malicious reason. Thus, the Polish government's report claiming that "Hitler decided to resolve the conflict

which he himself had caused" ignores the numerous provocations and violence against the German minority in Poland that led to Germany's invasion of Poland.

POLISH EXPULSIONS

The Polish report states that Poland has not received fair compensation from Germany:

> Following the Potsdam Conference, it was decided that Germany will "be compelled to compensate to the greatest possible extent for the loss and suffering that she has caused to the United Nations and for which the German people cannot escape responsibility." This provision has not been implemented to this day in respect of Poland. After the Potsdam Conference, the Paris Peace Treaties were signed in 1946. It concerned reparations for the countries of Western and Eastern Europe, Asia and Africa, but it did not include the Polish state.[21]

The Polish report fails to mention that, at the conclusion of the Potsdam Conference on August 2, 1945, the Western Allies agreed to transfer the German minority in Poland to Germany. The extreme suffering and death as well as the confiscation of German-owned property inflicted on ethnic Germans expelled from Poland after World War II is not mentioned in the Polish report.

These German expellees have never been compensated for their suffering and loss of property.

For more than three months prior to the Potsdam Agreement, the Polish government was expelling German citizens from what it now called the "Recovered Territories"—a reference to the fact that Poland once ruled Silesia and Pomerania under the Piast dynasty 600 years earlier. While the expulsions of the Germans were crude and disorganized, they were neither spontaneous nor accidental. Instead, the expulsions were carried out according to a premeditated strategy devised by the Polish government well before the end of the war.[22]

Poland relied almost exclusively on the use of terror to transport its German minority across its frontier. Except in a very few instances, deportations as a result of mob actions did not cause the German expulsions. Rather, the so-called "wild expulsions" were carried out primarily by troops, police and militia acting under orders and policies originating at the highest levels of the Polish government. So chaotic was the process of expelling the German minorities that many foreign observers, and even many people in the expelling countries themselves, mistook the violent events of the late spring and summer of 1945 as a spontaneous process from below. The expelling Polish government was more than happy to allow the myth of the "wild expulsions" to grow, since this myth enabled it to deny responsibility for the atrocities that were essential components of the expulsions.[23]

German expellees have never been compensated for their suffering and loss of property.

The worst of the violence in Poland occurred between mid-June and mid-July 1945, particularly in the districts bordering the Oder-Neisse demarcation line, which were designated by the Polish Army Command as a military settlement area. The commander of the Polish Second Army expressed on June 24, 1945 the Polish position on the rapid transfer of the Germans:

> We are transferring the Germans out of Polish territory, and we are acting thereby in accordance with directives from Moscow. We are behaving with the Germans as they behaved with us. Many already have forgotten how they treated our children, women and old people. The Czechs knew how to act so that the Germans fled from their territory of their own volition.
>
> One must perform one's tasks in such a harsh and decisive manner that the Germanic vermin do not hide in their houses but rather will flee from us of their own volition and then [once] in their own land will thank God that they were lucky enough to save their heads. We do not forget Germans always will be Germans.[24]

The Germans who were forced to resettle were usually allowed to take only 44 pounds of baggage with them and were escorted to the border by squads of Polish soldiers. In late June 1945, at least 40,000 Germans were expelled within a few days. One commentator describes what this meant to the Germans living near the Oder-Neisse line:

> The evacuation of individual localities usually began in the early morning hours. The population, torn from their sleep, had scarcely 15 to 20 minutes to snatch the most necessary belongings, or else they were driven directly onto the street without any ceremony. Smaller localities and villages were evacuated at gunpoint by small numbers of soldiers, frequently only a squad or a platoon. Due to the proximity of the border, for the sake of simplicity, the Germans were marched on foot to the nearest bridge over the river, driven over to the Soviet side [i.e., into the Soviet Occupation Zone of Germany] and there left to their own fate.[25]

The German expellees were frequently robbed by members of the Polish militia and military units that carried out the expulsions. Food supply became an acute problem, and the uprooted Germans were often destitute and exhausted when they arrived in the Soviet Occupation Zone. The German expellees became easy prey for Soviet occupation troops, who often stole the few belongings the Germans had brought with them. Some Germans were beaten and raped and forced to perform humiliating acts while others were randomly killed.[26]

The cross-border traffic of Germans was not all in a single direction. At the end of the war, many hundreds of thousands of Germans from the Recovered Territories who had fled the Red Army's advance to the west now returned to their homes. The returning Germans did not understand that there was not going to be a return home. The alarming spectacle of the population in the Recovered Territories of Poland increasing in the weeks after V-E Day was one of the factors spurring local authorities to quickly proceed with "wild expulsions" of the Germans. Polish soldiers and government officials used aggressive and often violent measures to prevent the unwanted Germans from returning to their homes.[27]

However great the hazards and miseries of life on the road were for the German expellees, they were usually preferable to the expulsion trains the Polish authorities began to operate. Taking up to two weeks to reach Berlin, the trains were typically not provisioned and lacked the most basic amenities. As a result, the death rate on the trains soared.

One passenger wrote:

> In our freight wagon there were about 98 people, and it is no exaggeration to say that we were squeezed against one another like sardines in a can. When we reached Allenstein, people started to die and had to be deposited along the side of the rails. One or more dead bodies greeted us every morning of our journey after that; they just had to be abandoned on the embankments. There must have been many, many bodies left lying along the track. …
>
> The train spent more time stopping than moving. It took us more than 14 days to reach the Russian occupation zone. We rarely traveled at night. …
>
> After a few days, we had no more to eat. Sometimes, by begging the Polish driver, we were able to get a little warm water drawn from the engine. …
>
> The nights were unbearable because of the overcrowding. We could neither keep upright nor sit down,

Top photo: A woman arrives at an impromptu morgue with flowers to drop on the corpse of a loved one killed in one of the murderous rampages carried out by Bolsheviks against ethnic Germans. **Bottom photo:** Twenty-year-old Franz Kurzhalov survived an attack by NKVD Communist Poles who inflicted 17 bayonet wounds on the young man. Somehow he survived.

The pictures we have shown are considered mild …

much less lie down. We were so tightly squeezed together that it was impossible not to jostle each other occasionally. Recriminations and quarrels erupted, even attempts to exchange blows in the middle of this human scrum.

The very sick suffered the worst. Typhus was widespread throughout the entire transport and the number of deaths grew with each passing day. You can well imagine the state of hygiene that prevailed in the wagon.[28]

A German priest who witnessed the arrival of German expellees at the border described what he saw:

> The people—men, women and children all mixed together—were tightly packed in the railway cars, these cattle wagons themselves being locked from the outside. For days on end, the people were transported like this and, in Görlitz, the wagons were opened for the first time. I have seen with my own eyes that, out of one wagon alone, 10 corpses were taken and thrown into coffins which had been kept on hand. I noted further that several persons had become deranged. …
>
> The people were covered in excrement, which led me to believe that they were squeezed together so tightly that there was no longer any possibility for them to relieve themselves at a designated place.[29]

Several observers compared the fate of the German expellees to the victims of the German concentration camps. Maj. Stephen Terrell of the Parachute Regiment stated: "Even a cursory visit to the hospitals in Berlin, where some of these people have dragged themselves, is an experience which would make the sights in the concentration camps appear normal."[30]

Adrian Kanaar, a British military doctor working in a Berlin medical facility, reported on an expellee train from Poland in which 75 had died on the journey due to overcrowding. Although Kanaar had just completed a stint as a medical officer at the Bergen-Belsen concentration camp, what he witnessed of the expellees' plight so distressed him that he declared his willingness to face a court martial if necessary for making the facts known to the press. Kanaar declared that he had not "spent six years in the army to see a tyranny established which is as bad as the Nazis."[31]

Gerald Gardiner, later to become Lord Chancellor of Great Britain, had been a member of a volunteer ambulance unit working with concentration camp survivors. Regarding the expellee trains arriving in the late summer and autumn of 1945 from the Recovered Territories, Gardiner stated: "The removal of the dead in carts from the railway stations was a grim reminder of what I saw in early days in Belsen."[32]

An eyewitness report of the arrival in Berlin of a train which had left Poland with 1,000 German expellees aboard reads:

> "I'd rather be 10 years in a German camp than one day in a Polish one."
> —Günther Wollny, Auschwitz inmate

> Nine hundred and nine men, women and children dragged themselves and their luggage from a Russian railway train at Leherte station today, after 11 days traveling in boxcars from Poland.
>
> Red Army soldiers lifted 91 corpses from the train, while relatives shrieked and sobbed as their bodies were piled in American lend-lease trucks and driven off for internment in a pit near a concentration camp.
>
> The refugee train was like a macabre Noah's ark. Every car was jammed with Germans … the families carry all their earthly belongings in sacks, bags, and tin trucks. Nursing infants suffer the most, as their mothers are unable to feed them, and frequently go insane as they watch their offspring slowly die before their eyes. Today, four screaming, violently insane mothers were bound with rope to prevent them from clawing other passengers.
>
> "Many women try to carry off their dead babies with them," a Russian railway official said. "We search the bundles whenever we discover a weeping woman, to make sure she is not carrying an infant corpse with her."[33]

Conditions in Poland for Germans after the war were so bad that many Germans saw no other option than to flee Poland. Food ration cards were progressively withdrawn from the entire German population in Poland after the war. Like their parents, German children found that they were entitled to no rations at all. The head of the Szczecin-Stolczyn Commissariat proudly reported that, since the end of November 1945, even German children under the age of two had their milk allocation withdrawn from them.

Polish laws designed to protect German children were typically never enforced. For example, a directive issued in April 1945 by the Polish Ministry of Public Security specifying that nobody under the age of 13 was to be detained was never followed. More than two years later, the Polish Ministry of Labor and Social Welfare was complaining that the regulations against imprisoning children in camps continued to be "completely ignored." German children were illegally detained in Polish internment camps as late as August 1949.[34]

POLISH-RUN CAMPS

Many of the Germans in Poland were also sent to the former German concentration camps. In March 1945, the Polish military command declared that the entire German people shared the blame for starting World War II. Over 105,000 Germans were sent to labor camps in Poland before their expulsion from Polish territory. The Polish authorities soon converted concentration camps such as Auschwitz-Birkenau, Lambinowice (called Lamsdorf by its German occupants) and others into internment and labor

camps. In fact, the liberation of the last surviving Jewish inmates of the Auschwitz main camp and the arrival of the first ethnic Germans was separated by less than two weeks.

When the camps in Poland were finally closed, it is estimated that as many as 50% of the inmates, mostly women and children, had died from ill-treatment, malnutrition and diseases.[35]

Many Germans were also tortured prior to entering the Polish-run camps. For example, Tuviah Friedman was a Polish Jew who survived the German concentration camps. Friedman by his own admission beat up to 20 German prisoners a day to obtain confessions and weed out SS officers.

"It gave me satisfaction," Friedman stated. "I wanted to see if they would cry or beg for mercy."[36]

In a confidential report concerning the Polish concentration camps filed with the Foreign Office, R.W.F. Bashford wrote:

> [T]he concentration camps were not dismantled, but rather taken over by new owners. Mostly they are run by Polish militia. In Swietochlowice, prisoners who are not starved or whipped to death are made to stand, night after night, in cold water up to their necks, until they perish. In Breslau there are cellars from which, day and night, the screams of victims can be heard.[37]

Lamsdorf in Upper Silesia was initially built by Germany to house Allied prisoners of war. This camp's postwar population of 8,064 Germans was decimated through starvation, disease, hard labor and physical mistreatment. A surviving German doctor at Lamsdorf recorded the deaths of 6,488 German inmates in the camp after the war, including 628 children.[38]

A report submitted to the U.S. Senate dated August 28, 1945, reads:

> In "Y" [code for a camp from the original document], Upper Silesia, an evacuation camp has been prepared which holds at present 1,000 people. …

Orders for the Expulsion of Germans

In summer 1945, after the defeat of Germany was complete, the Polish government began placing "proclamation signs" in cities in Poland informing ethnic German citizens that they were required to leave Polish territory immediately. The proclamation posted in Szczawno-Zdroj, typical of those posted in other cities, read as such:

Sonderbefehl

für die deutsche Bevölkerung der Stadt Bad Salzbrunn einschliesslich Ortsteil Sandberg.

Laut Befehl der Polnischen Regierung wird befohlen:

1. Am 14. Juli 1945 ab 6 bis 9 Uhr wird eine Umsiedlung der deutschen Bevölkerung stattfinden.
2. Die deutsche Bevölkerung wird in das Gebiet westlich der Flüsse Neiße umgesiedelt.
3. Jeder Deutsche darf höchstens 20 kg Reisegepäck mitnehmen.
4. Kein Transport (Wagen, Ochsen, Pferde, Kühe usw.) wird erlaubt.
5. Das ganze lebendige und tote Inventar in unbeschädigtem Zustande bleibt als Eigentum der Polnischen Regierung.
6. Die letzte Umsiedlungsfrist läuft am 14. Juli 10 Uhr ab.
7. Nichtausführung des Befehls wird mit schärfsten Strafen verfolgt, einschließlich Waffengebrauch.
8. Auch mit Waffengebrauch wird verhindert Sabotage u. Plünderung.
9. Sammelplatz an der Station Bad. Bad Salzbrunn-Adelsbacher Weg in einer Marschkolonne zu 4 Personen. Spitze der Kolonne 20 Meter vor der Ortschaft Adelsbach.
10. Diejenigen Deutschen, die im Besitz der Nichtevakuierungsbescheinigungen sind, dürfen die Wohnung mit ihren Angehörigen in der Zeit von 5 bis 14 Uhr nicht verlassen.
11. Alle Wohnungen in der Stadt müssen offen bleiben, die Wohnungs- und Hausschlüssel müssen nach außen gesteckt werden.

Bad Salzbrunn, 14. Juli 1945, 6 Uhr.

Abschnittskommandant

(z) Zinkowski

"Special order for the German population of the city of Szczawno-Zdroj [Bad Salzbrunn] together with the district of Piaskowa Gora [Sandberg] by Section Commander Lt. Col. Wlodzimierz Zinkowski

"Based on the order of the Polish government, I order:

"1. July 14, 1945 from 6 a.m. to 9 p.m. the German population will be resettled.

"2. The German population will be resettled to the areas west of the Nysa River.

"3. Each German is allowed to take a maximum of 44 lbs. of luggage with him on the road.

"4. Means of transport (cart, oxen, horse, cow etc.) are not permitted.

"5. All undamaged live and dead livestock shall become the property of the Polish government.

"6. The deadline for resettlement ends on July 14 at 10 p.m.

"7. Failure to comply with this order will be punished with the most severe penalties, including the use of weapons.

"8. Sabotage and plundering will also be prevented by force of arms.

"9. The meeting point is Bad Salzbrunn station, marching in a column of four people in a row. The beginning of this marching column is 65 feet before the town of Struga [Adelsbach].

"10. Germans who have non-evacuation certificates and their families are not allowed to leave their place of residence between 5 a.m. to 2 p.m.

"11. All apartments in the city must be unlocked, keys to apartments and houses must be inserted into the locks outside."

Ethnic Germans are shown fleeing Silesia for occupied Germany in 1945 in the *Fluchtlingstreck* or "refugee trail."

Germany's War

The Origins, Aftermath and Atrocities of World War II

By John Wear. *Germany's War* documents that the Allied leaders were primarily responsible for starting and prolonging WWII—costing millions of lives. FDR's numerous provocations forced Germany to declare war on the U.S.A. despite Hitler's desire for peace. Also covers Stalin's plan for European conquest, America's second crusade, how WWII was planned and instigated, the Allied conspiracy to prolong the war, the Allied POW camps that killed a million Germans, the appalling plight of expelled Germans, history's most terrible peace, crimes committed in German camps, the alleged genocide of 6 million Jews, and more. Softcover, 514 pages, #717, *$25* minus 10% for TBR subscribers plus $5 S&H inside the U.S. from TBR, P.O. Box 550, White Plains, MD 20695. Call toll free 1-877-773-9077, Mon.-Thu. 8-4 ET to charge or you may order at www.BarnesReview.com. Email Sales@BarnesReview.org for international S&H.

> A great part of the people are suffering from symptoms of starvation; there are cases of tuberculosis and always new cases of typhoid.
>
> … Two people seriously ill with syphilis have been dealt with in a very simple way: They were shot. … Yesterday a woman from "K" [another camp] was shot and a child wounded.[39]

Zgoda, which had been a satellite camp of Auschwitz during the war, was reopened by the Polish Security Service as a punishment and labor camp. Thousands of Germans in Poland were arrested and sent to Zgoda for labor duties. The prisoners were denied adequate food and medical care, the overcrowded barrack buildings were crawling with lice, and beatings were a common occurrence.

The camp director, Salomon Morel, told the prisoners at the gate that he would show them what Auschwitz had meant. A man named Günther Wollny, who had the misfortune of being an inmate in both Auschwitz and Zgoda, later stated: "I'd rather be 10 years in a German camp than one day in a Polish one."[40]

SEXUAL ASSAULT RAMPANT

A notable element of the postwar Polish camp system was the prevalence of sexual assault as well as ritualized sexual humiliation and punishment suffered by the female inmates. The practice at Jaworzno, as reported by Antoni Bialecki of the local Office of Public Security, was to "take ethnically German women at gunpoint home at night and rape them." The camp functioned as a sexual supermarket for its 170-strong militia guard contingent.

The sexual humiliation of female prisoners in the Polish camp at Potulice had become an institutional practice by the end of 1945. Many of the women were sexually abused and beaten, and some of the punishments resulted in horrific injuries.

The sexual exploitation of women in Polish-run camps contrasts to the experience of women in German-run concentration camps. Rape or other forms of sexual mistreatment was an extremely rare occurrence at German concentration camps and severely punished by the authorities if detected.[41]

The International Committee of the Red Cross (ICRC) attempted to send a delegation to investigate the atrocities reported in the Polish camps. It was not until July 17, 1947, when most Germans had either died or had been expelled from the camps, that ICRC officials were finally allowed to inspect a Polish camp. Yet, even at this late date, there were still a few camps the ICRC was not allowed to investigate.[42]

Jewish journalist John Sack confirmed the torture and murder of German prisoners in postwar Polish camps operated by the Office of State Security. Most of the camps were staffed and run by Jews, with help from Poles, Czechs, Russians and work camp survivors of various ethnicities. Virtually the entire personnel at these camps were eager to take revenge on the defeated Germans. In three years after the war, Sack estimates that from 60,000 to 80,000 Germans died in the office's camps.[43]

Efforts to bring perpetrators in Polish camps to justice were largely unsuccessful. Czeslaw Geborski, director of the camp at Lamsdorf, was indicted by Polish authorities in 1956 for wanton brutality against the German prisoners. Geborski admitted at his trial that his only goal in taking the job was "to exact revenge" on the Germans.

On October 4, 1945, Geborski ordered his guards to shoot down anyone trying to escape a fire that engulfed one of the barracks buildings; a minimum of 48 prisoners were killed that day. The guards at Lamsdorf also routinely beat the German prisoners and stole from them. German prisoners in Lamsdorf died of hunger and diseases in droves; guards recalled scenes of children begging for scraps of food and crusts of bread. Geborski was found not guilty despite strong evidence of his criminal acts.[44]

The Polish report on losses

sustained due to German aggression during World War II states:

> Poland and its people are still suffering from the negative effects of the Second World War on the country's population, economy, infrastructure and the progress it has been able to make in scholarship, education and culture. …
>
> Today, Poland's status in terms of civilizational growth in Europe and worldwide would have been completely different, had it not been for the Second World War and its aftereffects. For several generations following their wartime decimation, the people of Poland have been forced to undertake a huge effort to raise their country from ruins and restore it in the aftermath of the war.[45]

The Polish report is correct that Poland has faced stunted economic growth and development after World War II. However, most of this has been caused by the Soviet Union's influence over Poland in the postwar era.

World War II was supposedly fought to stop Fascist aggression and to create democratic institutions in the liberated nations of Europe. However, within a remarkably short period after the end of the war, the Soviet Union ruthlessly subjected Poland and other Eastern European nations to its totalitarian control. The Red Army brought Moscow-trained secret policemen into every Soviet-occupied country, put local Communists in control of the national media and dismantled youth groups and other civic organizations. The Soviets also brutally arrested, murdered and deported people they believed to be anti-Soviet, and enforced a policy of ethnic cleansing.[46]

On March 5, 1946, less than 10 months after the defeat of Germany, Winston Churchill made his dramatic Iron Curtain speech in Fulton, Missouri. Churchill stated in this speech:

> A shadow has fallen upon the scenes so lately lighted by the Allied victory. …
>
> The Communist parties, which were very small in all these Eastern states of Europe, have been raised to pre-eminence and power far beyond their numbers and are seeking everywhere to obtain totalitarian control.[47]

Churchill thus acknowledged that the Soviet Union was obtaining control of Poland and other Eastern European nations. A war allegedly fought for democracy and freedom had turned into a nightmare for the people of Eastern Europe.

Like other Eastern European countries, Poland faced major economic hardships and arrested development after the Second World War. In sum, this was caused primarily by the Soviet Union's control of Poland after the war rather than by the destruction of Poland during the war.

CONCLUSION

Poland does not have a legitimate claim for reparations from Germany. The Polish report published in 2022 states that Germany was solely responsible for starting World War II. In reality, Poland in 1939 committed numerous acts of violence and murder against its ethnic German minority, causing Germany to invade Poland to end these atrocities.

If Poland has a legitimate claim to reparations for the death and destruction that occurred in Poland during World War II, then Germans who were expelled from Poland also have legitimate claims for the deaths of their family members after the war. German expellees from Poland also had their real estate and most of their personal property either stolen or destroyed by the Allies. German expellees have never been compensated for these losses. Instead, they were forced to live in abject poverty in Germany, while paying reparations to Jewish survivors of the so-called Holocaust. ❖

ENDNOTES:

1. The Barnes Review, Vol. XXVIII, No. 6, November/December 2022, p. 44. The entire item read: "Poland Demands $1.2 Trillion: The Polish government has formally demanded $1.2 trillion from Germany 'for the damages from the Nazi invasion and occupation during WWII,' according to a report published in early October. Polish Foreign Minister Zbigniew Rau wrote and signed a formal diplomatic letter to

The Holocaust Hoax Exposed

Debunking the 20th Century's Biggest Lie

Victor Thorn's *The Holocaust Hoax Exposed* dissects nearly every element of what has become the most grotesque conspiracy theory of the 20th—and now the 21st—century. Covered in this book is the mythology surrounding "death camps," the truth about Zyklon B, Anne Frank's diary, how the absurd "6 million" figure has become a laughing stock. From eye-opening facts that not one autopsy exists that shows the use of Zyklon B on work camp inmates to zero photographic evidence of this supposed enormous event to the ludicrous and licentious tales woven by the "Holocaust" historians, survivors and Holocaust hucksters, Thorn's masterpiece should be required reading for anyone interested in understanding the underpinnings of the Zionist power elite. New second edition. Softcover, 184 pages, #609, ***$20*** minus 10% for TBR subscribers plus $5 S&H inside the U.S. from TBR, P.O. Box 550, White Plains, MD 20695. Unmasking Anne Frank: Her Famous Diary Exposed as a Literary Fraud

As a 13-year-old Jewish girl living in wartime Amsterdam, Anne Frank hid out with seven others for more than two years. During this time, she kept a diary of her thoughts, feelings and experiences. Eventually, the Frank family was discovered and deported. Anne later died of typhus in Bergen-Belsen. But there is a problem. Anne's tale is rife with absurdities, logical problems, inconsistencies and incoherent claims. Here, Japanese researcher Ikuo Suzuki deconstructs the famous dairy. In the process, he reveals that the notorious diary was likely written by a middle-aged Jewish man who worked with Anne's father, Otto, to foist upon the public a deceptive and misleading story of a young girl who perished in a German camp. Here, for the first time, is a highly readable critique of the global bestseller *The Diary of Anne Frank*. Softcover, 192 pages, #998, **$22** minus 10% for TBR subscribers plus $5 S&H inside the U.S. from TBR, P.O. Box 550, White Plains, MD 20695. Germany seeking a 'final settlement' on the outstanding consequences of National Socialist Germany's alleged aggression against Poland. Rau insisted that the two countries take 'immediate steps toward a permanent, comprehensive and final legal and material settlement on the issue of the consequences of the German aggression and occupation in 1939-1945,' without mentioning the aggression and brutality meted out against ethnic Germans in Polish-administered territory leading up to the German invasion of Poland. Polish politicians and the Polish parliament have long sought to extract compensation from Germany for its 'aggression' against Poland during WWII, only to be rebuffed by the German government."

WWII from a Revisionist Perspective

Mass Murder at Katyn

Here is the first-ever complete English translation of the forensic report by the Germans detailing the mass murder of Polish officers and officials by Stalin's secret police in the Katyn Forest, originally published in 1943. The detailed report starts with an overview of the discovery of the mass graves and then produces a series of eyewitness accounts of the captive Poles being transported to the site of the executions. Next, the reader is given a thorough account of the environment and its effect upon buried bodies. Then, a series of post-mortem studies on the bodies is presented. It also provides correspondence between the Red Cross and other parties on the matter, while the next section details the ridiculous Allied response. Also includes a list of identified victims and a complete photo record of the graves and the items recovered. Softcover, 290 pages, 8.5" x 11" format, #929, **$28**.

This is Germany

By Charles W. Domville-Fife. Foreword by Lord Queenborough. A sweeping snapshot of Germany in 1938, this book provides one of the most accurate English-language overviews of Hitler's Germany ever written. Not surprisingly, it was completely suppressed after the outbreak of World War II. With 18 chapters dealing with every possible aspect of German life, this work boasts 55 unique photographs. Aspects of German life discussed include: agricultural policies and food self-sufficiency; the place of women in the Reich; the Reich Labor Service for men and women; the youth movements; policies designed to boost population growth and birth rates; taxation policies; educational systems; land reclamation; and the futuristic plans for Germany's major cities. Here is the first new edition of this book since 1939. Softcover, 288 pages, #981, **$27**.

Stalin's War: A New History of WWII

Prize-winning historian Sean McMeekin reveals how Stalin—not Hitler—was the driving force of World War II. The war endures in the popular imagination as a heroic struggle between good and evil, with villainous Hitler responsible for any and all aggressions. But Hitler was not in power when the conflict erupted in Asia—and he was dead before it ended. His armies did not fight in multiple theaters, did not span the Eurasian continent, and he did not inherit any of the spoils of war. Those belonged to Stalin. Drawing on new research in Soviet, European and U.S. archives, *Stalin's War* revolutionizes our understanding of this global conflict by moving its epicenter to the east. McMeekin shows the war that emerged in Europe in 1939 was the one Stalin wanted, not Hitler. So, too, did the Pacific war of 1941-1945 fulfill Stalin's goal of unleashing a war between Japan and the "Anglo-Saxon" capitalist powers he viewed as his ultimate adversary. Hardback, 864 pages, #927, **$40**.

Summer, 1945: Germany, Japan and the Harvest of Hate

By Thomas Goodrich. Here is the truth about WWII in graphic detail. What kind of war do Americans suppose we fought? We shot prisoners in cold blood, wiped out hospitals, strafed lifeboats, killed enemy civilians, killed enemy wounded, tossed the dying into holes with the dead, boiled the flesh off enemy skulls to make table ornaments or carved their bones into letter openers and committed mass rape. We mutilated the bodies of the enemy. We kicked out their gold teeth for souvenirs. We topped off our napalm and saturation bombing of enemy civilians by dropping A-bombs on two defenseless cities. Softcover, 342 pages, #818, **$26**.

Hellstorm: The Death of Nazi Germany, 1944-1947

Throughout this book readers will see what Allied airmen saw as they rained down death on German cities; or the reader will experience what those below felt as they trembled in their bomb shelters. The reader will view the horrors of the Eastern Front during the last months of fighting, through the mud, blood and madness. Readers will witness for themselves the fate of German women as the rampaging Red Army raped its way across Europe. Learn about the criminal sinking of German passenger liners loaded with innocent refugees, the greatest mass migration known to man in which millions perished and the fate of those wretched victims in postwar death camps. Softcover, 390 pages, #549, **$30**.

Truth for Germany: The Guilt Question of the Second World War

The mainstream historical establishment insists that WWI and WWII were started by Germany. But what facts exist to support this seemingly unchallengeable hypothesis? In this book, the myth of Germany's guilt for fomenting war is refuted by famed historian Udo Walendy. Covers the allegations that Germany instigated the war, debunks long-held fallacies about German atrocities, the true nature of Hitler and more. Softcover, 535 pages, #648, **$30**.

The French Gestapo Trials

By Vincent Reynouard. Is everything we have been told about the Gestapo—the German secret police—nothing but lies? Is the reputation of the Gestapo as torturers and thugs false? Reynouard compared the accusations made against the Gestapo at the Nuremberg Tribunals by the Allies with the postwar French trials of the same personnel, involving the same cases, the same victims and the same eyewitnesses. What he found was that the evidence and accusations presented by the Allies against the Germans were fake. Softcover, 236 pages, #734, **$25**.

The Bad War: The Truth Never Taught About WWII

Banned by Amazon! After years of five-star ratings, Amazon finally caved and banned Mike King's *The Bad War*. Why? Here is the book to break the truth blockade! Americans today have an almost identical recollection of WWII as the "good war," fought by their forebears against the "Krauts" and "Japs." But how much do we know about that crucial event and the decades of complex European history preceding it? For whom were the 20th century's global wars actually waged? A photo-journalistic chronology—300 of the most important events of the war reinterpreted in brief synopses. 400 illustrations. Softcover, 308 pages, #772, **$25.**

A New Encyclopedia on the Holocaust Unveiled

Assemblage of experts contribute to new reference volume

By David Skrbina

Among the vast and ever-growing mountain of Holocaust literature, one can find numerous works that claim to be comprehensive reference material—encyclopedias, if you will—on that tragic event.

One of the earliest was Israel Gutman's four-volume 1990 *Encyclopedia of the Holocaust*. But we also have Niewyk's *Columbia Guide to the Holocaust* (2000; 473 pp.); Walter Laqueur's 2001 *Holocaust Encyclopedia* (765 pp.); the United States Holocaust Memorial Museum's *Encyclopedia of Camps and Ghettos* (three volumes); and Bartrop's and Dickerman's *The Holocaust* (2017, 1440 pp.).

Despite their diversity, all of these learned tomes share several common characteristics: they avoid troublesome or contradictory witness statements; they avoid source criticism; and they neglect to discuss the many forensic studies of camps or killing sites. Perhaps most importantly, they all accept without question the core of the conventional narrative—the alleged 6 million Jewish deaths and the homicidal gas chambers, above all.

Any troublesome matters relating to the conventional account are ignored, minimized or carefully swept under the rug. And Revisionist scholars like Carlo Mattogno, Juergen Graf or Germar Rudolf are, despite their own extensive and detailed research, absolutely censored. Such encyclopedias have served for decades as a kind of informal bulwark: an academic attempt to defend the orthodox view from any and all heresies.

***The Holocaust Encyclopedia: Uncensored and Unconstrained* is available from TBR. See p. 35.**

Now, finally, that era has come to an end.

For the first time in the history of the Holocaust, we now have a rigorous, academic, professional and detailed examination of all major aspects from "the other side"—that is, from the unconventional, unorthodox, revisionist perspective. Finally, orthodoxy's monopoly is broken. At long last, the reading public has access, in a concise and readable form, to all the many troublesome aspects of this monumental event of World War II.

The *Holocaust Encyclopedia: Uncensored and Unconstrained*, published in December 2023 by the Academic Research Media Review Education Group (ARMREG), is a truly remarkable work. It is fearless. It is honest. It seeks the truth by following the best science and the best evidence available.

These should be hallmarks of any encyclopedia worth its salt, but sadly, this has not been the case. The editors at ARMREG have compiled an eye-opening collection of details and successfully boiled down the often-arcane literature to the key facts, presenting them in clear and concise form. And these facts often conflict with—and occasionally decisively refute—the orthodox narrative.

This single-volume work of some 630 pages is large enough to be comprehensive, yet not so large as to be unwieldy. Like any good encyclopedia, each entry offers a concise overview of the topic at hand and points the reader to more detailed source material if he desires an in-depth study.

Here, the editors are fortunate to have direct access to the definitive HOLOCAUST HANDBOOK series—now

Why Would Anyone Inflate the Number of Holocaust Victims?

Those who want to believe that "6 million Jews were exterminated by Nazi Germany" sometimes challenge those who doubt the claim by asking: "Why would the Jewish people ever make up such a gigantic lie?" Professor Paul Rassinier, a French socialist and resistance fighter who ended up interned in the Buchenwald concentration camp and who later challenged the legends of the event now known as the "Holocaust," had an explanation:

"It is simply a question of justifying by a proportionate number of corpses the enormous subsidies which Germany has been paying annually since the end of the war to the state of Israel by way of reparation for injuries which, moreover, she cannot be held to have caused her either morally or legally, since there was no state of Israel at the time the alleged deeds took place.

"Thus, it is a purely and contemptibly material problem. Perhaps I may be allowed to recall here that the state of Israel was only founded in May 1948 and that the Jews were nationals of all states with the exception of Israel, in order to underline the dimensions of a fraud which defies description in any language.

"On the one hand, Germany pays to Israel sums which are calculated on 6 million dead and, on the other, since at least four-fifths of these 6 million were decidedly alive at the end of the war, she is paying substantial sums by way of reparation to the victims of Hitler's Germany to those who are still alive in countries all over the world other than Israel and to the rightful claimants of those who have since deceased, which means that, for the former (i.e. the 6 million) or, in other words, for the vast majority, she is paying twice." ❖

over 50 volumes of primary research on virtually every important aspect of the Holocaust. The encyclopedia entries on Auschwitz and Birkenau, for example, could clearly run on forever; instead, the editors wisely offer eight compact entries, each pointing to one or more of the 20-some handbooks that deal with the Auschwitz camps.

What I found particularly interesting about the new *Encyclopedia* is the emphasis on witnesses. In theory, their reports are among the best possible evidence for the conventional account. They were there, after all, and they saw things with their own eyes. And much of the orthodox story is directly constructed from such witness accounts.

But there are huge problems here, which our standard reference books never mention. Some 90% of the documented witnesses are Jews, who (a) had the limited perspective of a prisoner and (b) had a strong motivation to implicate the Germans in the worst possible way. Later, they also had incentives to become famous, to make money and so on. All this argues against the reliability of their testimony.

And in fact, the new *Encyclopedia* makes this point abundantly clear. Nearly 300 entries (out of the 579 total) deal with witnesses and especially with the ludicrous or ridiculous things that they said. The problem with being a witness is that once you are proven to be a liar (or at least severely mistaken) on one instance, this damages your overall credibility. If you are proven wrong on five, 10 or 20 counts, you have no credibility at all.

And this is exactly what we find with the Holocaust. Many of the key witnesses have stated such ridiculous things that we can't really believe anything else they said. And without reliable eyewitnesses, much of the Holocaust edifice collapses.

I think it is worth taking a moment here to explain the essence of the Revisionist view of the Holocaust. The conventional story is built on three key pillars:

1) mass-gassings in homicidal gas chambers;

2) an intentional policy of Jewish destruction by leading Germans, including Adolf Hitler; and

3) some 6 million Jewish deaths.

In theory, all three of these pillars are required to maintain the official version of the Holocaust; if any one of them can be disproven, the conventional story crumbles. As it turns out, not one, not two, but all three of these pillars are in doubt—and this is precisely the focus of revisionism.

For example, virtually all standard accounts of gas chambers—whether the alleged Zyklon-B systems at Auschwitz-Birkenau or the carbon monoxide schemes at Treblinka, Belzec, Sobibor and Chelmno—are either impossible or ridiculously ineffective.

The logistics would have been absurd: to cram 1,000 or 2,000 naked, frightened people into an enclosed room, then to introduce some toxic gas, then to clear out the toxic gas, then to extract the dead bodies, which would still be bearing possibly lethal residue of poisonous gas for anyone not wearing some kind of hazmat suit. It would have been slow, inefficient and dangerous to the Germans, and, ultimately, counterproductive. Zyklon-B—approved and sold to the general public as a household pesticide for decades—would have been a very poor choice for a toxic gas for several reasons. And carbon monoxide from "diesel engines" is absurd, given that diesel fumes produce very little toxic gas at all.

And then there is the disposal

question. No mass gassing scheme could have worked without an equally high-speed body disposal process—and this was totally lacking in all the camps. The Birkenau crematoria could never keep up (even in those rare times when they were all working) and other camps, like Treblinka and Belzec, had no crematoria at all. The claimed "open air fires" could never have burned to ash those 900,000 bodies at Treblinka, for example. If attempted, they would have left tons of unburned bones and teeth, of which we have no evidence.

But even this doesn't really show the absurdity of the mainstream Court Historian view. If you really want to kill thousands of people, you don't need dangerous and complex gas chambers. Just force them outside in the open air, in winter; one freezing night, and everyone is dead. (You still have a disposal problem, of course, but at least the corpses are not rotting and disintegrating as they are frozen.)

Perhaps mass drownings in the ocean—or a lake or river, for that matter—would do the trick. Bodies could have been trucked to some of the many abandoned mines around Germany and dumped down a shaft.

But no—the Germans were hell-bent on mass gassings and mass-shootings, to the tune of 6 million Jews, and then the burning of those 6 million bodies to ash. To say that this all beggars belief is an understatement.

Thus, we have the Revisionist movement, which argues that virtually no one was gassed in a homicidal gas chamber, that the intention of Hitler and others was always a territorial solution of moving Jews out of Germany (and perhaps out of Europe) and that there was never any plan or order to kill all the Jews. The Revisionists maintain that the overall Jewish death toll was under 1 million, and perhaps as low as 500,000. The "6 million" was always a symbolic figure, one that had existed for decades prior to WWII, and which was well-documented in the English-speaking press, including *The New York Times* and other mainstream sources.

And this is where we find the value of the newest *Holocaust Encyclopedia*. In entry after entry, we see, time and again, the absurdity of such things as the homicidal gas chambers and the 6 million deaths. Nothing works like we are told. Witness stories are revealed as obvious fiction; hard evidence on nearly every aspect is lacking; and the incentives and means for constructing a fantastic tale of Jewish suffering are laid bare.

We have all heard the old saying: "You don't know what you don't know." There is a truth to that, and it is nowhere more apparent than with the Holocaust. So many people—including so many academics and "experts"—take so much for granted, so much at face value, and so much unquestioningly, that they will be astonished at what they don't know. And even the average curious reader will be so intrigued that he is certain to want to know more.

Have no doubt: This is an event of supreme importance. The Holocaust today is at the center of the Gentile guilt complex. It is used to excuse and even justify the most heinous Jewish atrocities and crimes. It is invoked to silence criticism or even open discussion of any topic relating to Jews or Israel. And the Holocaust is being invoked again and again to justify the slaughter of Palestinians in the Holy Land so that the Israelis can avoid another "holocaust."

It is high time to set the story straight, and there is no better source of truth and honesty on this topic than this latest offering. The *Holocaust Encyclopedia: Uncensored and Unconstrained* may help to finally turn the tide against the orthodox view by forcing into the light all those dirty little secrets that our experts refuse to discuss. It can't happen soon enough. ❖

HOT OFF THE PRESSES!

One comprehensive, hardback reference volume covering all the events known as the Holocaust. Oversized (8.5 x 11), case laminate, 579 entries, 256 B&W illustrations, 101 color pictures, fully indexed, bibliography, 634 pages . . .

HOLOCAUST ENCYCLOPEDIA

UNCENSORED AND UNCONSTRAINED

The Holocaust is a topic whose public discourse is tightly controlled by powerful groups. Only their side of the story is permitted. In fact, they insist there is no other side. They guard the West's last taboo and enforce swift punishment upon those who dare to ask any questions or unearth any evidence that leads to unwelcome answers.

Undaunted by this threat, and for the first time in history, a team of critical scholars has produced an encyclopedic compendium of cutting-edge information on this topic that pays no tribute to any power, respects no taboo, poses all the questions worth asking and gives answers exclusively based on real evidence. Its contents have not been censored by any legal authority.

The lead editor of *Holocaust Encyclopedia* made sure that all contributors to this project were truly independent, and will defend what they consider to be true and accurate, even when threatened with imprisonment due to censorship laws in many countries.

In this encyclopedia, you are not lectured in so many entries what we think the Holocaust was. Rather, you find the many pieces summarized and explained that comprise the larger picture: Scores of entries present the essence of the most-pertinent witness accounts. They are the mainstay on which the Holocaust narrative rests. All are subjected to painstaking source criticism, which is one of the most important tools of a real historian. This enables the reader to assess which witnesses are trustworthy, if any.

Holocaust Encyclopedia addresses all the major Holocaust crime scenes: Auschwitz, Belzec, Sobibór and Treblinka; Dachau, Bergen-Belsen, Buchenwald and Mauthausen; Babi Yar, Ponary, Janowska and Maly Trostinets, to name but a few. But their entries do not just summarize what today's narrative is. They explain how it was formed, how it has changed over time, what the reasons for these changes are, and which aspects of the narrative are credible and why.

Forensics are the most important tool to investigate any murder case. Therefore, *Holocaust Encyclopedia* contains lots of entries discussing the many tools said to have been employed to commit the mass murders and to erase the traces: execution chambers, gas vans, mass graves, crematoria and cremation pyres. It discusses toxicological issues surrounding the various lethal gases claimed to have been used: gasoline and diesel exhaust gases, carbon monoxide, Zyklon B/hydrogen cyanide, to name only the familiar ones. How did these tools work, if at all? What traces can we expect to find, if any? And, ultimately, which traces were actually found during forensic investigations undertaken since WWII's end.

Holocaust Encyclopedia also has multiple entries on certain more-or-less common claims about aspects of the Holocaust, including a list of "Who said it?" These cover topics such as "flames shooting out of chimneys," "fat extracted from burning corpses," "blood geysers erupting from mass graves," "soap and towels issued to gassing victims," to name but a few.

Finally, several entries address factors that have influenced the creation of the Holocaust narrative, and how we perceive it today. This includes, among others, entries on psychological warfare and propaganda during the war, on conditions prevailing during criminal investigations and trials of alleged Holocaust perpetrators, on censorship against historical dissidents, on the religious dimension of the Holocaust narrative and on motives of all sides involved in this debate that refuses to go away.

In this important volume with 579 short chapters, you will discover—for the very first time uncensored and unconstrained—the bare bones of this skeleton in the West's historical closet.

Be prepared to be mind-boggled and amazed!

Large format (8.5"×11"), 634 pages, hardback, case laminate cover, 579 entries, 357 illustrations (101 color, 256 B&W), bibliography, index, item #1013, **$110** minus 10% for TBR subscribers plus $15 S&H inside the U.S. from THE BARNES REVIEW, P.O.Box 550, White Plains, MD 20695. Black, Brown, Asian & Slavic Volunteers Fought in Adolf Hitler's Armed Forces

THE MAINSTREAM, Hollywood-promoted narrative portraying Adolf Hitler and National Socialist Germany as ruthless, supremacist monsters who viewed non-Aryans as subhuman simply does not hold up to scrutiny. Numerous peoples, including Blacks, Muslims, Arabs, Hindus, Slavs, East Asians, Chinese, Jews and partial Jews, honorably served and worked with the National Socialist regime, demonstrating the nuance of Germany's wartime policies, as well as the respect it and her leaders and soldiers had for the anti-Communist peoples of the world.

This interview of researcher Veronica Kuzniar-Clark, conducted by TBR's Marc Roland, discusses that very fact. Kuzniar-Clark is the foremost expert on this subject, as she is the author of *Black Nazis: Ethnic Minorities and Foreigners in Hitler's Armed Forces—The Unbiased History.*

Interview by Marc Roland

INTRODUCTION

That the official history of a military campaign is written for posterity by its victors has been a self-evident truth since Homer's Greeks defeated Troy during the Late Bronze Age, more than 3,000 years ago. As part of the winning side in a more recent conflict, we may find that observation somewhat uncomfortable, especially if our textbook version of World War II is challenged by contradictory facts.

Among these latest revelations is evidence debunking the perennial Allied caricature of Adolf Hitler's Third Reich as a racist lunatic asylum. In the following interview with a leading American Revisionist, Veronica Kuzniar-Clark brings the full weight of her impressive scholarship to bear on the origins of this enduring myth, and, in the process, exposes the hitherto unsuspected roots of a modern misconception.

A member of the "Free Arabia" Division of the Waffen SS.

* * *

Marc Roland: Please tell us something about your professional background.

Veronica Kuzniar-Clark: I graduated *magna cum laude* from California State University San Marcos in December 2005, majoring in Liberal Studies with a Global Political Science emphasis. Later, I obtained a MMH degree, Master of Arts in Military History, which I received with honors from Norwich University in Northfield, Vermont in June 2009. I applied to the University of Maine and was accepted into their doctoral program in history.

Roland: For the last 90 years or more, mainstream historians, especially television and feature-film producers, have depicted Hitler's SS men as uniformly blond, blue-eyed mass-murderers, filled with genocidal contempt for all non-Germans. How accurate is this characterization?

Clark: The SS "superman" image isn't accurate at all. The idea of the blond, Teutonic "Nazi god soldiers" who were all supposed to be tall, fit and physically perfect is just Allied propaganda. In fact, there's a surprising paradox of detail at this time of alleged "racial fanaticism."

Siegfried Hollstein, Herbert Sabac el Cher's mulatto son, prior to his marriage, was blond, blue-eyed and athletic. He was enrolled in a political educational school at the outset of the war, one of the National Socialist elite schools whose students, after having proved their Aryan heritage, were to form the ideological leadership.

A document was found in Herbert's estate, a letter by a certain Agnes addressed to Siegfried's mother, Elfriede Hoschl, in Spandau, about "proof of

Soldiers of the 13th mountain division SS "Handshar" adorned in their distinctive red fezzes.

racial origin," along with all the other pertaining documents. It reads, "Please find enclosed a list for your information. Heil Hitler!"

So, here we have a case of a *Mischling* (mulatto) individual that was declared "Aryan" and admitted to a prestigious National Socialist school.

Roland: How did most SS men regard their non-German and especially their non-Aryan comrades?

Clark: Most SS men held their non-German (non-Aryan) comrades in high regard. The best sources to consult on personal testimonials of various SS volunteers and conscripts are those published by Preuss, like the *SS Chronicles* series, books by Antonio J. Munoz and books by Richard Landwehr.[1] My books feature testimonials, too, but I'll just mention a few examples that stand out.

In *Warwolves of the Iron Cross: Swastika & Scimitar*, we read about Standartenfuehrer [a battalion commander of 300 to 500 men] Wimmer-Lamquet's African comrade, Sam. He wrote:

> I introduced the old men to an African from the U.S. who spoke many of the local tribal dialects. This medical student was specifically chosen by the Black African movement in the United States to live for an extended period in East Africa to campaign there for a new Africa, an "Africa for the Africans."
>
> I had met this man through my administrator. After an extensive conversation he agreed to support my idea. Though he aimed for a Pan-Africa, he still committed himself during the preparatory stages of the wishes of the U.S. Blacks to participate in my anti-British agitation efforts. Until the realization of his own plans, it seemed to him a welcome interim solution.[2]

In *Black Nazis II: Ethnic Minorities and Foreigners in Hitler's Armed Forces*, we read the German opinion of the Buddhist Kalmycks: "[T]hey launched themselves passionately into their work. Indeed, they set about wiping out groups of [Soviets] in the Steppes with such ardor that the German army at times had to intervene to prevent atrocities."

We also read: "There were no better scouts and no better hunters of partisans. They kept the *franctireur*s [armed enemy civilians] of the *Plavna* [Communist Serb underground resistance organization] in check."[3]

In Maj. Wolf-Dietrich Heike's memoir *The Ukrainian Division Galicia 1943-45*, part of which is quoted in *Hitler & Himmler Uncensored*, we read his opinion of his Ukrainian troops:

> One thing should be stressed at the outset for today's generation and those to come: In the 1943-45 period of the war, the Ukrainian Division enlisted close to 32,000 men. They fought with the Germans in good faith and for a cause they considered just; they battled, suffered, overcame and were overcome.
>
> This was not the Division's fault. Its soldiers, no less than those on the other side, were fulfilling their duty. Alongside the peasants and workers stood distinguished and

> older veterans of World War I, soldiers and officers from the Austro-Hungarian army and the Ukrainian Galician army (UHA), as well as scores of young men of the western Ukrainian intelligentsia. They paid dearly in blood, a fact that the German people should never forget. I wish to dedicate this book both to Ukrainians and to the German people, who owe the former a debt of gratitude.[4]

Roland: How did the average non-Aryan SS man regard his German comrades?

Clark: We learn from Russian volunteer Grigori von Lambsdorff that Russians serving with him did not see themselves as inferior. He told his interviewer: "We viewed the Germans not as our masters, but as our allies."

The Arabs followed the old saying, "The enemy of my enemy is my friend." While Haj Amin al-Husseini, the Grand Mufti, and other Arabs—from Jordan, Palestine, Syria and Iraq—did not necessarily support German nationalism or imperial ambitions in Europe, they did see the Germans as their greatest hope for ending British imperialism in their homelands.

At least one Arab commando, Fawzi el Kotub, deserted the Germans and used his excellent training provided by them to commit acts of sabotage against the Judeo-British mandate government in Palestine. So, we see that the Arabs certainly were not used by the Germans but had in fact used the Germans for their own gains. The Ukrainians, and many other nationalist and splinter groups—like the Croatian *Ustasha*, Serbian *Chetniks*, Sandjak Muslims and Lusatian Serbs—also used an alliance with Germany for their own gains.

The Crimean Tatars hoped to use Germans for their own ends as well. The nationalists "hoped to utilize the situation to advance their own purely Tatar interests, as they saw them."

In any alliance between different nationalities or ethnic groups, both sides have something to gain from the relationship. There is no such thing as an entirely one-sided alliance, so we must not be deceived into thinking that the Germans "exploitatively used" foreigners and non-German minorities or vice versa.

The Germans and non-Germans needed one another, which is why their respective relations underwent transformations. Both sides made concessions.

Roland: Did all SS personnel, regardless of their various ethnic or racial backgrounds, share the same goals? If not, how did they differ?

Clark: No, not all SS personnel shared the same goals. Motives ranged from a sense of patriotism to a burning desire to stop Stalinism. Most Russians were using the SS opportunity to bolster their chances of successfully defeating Stalin and his puppet regimes, whereas British SS volunteers, recruited by John Amery, were motivated by a combination of anti-Jewish sentiment, adventurism, a chance for a unique opportunity or social promotion or Pan-European patriotism.

> Not all SS personnel shared the same goals. Motives ranged from a sense of patriotism to a desire to stop Stalin.

Estonians, Latvians and Lithuanians joined for a combination of reasons as well. Some were conscripted by their National Socialist-allied governments; some were motivated by a sense of Pan-Europeanism; some were fervent nationalists who wished to join the Germans in an effort to halt Stalin's imperial advance against their homeland. Still others sought professional military training and experience for future war against the Soviet regime that they felt sure was coming.

The Estonians welcomed the Germans as liberators. They and the Latvians had witnessed some of the most inhuman atrocities known in warfare.

As the NKVD retreated from these states to avoid the Germans, they committed a number of ghastly massacres to let the Germans and their allies know what their fate would be if they lost. Eyes were gouged or "flipped" out; tongues were hacked out; genitals were hacked off and shoved down the victims' throats; skin was torn from some of the bodies; feet had been set alight; many victims had severe burns to their flesh; others were so mutilated from beatings and gashes to the face that they remained unidentified.

The Germans were shocked and many of them literally went "mad" upon seeing this or vomited on the spot. Even mainstream historians like Terence O'Reilly were forced to admit that, while the National Socialist occupation was oftentimes harsh in the east, it did not remotely compare to the brutality of the Soviet regime.

Only a couple of Americans joined the SS. One was Martin James Monty, a young Anglo-American executed for treason. He believed that Franklin Roosevelt was communizing America, so he felt obligated to join the SS to help save America from Communism.

Unfortunately, we do not know what motivated Africans to join the SS, because so few wrote about this topic. We may safely assume that their reasons were similar or the same as those of the Arabs: They wanted to see the end of British colonialism.

Franz Wimmer-Lamquet recruited at least two African volunteers, a man who likely went on to fight in Greece with the Free Arabia SS Division. This man may have been Sam, but I have not been able to confirm this for sure.

Blacks served with Free India SS troops as well. At least one SS commando, apparently a member of Special Commando Wimmer in the light of the arm patch he's wearing in his photo, was African. There is a Black soldier pictured in Wimmer-Lamquet's book on the back cover. There are also several photos of commanders in conversation with Black Muslims,

but what their goals were is unclear.

Ukrainians, like most Russians, joined the Germans and used them for their own purposes: to receive excellent, professional military training for future warfare against the encroaching Soviet imperium.

Irishmen served as SS commandos under Otto Skorzeny. Their reasons were two-fold: as Catholics they were staunchly anti-Communist, and they had been held as German POWs for over two years, so they were probably convinced of the validity of the German cause. Frank Stringer, one of the Irish soldiers, commented that he "hated Russians," so he "joined the German army to fight them."

Since half of the Waffen SS were churchgoers and/or Catholics, many SS volunteers were supportive simply because of their religious views. They saw the Russians as antichrists and atheists. Many Ukrainians volunteered for religious reasons, too.

Muslim volunteers were not only anti-Communist, but anti-British and anti-French. Algerians and Syrians wanted the French out. Arabs wanted the British out of Iraq and Palestine, and Iranians wanted the British out of Iran.

Similarly, the Indians wanted an immediate end to the British Raj, an imperial tyranny that had claimed the lives of an estimated 30 million Indians by famine alone between 1860 and 1900. The British were responsible for 35 famines between 1854 and 1908. These endless crimes against India were the main ideological factor behind the *Azad Hind* ("Free India") movement sponsored by Berlin. Indian leader Subhas Chandra Bose was frustrated that Hitler was unwilling to send German troops to liberate India, but Hitler was strapped with Operation Barbarossa and the Iraq Uprising in 1941, so he refused to make Bose promises he might not be able to keep. Meanwhile, Hitler authorized the recruitment and training of thousands of Indians in Germany.

Roland: Conventional historians insist that the non-German recruits in the SS were nationalist dupes used

Top: Hindi soldiers of the Waffen-SS Legion, "Free India." **Above:** Blacks who defected from the British military were welcome additions to the Nazi war effort and were better treated by the supposedly "bigoted" Germans than in the British or American armed forces. Although most Black volunteers served the Wehrmacht on the North African Front, some fought the Soviets before Stalingrad. This photo was taken in Greece in 1943. **Right:** Chinese Jiang Vago in the officer candidate uniform of the Wehrmacht.

by Wehrmacht commanders as cannon fodder on the battlefield. Based upon your research, how would you respond to this assertion?

Clark: Yes, the Cannon Fodder Thesis is a lie easily revealed by deployment facts and figures.

For example, thousands of SS potentials were rejected during the recruiting process. Actual and authorized strengths never matched up, further indication that not all recruits were accepted by the end of the vetting and training process even when we account for AWOLs, or those "absent without leave" for whatever reason.

Some historians claim that there were an estimated 20,000 to 25,000 Blacks living in Germany when Hitler came to power. Others claim that only about 1,500 to a few thousand lived in the Reich.

Regardless of who is correct, Hitler could have easily conscripted these Afro-Germans and Africans to serve as Eastern Front cannon fodder, but he did not do that. As we learn from a number of Black war survivors, such as Hans Hauck, Hans Juergen-Massaquoi and Herbert Sabac el Cher, Afro-Germans were not used as cannon fodder, if they were drafted at all.

Hitler also could have demanded that France's African troops serve in some capacity, but he did not demand that either. Hitler said at one point that the "use of Black blood" in a European war was "criminal."

Roland: How many non-Aryan volunteers participated in the SS?

Clark: Most historians affirm that about 2 million men and women served in Hitler's armed forces in World War II. My most recent research, which includes obsolete Russian sources, shows that an estimated 3 million non-German foreigners and ethnic minorities served in the German armed forces in some capacity between 1939 and 1945. In addition, of this number, at least 900,000 were members of the Waffen SS.

Roland: How many non-Aryan volunteers in the SS fell in battle?

Clark: An accurate figure of non-German deaths will never be known, as many were missing in action, died in Soviet gulags, never had their remains identified etc. What I can tell you is that nearly 600,000 German soldiers had died by the end of the Battle of Stalingrad and 100,000 were taken prisoner by the Soviets. Only 6,000 ever returned home. What happened to the rest is unknown.

We do not know how many of these nearly 700,000 German soldiers were non-Germans, but stories like that of Horst Sabac el Cher, the Afro-German Wehrmacht soldier mentioned earlier, were likely more common than one might think. His wife Liesbeth received this notice from her husband's superiors, on February 7, 1943:

> The Cannon Fodder Thesis is a lie that is easily revealed by the deployment facts and figures.

> It is my sad duty to inform you that your husband, medical NCO Horst Sabac el Cher, went missing on January 1, 1943, at the conclusion of a battle near Uruchskaja in the Caucasus. He was last seen caring for a number of severely wounded. It can be assumed with a high degree of certainty that your husband has been captured.

Horst Sabac el Cher was never heard of again. His brother Herbert was bombed out of his home by the Allies and was nearly killed by a wooden beam that fell and struck him on the head. When he was called up to report for *Volkssturm* service (national home guard), the recruiters saw that he was unfit for such service and did not deploy him in combat.

Roland: There have even been reports of Jews or persons of partial Jewish ancestry who volunteered to serve the Third Reich in various capacities. If these accounts are true, what can you tell us about them?

Clark: Yes, there were as many as 150,000 Jews and men of Jewish descent in Hitler's armed forces. According to Bryan Mark Rigg, author of *Hitler's Jewish Soldiers*, 2,000 full-blooded Jews, 60,000 half-Jews and 90,000 quarter-Jews served in Hitler's army.[5] Jewish-Finnish soldiers are also now known to have volunteered in the dozens to assist the German war effort.

Brian Cuban writes:

> In 1941, Finland joined the war as a "co-belligerent" of Germany. (Finland refused to call itself an ally.) There were 250-300 Finnish-Jews fighting alongside Germany on the Eastern Front against Russia, and some of the Finnish-Jews were even awarded German battle decorations.
>
> Soldiers with Jewish heritage also fought alongside the Nazis when Romania was aligned against the Soviet Union as well as for Italy.[6]

Finnish Jews fought alongside National Socialist Germans in Leningrad as well. According to a *Jewish Post* article:

> During the 1940 war between Finland and Russia (Winter War), Finnish Jews fought alongside their countrymen. But, most surprising, they fought in World War II alongside Nazi Germany on the Russian front, as Finland allied itself with the Nazis.
>
> The Finnish government afforded them full civil rights throughout the war despite pressure from the Nazis. Today's community has a memory of a "field synagogue" built by Finnish soldiers in which they could conduct services alongside Waffen-SS units. And there was a Jewish soldier who defied death to rescue a battalion of SS soldiers pinned down by enemy fire. Offered an Iron Cross, he refused, in flawless German.[7]

Jews also collaborated with the Germans in the Netherlands. The Hirschfelds and other Jewish business men assisted German authorities.

Hirschfeld was in fact instrumental in "merging Holland's economy into the German war effort." Young Jewish boys, like George Soros, were National Socialist collaborators who helped disseminate National Socialist deportation notices to their Jewish neighbors. Dozens of Jews served as Gestapo and SS agents, such as Special Commando Wimmer.

Hundreds of Jews volunteered as policemen in various Jewish ghettos as part of the Jewish Order Police. And, as most of us are aware, Zionist Jews like Feivel Polkes and Rudolf Israel Kastner negotiated and facilitated Jewish emigration from the Reich to various destinations throughout the world. Between 60,000 to 70,000 immigrated to Palestine and 30,000 went to Shanghai. Many thousands more went to Brazil, Mexico, Japan and Argentina—all with Hitler's direct approval.

Numerous German commanders were Jewish as well, including the one and only Erich von Manstein (*nee* Lewinsky/Levy). Some Jews (or partial Jews) were even NSDAP, SA and SS members.

Roland: Where and in which battles did the non-Germans fight?

Clark: Non-Germans fought in just about every theater, on the front and behind the lines against partisans. Their duties ranged from security and policing (most Indian units) to front line action against the Soviets (Estonians, Spaniards, Frenchmen, Russians etc.).

Horst Sabac el Cher and Hans Hauck, both Afro-Germans, served on the Eastern Front. Horst went missing in action and Hauck was taken prisoner by the Soviets as I mentioned earlier.

Arabs and Kalmycks [Mongolians] saw action in the west against the Anglo-Saxons, while most Germanic volunteers were fighting in the east. The Latvians and Estonians were amongst the most impressive non-Germans, as these two ethnic groups distinguished themselves as much as the Spaniards and Belgians on the Eastern Front.

Roland: Persistent rumors suggest Japanese, Chinese and even Tibetan volunteers saw action on the Eastern Front as SS members or auxiliaries. Is there any truth to these rumors?

Clark: Yes. We do not know how many of each of these Asian groups served, but we have plenty of photographic evidence that proves their service.

There were Burmese members of the Free Indian SS division and Japanese advisors. Vietnamese, Chinese and possibly even Korean soldiers fought in the Western theater. Whether or not Tibetan soldiers served is still up in the air, but it is possible that a few did.

At least one Chinese soldier was awarded the Iron Cross, and Chiang Kai-shek's adopted son, Chiang Wei-kuo, received the prestigious *schutzenschnur* lanyard. He almost participated in the conflict with Poland but was recalled to China just before war broke out.

There was close collaboration between Hitler's government and certain factions in Chinese politics, such as the pro-Japanese Wuhan government headed by Wang Jingwei (died 1944). Most Indochinese troops served as *Hiwis* ("willing helpers") in the Western theater, as Cochinchina (Vietnam) was a colony of France during World War II.

Roland: Are there any non-Aryan SS veterans still alive? If so, have they shared any of their experiences?

Clark: I am sure many non-German veterans are still alive, but I do not know how many documented or shared their stories.

Some Asian and Indian veterans wrote about their experiences, as did countless Eastern Europeans. Antonio J. Munoz has collected a number of their testimonials and even interviewed a few of these veterans, such as "Dory," a Lebanese veteran.

The best books to consult on this topic are Munoz's *The East Came West: Muslim, Hindu & Buddhist Volunteers in the German Armed Forces, 1941-1945* and just about anything written by Landwehr and David Littlejohn. Landwehr's books

Two books by Waffen SS officer Leon Degrelle

The Burning Souls: A Poetic Memoir

Born to a Belgian family 1906, Leon Degrelle rose to prominence as a newspaper editor and head of the militant monarchist, Catholic and anti-Communist *Parti Rexiste.* Following the German occupation of Belgium, Degrelle and his party loyalists enlisted in the Waffen SS Walloon Legion to aid in the liberation of the peoples of the Soviet Republics. After the fall of Berlin, Degrelle escaped to Spain, where he was safeguarded by Franco. *The Burning Souls* is Degrelle's reflection on his experiences and on the soul—part poetry but mostly memoir. He traces his journey, from his idyllic childhood to the steppes of Russia, not just as a physical journey but as a spiritual trial. Softcover, 112 pages, #901, **$19**.

My Revolutionary Life

Here is Gen. Leon Degrelle's autobiographical account of his daring escape from war-ravaged Germany in 1945 and his adventures after the war. Sentenced to death by the Belgian government after the Axis surrender, Degrelle escaped by flying from Norway and crash-landing in Spain. The Belgian Waffen-SS officer also recounts his experiences as a rising nationalist politician, the political situation in Europe before WWII, his battle against the Bolsheviks before and during WWII, and the last days of the Reich. Softcover, 217 pages, #714, **$27**.

are back in print and available on Amazon.[8] Rigg interviewed dozens of Jewish veterans for his books *Hitler's Jewish Soldiers* and *Lives of Hitler's Jewish Soldiers*, too.

Roland: Born in Java to a Dutch father and a native Indonesian mother, Wilhelm Eduard de Graaf's mixed parentage was no obstacle to acceptance and promotion by German authorities, because they valued his exceptional flying skills as a prewar airline pilot for KLM Royal Dutch Airlines.

He was admitted to the *Versuchverband Oberbefehlshaber der Luftwaffe*, a highly classified formation for testing secret aircraft. De Graaf thereafter transferred to another extraordinary squadron, *Kampfgeschwader 200*, specializing in extremely hazardous missions, such as 1944's Operation Maria, when agents were flown far behind enemy lines to be set down inside Soviet Russia.

Do you know of any examples similar to de Graaf in the Luftwaffe or other Wehrmacht services?

Clark: Hans Massaquoi recalled that his friend Ah-Yue Hon Lou was accepted as a Luftwaffe volunteer "and did wartime service in a parachute outfit," even though he was mixed-race.

Ah-Yue was born in Hamburg. While he lost his father and grandfather when he was still a young boy, his mother made sure he acquired the skills to succeed. He became a professional entertainer. His grandfather was a German sailor who had befriended a young Chinese man during his sailing days. When this young man later met up with him in Hamburg, he met the sailor's daughter and later married her. Ah-Yue was their son.

Then there's the case of Thai Col. Vicha Titawat.

Titawat received a scholarship to study in a Belgian military academy. When Germany attacked Belgium, he fled to France and the Thai government soon sent him to study in the Reich. He then joined the German army as a volunteer soldier and fought against the Allies.

When the war ended, he was captured by the Americans. He was held in a POW camp for three months and was then allowed to return home. After that he wrote the book *Kon Thai Nai Korn Tab Nazi* or *Thai in the Nazi Army*. His book is excellent because he wrote about actual events and people he met, including Hitler. In his mature years, he became the Thai ambassador in Iceland and Norway. The first edition of his book was published more than 60 years ago.

Willy Baarn was an African *Abwehr* spy. He was apprehended in Brazil in August 1943. Baarn confessed that he was trained in codes, ship-spotting and radio telegraphy at a National Socialist training school for spies in Paris. His goal was to locate fellow National Socialist agents and operatives. An African newspaper read, "It marks the first incident in the New World where a Negro has been apprehended on the charge of being a Nazi agent."[9]

> Hans Massaquoi recalled his friend, Ah-Yue Hon Lou, was accepted as a Luftwaffe volunteer.

The African American medical student and "Back to Africa" supporter Sam assisted *Standartenfuehrer* Franz Wimmer-Lamquet in Tanganyika. Together they enacted a plan to foment anti-British passive resistance. Sam and Franz trained African medicine men in the use of European medicine as part of Franz's covert plot that caused the British occupiers plenty of headaches.

Activities like this were probably why *Ken* magazine denounced noticeably pro-German Africans as "Black Nazis" in an article published on March 23, 1939.[10] This is where I got the title for my book, in fact. ❖

An Indonesian volunteer in the German army.

Marc Roland is a self-educated expert on WWII and ancient European cultures but is equally at home writing on American history and prehistory. He is also a freelance book and music reviewer. Roland has written dozens of articles for TBR. To review them, access the yearly author/subject index found in the back of each year's November/December issue of TBR.

What Did the Nazis Really Think About Race?

By Marc Roland

How does non-White participation in the Wehrmacht jibe with the standard narrative of the Third Reich, supposedly the most racist regime in history? From Adolf Hitler's assumption of power in 1933 until the end of WWII 12 years later, citizenship in his country was restricted to men and women of Aryan descent. Mixed marriages were criminalized, while racial hygiene was taught in school and promoted publicly to preserve the genetic integrity of the German people.

The NSDAP's official view in these matters was articulated by a medical physician, Walter Gross (1904–1945), who headed the Office of Racial Policy (*Rassenpolitisches Amt*):

> Government has the right to implement such measures for the benefit of the community, as are scientifically proved expedient in the way of eugenics. Civilization is only possible through the individual becoming part of the whole. Illicit intercourse liable to punishment was designed primarily with a view to preventing the birth of further individuals of mixed blood, whose fate is a sorry one everywhere in the world, because they are neither one thing nor the other.

Dr. Gross often stressed that goodwill between the various races of the world depended upon honest recognition of and mutual respect for the natural differences which defined their unique identities. Those God-given distinctions should be preserved, otherwise the very existence of a folk, or a unique group of people, was endangered.

"Since peoples differ racially,

WALTER GROSS

each must follow its own nature, keeping it pure from physical or intellectual corruption," Dr. Gross argued. "This is the great and essential conclusion that the National Socialist draws from an understanding of the racial teaching of science. Our common task will be to build a new age on this knowledge, and we believe and know that our future will then be happier, because it will be based on foundations that are true."

This view was most clearly expressed in the German armed forces during World War II. Non-Whites served in the army, navy and air force. But special armed SS organizations were restricted to non-Aryans, such as the *Azad Hind Fauj* for volunteers from India, or the *Jaysh bil d al- arab al-urra*, in which Arabs from the Middle East and North Africa enlisted.

Unlike the military units of the Allied governments, "colored" soldiers were not segregated or deprecated as second-class servicemen in the German Wehrmacht but allowed to fight for their own racial preservation against the common Zionist world enemy, no differently than Frenchmen in the SS Charlemagne Division or Swedes in the SS Viking Division fought for their shared European heritage and survival against the same international foe.

These racially dissimilar men—recognizing and respecting their dissimilarities drawn by Mother Nature herself, but struggling for the same, fundamental purpose—epitomized the earlier words of Dr. Gross:

> We have learned that the differences between the major blood groups of the world, between the major races, are not the result of human action, but of the laws of Creation. Other peoples may not be better or worse, but they are different from us, and because they are different than we are, there is a kind of wall between us that is part of the laws of life. That is the core of National Socialism's racial thinking.
>
> Our goal is not to insult others, to say, "I'm better than you!" Rather, we hold to the humble recognition that each healthy piece of life has its own corner of the world and its special tasks. We know that each variety of life has a right to exist, only as long as it keeps itself pure and strong. Our task is to humbly accept the laws that govern our human existence and to accept the fact that we are born Germans in Germany, not as Chinese or Eskimos.
>
> Let us then together follow the path to a new worldview! Let us go this path, not a path of superstition and heresy, but rather a path of deep humility and piety before the laws of God! Let us go along this path together, and listen to the deepest depths of race, where blood and soul rule! ❖

HISTORY YOU MAY HAVE MISSED

A digest of interesting historical news items gleaned from various sources around the world that most likely did not appear in your local newspaper or on your mainstream television broadcasts.

✠ ✠ ✠

Israel Rejects Genocide Claims

On December 29 last year, South Africa formally brought charges of genocide against Israel at the UN's International Court of Justice based in The Hague, Netherlands for its ongoing slaughter of Palestinians in the Gaza Strip. Citing the 1948 Convention on the Prevention and Punishment of the Crime of Genocide, lawyers for South Africa argued that Israel's military campaign is "genocidal in character" because Israel is seeking "to bring about the destruction of a substantial part of the Palestinian national, racial and ethnical group." Predictably, Israel rejected South Africa's well-documented arguments, invoking the official "Holocaust" narrative and arguing that the very notion of the legal concept of genocide is being turned on its head by South Africa. It is estimated that the state of Israel is responsible for nearly 5 million Palestinian deaths in the last 75 years.

✠ ✠ ✠

Survivors Not Surviving

According to the latest statistics published by the Conference on Jewish Material Claims Against Germany, there are roughly 245,000 "Holocaust survivors" still living in 2024 in 90 different countries. Nearly half live in Israel, while 18% reside in North America and Western Europe and another 12% in the former Soviet Union. Even as the number of "survivors" continues to dwindle, Jewish leaders continue to insist that the money and resources needed to help them is far from enough. "Now is the time to double down on our attention on this waning population," Gideon Taylor, president of the Claims Conference, said. "Now is when they need us the most."

✠ ✠ ✠

No Free Speech "Purist"

In late January, Elon Musk, the billionaire owner of X (formerly Twitter), traveled to Auschwitz with Ben Shapiro, a popular Jewish media personality. Donning a yarmulka, Musk—allegedly a free speech "purist"—laid a wreath at the concentration camp and participated in other commemorative ceremonies. The following day, X CEO Linda Yaccarino announced that free speech ends at "hate speech," vowing to crack down on anti-Semitism and hate, which amounts to criticism of Jews and/or Israel or questioning any aspect of the official mainstream "Holocaust" narrative. So much for free speech "purism" on X.

✠ ✠ ✠

"Misinformation" No. 1 Threat?

Move over climate change, terrorism, nuclear war and worldwide pandemics. At the recent World Economic Forum (WEF) in Davos, Switzerland, members of the power elite identified the global threat that puts all those others to shame. Misinformation and disinformation, they say, constitute the greatest threat to humanity. But what in their minds constitutes misinformation and disinformation? Turns out it is freedom of speech. The Global Risks Report 2024, published in January, insists total censorship of any material—whether in print or electronic format—is the solution.

✠ ✠ ✠

Not OK to Be White

A British activist affiliated with Patriotic Alternative (PA), one of the most popular nationalist organizations in the UK, has been found guilty of "inciting racial hatred" for distributing stickers with pro-White messaging. Sam Melia, the 33-year-old activist who was sentenced, had been under investigation by counterterrorism officials since 2021. It was then his home was searched and he was formally charged. Some of the "offensive" slogans Melia used included "Reject White guilt," "It's OK to be White," and "Love Your Nation," among other allegedly offensive slogans. Mark Collett, the leader of PA, noted that even the prosecuting officials admitted that the language used on the stickers was lawful, yet they still assiduously pursued their successful prosecution of Melia.

✠ ✠ ✠

Provocative Publisher Passes

On December 18, LeRoy St. Germaine, founder and publisher of *Your Ward News*, an independent newspaper based in Canada, passed away at the age of 82. Founded in 2011, *Your Ward News* "took strong stands on local issues and went after certain politicians quite fiercely," according to Bahman Yazdanfer, a friend of St. Germaine. By 2014, St. Germaine began collaborating with Dr. James Sears, a consistent critic of the powerful Zionist lobby in Canada, among other politically incorrect topics. St. Germaine and Sears were later convicted in 2019 under Canada's hate speech law—Sec. 319 of the Criminal Code—which criminalizes the "willful promotion of hate" against privileged groups. St. Germaine was eventually sentenced to house arrest for one year while Sears spent a year behind bars.

✠ ✠ ✠

Just Can't Get Over It

According to *Smithsonian* magazine, descendants of "Holocaust survivors" are replicating Auschwitz tattoos on their bodies as conversation starters. Rony Cohen, one of

those who has had a number tattooed on her arm, "felt as if she had experienced the Holocaust herself. It featured in her dreams. It permeated family life. … The legacy of starvation was never far from the surface. Food was used to soothe. There was no waste. Her grandfather finished every crumb from every plate," says *Smithsonian*. The same could be said of the many Americans who suffered from starvation during the Great Depression. Note: The top five stories on *Smithsonian*'s website were focused on the "Holocaust," no doubt part of the propaganda campaign to garner sympathy—and thus justification—for Israel's ongoing ethnic cleansing of the Holy Land.

✠ ✠ ✠

Take a Bite of History

In another Earth-shattering story from *Smithsonian*, writer Sarah Kuter informs us that Winston Churchill wore false teeth—gold mounted dentures—while addressing the nation during World War II. He evidently felt his deteriorated choppers were a bad look for a powerful English politician. If you are interested in buying Winnie's false teeth, contact Cotswold Auction Company. They will only cost you a cool $10,000.

✠ ✠ ✠

Punishment from the Heavens?

A team of archeologists and other researchers believes it has discovered evidence indicating that, in ancient times, a large meteor exploded, raining down molten material while raising temperatures to levels deadly to humans, leveling a massive area in the "Middle Ghor" region where the cities of Sodom and Gomorrah are thought to have been located. The discovery backs up the biblical account as described in the Book of Genesis in the Old Testament. Steven Collins and Phillip Silvia, two of the main archeologists involved in the study of the Tall el-Hammam Excavation Project, argued that "the physical evidence from Tall el-Hammam and neighboring sites exhibits signs of a highly destructive concussive and thermal event that one might expect from what is described in Genesis 19."

✠ ✠ ✠

We Told You So

In the September/October 2022 "Ancient Mysteries" edition, TBR discussed the growing body of evidence that there was a sophisticated mound-building culture in the Amazon that has now been overwhelmed by the rain forest. Now the BBC confirms this in an article published January 2024. "The unearthing of an immense network of cities deep in the Ecuadorean Amazon is proving that the world's biggest rainforest was once a thriving cosmopolitan hub." The article quotes archeologist Stephen Rostain who says, "Let me ask you something. … What do you know about the history of the Amazon? … You know nothing, because the history that we think we know is wrong. … It's a history of lies." Thanks to Rostain for pointing out what is obvious to all TBR readers: Mainstream history is full of lies.

✠ ✠ ✠

Looking for a Madiba Shirt?

According to ABC News, personal items belonging to Nelson Mandela—the lionized Marxist terrorist who began the meteoric descent of South Africa from a prosperous First World state to it's present dysfunctional condition—are scheduled to go on sale in February at Guernsey's Auction House in New York. South Africa, however, is not happy, and the government is still trying to stop the auction in court. ABC says, "Among the items set to go on sale are Mandela's 1993 South African ID book, his green Madiba shirt, iconic aviator sunglasses, a gifted blanket from former President Barack Obama, sculptures and personal letters written by Mandela." Mandela's son Makaziwe insists, "I want other people in the world to have a piece of Nelson Mandela—and to remind them, especially in the current situation, of compassion, of kindness, of forgiveness." Are we talking about the same guy?

✠ ✠ ✠

Honoring Emmett Till

"Good Morning America" reports that influential "television producer and screenwriter Shonda Rhimes is taking on a new passion project." She and the Emmett Till Interpretive Center are out to "preserve the powerful history of Emmett Till, a Black 14-year-old boy who was kidnapped, beaten and lynched in Mississippi in August 1955 after being accused of whistling at a white woman." Once again, fallacious mainstream myth has overtaken reality. In the January/February 2024 edition of TBR, letter writer Ronald Williams set the record straight on Till, who was no innocent angel (page 75) and did far more than whistle at a White girl, sexually assaulting the young woman in front of multiple witnesses. This just proves, yet again, that Hollywood has no interest in truth, simply perpetuating stereotypes about White people as irrational, violent, racist "rednecks."

✠ ✠ ✠

Supreme Ignorance

In September last year, on the 60th anniversary of the deadly 1963 church bombing in Birmingham, Alabama, Supreme Court Justice Ketanji Brown Jackson delivered a speech demanding that U.S. schools need "to educate American school children about the nation's dark history of racial inequality and violence," according to multiple news outlets. Jackson said in her speech, "The work of our time is maintaining [our] hard-won freedom, and, to do that, we're going to need the truth—the whole truth—about our past. … We must teach it to our children and preserve it for theirs. … If we're going to continue to move forward as a nation, we can't allow concern about discomfort to displace knowledge, truth or history." We completely agree. Thus, TBR has mailed copies of select Revisionist books on the enslavement of Whites to her. So far, we have not received a thank you note for helping her bring out "the whole truth."

Who Were the Red Paint People of Ancient North America?

Seventy-five centuries ago, a new ethnic group abruptly appeared on the Eastern Seaboard of our continent. Although we do not know what they called themselves, archeologists studying the remnants of their remarkable society refer to them as "the Red Paint People," for their use of red ochre in mortuary and other ceremonial contexts. Their life-style was completely different from all other North American Indians, but not unlike the circumpolar cultures of the ancient Old World, particularly the seafaring peoples of neolithic Europe. This included nearly identical ship-building tools, oceanic navigation skills, artistic motifs, architectural constructions, a sophisticated maritime tool kit, religious practices and more. Could the early Red Paint People have actually been prehistoric Europeans who arrived in North America, thousands of years before Columbus?

A RELATED ANCIENT MYSTERY?

Illustration from a 128-year-old newspaper article announcing the accidental discovery in rural Michigan of a baked-clay tablet from the Eastern Mediterranean Bronze Age. Archaeologists who dismissed the object as a fake from the time it was found in 1896 to the present day are still unable to reconcile the object's Minoan glyphs with the same written language of ancient Crete, which was unknown and unpublished until 1957.

By Marc Roland

On the west side of Newfoundland's Great Northern Peninsula, at a place known as Port au Choix (pronounced "*Port oh Chwah*"), archaeologists were taken by surprise when they discovered barbed and prehistoric toggled harpoons, *leisters* (spear-like implements with three or more prongs for stabbing fish), modeled swordfish bones, stone plummets for fishing weights, and the polished effigies of whales. Not only were such items never encountered elsewhere throughout pre-Columbian North America, they clearly belonged to sailors who ventured far from shore for deep-sea fishing, unlike the landlubberly Indians of Atlantic coastal Canada. The first discovery of a Red Paint settlement—utterly unlike anything associated with local Amerindians—was made at Nulliak Cove, near the shore of Labrador, where 26 multi-room stone foundations spread out over more than 300 feet.

Nearby, several up-right, sharp-pointed monoliths were erected by

The coast of Doggerland and its position between Britain and Denmark are shown on this map of the northern European continent. The people of ancient Doggerland were accomplished deep-sea mariners and highly skilled craftsmen. Once Doggerland was inundated by rapidly rising sea levels about 7,500 years ago, the Doggerlanders were forced to find refuge elsewhere. Their new home may well have been along the Atlantic coast and inland waterways of ancient North America.

the Red Paint People. Eskimos refer to these standing stones as *inuksuit*, or "travel markers," capable of being observed from some distance out at sea for purposes of triangulating relative positions for navigating the coastline—an identical function performed by megaliths near the shores of Brittany, such as Locmariaquer's *Grand Menhir Brisé*, on the Atlantic coast of France.

In 1876, years before the modern rediscovery of the Red Paint People, Randall Mitchell, a clerk at Igloolik in coastal northern Canada, was told by local Eskimos that their ancestors were not responsible for the *inuksuit*, which had been raised in the distant past by fair-haired giants from across the sea.[1] Some of the standing stones at Nulliak Cove have squared notches cut into them to frame solar alignments, likewise incorporated in many Neolithic sites throughout Western Europe, but not in the Americas.

American anthropologist Dr. Gunnar Thompson writes:

> At Borango Fjord and Varanger Fjord in Norway, archeologists uncovered remains of a 6th millennium B.C. [Western European] culture [the Maglemosian], having red ochre burials, polished slate tools, polished stone gouges, elbow-handled choppers, soapstone plummets, bird effigy combs, barbed harpoons

Red Paint Artifacts Found in Maine

Above: Red Paint artifacts found in Massachusetts by local amateur archeologists. The finds included finely carved plummets, spearheads, a stone pick-axe head and a copper blade.

At left: A grave excavated in an ancient Red Paint settlement in Maine by Warren King Moorehead, known as the "Dean of American archeology." He was among the first to investigate the Red Paint People, concluding they were of European origin. There is evidence that the Red Paint People of Maine conducted trade with Newfoundland, at least 400 miles away by sea, proving their navigational skills. There is further evidence that the Red Paint people moved up the St. Lawrence Seaway and into the Great Lakes region, as red ochre burials are found there with Red Paint cultural remains.

Upper left: Artfully crafted slate "bayonets," or harpoon tips, from a Red Paint cemetery. The longest is 16 inches, but, due to the fragility of the slate, researchers believe they may have had a ceremonial meaning, as they almost certainly could not have served as everyday tools or weapons. **Upper right:** Barbed harpoon tips identical to ones found in the remains of European Stone Age maritime cultures, whose providers hunted large sea mammals and deep-water fish. **Below left:** Three types of Red Paint tools (left to right)—an adze, a knobbed gouge and a traditional gouge—found in Maine. **Bottom right:** An artist's rendering of a stone gouge attached to a wooden haft. Such traditional ship-making technology could have easily been adapted to mining endeavors.

> and inscribed bones. The similarity of these artifacts to New England specimens, particularly the use of red ochre, establishes that America's Red Paint People and Scandinavia's ancient maritime hunters [known to archeologists as the Red Ochre People] had a common heritage.[2]

There, littoral graves characteristically feature red ochre, such as the Maglemose site's 19 burials near Vedbæk, on the Oresund coast of Danish Zealand, facing Sweden, and date to more than 5,000 B.C. Found among them was a *leister* identical to its transatlantic counterpart from Port au Choix, mentioned above.

The Labrador settlement at Nulliak Cove also features a small monolith, about two feet tall, deliberately placed at the village center, and unlike anything found anywhere else in the world, save among the Laplanders of Finnmark, in extreme northeastern Norway, where shamans still use precisely the same kind of rudely shaped stones as altars. A prominent Norwegian anthropologist of the mid-20th century, Gutornt Gjessing, observed, "Nowhere on the globe are there to be found remains as closely related as those of the Norway coast and the coast of Maine."[3]

Ancient blood or new? Today, this Native American woman from eastern Notre Dame Bay, on the northeast coast of Newfoundland—formerly inhabited by the extinct Beothuk natives and site of the Red Paint People—appears less "Indian" than Western European.

Virtually identical bone combs and carvings produced by North America's Maritime Archaic and Western Europe's Stone Age societies self-evidently resulted from a shared cultural impetus. A carving from Maine appears to depict a lunar representation of some kind. Inside its vertical rectangle are two diagonals bisected below mid-point by a horizontal line. At top-left, where the upper diagonal rises into the corner, a circle represents the Moon, as suggested by 13 smaller circles running along the rectangle's left side from top to bottom. Thirteen phases of the Moon make up one lunar month of 28 days. Lunar calendars were particularly associated with seamanship in Stone Age Europe.

Perhaps Nulliak Cove's most obvious connection to megalith-building on the opposite side of the Atlantic Ocean is a burial mound with a rectangular entrance formed by a pair of monoliths crossed at the top by a horizontal lintel. It is virtually a mirror image of Brittany's Merchant's Table—"the Table des Marchand"—at Locmariaquer. That the Red Paint People built stone burial mounds no different than those raised along the shores of Western Europe, but the Native Americans did not, indicates a fundamental, overseas connection.

"Massing evidence argues they were one folk," wrote George Murray in *Ancient American* magazine:

> The cultures shared a spectrum of traits, including long-occupied settlements along the Atlantic, from which they sailed to fish the deep ocean. Another signature of their sameness are three-story middens, trash-heaps treasured by archaeologists. The middens' fills are mostly bones of deep-sea game: whales, porpoises, sharks and seals.

An early 19th-century portrait of Demasduit. A full-blood Beothuk American Indian with a decidedly Western European appearance, was she a descendant of the Red Paint People?

> The middens' mass tells much. They show American Red Paint and European Red Ochre folks were alike skilled sailors, fishermen, boat-builders and sail-weavers.
>
> The heaps suggest these folks cultivated at least sail fiber, likely hemp, and harvested lumber for boat-hulls.[4]

The credibility of these comparisons is confirmed by their shared chronology. The oldest known physical evidence for North America's Maritime Archaic is likewise the most northerly site of its kind: a burial cairn—a man-made pile of stones from the Irish Gaelic *cairn*—at Labrador's L'Anse Amour, dated to circa 5500 B.C. It compares with a contemporaneous burial mound of discarded mollusk shells on Téviec, an island near the Quiberon Peninsula in Brittany.

America's Eastern Seaboard Red Paint People left behind abundant evidence of their preference for copper, which has been found at many of their burial sites in the form of rich grave goods. Their wide use of that metal, plus their contemporaneous appearance at the Atlantic mouth of the St. Lawrence River, allowing them direct access to the Great Lakes, with the beginning of

Here is an artist's rendering of what a coastal Doggerland fishing settlement might have looked like. Judging by artifacts dredged up in the North Sea area, the Doggerlanders were accomplished workers in bone, stone and wood, and clearly capable of open-water cruising. Though none of their wooden vessels has survived the ravages of time, the highly sophisticated and crafted tools used to create their large dugout ships and the remnants of sailmaking technology have survived to show that the Doggerlanders were capable of deep-sea voyages—even skilled enough to cross the impetuous North Atlantic. The skill and knowledge demonstrated to build sailing vessels capable of navigating the Atlantic—thousands of years before cultures to the east—gives them the distinct honor of being among the world's earliest-known transoceanic explorers—and possibly the first Europeans in the New World.

Michigan's ancient copper enterprise, identifies the Red Paint People as the Upper Peninsula's most likely first prehistoric copper miners.

But where specifically in Western Europe did they come from? And why did they leave 7,500 years ago? During that time, Earth's mean sea level was almost 50 feet lower than at present because unthinkable quantities of frozen water were still locked up in the form of glaciers. Coastlines across the world once extended into great tracks of dry land, where today ocean waves roll.

Between England and the European continent lay a large, low-lying, above-sea-level territory in the North Sea, until rising sea levels around 6500 to 6200 B.C. inundated this island. Geological surveys have defined its original extent from what is now the east coast of Great Britain to the Netherlands, the western coast of Germany and the Danish peninsula of Jutland.

It was a rich ecosystem with human habitation in the Mesolithic period, or Middle Stone Age, beginning around 12,000 years ago. Referred to today as Doggerland, the sunken island has been named after the Dogger Bank, which, in turn, was named after 17th-century Dutch fishing boats known as doggers. Doggerland was occupied by a people in cultural transition from the Paleolithic cave artists of Lascaux and Troi Freres to the Neolithic inventors of agriculture. In addition to many hundreds of Doggerland artifacts attesting to the inhabitants' seafaring capabilities are numerous pins, tools, spearheads, arrowheads and other objects fashioned from copper.

The last of the post-ice age glaciers began to melt during the mid-6th millennium B.C., significantly raising

Shown are dozens of ancient Doggerland artifacts recovered from the bottom of the North Sea region. Note the central object interpreted by some scholars as an oar paddle. It is identical in form to ones found in Red Paint burials from Maine to Labrador. The other specialized deep-sea fishing tools above are also mirror images of North American examples. While technological problem-solving solutions using similar materials do appear amongst human groups facing the same environmental challenges (polar, oceanic, desert, grassland etc.), the etched motifs found on examples of similar tools from ancient Norway are more or less indistinguishable from objects found in Red Paint cultural areas in North America.

sea levels and steadily flooding Doggerland in something climatologists call the Holocene Climatic Optimum, when temperatures reached several degrees higher than today. The Doggerlanders were forced to leave, but found welcome on neither the neighboring European continent, nor in England. There was only so much game available at the time for hunter-gathering natives, who would have regarded any influx of numerous newcomers as endangering local food supplies. The only available option for these ancient emigrants was to venture out into the Atlantic Ocean.

The Doggerlanders' proposed arrival on North America's Eastern Seaboard coincides with the Holocene Climatic Optimum, which we know raised sea levels sufficiently to completely sink the North Sea land mass. That event occurred just when the Red Paint People, with all their cultural correspondences to Western Europe's Mesolithic Red Ochre People, established themselves at the entrance to the St. Lawrence River. Simultaneous with their sudden florescence in what is now Labrador and Newfoundland was the unprecedented excavation of copper in the Great Lakes region during our continent's Early Archaic Period.

These associations in comparative chronology and archeology trace Middle Stone Age Europeans from inundated Doggerland to North America, where they were still remembered by Eskimo as the *Toonikdoak* and known to us as New England's Red Paint People.

WERE THEY COPPER MINERS?

Among the greatest mysteries of the past is also one of the least known. Although archeologists have been familiar with prehistoric copper mining around the Great Lakes region since the mid-19th century, they have always been reluctant to publicly discuss this enigma. Why? Because it suggests overseas impact on ancient America, thereby contradicting their unswerving belief that no Europeans made it to North America's shores before the Vikings, 1,000 years ago. Yet these same mainstream archeologists are unable to account for 223,215 tons or more of copper excavated from several thousand pit-mines, located mostly on Michigan's Upper Peninsula, beginning around

5000 B.C.—7,500 years ago.

For the previous 50 centuries, the area had been sparsely inhabited by paleo-Indian tribes of nomadic hunter-gatherers following migrating animal herds, but possessing little in the way of material culture. The Indians occasionally picked up pieces of "float copper" left behind by retreating glaciers, and annealed or cold-hammered these chunks into shiny trinkets with which to adorn themselves. Then, around 5555 B.C., an ambitious mining enterprise of truly industrial proportions opened with great suddenness along the Lake Superior shores of northeastern Wisconsin, thereafter quickly spreading throughout the region, where the world's purest high-grade copper may still be found.

The diggings eventually extended over 150 miles along the Lake Superior coast, through three Michigan counties. So far, some 5,000 ancient mines have been identified on the Great Lakes. Archaeologists are certain that more remain to be found—perhaps many more. If combined into a straight line, the 5,000 verified mines from antiquity would form a five-mile-long trench averaging 20 feet wide and 60 feet deep.[5] But such a colossal excavation—made all the more mind-boggling because it was achieved by a pre-industrial people—would result from all known pits.

Until his death in 2009, Fred Rydholm, a leading authority on the subject, pointed out that 19th-century farming and urban development obliterated most of the state's prehistoric mines, which originally numbered at least twice as many. Each one yielded 1,200 tons of ore for 55 tons of copper each.[6] According to James P. Scherz, professor emeritus at the University of Wisconsin (Madison), who applied his surveying and civil engineering expertise to archeoastronomy:

> The magnitude of this prehistoric enterprise becomes more comprehensible when put into modern perspective. For example, if a railroad car of the type used in the 1800s carried about 50 tons of copper, then the number of railroad

Plummets Found in Massachusetts

Classic plummets like those found in Red Paint burials.

Crude plummets

Grooved and holed plummets used by American Indians.

Notched plummets used by American Indians.

There has been a great debate over the decades as to what these "plummets" were used for. Obviously the ones pictured in the bottom row above are crude Algonkian plummets. They would have served most likely as weights for fishing lines or for weighting nets. In the top row, the debate is more intense. If these artifacts were used merely as fishing weights, the large size and attention to craftmanship would indicate a deep-water maritime culture that was entwined with their religious beliefs. (Obviously one would not use a five-pound plummet for pond or river fishing.) However, others insist these stones were used as true plummets, i.e., to determine an architectural vertical or, tied to a string, used to gauge the depth of a body of water. In Red Paint burials, one finds highly crafted plummets plus finely made stone tool heads. Apparently, these items had taken on a ceremonial significance and, thus, only the most finely crafted versions were included in burials. Interestingly, Red Paint graves still containing human remains are very rare. Thus, some scholars hypothesize that the objects were buried in their own ceremonial pits, due to the significance they held for the cultural identity of the Red Paint people.

Stone Navigational Towers of Canada & Europe

Dotted along the coast of northern Canada and Greenland, in areas where natural landmarks for sailors are few and far between, stand navigational markers known as *inukshuit* to American Indians of the north. (Examples from Baffin Island are shown above and left.) The Inuit and Eskimo people are credited with their construction, yet, in their own lore, they were built by fair-haired giants from across the sea. Interestingly, ancient sailors operating along the coast of Brittany in France used stone pillars to triangulate their location during Neolithic and later periods, much as these *inukshuit* were believed to have functioned. The ancient Stone Age architects of Brittany, however, erected menhirs (one-piece standing stones) for their markers. One such prominent navigational menhir found along the coast of Brittany is shown at right.

cars required to haul the prehistoric excavations would have been a quarter of a million tons, for 50 tons per car, equaling 5,000 railroad cars filled with copper nuggets. Unlike trainloads of modern ore, which may contain 2% or 4% metal, these 5,000 railroad cars carried essentially pure copper.

If there were 100 railroad cars per trainload, they would equal 50 trainloads of copper nuggets. Given the average length of a railroad car at 25 feet, each train is 25-by-100 feet, equaling 2,500 feet, about one-half mile long. If all 50 trains were parked on a track, end-to-end, their combined length would be 25 miles of railroad cars, with each car carrying about 50 tons of nuggets. If the Michigan copper was removed over a 2,000-year period, then, in each year, on the average, there had to have been the equivalent of two railroad cars freighting 100 tons of copper each summer.[7]

This late-19th-century photograph shows a five-ton copper boulder that ancient Upper Michigan engineers and miners raised from the bottom of a 60-foot-deep pit-mine they had created between five thousand and more than three thousand years ago. A modern mining company then hoisted it onto this makeshift cart made of two tree trunks and equipped with axles and wheels that could be used on rails. How did Michigan's pre-industrial miners move it?

To achieve such prodigious yields, the ancient miners employed techniques that enabled them to work with much-needed speed and efficiency. Severe winters in this part of the world limited their mining season from late May to early September. The miners created intense fires atop a copper-bearing vein, heated the rock to very high temperatures, then doused it with water. The rock fractured and stone tools were employed to extract the copper. Deep in the pits, a vinegar mixture was used to speed spalling—breaking the rock into layers—and reduce smoke.

How such temperatures were achieved is part of the enigma. The bottom of a fire sitting on a rock face is its coolest part. Even especially hot cane fires would take a long time to sufficiently heat the vein for spalling, if at all, and require more cane than feasibly applicable. Just how the prehistoric miners directed concentrated acetylene temperatures to the ground is an intriguing question modern science is unable to answer.

No less mysterious is how they knew the precise, subterranean position—before digging—of every copper vein. Sometimes these veins are visible because they extrude the surface of the earth. Most of them, however, are more deeply buried and impossible to otherwise locate. Not until the advent of modern magnetometers have mining engineers been able to pinpoint the underground presence of various metals. Even state-of-the-art detectors cannot invariably distinguish copper from other metals.

Yet, Michigan's prehistoric excavators were spot-on with every, single one of the 5,000-plus pits they sank directly into the buried copper veins. What kind of technological knowledge could they have possessed that enabled them to find underground sources of copper unerringly duplicated in more than 5,000 mines?

Other examples of that technology still survive. Masses of copper rock weighing many tons were dug out and raised on a well-made ancient cribwork of stone and timber platforms used to lift ponderous material to the surface. These cribs were usually made of shaped tree trunks organized to resemble a log cabin that could be raised vertically straight, like an elevator, by a series of levers and wedges.

An example of the massive proportions mined in ancient Michigan includes the so-called "Ontonagon Boulder." Removed to the Smithsonian Institution around the turn of the 19th century, it weighs five tons. An even heavier, six-ton copper mass was discovered *in situ* on one of the raised cribs, where it appears to

Far left photo: One of the tens of thousands of identical hammerstones fashioned in antiquity from solid granite and found throughout the Upper Great Lakes region. Their creators mass-produced these multi-purpose mining tools on an industrial scale, beginning more than 5,000 years ago. **Above:** Samples of fine-quality implements made from Michigan copper during the 4th millennium B.C. It has always been a mystery where the massive amounts of copper removed from ancient North American mines ended up. Many Revisionists believe it was shipped off to Europe and the Mideast to fulfill the massive demand for copper at the time, copper being a vital ingredient for arming and equipping the massive armies of the Chalcolithic Age, which ran from the late-fourth to the early-third millennium B.C. in Europe and the Mideast. One thing is certain: The missing copper (223,215 tons) did not remain in North America.

have been abandoned. Partially trimmed of its spurs and projecting points, it was 10 feet long, three feet wide and two feet thick.

Incredibly, many thousands of tools used by the ancient miners have been collected. As long ago as 1840, 10 wagonloads of their stone hammers were taken from a single location near Rockland, Michigan. Those in McCargo Cove, on the north shore of Lake Superior's Isle Royale, amounted to 1,000 tons. And these hammers were not crudely manufactured. According to Roy W. Drier, a mid-20th century authority on Michigan's ancient copper miners:

> In examining the tools that have been recovered, one is involuntarily amazed at the perfection of workmanship and at their identity of form with the tools made for like purposes and used in the present day, the prototypes of the implements of our present civilization. The sockets of the spears, chisels, arrowheads, knives and fleshers are, in nearly all instances, formed as symmetrically and perfectly as could be done by the best smith of the present day, with all the improved aids of his art. [8]

The mines themselves were not simple holes in the ground, but outfitted with modern-like irrigation techniques to flush out debris and fill-material via substantial trenches, some as long as 500 feet. Many of the pits were sunk 60 feet down through solid granite.[9]

Who could have been responsible for such a tremendous enterprise so much in technological contrast to the paleo-Indians, who were only concerned with but several pounds of float copper?

Extracting as much as half a million tons of copper required an organized labor force in the tens of thousands of men. "But even if these estimates were in error by 50% or more," stated Prof. Scherz, "the conclusions are essentially the same: Watercraft, and not the backs of natives, must have been used to move the ancient copper nuggets. … It is hard to imagine this amount of copper being carried on the backs of Indians over trails or even over portages each summer for two millennia." [10]

Indeed, copper removed from Isle Royale, where a lion's share of the mining took place, would have required more than a birch-bark canoe

for transporting such a cargo over 13 miles of open water to the nearest landfall on the shores of Minnesota.

Did Mesolithic Doggerlanders operate freighters and industrial-level technology sufficient for such an immense undertaking? No. The bare minimum of nearly 225,000 tons of metal extracted from Michigan's Upper Peninsula bespeaks not to the Middle Stone Age but the much later Bronze Age, when copper was the Pre-Classical equivalent of nuclear fission—the natural resource that empowered the high civilizations of the Ancient Old World. Several Western European, Mediterranean and Near Eastern kingdoms did possess the wherewithal to carry out what William P.F. Ferguson, an early and still-respected authority on North American prehistory, said of pre-Columbian mining in the Great Lakes region: "The work is of a colossal nature, and amounted to the turning over of the whole formation to its depth and moving many cubic acres—it would not be seriously extravagant to say cubic *miles*—of rock."[11]

This magnitude of achievement was on a scale to match Bronze Age pyramid-builders, but beyond the Doggerlanders' earlier cultural level. Their contribution to the "Copper Question" was nonetheless vital. When melting glaciers expelled them from their European homeland, the Mesolithic refugees followed North Atlantic ice sheets to Labrador, where the Doggerlanders became the Red Paint People. These were the 6th millennium B.C. colonizers who discovered Michigan's highest-grade copper, which they mined themselves for the first time in prehistory.

Word of these uncommonly rich deposits later spread to other maritime Europeans, such as the Minoans, on the Aegean island of Crete, in the Eastern Mediterranean.[12]

Physical proof of their arrival in ancient America's copper-mining region came to light in November 1896, outside the town of Newberry, in northern Michigan, when two woodsmen found an inscribed tablet. Ten inches high by eight inches wide, its inscrutable text was divided by 10 vertical and 14 horizontal lines into 140 quadrangles, each containing a single glyph. The plaque displayed 137 symbols, which were similar to Cypriot-Minoan; seven glyphs out of 39 were similar to Linear A and B ideograms used by the Minoans. A study conducted for the Epigraphic Society concluded that the tablet was created around the 12th century B.C., when both Linear A and B ideograms were being phased out, which coincides with their low, 21 percentage on the Newberry Tablet.[13]

Early photograph of the Newberry Tablet. It crumbled in the mid-20th century after years of neglect and vandalism.

According to Dr. Minas Tsikritsis, a world-class linguist at the University of Athens:

> When the Newberry Tablet first came to light in the late 19th century, the Cypriot-Minoan script was still unknown. True, the first cylinder seals bearing a Cypro-Minoan script were discovered 19 years before the Newberry Tablet was found. But these earlier European discoveries were not published until 1957. Moreover, they only included two of the same symbols—for numerals 4 and 5—which appear on the Michigan artifact."[14]

In other words, the Newberry Tablet, found in 1896, had been inscribed with Cypriot-Minoan glyphs, which were not made public for another 61 years.

The Minoans were among other ancient Old World peoples who mined Great Lakes copper, thereby eventually giving birth to the Bronze Age of civilized greatness. But they had been long preceded by European Doggerlanders, prehistoric North America's Red Paint People.[15] [See TBR's "Ancient Mysteries" edition, September/October 2022.—Ed.] ❖

Did Civilization, Religion Start at Gobekli Tepe?

Author identifies common cradle of world's belief systems

By Ronald L. Ray

What if numerous ancient cultures on at least five continents demonstrated incredibly significant similarities in religious beliefs, symbols and practices?

What if many also showed notable linguistic overlap in language used to describe those beliefs and practices, particularly regarding the origins of the universe?

And what if they further told similar stories about the beginnings of agriculture, metallurgy, urban and civic life and much more?

Most intriguingly, what if all of this could be traced back to a common point of origin?

In that case, argues author Laird Scranton in his book *Point of Origin*, one might just find oneself looking toward Gobekli Tepe in southern modern-day Turkey to discover the origins of civilization.

Cosmology is a branch of philosophy which attempts to explain the origins and nature of the universe and the things contained in it. It is also in that sense a science, although at a deeper and more foundational level than modern empirical science, which concerns itself only with observable phenomena but not the underlying realities. In this regard, empirical science was called the shallowest of the sciences by medieval philosophers.

LAIRD SCRANTON
Alternative historian.

It is therefore no mean task which Scranton sets himself in his book when he goes in search of, well, the beginning of everything.

COMMON CONNECTIONS

What do ancient Egyptian hieroglyphics, Sirius, Orion's Belt, Barnard's Loop, Buddhist temples, the Giza pyramids, Hindu deities, modern scientific ideas of quantum mechanics and string theory and a unique African religion all have in common?

In Scranton's densely packed volume, he explores all of them, comparing the symbols, language, myths and scientific facts they share. And he arrives at a somewhat shocking conclusion: that they all help describe the origin of the universe and the apparent first appearance (or reappearance) of civilization and religion among mankind.

Given the subtitle of the present volume ("Gobekli Tepe and the Spiritual Matrix for the World's Cosmologies"), the author has chosen a seemingly odd starting point: the Dogon people in what is today the country of Mali in Africa.

Or is it so odd? In earlier research, Scranton discovered:

> … a number of cultures whose creation traditions appear to be fundamentally similar to one another. These include the cultures of the modern-day Dogon tribe of Mali, the ancient Egyptians, the ancient Buddhists, the Tibetan Na-Khi tribe and the ancient Chinese.
>
> In each of these cultures there is an abiding belief that civilizing skills relating to agriculture, weaving, pottery, metallurgy, stone masonry, the domestication of animals and written language—among others—were intentionally given to humanity in some remote era by knowledgeable, quasi-mythical ancestor-teachers or ancestor-deities. Each culture we have studied closely associates these instructed civilizing skills with

From left to right, amazingly similar statuary among various peoples of the Earth: Dogon wooden statuette; colossal figure at Tiwanaku, Bolivia; a fully excavated megalithic statue on Easter Island; a life-size stone statue found near Gobekli Tepe. Is there some common connection between these far-flung cultures or is it merely a reflection of how human beings think and the limitations of the materials used to create the art forms?

important concepts of their creation tradition (or cosmology).

The purpose of this instructed civilizing plan is understood by the most knowledgeable initiates of these cultures to have been to raise humanity upward from the status of hunter-gatherers to that of farmers.

From a similar perspective, the Dogon priests assert that one of the foremost purposes of the cosmology was to help mankind understand our own place within the larger processes of creation.

Because the Dogon have maintained their religious traditions more or less intact for the longest period of time among these various cultures today (perhaps as long as 2,500 years or more), Scranton begins with the tribe's esoteric traditions and searches for more cultural and religious similarities elsewhere across the globe.

The Dogon, for example, teach that there is a series of paired universes, dualistically spiritual and material at each level. They also teach that matter comes into being first as waves, which then become particles. Scranton sees in this some significant parallels to modern concepts of physics such as string theory and quantum mechanics.

The tribe's ritual shrines are built along solar alignments and symbolize the "ascent" of creation or the individual person through the various universes. Their deities, religious symbols (such as the "egg of the world" and a type of fish) and even their language show striking similarities to those found in ancient Egypt—to which there seems to be a demonstrated historical connection—China and elsewhere, including Gobekli Tepe—the oldest known sophisticated civilization yet discovered.

By analyzing words and their meanings from the cultic languages of various peoples, Scranton finds stunning overlap and similarity. "Gobekli Tepe," for example, which has multiple meanings, one of which involves the concept of a navel (almost suggesting the "navel of the world"), shows a clear relationship to the Egyptian "Zep Tepi," which is the name of "the first time," the primordial age, the mythical (or perhaps actual) "Golden Age" of human history.

And, when Scranton examines the Egyptian hieroglyphics for these many words, both in terms of the sounds they represent and the symbolic meanings of the images, the parallels become almost overwhelming. In this regard, it was new to this author that, rather than just phonetic values, as we were taught in school, the hieroglyphics also have symbolic meanings on a different level, very much tied to the images which are drawn.

There is clear purpose and reasoning in the hieroglyphs of vultures, serpents, dual outstretched arms etc., and how they comprise the names of gods and goddesses and religious concepts. Many of these find echoes among the Dogon, early Buddhists, the Shakti cult of pre-Vedic Hinduism in Orissa and even in the Turkish language.

CONNECTION OR COINCIDENCE?

Some of our readers who are members of Masonic Lodges will recognize in a number of the symbols and stories strong reflections of the teachings of speculative Freemasonry, especially as found in the writings of Gen. Albert Pike or the supposedly defunct 96-degree Rite of Memphis (which, however, was taken over, if not necessarily practiced, by one of the Grand Lodges in the United States).

The similarities between the myth of Isis and Osiris and that of Hiram Abiff are easily recognized, of course. But a more surprising commonality is that of the famous Masons' Mark (used even by the medieval guilds of stonemasons), appearing as an "H." Almost shockingly, the image is found already on some of the stone pillars at Gobekli Tepe, and seemingly with essentially the same meaning of the union of the male and female (or masculine and feminine) principles.

And while Freemasons might agree in their assessment of the meaning of the vultures, eagles, serpents, scorpions etc. that figure prominently in the ancient religions discussed by Scranton and at Gobekli Tepe, Christians will recognize the symbols of Satan ("Lucifer," the light-bringer, who critics of "the Craft" insist is the true god of Freemasonry, Talmudic and Kabbalistic Judaism and many ancient world religions) and other evil spirits. Catholic exorcists, for example, point out that serpents and scorpions are two primary categories of demons.

In this regard, it is rather disappointing that Scranton glosses over the more unsavory aspects of the cults and cultures he compares (extending, for example, even to human sacrifice among Shakti devotees, which the author mentions only in passing), while ignoring comparisons and contrasts with Christian teachings almost entirely.

Those readers, however, who are familiar with apocryphal Jewish or Christian writings, such as those regarding the "Cave of Treasures," the supposed history of early humanity following the expulsion of Adam and Eve from the Garden of Eden, will nevertheless find interesting correlations between the Dogon, Buddhist, Egyptian and Hindu origin stories of civilization and the quasi-biblical accounts in the "Cave of Treasures" stories, even if presented from divergent viewpoints.

Apart from this lacuna, Scranton leaves almost no stone unturned in his comparisons of seemingly unrelated facts and concepts, demonstrating by strong arguments their common origins. Thus, the Dogon teaching regarding the "egg of the world" and its connection with the heliacal (i.e., "near the Sun") rising of the star Sirius around the summer solstice, and the Dogon, Egyptian and other calendars, along with the time of rains, floods and planting of crops, finds reflection in the apparent astronomical alignment of the Great Sphinx of the Giza Plateau in Egypt.

According to one of Scranton's sources, at the time millennia ago which is the topic of his book, it seems that Sirius rose close to the constellation Leo near mid-summer, and that the Sphinx (which initially may have had the head of a lion) was aligned to this point on the horizon.

While this article can only summarize, Scranton himself is very detailed in his investigations and comparisons, and *Point of Origin* will require more than one reading to appreciate fully its depth.

ENDING AT THE BEGINNING

Scranton concludes—with much evidence and powerful arguments—that the ancient religious beliefs and practices of numerous, widely dispersed peoples, as well as their civilizations—from agriculture to astronomy to metallurgy to urban planning—derive from a common source. These diverse ancient traditions claim this common source was revealed to them by spiritual beings who were not human, and who did not come from another planet but from another dimension or plane of existence consisting of pure spirit.

One could argue that those "teachers" or "ancestors" were angels or demons—or both. What Scranton successfully demonstrates, we believe, is that this meeting point of matter and spirit, heavens and earth, primitive peoples and civilizational advancement can be found in a real place—a place lying in a region roughly bounded by today's Turkey, Syria and Iran. Or, if you prefer, ancient Mesopotamia, near the biblical Garden of Eden and tolerably close to Mt. Ararat.

That place is likewise not so far from the original home of the Aryan peoples. That place is Gobekli Tepe.

Some may view Gobekli Tepe as the "school of the gods." Some may view it as a source of demonic derangement. Some may wonder whether Scranton describes a world before or after the Great Flood recounted in the Bible—or both before and after.

But whether you believe in evolution or creation, whether you agree or disagree with Scranton, and whether you love or hate his ideas, his book is certain to present you with an impressive wealth of information you will not find assembled in one place anywhere else.

If you wonder where we came from, and how we got here from there, you will find much to ponder and provoke in *Point of Origin*. ❖

Point of Origin

Gobekli Tepe and the Spiritual Matrix for the World's Cosmologies

How could multiple ancient cultures, spanning both millennia and separated by thousands of miles, have nearly identical creation myths and cosmologies? Why do the Dogon of Africa and the civilizations of ancient Egypt, India, Tibet and China share sacred words and symbols? Does this reveal the existence of a long-forgotten primal culture that spread knowledge about the heavens and was, in fact, the world's first center of higher learning? The author of this volume, Laird Scranton, makes the case for this hypothesis and posits that the sophisticated complex at Gobekli Tepe in Turkey is the definitive point of origin from which all the great civilizations of the past inherited their cosmology, esoteric teachings and civilizing skills, such as agriculture, metallurgy, and stone masonry, fully developed.

Scranton explains how the carved images on Gobekli Tepe's stone pillars were the precursors to the sacred symbols of the Dogon, Egyptians, Tibetans and Chinese as well as the matriarchal Sakti cult of ancient Iran and India. He identifies Gobekli Tepe as the remote mountain sanctuary of higher knowledge alluded to in Sakti myth, named like an important temple in Egypt, and defined in ancient Buddhist tradition as Vulture Peak.

Scranton reveals how Gobekli Tepe's enigmatic "H" carvings and rich animal symbolism, representing stages of creation, was presented as a kind of prototype of written language accessible to the hunter-gathers who inhabited the

region. He shows how the myths and deities of many ancient cultures are connected linguistically, extending even to the name of Gobekli Tepe and the Egyptian concept of Zep Tepi, the mythical age of the "First Time."

Identifying Gobekli Tepe not only as the first "university," but also as the first temple, perhaps built as a civilizing exercise, Scranton definitively places this enigmatic archaeological site at the point of origin of civilization, religion and ancient science. This also included an advanced understanding of the cosmos, the precession of the constellations, cyclic predictions of comets and other information clearly embedded in the sculptures and bas reliefs found on the excavated pillars of Gobekli Tepe.

Scranton also:

- Details how symbolic elements at Gobekli Tepe link a pre-Vedic cult in India to cosmological myths and traditions in Africa, Egypt, Tibet and China.
- Discusses how the many carved animal images at Gobekli Tepe—some of which come from areas thousands of miles away from the Gobekli Tepe tempe site—relate to stages of creation and provide an archaic foundation for symbolic written language which was later adopted and refined by the ancient Egyptians.
- Defines how classical elements of ancient Egyptian myth and religion characterize an archaic cosmological tradition that links ancestrally back to Gobekli Tepe.

In short, it is nearly impossible to believe that ancient peoples around the globe could have developed nearly identical belief systems, explanations for the cosmos, eerily similar architectural techniques, an obsession with the cycles of the Sun and Moon, and how many of these ancient people saw the exact same "animals" in the constellations, and analogous interpretations of the creation of the universe.

In the end, whether you agree or disagree with the offer, you are guaranteed to be introduced to a wealth of information not only about Gobekli Tepe but other ancient cultures.

Fr. Leonard Feeney and the St. Benedict Center Revisited

Here is the conclusion of our two-part series that began in the January/February 2024 issue of TBR reevaluating a leading Irish Catholic dissident widely respected until he was unceremoniously "canceled" by the Catholic church and powerful interests.

By Antonius J. Patrick

POST-WWII RELATIONS

After World War II and certainly following the Second Vatican Council (1962-1965), the Catholic church's relationship with the Jews changed. Vatican II officially altered the church's relationship with and traditional outlook of the Jews with the document *Nostra aetate* ("Declaration on the Relation of the Church with Non-Christian Religions"), which most traditional theologians believe to be heretical as are many other pronouncements of the Council.[1] The changing attitude of many churchmen toward the Jews was reinforced by the Allied victory over the Axis powers, in particular, the "anti-Semitism" of the Third Reich.

Nostra aetate had, in effect, repudiated nearly 2,000 years of Catholic teaching on the Jews. Ever since, the church has continually bowed to Jewish pressure in regard to its doctrine, liturgy, the naming of saints and, in the political realm, with its most infamous decision—the recognition of the state of Israel by the Vatican back in 1994.

FR. LEONARD FEENEY
Politically incorrect priest.

Prior to the Council and since its inception, the church's mission toward the Jews was one of conversion. However, after Vatican II, they were seen as "elder brothers" whose covenant with God was still in force and did not need evangelization. This, of course, went directly against scripture, as demonstrated in St. Paul's Epistles describing the end of the Old Covenant along with Christ's great commission to convert all nations at the conclusion of the Gospels of St. Matthew and St. Mark.

Even before the Council, fewer and fewer clerics criticized the Jews, especially after the Zionist conquest of Palestine and their malignant role in cultural Marxism which began to infiltrate and eventually overtake Western societies. Not only was there little criticism, but the Catholic clergy began to participate in "interfaith" activities.

Such actions were always condemned by the church, but the American hierarchy looked the other way on these events and even began to take part themselves in inter-religious meetings.

An example of pre-WWII Catholic exposure of the Jews can be seen in an article from the British publication *Catholic Gazette*. The piece, titled "The Jewish Peril and the Catholic Church," written in 1936, quotes from a speech given at a B'nai B'rith convention in Paris. The author of the talk does not try to obfuscate his words about the aim of Jewry to subvert Christianity:

Fr. Feeney addresses a crowd of thousands of Christians on Boston Common.

> We [Jews] have spread the spirit of revolt and false liberalism among the nations of the Gentiles so as to persuade them away from their faith and even to make them ashamed of professing the precepts of their religion and obeying the commandments of their church. We have brought many of them to boast of being atheists, and, more than that, to glory in being descendants of the ape![2]

After WWII, discussion about the undermining of Christianity by the Jews within Catholic circles disappeared, except for places like the St. Benedict Center and Father Leonard Feeney's works and lectures.

To pave the way for *Nostra aetate* and the false ecumenism of Vatican II, liberal Catholic clergy began working with Jewish intellectuals and religious figures in a number of areas, one of the most important was the reinterpretation of the biblical account of Christ's crucifixion. Since the Jews had always been held mainly responsible for Christ's death, the blame had to be shifted to the Romans and Pontius Pilate, in particular.

The focus of these efforts was on St. John's Gospel since he was an eyewitness of the deicide and had a relationship with some of the Jewish officials at the time. St. John's account was also the most detailed, and clearly saw the Jews as the primary culprit for Christ's death. Most interpretations of the scriptural account maintain that Pilate would have let Christ go (after the unnecessary scourging), but it was the fanatical hatred of Jesus by Jewish leaders that ultimately convinced the cowardly Pilate to make the most infamous judgment, possibly in all of human history.

One of the leading Jewish writers in this effort was Jules Isaac who, at one time, had served as an inspector general of public education in France[3] and became the "principal theorist and promoter of the campaign being waged against the traditional teaching of the church."[4] His two most impor-

tant books on the subject were *Jésus et Israel* (1948) and *Genése de l'Antisémitisme* (1956). Vicomte Léon de Poncins accurately summarizes the main thrust of these works:

> In these books, Jules Isaac fiercely censures Christian teaching, which he says has been the source of modern anti-Semitism, and preaches, though it would be more correct to say he demands, the "purification" and "amendment" of doctrines 2,000 years old.[5]

In addition to his written works, Isaac organized "both national and international gatherings attended by sympathetic Catholics who were favorably disposed toward his arguments."[6] A number of the "favorably disposed to" would turn out to be leading figures at Vatican II.

FEENEY AND THE JEWS

This was the religious environment that Feeney found himself in with the likes of Jules Isaac getting access to the highest levels of the church and receiving support for his blasphemous thought. While few saw the fomenting revolution about to be unleashed, even fewer chose to speak out about it. Most of Feeney's warnings about Jewish attitudes and the failure of the American Catholic hierarchy to counter their growing influence can be found in his book *Bread of Life*, and *The Point*, his hard-hitting newsletter of the 1950s.

In a piece titled "Point of the Point" published in the newsletter in February 1959, Feeney pulls no punches and zeros in on what he sees as the greatest threat to America and its Catholic population. Feeney argues that "we think it is imperative that American Catholics wake up to the fact that the Jews, as an organized force, are the implacable, declared enemies of Christianity—of its tenets, its traditions, its moral code, its very culture."[7] He reminds readers that the church had always been aware of Jewish power, and had, in the past, taken measures to counter their actions.

American Catholics of the 20th century, however, have remained oblivious to the danger mostly because of the betrayal of their shepherds:

> [T]he church has always known this fact about the Jews and, to the extent of her influence, has counseled and decreed regulations for curbing their malice. And, since American Catholic publications, in general, seem determined to say little about these basic matters, we [*The Point*] have tried to make up for their negligence by our own insistence.

The purpose of the newsletter was to "inject American Catholics with a crusading zeal for the truths and traditions of their Faith, and thus to foster in America a strong militant Catholicism, worthy of a country that is dedicated to the Immaculate Conception."[8]

> Fr. Feeney believed American Catholics were lacking zeal for truths and traditions of their faith.

The novel thinking among Catholics coincided with the outcome of WWII, which was fought, in large measure, for Jewish interests. After the war, organized Jewry became even more assertive in its efforts to mitigate opposition to their religion, their subversive cultural agenda and, more importantly, their political aims. One of the primary obstacles to their political and cultural hegemony had traditionally been Catholicism, but, as Feeney's newsletter would constantly point out, this was no longer the case, particularly following Vatican II.

WWII liberated the Jews in almost every aspect. While there were few legal impediments to their interaction and influence in society before the war, there were informal proscriptions on their intermingling among the Gentiles. This was all washed away with the defeat of the Third Reich which stood opposed to Jewish control and domination of society.

After the conclusion of hostilities, the legitimate concerns and fears that the Germans held regarding Jewish subversion and corruption of their society and, for that matter, the rest of the Western world, had been manipulated and distorted by the Jewish controlled press, academia and the electronic media into the alleged "racial hatred" inherent in National Socialism. Hitler's policies had nothing to do with combating what the Jews were doing inside of Germany but was instead based on pure, blind hatred—or so the narrative went and continues today. This portrayal of the Third Reich has been swallowed whole by the entire world to this day, none more fully as in America.

The American Catholic hierarchy, which enthusiastically supported the war, should also be faulted in the "emancipating" of the Jews after WWII. That it did not side with the isolationists and oppose then-President Franklin Delano Roosevelt's bellicose foreign policy shows where its sympathies laid. The war was not a fight to advance or defend Christianity, but to maintain and expand Jewish domination of both Anglo-American liberal democracy in the West and Russian Bolshevism in the East.

What is surprising is that the 1950s has been looked upon as a decade of great progress for the church, especially in America. The faith seemed to be vibrant among the laity—vocations were up, mass attendance at all-time highs and there was massive church and school building, while the pope, for most of the decade, was considered to be a conservative—the polar opposite of what happened after Vatican II.[9]

While the externals seemed sound, there was a certain superficiality about the faith that few understood. In many ways it had become sterile and formalistic, lacking the dynamism of a church seeking conversion of non-members, but, instead, content with

becoming a part of the establishment which, in postwar America, was becoming increasingly Judaized. This explains why there seemed to be more enthusiasm over construction—schools, hospitals, religious houses—and the social aspects of life, than the propagation of the faith. It also explains, to a large extent, why, less than a decade later, Vatican II was pushed through so easily.

As the 1950s wore on, churchmen showed more interest in social justice issues than in teaching the tenets of the faith. Catholics were at the forefront in the nascent civil rights movement, which was largely directed and funded by Jews. It continued to support nearly all the major social justice causes that emerged in the postwar era, ranging from feminism and mass immigration to LGBTQ+ rights and more. The more the church participated in these activities, the more members it lost, especially among its Occidental population. Yet, few saw or cared about the almost direct correlation between the church's new leftist orientation and the devastating loss of its faithful.

It did not take long after the religious authorities began their crack down on Feeney for church liberals to begin their ecumenical program. In October 1948, Bishop John Wright, the spiritual director of the League of Catholic Women, sent an invitation to the league's members inviting them to attend an Institute on Judaism to be held at Temple Ohabei Shalom in Brookline, Massachusetts.

The National Federation of Temple Sisterhoods, Committee on Interfaith Activities sent out the invitation with the subject of the meeting titled "To Build the House of the Living Judaism."[10]

Interfaith activities were not just taking place in Boston but began popping up all over. In Michigan, Bishop Francis J. Haas received the B'nai B'rith Interfaith award and in his acceptance comments "got off some choice Interfaithery," as noted in "Pointers" of the July 1952 issue of *The Point*:

> Speaking on the great dangers facing our United States culture, the bishop [Haas], like a true orator, touched upon those concerns that were nearest the Hebrew hearts of his listeners—"the high cost of living, prices, wages, rents … the entire economy." Then, as any Gentile must, when addressing a Jewish audience, Bishop Haas launched into an attack against "discrimination."[11]

In a witty and biting response to the Bishop's talk, which demonstrates the extent to which the Catholic clergy had imbibed Jewish terminology long before Vatican II, *The Point* continues:

> His Excellency had the usual condemnations for those who "look down upon others." Notably missing from Bishop Haas's talk was any reference to the Divine Person Who, 2,000 years ago, looked down upon B'nai B'rith's ancestors, a howling Jerusalem mob who accepted the consequences of murdering God when they shouted, "His blood be upon us and upon our children."[12]

The Catholic hierarchy began to go out of its way to praise the growth of Judaism in the nation. Feeney's newsletter carried a report on how Washington, D.C. Archbishop Patrick O'Boyle (who would later become a cardinal) sent his "warmest greetings" to Rabbi Norman Gerstenfeld "rejoicing with the rabbi that Judaism had become successful enough in the nation's capital to build a new temple."[13] Later, Cardinal O'Boyle was a fervent supporter of the Civil Rights Act of 1964.

Not only were loaded terms like "racism," "bigotry," "hate" and "prejudice" cleverly used to protect themselves from criticism, they have also weaponized them in their social engineering schemes to break down the natural bonds and relationships within Gentile society at large. "Bigotry" and "prejudice" were seen as abhorrent traits that needed to be eradicated through legislation. Their control of the media, entertainment and academia aided this effort. Anti-discrimination laws were passed regarding employment, housing and even private clubs

SUPPRESSED BOOK RESCUED!

Why the Jews Should Be Kept Out of England

NEW! This book has historical significance as it explains the reasons why "anti-Semites" did not want the Jews to return to England after the 1290 banning. This book is the argument of William Prynne (1600–1669)—an English lawyer, author, polemicist and political figure—who objected to a 1656 proposal to lift the residency ban for Jews. This prompted Prynne to write this treatise against the proposal.

In his treatise, Prynne was mostly reciting from what he considered the uncontested legal record of England and other countries. He cited ruinous Jewish usury, forgery of coins and royal charters, general criminality, ritual murders, etc. as main reasons why the original expulsion had happened and why the Jews should not be readmitted in his time. This publication will be of interest to anyone fascinated by Puritanism, Protestantism or Jewish history in particular and Revisionist history in general. Transcribed and edited by JR Books Online and printed by TBR's Operation Book Rescue. Softcover, 220 pages, indexed, #1014, **$25** minus 10% for TBR subscribers plus $5 S&H inside the U.S. Order from TBR, P.O. Box 550, White Plains, MD 20695 or call 1-877-773-9077 toll free to charge, Mon.-Thu. 8-4 ET or order online at www.BarnesReview.com.

and associations, regulating who they could include or exclude.

Of course, such behavior had always been a natural attribute of ethnic groups used to protect, distinguish and ensure their solidarity and genetic continuation. This did not just apply to Whites against non-Whites, but were traits seen in subgroups to confirm their identity. The Irish, for example, thus held prejudices toward the Germans, the Germans against the Poles, the Koreans against the Chinese and so forth.

Religiously, there was nothing wrong with such behavior, and the church had long recognized this sociological norm, which was one of the reasons why it frowned upon not only interracial marriages but unions between different ethnicities. It is also why it provided clergy of the same ethnic background to the communities they served.

This would all change after WWII. Even before the war, however, the Catholic church in America began experimenting with integration as Washington, D.C.'s Catholic schools were integrated in the 1930s by Archbishop O'Boyle. This did not have much of an impact since most Blacks in Washington were Protestant, but it was a precursor of things to come.

Feeney accurately observed that, when they had the power to do so, Jews would try and denigrate or seek to erase from the public consciousness any references, symbols or customs referring to Christ:

> [W]e have Jews evading the faith, running away from it, pretending they do not hear the name of Jesus—pretending Christmas is not the birth of Jesus Christ, and getting civic leaders to remove "Merry Christmas" from in front of City Hall and to substitute for it "Season's Greetings," because the word "Christ" in "Christmas" annoys them.[14]

Of course, if Christians had stood up against such assaults, these efforts would have failed. The failure of Christians to do so, and their spiritual shepherds to lead them, is why the world is in its current deplorable condition.

ANTI-SEMITISM

The growing popularity and use of the term "anti-Semitism" came to the fore after WWII. It is used as a weapon, which has now become enshrined in law in many jurisdictions, against anyone who would oppose their actions, no matter how immoral, criminal or truly evil. Feeney was one of the first to point this out. "The familiar cry of 'anti-Semitism'," Feeney argued, is the equivalent of the Jews proclaiming "'Hands off!' to any who would expose or thwart their endeavors."[15]

The Point tells it like it is in analyzing the Jews' outlook toward Christianity: "The great, essential fact about the Jews, patent not only in their everyday utterances and activities, but in their official documents as well, is that they are sworn enemies of Christianity, and are constantly driven with the wild, frenzied aim of destroying it."

> During its existence, Feeney's newsletter continued to expose the genocide taking place in Palestine.

American Catholics have not been immune from these tactics, and remain mostly clueless about their objectives: "They [American Catholics] have fallen head over heels for those subterfuges by which the Jews shield themselves."[16]

Feeney was not oblivious, as most Catholics were at the time, to this effect on American culture as almost every aspect of society was "becoming daily more foul and corrupt." Take, for instance, fashion: "The clothes that Jews design, Catholics have accepted as being merely modern and American, not suspecting that these clothes have been foisted on the country for the purpose of demoralizing and degrading it."

Of course, many knew, even at the time, that the entertainment industry was controlled by Jewish moguls: "The moving picture and television shows that the Jews present, Catholics have taken to be merely entertainment, not suspecting that these shows serve the purpose of indoctrination."

The press, too, he said, was dominated by Jews: "The newspapers that the Jews control, Catholics have trusted to report the straight news, not suspecting that these newspapers slant the news in order to create the impressions and the interests and the attitudes that the Jews want created."[17]

Once the idea of anti-Semitism was established in the public mindset, the Jews began to push other terms and concepts into the public discourse: intolerance, bigotry, prejudice etc. Anyone holding in the Jews' eyes (and later those of the brainwashed Gentiles) such despicable attitudes or, heaven forbid, was caught practicing such abominations would face penalties all of which fell under the guise of "anti-discrimination" legislation.

Anti-discrimination edicts would eventually cover housing and hiring while those covered by the new statutes would expand beyond race to include women and, now, homosexuals. All of this was cleverly designed to shield their authors from their own nefarious activities:

> [T]he Jewish slogan "regardless of race, color, or creed," which implies that a man is no more responsible for the last item than for the first two, and which protects the Jews to practice their hatred of Jesus without reproach.[18]

The post-WWII church adopted similar language and used it to attack Feeney and anyone who stood against the liberalization of Catholicism and the later reforms of Vatican II.

Like the church, one of the greatest failures of the conservative and libertarian movements was that they did

not challenge the civil rights laws at their core which, in essence, were a massive assault on property rights, the freedom of association and, just as important, the right of disassociation or exclusion. Anti-discrimination measures were not confiscatory in nature as under Communist regimes, who used tactics such as seizing private property, the collectivization of farmland or the nationalization of industry. Rather, they were regulatory in scope—regulating what property owners could do or not do with their assets.

The lack of emphasis on the violation of property rights by conservatives and libertarians hindered the mobilization of popular opposition to these egregious edicts. The main reason why those on the right failed to take on the matter was that they feared being called "racist" or being sued if found in violation of these mandates.

Feeney turns the idea of anti-Semitism on its head in an article titled "The Anti-Semitism of the Jews."[19] Since Christians believe and worship Christ as a king (after all, the description "King of the Jews" was placed on the crucifix), the Jews are, in fact, the real anti-Semites since they have persecuted Christians over the centuries.

"For 2,000 years now," Fr. Feeney, states, "we Gentile[s] … have been eager subjects of the King of the Jews. We have enthroned Him in our chapels and cathedrals. We have sent our missionaries to remote Gentile lands so that the Kingdom of Jesus, King of the Jews, might cover the entire Earth."[20]

PALESTINE AND ZIONISM

While the Zionist conquest of Palestine had received little coverage from the Catholic press—and, for that matter, mainstream sources either, despite the fact that many thousands of Palestinian Christians had been murdered and displaced—Feeney's newsletter, throughout its existence, continued to expose the genocide taking place in the Holy Land.

The pro-Jewish press, especially *The New York Times*, was at its hypocritical best in its non-coverage of the atrocities. While the *Times* routinely criticized nascent populist movements across the globe, it loudly praised the Israeli gangsters and thugs who terrorized the Palestinians as "freedom-loving democrats" whose main goal was to spread prosperity and progress to the backward land.

"Jewish nationalism (the Zionist plan for the rape of the Holy Land)," *The Point* asserted, "comes off in the *Times* as a lofty and laudable venture—one which the paper, in its measured fashion, has been only too happy to promote."[21]

A *Times* editorial claimed that the Arabs were hostile to the "democratic and economic features of Israel. These groups simply do not want an efficient Western-style economy in Arabia." The editors of *The Point* accurately countered the sophistry of the *Times*, giving a true depiction of the Arabs' opposition to their Israeli overlords: "The 'Western-style economy' that is currently driving the Arabs mad is, of course, the one which the Jews have already set up—on Arab-owned farms and in Arab-owned towns—and out of which the 'efficient' Israelis have already expelled over 900,000 rightful Arab residents."[22]

Feeney chastised his fellow Christians for allowing the takeover of Palestine and reminded them that their ancestors in the First Crusade had courageously responded to Pope Urban II's appeal and liberated, for a time, the Holy Land:

> But this time there will be no talk of "snatching" the Holy Land. Indeed, we have been quite content, of late, to settle back and watch someone else grab it up. Nor have we been even slightly jarred from our lethargy by the fact that the Holy Land's *new* occupants make Pope Urban's "abominable" Mohammedans almost bearable by contrast. [Emphasis in original—Ed.][23]

Due to Israeli desecrations of churches and sacred sites, as well as

Jewish Fanaticism

By Hervé Ryssen. Judaism is essentially a universalistic political project with the objective of world unification, the prelude to global pacification. It is a long-term project and the aim is not simply to convert the world to Judaism, but rather to incite the other peoples to abandon their racial, national and religious identities so as to favor the spirit of "tolerance" between men. The Jews thus feel compelled to engage in perpetual agitation intended to convince the world to adopt their project. They are a people of propagandists. It is not by chance that they are so influential in the mass media of all democratic societies. The incessant guilt-tripping campaigns directed at Europeans of all stripes and for all crimes, whether real or imagined, relating to slavery, colonialism, pillaging the Third World or Auschwitz, have no other aim, when all is said and done, than to eradicate all sense of collective identity. Softcover, 449 pages, #873, **$30** minus 10% for TBR subscribers plus $5 S&H inside the U.S. from TBR, P.O. Box 550, White Plains, MD 20695. attacks upon followers of Jesus, Feeney suggested extreme action:

> That the state of Israel is now a reality, that the Holy Land has fallen into the hands of the Jews, that the crucifiers of Christ have been restored with honor to the scene of their crime, should be provocation enough for all of Christendom to descend in battle array and obliterate the cursed invaders. But nothing happens. In fact, this tragic betrayal of the holy places has been allowed to develop far beyond the mere physical presence of Jews in Palestine.[24]

Worse is the fact that, now, Christians, in a number of countries, pay taxes that go to support Israel, with the United States being the biggest contributor, demonstrating the power and control that world Jewry possesses. Yet, this would not be possible either today or in Feeney's time had it not been for the pusillanimous attitude of Christians. While the laity may get a pass, the Christian leadership, whose position it is to know better, have ignored the matter or justified the Jews' atrocious behavior.

The driving force that created the state of Israel was, of course, Zionism. Zionism and Communism, two of the great ideologies of the 20th century, were of Jewish origin. The September 1958 issue of *The Point* correctly saw the relationship and pointed out that both ideologies and movements received tremendous impetus from the world wars.

The Bolshevik version of Communism would have never come to power had Russia remained out of World War I. Zionism, too, profited mightily from the war with the issuance of the Balfour Declaration that set in motion the eventuality of a Jewish state in Palestine.

World War II was, in essence, a victory for Josef Stalin and world Communism. One half of Europe fell under the Soviet yoke and would remain subjugated for nearly a half century, while in the Far East, with the defeat of Japan, a power vacuum was left which was ruthlessly filled by the Communist Chinese. The Zionist cause gained mightily from the war for it provided a justification for its conquest of Palestine. The Holocaust myth was employed by propagandists to play on Gentile sympathies that an exclusive homeland would be available for persecuted Jews the world over.

The Point did not mince words about the forces behind these two evils: "That both movements are avowedly anti-Christian, and that both are in origin and direction Jewish is a matter of record." While conservatives and Catholics at the time would continue to warn about the "Communist threat," less and less was heard from either group about the horrific crimes that were taking place in the newly established state of Israel.

The Bolshevik version of Communism would have never come to power had Russia remained out of WWI.

EXPOSURE OF ZIONIST LEADERS

Feeney's newsletter was one of the few voices that continued to speak out against Zionism: "[A]lthough the Jewish power of Communism has been quantitively a greater oppressor of the church—having killed more priests and desecrated more altars—the Jewish power of Zionism has hit the church at the very core by seizing and profaning the one land which above all others is the Holy Land."[25]

The September 1959 issue gives a brief summary of the four leading figures of modern Zionism and their most vicious actions and statements against Christianity, beginning with Moses Hess (1812-1875). Hess is credited with launching the movement with the publication of his book *Rome and Jerusalem*. A German-born Jew, Hess openly attacked Catholicism writing, "Papal Rome symbolizes to the Jews an inexhaustible well of poison."

He argued that ever since the French Revolution, Rome had been in decline, and it is the Jews' task to substitute Jerusalem (under Jewish control) for Christianity which will "finally [be] replaced among the regenerated nations by a new historical cult. To this coming cult, Judaism alone holds the key."[26] The "regenerated nations" referred to are the former countries that once comprised Christendom which, for Hess, will be Judaized in the years to come.

Theodore Herzl (1860-1904) was a Hungarian-born Jewish writer whose primary role was as propagandist for the Zionist cause among Western Jews who were initially skeptical of the idea because of their own growing acceptance and upward mobility in European societies which they did not want to upset.

"Herzl," wrote *The Point*, "was the capable calculator who brought order to the Zionist frenzy … and gave permanent direction to the Jewish resurgence by advocating the immediate establishment of a self-governing Jewish state."[27]

That Herzl was able to gain an audience with a number of European sovereigns and also the Turkish sultan shows the extent that Jewish influence and power had grown. He even got a meeting with Pope St. Pius X (1903-1914) to discuss the matter.

In a famous exchange between the pope and the Zionist leader, Herzl recounts the pope's unfavorable reaction to Zionist aspirations:

> We are unable to favor this movement. We cannot prevent the Jews from going to Jerusalem—but we could never sanction it. The ground of Jerusalem, if it were not always sacred, has been sanctified by the life of Jesus Christ.
>
> As the head of the church, I cannot answer you otherwise. The Jews have not recognized our Lord; therefore, we cannot recognize the Jewish people.[28]

Chaim Weizmann (1874-1952) was a chemist born in Belarus which then was part of the Russian Empire. From ages four to eleven, he attended a traditional Jewish primary school and later, to support himself, taught Hebrew at an Orthodox boarding school. He moved to Berlin in 1892 and joined a cadre of influential Zionists.

It was Weizmann who took up the mantle of Herzl and, after settling in Great Britain, was instrumental in the promulgation of the Balfour Declaration which granted Zionist concessions in the Holy Land after WWI:

> It was Weizmann's task to acquaint the British government with Jewish designs on the Holy Land. In exchange for an official smile on these Zionist ambitions, Weizmann could promise that his race—its financiers, presidential advisors, newspaper publishers and all—would join whole-heartedly in helping Britain win the war.[29]

Weizmann settled in Palestine in 1918 as head of the Zionist Commission, which pushed Jewish settlement and land acquisition. While immigration increased the Jewish population to about half of the total number of people living in Palestine before the Zionist takeover in 1948, Jewish ownership of land remained at only about 6% of available property.

While it was hoped by Zionist leaders that WWI would "do the trick" in the establishment of a Jewish state in Palestine, a second global conflagration "was needed to bring the Jews' otherwise unthinkable scheme to perfection."

After the conclusion of WWII, Weizmann went to Washington to get U.S. support. President Truman, "defying all protocol, accorded this infant monstrosity official United States recognition" within minutes after the Zionist leaders announced the formation of the Jewish state. Truman would later admit:

> I do not think I ever had as much pressure and propaganda aimed at the White House as I had in this instance. The persistence of a few of the extreme Zionist leaders—actuated by political motives and engaging political threats—disturbed me and annoyed me.[30]

David Ben-Gurion (1886-1973) was another Eastern European who would become known as "Israel's Founding Father." Ben-Gurion displayed an interest in Zionism at an early age and immigrated to Palestine in 1906 and quickly became involved in Zionist activities.

Ben-Gurion became Israel's first prime minister from 1948 to 1954, resigning in 1954 only to come back in 1955 to serve until 1963. Under his murderous regime, Ben-Gurion oversaw the massacre of Arabs, their forced displacement from their ancestorial homeland and the confiscation of those lands by Israelis.

In 1958, *The Point* aptly described this Jewish henchman:

> As effective head of the Jewish state, Ben-Gurion represents the fulfillment of Hess, Herzl and Weizmann; the achievement of Zionist victory. He is the symbol of Jewry on its own—the crucifiers of Christ free at last of Christian standards and surveillance.
>
> How alien the Jews are to those standards, their 10 years of sovereignty have enabled them to show.[31]

Prior to becoming prime minister, Ben Gurion was active in the mayhem that took place in Palestine right before the British were set to leave and abandon the Arabs and Christians to the Jewish zealots who were maniacally set on the establishment of the terrorist state of Israel:

> The acts of Jewish terrorism that had marked the final months of the British Mandate (when Jews were blowing up British buildings in Palestine, hanging British soldiers, mailing time-bombs to members of the British Cabinet) seemed like mere schoolboy pranks when the Jews went to work on the Arabs.
>
> More than 1 million Arab residents of Palestine were forced to flee their ancestral homes—the orchards, pastures and farms their people had worked [and owned] for centuries.[32]

Classic Essays on the Jewish Question: 1850 to 1945

Edited and compiled by Thomas Dalton, Ph.D. Uncensored essays from such well-known figures as Richard Wagner, Fyodor Dostoyevsky and Theodor Fritsch to virtual unknowns like Frederick Millingen and Wilhelm Marr discuss the most taboo subject of all. Their words are potent, compelling and "racist." Now, for the first time, 16 classic essays on this issue are compiled into a single volume. These essays are difficult to find, even in the internet age, for obvious reasons. These kinds of essays are not only frowned upon in America, several states are pushing for an outright ban if not future criminalization for those writing or distributing them. In Europe, as we all know, dozens of nations have passed laws making open discussion of this issue a criminal offense. When found, these essays are almost always incomplete. When found complete, they are poorly translated and edited. The aim of the present book is to alleviate this shortcoming and to offer full information so readers can decide for themselves if the authors contained herein are blazing "anti-Semites" or actually have a reasonable cause for concern. Softcover, 370 pages, #931, **$23** minus 10% for TBR subscribers plus $5 S&H inside the U.S. from TBR, P.O. Box 550, White Plains, MD 20695. Call toll free 1-877-773-9077 to charge, Mon.-Thu. 8-4 ET. Shop online at www.BarnesReview.com.

The editors of *The Point* accurately predicted that once the Jews finished with their genocide of the Arabs, they would turn their diabolical sights on the Christians:

> When Prime Minister Ben-Gurion's plans for the further expansion of the Jewish state are realized (when international circumstances have been ordered to that end), there will be a fresh field open to the Jews. And it will be open not only for additional confiscation of Arab property, but for further desecration of Christian shrines and churches in those parts of the Holy Land that the Jews do not yet control.[33]

PERVERSION

In his book *After the Boston Heresy Case*, Gary Potter speculates that another reason why the church wanted to get rid of Feeney was that he might have begun to expose the growing problem of sodomy and pedophilia that was taking place in the priesthood.

As more evidence has become available, sexual deviancy on a significant scale was in fact taking place in the church long before the scandals broke in Boston in 2003 under the disgraced Cardinal Bernard Law

It is ironic and no doubt providential that the very diocese that persecuted Feeney and the St. Benedict Center was where the church's largest sex and embezzlement scandals broke, which continue to this very day.

In an exchange with one of his Jesuit supervisors to resolve the controversy, Feeney contended that it was more than his adherence to the salvation doctrine for which he was being persecuted. Because he had converted a goodly number of Harvard students, the priest believed that the school was "embarrassed" and began pressuring the Boston Catholic hierarchy to shut him and the St. Benedict Center down.

Feeney also voiced his displeasure with the Jesuits for allowing their priests to take classes at Harvard, where they were being taught, in Feeney's words, by "atheists, Christ haters, Mary haters, Communists and sexual perverts."[34]

Potter seems to think that his "sexual pervert" reference may have struck a chord with his Jesuit inquisitors, although there was never anything written down by Feeney about the subject. Anyone, however, who knew the priest understood that he found the practice of sodomy an abomination.

Furthermore, it is well known that, of all of the religious orders, the Jesuits had been the most rigorous and demanding in formation of their priests. That they allowed their clergy who were, in most cases, more learned than most of the Harvard faculty to be subjected to leftist propaganda demonstrates that the Society of Jesus had been infected with modernism long before the Second Vatican Council.

> For his outspoken criticism of Jewish attempts to undermine Western morals, Feeney was silenced.

Sadly, since Vatican II, among the religious orders, the Jesuits have been the worst in promoting the LGBTQ+ agenda, demonstrating once again that Feeney's concerns were not unwarranted.

THE WAR ON FEENEY

It is quite telling that church authorities, knowing that they had no doctrinal case against Feeney, employed similar verbiage that the Jews had been using to condemn the priest and the center. In a speech shortly before silencing the priest, Richard Cardinal Cushing, archbishop of Boston (1944-1970), laid the groundwork for his later action:

> I cannot understand any Catholic who has prejudice whatsoever against a Jew or other non-Catholic. If there is any Catholic organization harboring such prejudices, I will assume responsibility of remedying it. A Catholic cannot harbor animosity against men, women and children of another creed, nationality or color.[35]

After the "official" ruling on Feeney came down, the use of such weaponized words took center stage in the church's war against the priest. It is interesting to note that the same Cardinal Cushing was a one-time "Man of the Year" of the B'nai B'rith and was close to the family of his sister's husband, who was Jewish, and, to show his ecumenical spirit, once boasted that he had "never made a convert in his life."[36]

At the time of Feeney's dismissal in 1949, three teachers at Boston College affiliated with the St. Benedict Center were fired. The president of the college, Rev. William L. Kelecher, S.J., in a statement to the *Boston Evening Post*, said that the three "continued to speak in class and out" promoting "ideas leading to bigotry and intolerance." The statement continued: "Their doctrine is erroneous and, as such, could not be tolerated at Boston College. They were informed that they must cease such teaching or leave the faculty."[37]

The above quote from Kelecher is just one of the many displays of hypocrisy, distortions, calumnies and outright lies told by the church in its battle with Feeney. While Kelecher was charging the teachers with being "intolerant" on the one hand, he was, nevertheless, relieving them of their duties because their position could not be tolerated. What happened to open debate and acceptance of all views? Did the three teachers not have a right to express their opinions in the new ecumenical climate?

It is the duty of the church's hierarchy to protect their flocks spiritually from the wolves seeking to devour them. It is clear that post-WWII Catholicism has failed in this duty

and has, in fact, willingly allowed and actually promoted the enemies of the faithful while, at the same time, it has condemned those such as Feeney who sought to guard the church's doctrines and the faithful who follow them.

CONCLUSION

Besides his courage, what is remarkable about Feeney is that he saw, at a time when most Catholics believed the church was flourishing, the revolutionary forces underneath that were laying the groundwork to fundamentally change it and create a new institution with a different set of dogmas, disciplines and practices. The change could be seen most clearly with the new policy toward the Jews that would come into full fruition at Vatican II.

While Feeney gallantly pointed out these ominous trends, he did not act out of hate or intolerance, as many of his enemies alleged. Instead, he sought the conversion of the Jews as the church had done for 2,000 years. Conversion could never be accomplished through interfaith get-togethers or watered-down doctrines, but a transformation of the heart and soul. ❖

ENDNOTES:

1. Many traditional scholars consider Vatican II as an "anti-council" and the popes who followed in its wake as "anti-popes."
2. This quote was re-printed in an article titled "The Monkeys and the Jews" in the October 1954 issue of *The Point*, Fr. Feeney's hard-hitting newsletter that ran from 1952 until 1959. An online archive of *The Point* is accessible at www.Big-Lies.org. Later references to *The Point* in this article are accessible via this online archive.
3. It is telling that a Jew had landed such a high position in a nominally Catholic country such as France, which demonstrates the inroads that Judaism had made in postwar Europe.

To find out more, check the back of each November/December issue of TBR for a full author and subject index. This essay is dedicated to Father Leonard Feeney (1897-1978) and Sister Catherine Goddard Clarke (1900-1968).

The International Jew: The Complete Unexpurgated Version —in a Two-Book Set

This recently composed two-book set contains all four volumes of the original *International Jew* and is the only complete set of all 80 unexpurgated articles published by Henry Ford in *The Dearborn Independent*. The 80 articles were later republished in book form but were severely redacted by the editors for fear of accusations of anti-Semitism. Now, the full version of Ford's groundbreaking study is available again and contains all the content and prefaces. **Book 1** contains Volume I: The International Jew—The World's Foremost Problem, and Volume II: Jewish Activities in the United States. **Book 2** contains Volume III: Jewish Influence in American Life and Volume IV: Aspects of Jewish Power in the U.S.

Book 1: Softcover, 413 pages, #977, **$35**.

Book 2: Softcover, 396 pages, #978, **$35**.

GET THE WHOLE SET FOR $60—save $10

BOTH BOOKS (the four volumes of the original series included in two large books) for just $60. Order Item #987.

TBR subscribers may take 10% off these list prices. Add $5 S&H inside the U.S. for one volume. Add $10 S&H inside the U.S. for the full two-book set. Order from TBR, P.O. Trials & Tribulations of an 'Anti-Semitic' Academic

What follows is an interview conducted by TBR's James Edwards with Dr. Kevin MacDonald, an author and retired professor of evolutionary psychology at California State University Long Beach.

James Edwards: Your name and your research are very well-known by many on the right but, in your early years, you leaned to the left. When and how did your opinions begin to change?

Dr. Kevin MacDonald: It was gradual. I went through the 1960s counter-cultural revolution and came to question a lot of it as groupthink and far too radical for me, having been brought up in a conservative Christian environment free from the divisive forces unleashed by the 1960s. I remember voting for Gerald Ford in 1976 and was very happy Ronald Reagan won in 1980, thinking he would solve all the problems. I was unhappy with accepting Vietnamese war refugees beginning in the late 1970s, creating a "Little Saigon" in Orange County, California where I lived. And I thought Reagan's amnesty of 2 million illegals in 1986 was a bad idea.

So, I definitely had an implicit idea that the United States should be for White people. Based on my personal experience as a teacher in Jamaica in the early 1970s, and being aware of writings by Arthur Jensen and Phil Rushton on race differences as an evolutionary psychologist in the 1980s, I came to accept that there are race differences in IQ etc. But it wasn't until I read about Jewish involvement in promoting immigration and opposing the idea of race and race differences that I attributed any role to Jewish activism.

DR. KEVIN MacDONALD

Edwards: In the mid-1990s, while you were a tenured professor of psychology at California State University, you published the *Culture of Critique* series, a trilogy of books that analyzed Judaism and secular Jewish culture from the perspective of evolutionary psychology. What was it about this particular subject that piqued your intellectual curiosity?

MacDonald: It started out innocently enough as a chapter in my book *Social and Personality Development: An Evolutionary Synthesis* on the ancient Spartans as a group strategy—how the entire society was set up to attain military power via socialization of children to adapt to a military way of life. I decided to follow this up with a similar approach to a very different group, the Jews, resulting in *A People That Shall Dwell Alone: Judaism as a Group Evolutionary Strategy*.

Jews are a good group for such a project because there is a long history of writing about them by friend and foe alike. And I was young and foolish, and I did not think that what would eventually happen is that I would end up being ostracized in academia, my books taken off Amazon etc.

Edwards: What were the findings of your research into this question from an evolutionary perspective?

MacDonald: The more I read about Jews the more I realized that they are a dominant elite, and that Jewish power has been directed against White Americans. I became aware that they had often been an elite in alliance with aristocrats and kings in traditional European societies and with the Bolshevik government of the Soviet Union, all of whom were acting against the best interests of the people they ruled.

Jews have thus been a common component of elites hostile to the people they rule. And I became aware that most Jews understand Jewish history in the West as repeated outbreaks of irrational anti-Semitism, ranging from the destruction of the Second Temple in A.D. 70 by the

In A.D. 70, the forces of the Roman Empire leveled the Temple of Solomon (also known as the Second Temple). The First Temple was destroyed in 587 B.C. by the Babylonians. Jews have been conditioned to believe that both of these pivotal events in Judean history occurred because, simply put, they were "Jews." In fact, in each instance, they had become thorns in the side of both of those empires and were also in a strategic yet dangerous position as a buffer between the superpowers of the time. Above, Judeans are hauled away in chains by soldiers of the army of Gen. Titus Caesar Vespasianus, who would later become emperor of Rome.

Romans, to medieval expulsions, pogroms in Eastern Europe, to the actions of the German government from 1933–1945. Jewish activists have an atavistic hatred for Europeans and their activism is motivated by fear of the rise of a government like that of the above-mentioned National Socialist government of Germany.

Edwards: I think that this issue is certainly worthy of scholarly exploration, but it seems as though you are the only man in the American university system who has been willing to publicly take this on. What was the initial reaction to your books by your colleagues on the faculty?

MacDonald: The reviews of my books may be found at my website KevinMacDonald.net. My 1994 book *A People That Shall Dwell Alone* was well received, including several reviews by academics—less so for *Separation and Its Discontents* and, apart from a positive review by Frank Salter, my third book *The Culture of Critique* was basically ignored by academics for 20 years until Nathan Cofnas published negative comments in academic journals because it had become influential among certain people.

Edwards: Over the course of several years, the media and nefarious organizations like the Southern Poverty Law Center (SPLC) attempted to provoke a backlash against you on campus. How effective were these efforts?

MacDonald: The SPLC, and then the Anti-Defamation league (ADL), riled up the faculty at my university and demanded I be fired. But they couldn't fire me because I had tenure, so all I experienced was hate in my face-to-face world from 2008–2014 when I retired—a small price to pay given the stakes involved. It would be much more intense now because the academic world is even more strongly on the left and intolerant of opinions that don't conform to their world view.

Edwards: We are told that universities are places of learning and understanding where rigorous debate occurs, and diversity is welcomed. Does that include the diversity of opinion?

MacDonald: Definitely not. The left, which dominates the university

system, thrives on censorship. They don't want to debate or even allow research on race. It's impossible to get research on race differences published in mainstream academic journals. For example, Claudine Gay, the Black, academically unqualified [former] president of Harvard (until coming up against Jewish power and accusations of extensive plagiarism), refused to rehire an instructor who wanted to have a Zoom presentation by Charles Murray on IQ. Jewish power and transgender ideology are also off limits—basically anything the left doesn't like can't be discussed.

Edwards: You never backed down from the findings that your research led you. That is neither an easy nor trivial thing to do. Most in your position would have apologized and recanted. What compelled you to hold the line in the wake of so many distancing themselves from you at your place of work?

MacDonald: I didn't feel that anyone had raised any good objections to what I had written, and I certainly didn't want to recant anything due to pressure from people who were obviously ethnically motivated. I always replied to my critics, most recently Cofnas, who has basically acknowledged the central point that Jewish intellectuals may attempt to discredit ideas, such as ideas about race, that they see as damaging to their interests.

Jews, like other groups, are self-interested, but Jews are especially important because they are highly influential (unlike, say, Blacks or Gypsies), and their power has been directed against the interests of White Americans, the majority of whom are unaware of this—or they are aware of it but, like almost all successful politicians, academics and journalists, they go along with it because it benefits them personally.

Unlike Jews, we Westerners are prone to individualism, so that it is hard for us to cohere as a group. We are very open to strangers, and we are not really equipped to deal with Judaism as a group strategy. This individualism is a consistent, pervasive problem. Pretty much all White politicians, media figures and even academics are very individualistic. They do not care about their people or much of anything beyond their career and their family. They do not care about the interests of the United States (hence the effectiveness of the Israel lobby), much less the fate of White America.

I keep wondering why they don't do more to help secure the interests of their children and grandchildren. All they care about is becoming rich and famous—what you might call pathological individualism.

Edwards: As an author, researcher, classroom teacher and scholar who took his profession seriously, does it dismay you to find that the university system is content to trim its sails to the conclusions drawn by political correctness instead of pursuing a higher level of truth?

MacDonald: It dismays me but hardly surprises me given my experience. I remember being afraid to say I liked Reagan at faculty parties where everyone assumed that everyone was liberal-left, so it's been going on a long time. They love consensus and they fear sticking out, and that means sticking to the liberal-left line.

Edwards: Like so many institutions, the education establishment is hellbent on pursuing "equality" rather than excellence. Standardized testing is nearly a thing of the past, and many diplomas are simply given, not earned. How might that impact the future of this country and are White students being discriminated against by admissions offices?

MacDonald: Meritocracy is a central component of Western success as well as the success of other meritocratic cultures, such as traditional Judaism where there was intense competition for wealth and power within the Jewish community as well as eugenic selection for IQ.

Imperial China was also meritocratic. There were competitive exams for admission to lucrative positions in the imperial bureaucracy, leading to eugenic selection for intelligence. The demise of the meritocratic system in the West is essentially because some groups, particularly Blacks, have a hard time competing in a culture based fundamentally on intelligence which is linked to high achievement and success in pretty much all areas of our contemporary, highly literate culture where science, mathematics and technology have central roles.

Essentially, the natural linkages between intelligence and success in a meritocratic culture are being broken down because of the low average intelligence of Blacks. This, of course, discriminates against Whites for admission to prestigious undergraduate and graduate programs in universities.

Since Jews are typically counted as White when calculating the White percentage (around 35% at Harvard and Princeton), the situation is far worse than it appears, with high-achieving Whites underrepresented at levels far more than Jews or Asians.

While high-achieving Jews are overrepresented by more than a factor of four, non-Jewish Whites are underrepresented by over a factor of two. In general, the percentage of Jews in prestigious academic programs has not significantly declined but non-Jewish Whites are a vanishing component of these universities.

Non-Jewish Whites with superior academic ability are being relegated to lower-level colleges and, thus, are in a less favorable position to obtain prestigious jobs.

Edwards: *Individualism and the Western Liberal Tradition* is your most recent book and I recommend that readers pick up a copy. It can be found online at AbeBooks.com. ❖

James Edwards is a member of TBR's Board of Contributing Editors and the outspoken host of *The Political Cesspool*, one of America's most potent talk radio programs. He has made numerous television guest appearances and his work as a political commentator over the past two decades has been the subject of articles in hundreds of print publications and media broadcasts around the world. ANTELOPE HILL PUBLISHING

Professionally publishing new translations, original works and reprints since 2020

Antelope Hill Publishing seeks to ensure history, culture, and revolutionary ideas will be preserved in the written word and made easily accessible, fairly priced, and professionally published. The best refutation of historical revisionists is a clear statement of primary accounts—fighting the battle for minds from the printed page, instead of locked away in secret hard drives and foreign languages. Antelope Hill translates, transcribes, and republishes existing works in print and eBook format. We are also looking for the authors who will tell the story of the current generation so that we can publish the words that will inspire us to victory. Our efforts are endorsed by The Barnes Review.

Three Radio Shows You Just Can't Miss!

TBR History Hour

Listen to provocative interviews at www.BarnesReview.com 24 hours a day.

TBR Radio Network is back on track with **TBR History Hour** hosted by Assistant Editor John Friend! John has taken over as host of **TBR History Hour** since the untimely death of Revisionist Pastor Dr. Edward DeVries. **TBR History Hour** is a podcast program featuring special guests as well as some of the great contributors to **THE BARNES REVIEW** history magazine. Politically incorrect guests have included TBR's longtime Executive Editor Paul Angel, writer and TBR contributor Karl Haemers, TBR Board of Contributing Editors member Harry Cooper, TBR's regular French-Canadian contributor Rémi Tremblay, free speech advocate Henry Herskovitz, "thought criminals" Alfred and Monika Schaefer, and nationalist historian Dr. Matthew Raphael Johnson, also a member of TBR's Board of Contributing Editors and the former editor of TBR, and many more.

All podcast programs may be accessed at our official website: **www.BarnesReview.com.** Check out the archives and stay tuned for more unique podcast programs from your favorite TBR writers!

The AFP Report

Listen to provocative breaking news interviews 24 hours a day at www.AmericanFreePress.net.

The AFP Radio Network is going strong once again with **The AFP Report** hosted by longtime AFP contributor John Friend, who is also the host of **TBR History Hour**.

The AFP Report is a podcast program featuring special guests as well as regular contributors to AMERICAN FREE PRESS—America's last real newspaper. Some of our many provocative guests include AFP contributors Dr. Kevin Barrett, bestselling author Donald Jeffries, former CIA analyst Philip Giraldi, longtime Bilderberg sleuth and on-the-scene reporter Mark Anderson, and award-winning historian and newsman Mike Walsh. Special guests appearing on the podcast include attorney Glen Allen of the Free Expression Foundation, Christelle Néant of "The Donbass Insider," Tony Gosling, an independent journalist based in the United Kingdom, and Phil Tourney, a U.S. Navy veteran and survivor of the Israeli assault on the USS *Liberty*, among many others.

All podcast programs may be accessed at AFP's official website: **www.AmericanFreePress.net**. Check out the archives and stay tuned for more unique podcast programs featuring your favorite AFP contributors!

The Political Cesspool

Tune into THE POLITICAL CESSPOOL every Saturday from 6-9 p.m. Central!

The Political Cesspool is an award-winning LIVE radio broadcast that can be heard on its flagship station AM 1600 WMQM in Memphis, Tennessee, and via the Liberty News Radio Network's internet stream. Hosted by James Edwards, one of the leading pro-White advocates and Southern nationalists in America. His **Political Cesspool radio program** offers hard-hitting news, history and analysis every weekend not found anywhere else. Featuring regular guests and outspoken contributors, the insights and perspectives presented on **The Political Cesspool** are thought-provoking and refreshingly politically incorrect. Co-host Keith Alexander, with his encyclopedic knowledge and expansive historical recall, adds much to the discussion every week, and has become a fan-favorite and indispensable contributor.

Visit www.ThePoliticalCesspool.org for more details and program archives! **We also encourage you to support the efforts of Edwards and Alexander with a financial donation.** You have rarely seen TBR urge you to donate to other organizations. So many other groups end up using the money in unproductive and sometimes selfish ways. We 100% endorse the efforts of Edwards and Alexander and can assure you that any contributions will go to spreading the word and increasing their outreach, not their bank accounts.

LETTERS TO THE EDITOR

BEST ISSUE EVER

I am so pleased with the November/December 2023 issue of TBR that I bought six more copies to give out. I have never bought this many extra TBR copies before. But, in my opinion, this issue is one of the most important issues TBR has ever published. All of the topics covered concern all of us. Every American needs to read about the betrayal of our country by people in power in our government. Indeed, 1913 was the year that sealed America's fate, and I'm glad that TBR decided to put it in print.

The unconstitutional Federal Reserve Act and the 16th and 17th Amendments couldn't possibly have gotten passed without corruption from people in high places in our government, especially President Woodrow Wilson, who took an oath to protect and defend the U.S. Constitution. This TBR issue covers and proves that.

Then the JFK assassination is well covered, with proof of what really happened, not the "official story" of the lone gunman put out by our dishonest government and mainstream media.

The tremendous number of government and non-governmental people involved needs to be exposed so that the American people can know just how corrupt our government really has become. This issue does it, and that's why I'm so impressed with it.

Nick Markos
Ohio

WE'RE IN PHASE THREE

I am writing in response to the well-documented and thoroughly written article by Marc Roland that addresses the historical backgrounds of Talmudic Zionism, Fabian Socialism, and the marginalization of truth in the news media today. [TBR, November/December 2023.—Ed.] Here is my take on the present situation in the Middle East.

It has come to my attention that Josh Paul, director of congressional and public affairs at the State Department's Bureau of Political-Military Affairs which handles arms transfers, has recently tendered his resignation. It appears after reading Paul's reasons for his resignation that serious gaps of open dialogue between the administration, Congress, and the Pentagon exist. In an interview with *Time*, Paul spoke about his decision to resign, why the administration may be violating the law in providing weapons to Israel, and the response he received from his colleagues.

Mr. Paul was quoted as telling *Time* that room for debate has existed in the past as it dealt with controversial, complex and sensitive arms transfers. In the most recent instance of large amounts of money and military aid being sent to Israel, there has been no debate or, when there has been debate, it has been ignored. It has just been, "here are your marching orders; move as quickly as you can."

Paul further elaborated that, in past debates, even if an individual was not satisfied, there was at least some degree of comfort that the next step would be for cases to be referred to Congress, through which the arms transfer process is supposed to work.

The mode of operation that exists on Capitol Hill today was birthed in the late 19th century under the leadership of Theodore Herzl, and continued in the early years of the 20th century under the leadership of Woodrow Wilson, Edward Mandell House, Bernard Baruch, Louis Brandeis, Chaim Weizmann, Stephen Weiss, Jacob Schiff and Paul Warburg. What we are faced with today is a bicephalous monster made up of "Fabian Socialism" and "Talmudic Zionism." These two heads are wedded together.

We are actually in phase three of a three-pronged movement to finally shift these financial and political operations from Europe to the United States. As Roland's article so clearly pointed out, a quadripartite arrangement of "premier dictators" was chosen to bring this present situation to fruition: Franklin Roosevelt, Winston Churchill, Adolf Hitler and Joseph Stalin. They were all key players in the drama. The "advisors" shifted somewhat, with Baruch playing the lead and supported by Herman Lehman, Felix Frankfurter, Samuel Rosenmann and James Warburg.

I close with a quote from Marcus Tullius Cicero, the Roman orator, politician and academic philosopher who penned the following in 45 B.C.: "A nation can survive its fools and even the ambitious. But it cannot survive treason from within. An enemy at the gate is less formidable, for he is known and carries his banners openly against the city. But the traitor moves among those within the gates freely, his sly whispers through all the alleys, heard in the very halls of government itself. For the traitor appears not a traitor; he speaks in the accents familiar to his victims, and he wears their face and their garments, and he appeals to the baseness that lies deep in the hearts of all men. He rots the soul of a nation; he works secretly and unknown in the night to undermine the pillars of a city; he infects the body politic so that it can no longer resist. A murderer is less to be feared."

Yes, Mr. Josh Paul, sensible and truthful dialogue are a must.

A SIMPLE SOLUTION

Having read the giddy news stories from the presstitutes in the lamestream media and the accurate follow up "History You May Have Missed" item in the January/February 2023 issue of TBR, may I humbly offer a simple suggestion to the low IQ, retarded primates destroying the statue of Confederate Gen. Robert E. Lee, a Virginian, in Charlottesville, Virginia?

Rather than having to cut up and melt down the entire statue to make medallions for some Black criminal or neo-Bolshevik organization, let me offer a practical suggestion to save time.

The Lee statue is an equestrian statue. Gen. Lee is mounted on his beloved war horse Traveler. Simply move to the rear of the horse, lift Traveler's tail, cut the rear end out of poor ole Traveler and one would already have a perfect medallion representing an uncanny likeness of George Floyd, excuse me, St. George Floyd, or Al Sharpton or Maxine Waters, or … well you get the idea.

And one could use white spray paint

Continued on page 78

Continued from page 77

and shazam … a perfect replica of Nancy Pelosi or Elizabeth Warren or Liz Chaney or Alexandria Ocasio-Cortez, or … well, the possibilities are endless.

Just trying to be helpful and offer an artsy suggestion to enhance our wonderful diverse culture.

KHAZAR CORRECTION

In the letter entitled "Khazars" on page 78 of the November/December 2023 issue of TBR, an error crept in regarding the date when the Khazars adhered to Judaism under King Bulan. It should be the 8th century A.D., not the 18th, as appeared in the article.

FATE WORSE THAN DEATH

I just finished a fantastic book on Amerindian captives titled *A Fate Worse Than Death: Indian Captivities in the West, 1830–1885* by Gregory and Susan Michno. Extensively researched with timelines and maps, the book provides harrowing details on over 100 captives, mostly women and children, and vividly demonstrates how finding oneself in such a circumstance truly was a fate worse than death. In a "you-are-there" style, the authors present the captives' experiences in a straight-forward narrative that, while difficult to read at times, makes it hard to look away. It is every bit as good as Thomas Goodrich's *Scalp Dance: Indian Warfare on the High Plains, 1865–1879* but unique in that it's not about the Indian wars but the violence and carnage waged by Amerindians against innocent people before, during and after those conflicts.

While I was aware of the horrors of Amerindian captivity from Goodrich's book and others, none paint it in such detail or demonstrate how pervasive it was across half a century in the West than the Michnos. As such, I think *A Fate Worse Than Death* would make a great addition to the TBR book catalog if it can be worked out. More people need to know about these atrocities, and it seems the book would be popular with TBR readers.

I stumbled upon this book by seeing it mentioned in a comment section under an online video. I can't tell you how many great books I've found that way.

[This letter was not intended for publication by the letterwriter, but, when a TBR reader says a book is good, we think others should hear about it.—Ed.]

APARTHEID NOT THE GOAL

What we in the know (all thanks to forensic Revisionists) have yet to do is figure out how to make all this information personally relevant to one and all. Yes, it's good to see that South Africa is aiming to "mobilize solidarity" by taking Israel to the International Court of Justice, even though, alas, it does so because, incorrectly, it sees a relationship between South African apartheid and the so-called "racial apartheid" policy of Israel against Palestinians. It is important to know, however, that the Jewish state is not and never was about mere separation.

One look at Israel's flag shows criminal flagrance by defining its world Judaic headquarters from "the Nile to the Euphrates" as shown by the blue stripe at top and the blue stripe at bottom.

From its inception by Theodore Herzl in 1897, Zionism's blueprint was "to disappear the indigenous poor." The world is witnessing this final stage every heart-rending day while Israeli Prime Minister Benjamin Netanyahu carries this plan out. From what I have seen, only two Israeli teenagers have stepped forward to refuse military service, preferring punishment to participating in a genocide. Long ago, Jewish writer, activist and musician Gilad Atzmon did the same, although he stops short of disavowing the anti-gentile cult of Judaism.

Herzl's diaried blueprint for the Jewish state is a religio-political genocide as advertised for millennia (and today cited from the Book of Deuteronomy by Netanyahu to his troops).

If only everyone would read the Torah (never mind the Talmud) and understand what it means to the group-deluded "Chosen People." The reading of the Torah alone allows anyone to grasp the anti-gentile, unnatural, anti-human mentality of its devious authorship. It is, admittedly, a ghastly read. You can also watch the "Torah on TV" being played out every day in Gaza, in Palestinian fields, wells, herds, olive groves, on every infant crushed under rubble. That, to me, is Judaism made manifest—aided and abetted by almost all Western nations.

Somehow, the worst of "our" leaders have been suckered by persuasively mis-sold Judeo-Christianity and Holocaustianity into roles of power. They are craven in-group wannabes. Saving Palestine is to save all from the sheer fear of personal demonization by the Judaic advertising monopoly power.

It's not complicated. Israel benefits no one. Israel enslaves everyone. Its non-Jewish inhabitants are its so-called footstools. A feasible two-state solution is at hand, the plan Col. Muammar Qaddafi agreed to help implement via a UN resolution.

I say, "Palestine for the Palestinians and Birobidjan (sans weapons of mass destruction) for the Jews." This would relieve secular Zionism of Jerusalem as its most potent advertising logo. This plan is not that hard. It is immediately achievable by defunding and thus duly making law-flouting Israel a pariah. I believe every taxpayer worldwide will concur. Imagine it! Everyone would breathe a sigh of relief to regain their freedom of opinion. It can be done merely by withdrawing business, fake guilt funding, and military bases.

Qaddafi ended U.S. military bases in his nation. Donald Trump and Vladimir Putin also wanted to end this global occupation. It's the real reason they're demonized. Save Palestine!

SUING THE SPLC

My husband and I are long-time subscribers to The Barnes Review. We read your insert on Operation Book Rescue a few issues ago. In your efforts to combat the unfair attacks by agencies like the Anti-Defamation League (ADL) and Southern Poverty Law Center (SPLC), you may want to contact Mat Staver of the Liberty Counsel. The Liberty Counsel is suing the SPLC for its labeling of pro-life, pro-family and conservative groups as "hate groups" and have survived a motion to dismiss and are moving toward discovery.

The SPLC has your organization listed as an "extremist hate group"

on its web site. By labeling The Barnes Review, they are labeling your subscribers as well. None of us deserve to be labeled as "anti-government extremists, Holocaust deniers, anti-Semites, White supremacists and racist conspiracy theorists" merely because we have a strong interest in history and the truth.

You may want to help the Liberty Counsel's efforts combating the SPLC. If you could assist their lawsuit and force the SPLC to drop its "hate group" labeling campaign, this could be used as leverage in your efforts to end the ADL attacks on your organization and others, as well.

Anne Kuhl
Via email

LIBERTY COUNSEL STATEMENT

Liberty Counsel has joined the legal team representing The Dustin Inman Society (DIS) and its founder and president D.A. King, which the SPLC has falsely painted as an "anti-immigrant" hate group.

DIS was formed in 2005 after an illegal immigrant's recklessly driven vehicle hit and killed 16-year-old Dustin Inman and paralyzed his mother. The organization was founded to "end illegal immigration, illegal employment and the illegal administration and granting of public benefits and services through the equal application of existing laws" in the state of Georgia.

The SPLC designated the DIS as an anti-immigrant "hate group" in its annual "Intelligence Report" published since 2018. The SPLC also stated that King "focuses on vilifying all immigrants." Nothing could be further from the truth.

The SPLC's stated motivation is to "destroy" groups with which it disagrees, and it accomplishes this objective by falsely labeling nonviolent organizations as "hate groups." But, as can be witnessed by the victims of the Family Research Council and congressional Republican baseball team, the SPLC hate list has only served to destroy innocent lives.

To falsely label nonviolent people or organizations with whom you disagree as "haters" or "hate groups" is irresponsible, dangerous and deadly. The SPLC's lies and disparagement must end.

It is time to stop the SPLC lies.

We seek justice and we continue to fight in courtrooms across the country and at the U.S. Supreme Court for the right to life, religious liberty and the natural family. We won all four of the cases we argued or briefed before the High Court in 2022, and two cases in 2023 … and we aren't done winning yet!

CORRECTION

Could The Barnes Review please publish a corrected version of the chart shown on page 33 of the November/December 2023 edition, where the sources of the shots are reversed, to explain the shot to the back came at a downward angle because it was fired from the top of the County Records Building and that the shot to the back of the head was virtually on the horizontal because it was fired from the Dal-Tex Building? I would be most grateful not to leave the question hanging.

Dr. James Fetzer
Wisconsin

[Note, for those who have the print edition, the simplest correction is to reverse the boxes containing CNTY RECORDS BLDG and DAL-TEX BLDG.—Ed.]

Honoring the Legacy of Patrick Pearse

FOUR NEW BOOKS AVAILABLE FROM THE BARNES REVIEW BOOK CLUB

By Demand: More Books from Dr. Tom Dalton

The Poisonous Mushroom

NEW! Among the most controversial and anti-Semitic of Nazi publications was a book for children, published in 1938 under the title *Der Giftpilz*—or *The Poisonous Mushroom*. Here, the perceived Jewish threat to German society was portrayed in elemental terms. Ernst Hiemer put together 17 short morality stories intended to warn children of the dangers allegedly posed by Jews. Jews were stereotypically depicted as conniving, thieving, treacherous liars who would do anything for personal gain. Though aimed at children 8 to 14, Hiemer's lessons were intended for all readers. Long out of circulation and banned in Germany and elsewhere, this historic edition reproduces full color artwork by German cartoonist Philipp Rupprecht ("Fips"). The book was repeatedly cited at the Nuremberg Trials as evidence of "Nazi cruelty," and was used by prosecutors to justify a death sentence for its publisher, Julius Streicher. Edited by Thomas Dalton. Softcover, full color, 72 pages, #1000, **$17**.

The Riddle of the Jews' Success

NEW! Jewish power, critics say, derives from Jewish money. But how do Jews become so wealthy? What, exactly, is the secret to their remarkable success? Around 100 years ago, Theodor Fritsch began to closely observe Jewish business practices, with the aim of truly understanding how this alien on German land had acquired so much wealth so quickly. Fritsch had ample, first-hand experience dealing with Jews, and he came to develop a keen insight into their tactics—the very things that led to their fabulous "success," he believed. Long out of print and shunned by mainstream scholars as anti-Semitic, this book, edited by Thomas Dalton, discusses a whole range of Jewish practices, all of which have echoed down to the present. Most striking of all, we obtain here a firm grasp on exactly how coarsened modern life has become, thanks to un-Christian commerce. In a straightforward and clear manner, Fritsch offers the facts as he saw them. Softcover, 254 pages, #999, **$25**.

Unmasking Anne Frank: Her Famous Diary Exposed as a Literary Fraud

NEW! As a 13-year-old Jewish girl living in wartime Amsterdam, Anne Frank hid out with seven others for more than two years. During this time, she kept a diary of her thoughts, feelings and experiences. Eventually, the Frank family was discovered and deported. Anne later died of typhus in Bergen-Belsen. But there is a problem. Anne's tale is rife with absurdities, logical problems, inconsistencies and incoherent claims. Here, Japanese researcher Ikuo Suzuki deconstructs the famous dairy. In the process, he reveals that the notorious diary was likely written by a middle-aged Jewish man who worked with Anne's father, Otto, to foist upon the public a deceptive and misleading story of a young girl who perished in a German camp. Here, for the first time, is a highly readable critique of the global best-seller *The Diary of Anne Frank*. Softcover, 192 pages, #998, **$22**.

Protocols of the Elders of Zion: The Definitive Edition

NEW! As mysterious as it is notorious, "The Protocols" has been called the most influential piece of anti-Semitic literature in history. Here we find an express desire for world domination, along with a plan to attain it. In the Protocols' world-to-come, there will be a Jewish king of the world who will guide all humanity on behalf of Jewish interests. Serving at his behest will be the detested Goyim, who will gratefully submit to their ruler. Written in the form of meeting minutes, this document purports to be a transcription of a talk by an unnamed influential Jew, speaking around the year 1900. It first appeared in Russia in 1902 and then, in its final version, as part of a book by Sergei Nilus. But little beyond this is certain. It was denounced as a "forgery" in 1922—but is it? And what does that mean in this context? This new English translation includes commentary from Henry Ford, Alfred Rosenberg, Julius Evola and others. Softcover, 278 pages, #997, **$27**.

TBR subscribers get 10% off retail prices. Call toll free 1-877-773-9077 to charge, Mon.-Thu. 8-4 ET or use the handy all-purpose ordering form found inside the front cover of this issue and mail to TBR, P.O. Box 550, White Plains, MD 20695. S&H charges not included. Add $5 on orders up to $50. Add $10 S&H from $50.01 to $100. Add $15 from $100.01 to $200. Add $20 from $200.01 to $300. Add $25 from $300.01 to $400. Over $400? Call 202-547-5586 for best S&H rates to your locale!

From TBR: Classic Historic Films in Remastered DVDs

Hitlerjunge Quex (Hitler Youth Quex)

The year is 1931. Young Heini Volker has a problem. His unemployed father demands he joins Berlin's young Communists. But he loves the Hitler Youth. How Heini resolves this quandary is the story of *Hitlerjunge Quex*, a movie central to the moral instruction of young Germans in the Nazi years. Produced in 1933, *Hitlerjunge Quex* drew from the real story of Herbert Norkus, a Hitler Youth killed by Red street-fighters in 1932. Musical score is by Hans-Otto Borgmann. DVD special features include: historical slide show, original promo materials, interactive scene selection, switchable English subtitles. B&W, 1933, 87 minutes, German dialogue, English subtitles, #1001, **$25**. (NTSC Region 0 encoding—entire world.) **NOTE: Distribution prohibited in Germany, Italy, Austria and France.**

Red Storm Over the Village: Frisians in Peril

Few political films made during the Third Reich were distributed by the Goebbels Propaganda Ministry. Peter Hagen's *Friesennot* (*Frisians in Peril*) was awarded that distinction in 1935. Now titled *Red Storm Over the Village: Frisians in Peril*, the film dramatizes the plight of peaceful Germans who lived in an isolated village on the Volga for generations. Their bucolic existence is shattered by the invasion of the Red Army. A brutal Red Guard rapes and kills a village girl. Then, when drunken troops desecrate the village's house of worship, the outraged Germans revolt. Multiple special features. DVD, 96 minutes, English subtitles, #1002, **$30**. (NTSC Region 0 encoding—entire world.)

Diesel: The Life of Rudolf Diesel —Inventor of the Diesel Engine

This is the story of Rudolf Diesel, the German inventor who created an internal-combustion engine that conquered maximal thermal efficiency, but whose obsession almost killed him. Young Diesel (Willy Birgel) dreams of becoming an engineer. He builds an ammonia steam engine, but it fails to produce the power he seeks. Diesel knows the engine he envisions will revolutionize the world. Several patents later—and now financed by industrialist Heinrich von Buz—Diesel is allowed to test his ideas. Von Buz enlists the additional support of the Krupp firm. Diesel atomizes the fuel and it works, and it's almost three times as powerful as a steam engine. It ends with an impressive montage of tractors, trucks, airplanes, ships and submarines—powered by Diesel's engines. DVD, 1942, B&W, German dialogue, English subtitles, 90 minutes, #1004, **$25**. (NTSC Region 0 encoding—entire world.)

Kolberg: The Restored 1945 Epic

Filmed over late 1943 and 1944, *Kolberg* drew upon the historical resistance of East Prussian townsmen against Napoleon in 1807 in arguing its case for total war against the WWII Allies. Its bone-jarring climax, showing Kolberg bombarded into rubble by French artillery, evokes Allied bombing raids across Germany at the time. Even as the Nazi regime was entering its last phases, it devoted lavish resources to *Kolberg*'s spectacular battle scenes, detonating tons of explosives and diverting thousands of soldiers from the front. Released amidst the chaos of 1945, *Kolberg* was shown in Germany's few still-intact movie houses. This new DVD edition features better subtitles, restored sound and restoration of the original color. Directed by Veit Harlan. Music by Norbert Schultze. Multiple special features. Color, 104 minutes, German dialogue with switchable English or Spanish subtitles, #1005, **$25**. (NTSC Region 0 encoding—entire world.)

Die Frontschau (The Front Show)

An amazing collection featuring nine films on one DVD! Nearly three hours long with new English narration track. Includes six never-before-seen films! One of the rarest cinematic documents to survive the war, Germany's "Front Shows" offer a unique perspective of Hitler's 1941 Russian campaign. Skillfully blending German frontline footage and captured Soviet combat film, the programs depict the German soldier in battle, on forced marches, building forts and shelters and coping with climatic hardships. Censored from the public, the features were shown to recruits to help prepare them for the realities of the east. Germany, 1940s, B&W, 158 minutes, English voice-over, #1006, **$20**. (NTSC Region 0 encoding—entire world.)

Disasters of the 20th Century: Natural and Manmade Disasters That Marked the Century

Here are the disasters, natural and man-made, that have marked our turbulent 20th century. In addition to dramatic footage from the San Francisco earthquake of 1906, the Miami hurricane of 1926, the eruption of Mount Saint Helens in 1980, and other natural disasters, you'll see the crash of the dirigible Hindenburg, historic fires and other man-made disasters that have taken hundreds of lives. This program also includes film relating to the assassinations of Gandhi, the Kennedys and Martin Luther King Jr. Color and B&W, 60 minutes, #1007, **$15**. (NTSC Region 0 encoding—entire world.)

TBR subscribers get 10% off retail prices. Call toll free 1-877-773-9077 to charge, Mon.-Thu. 8-4 ET or use the handy all-purpose ordering form found inside the front cover of this issue and mail to TBR, P.O. Box 550, White Plains, MD 20695. S&H charges not included. Add $5 on orders up to $50. Add $10 S&H from $50.01 to $100. Add $15 from $100.01 to $200. Add $20 from $200.01 to $300. Add $25 from $300.01 to $400. Over $400? Call 202-547-5586 for best S&H rates to your locale!

The Autobiography of Sir Götz von Berlichingen

A Knight of the Holy Roman Empire

Here is the amazing tale of a man few people have ever even heard of. Gottfried "Götz" von Berlichingen, the Knight of the Iron Hand, was one of the last great medieval knights of history. Born in the year 1480, Götz came of age in an era of great change, both in his native German lands and the wider world. The Reformation would fundamentally change the landscape of political power in Europe, and the ensuing wars would tear the continent apart. Yet, for a time, Götz's world remained true to it's feudal history, and Götz participated in many feuds and conflicts, victories and losses.

A good friend and a terrible enemy, Götz recalls how he fought and struggled in the internal politics of Germany, which pitted princes and lords against one another over land, titles and wealth. He crosses paths—and sometimes swords—with other famous knights, esteemed princes and, on more than one occasion, with the Holy Roman emperor himself. Campaigning with the Imperial Army abroad in France, Switzerland and Hungary, he often survived on nothing more than his wits and his prowess in battle. His legacy as a folk hero lived on long after his death, inspiring Johann Wolfgang von Goethe to write a play based on his life, and becoming the namesake of the 17th SS-PanzerGrenadier-Division "Götz von Berlichingen" in World War II.

Before his death Götz wrote down his unique story in an autobiographical account of one of Europe's most notable medieval knights. Translated from the original 1567 manuscript, TBR Book Club is proud to present *The Autobiography of Sir Götz von Berlichingen*, available for the first time ever to the English reader. Although politics and military technology may have changed since the time of this famous knight, one thing remains the same: Honor, bravery and loyalty count for much, even for a man of quite humble beginnings. Softcover, 120 pages, #1012, **$18** plus $5 S&H inside the U.S. from The Barnes Review, P.O.Box 550, White Plains, MD 20695. Call TBR toll free at 1-877-773-9077 to charge, Mon.-Thu. 8-4 ET. Purchase online at www.BarnesReview.com.

The War of Jenkins' Ear

The Forgotten Struggle for North and South America—1739-1743

Filled with unforgettable characters and maritime adventure, the incredible story of a forgotten war that shaped the fate of the United States—and the entire Western Hemisphere. In the early 18th century, the British and Spanish empires were fighting for economic supremacy in the Americas.

Tensions between the two powers were high, and wars blossomed for nearly 100 years, from the War of Spanish Succession (known as Queen Anne's War in the Americas), culminating in the War of Jenkins' Ear. This war would lay the groundwork for the French and Indian War and the American Revolution.

The War of Jenkins' Ear was a world war in the truest sense, engaging the major European powers on battlefields ranging from Europe to the Americas to the Asian subcontinent. Yet the conflict that would eventually become known as the War of Jenkins' Ear—a moniker coined by the 19th century historian Robert Carlyle more than a century later—is barely known to us today. Yet it resulted in the invasion of Georgia and even involved members of George Washington's own family. It would cost 50,000 lives, millions in treasure, and over 600 ships.

Author Robert Gaudi takes the reader from the brackish waters of the Chesapeake Bay to the rocky shores of Tierra del Fuego. We travel around the Cape of Good Hope and across the Pacific to the Philippines and the Cantonese coast, with adventurous stops in Cartagena, Panama and beyond.

Yet even though it happened decades before American independence, The War of Jenkins' Ear was truly an American war; a hard-fought, costly struggle that determined the fate of the Americas and in which, for the first time, American armies participated. Softcover, 408 pages, #1009, **$22** plus $5 S&H inside the U.S. from The Barnes Review, P.O.Box 550, White Plains, MD 20695. Call TBR toll free at 1-877-773-9077 to charge, Mon.-Thu. 8-4 ET. Also purchase online at: www.BarnesReview.com.

TWO RESCUED BOOKS REFLECT DEEPLY HELD ANIMOSITIES

Published by THE BARNES REVIEW.
Prepared by JR Books Online.
Available nowhere else!

The Blood Mystery

NEW! Here is a work from a brave researcher from France who lived in the late 19th century. We are happy to offer the reader in this volume the full translation of Henri Desportes's most renowned work, *Le mystère du sang chez les juifs de tous les temps*, translated as *The Blood Mystery Among the Jews of All Times*, a seminal study of Jewish ritual murders that was published as a second edition in 1890. Desportes (real name: Célestin Henri Déporte) was a Catholic priest and writer, born in 1865 in the Normandy region of France. He died in 1939.

In *The Blood Mystery*, Desportes takes the approach of performing a historical survey of the ritual murder phenomenon, then dives into specific historical cases and answers the perennial claims of critics. At one point, he considers himself compelled to say: "The Jews do not change. All the revelations, the ancient chronicles, the records of the Trent and Damascus trials, the book of the Moldovan Rabbi, etc. etc. tell us about the same turpitudes. The custom of using Christian blood is very old. It already existed before the total scattering of the Jewish nation, it continued to be practiced until recently, in compliance with Talmudic and rabbinical laws, and it is definitely practiced even today, wherever an Orthodox Jew lives. … The Jews do not change: this was, is and will always be the case." This edition contains a preface by Édouard Drumont, the famous French author and journalist. Translated and edited by JR Books Online and printed by TBR's OPERATION BOOK RESCUE. Softcover, 271 pages, indexed, #994, **$30**.

Why the Jews Should Be Kept Out of England

NEW! William Prynne (1600–1669) was an English lawyer, author, polemicist, political figure and a prominent Puritan opponent of church policy under Archbishop of Canterbury William Laud. Although Prynne's views were Presbyterian, he became known in the 1640s as an Erastian, arguing for overall state control of religious matters. In 1656, a proposal was made in the Parliament of England to lift the 13th-century residency ban for Jews. This prompted Prynne to write *A Short Demurrer to the Jewes Long Discontinued [Barred] Remitter into England*, a remarkable legal treatise against the proposal. It was printed in 1656 shortly before the Whitehall Conference and became influential in strengthening the public opinion against the readmission of Jews. In particular, Prynne strongly doubted that the Jews could be converted to Christianity if allowed back.

The return of the Jews to England was heavily promoted by Manasseh ben Israel, the famous Portuguese rabbi and author, while Oliver Cromwell desired their conditional readmission. In the end, the Parliament did not support any such proposal. The Jews only came back to England in large numbers with the restoration monarchy of Charles II (1660–1685). In his treatise, Prynne was mostly reciting from what he considered the uncontested legal record of England and other countries. He cited ruinous Jewish usury, forgery of coins and royal charters, general criminality, ritual murders, etc. as main reasons why the 1290 expulsion had happened and why the Jews should not be readmitted in his time. This publication will be of interest to anyone fascinated by Puritanism, Protestantism or Jewish history in particular and Revisionist history in general. Transcribed and edited by JR Books Online and printed by TBR's OPERATION BOOK RESCUE. Softcover, 220 pages, indexed, #1014, **$25**.

HOT OFF THE PRESSES!

One comprehensive, hardback reference volume covering all the events known as the Holocaust. Oversized (8.5 x 11), case laminate, 579 entries, 256 B&W illustrations, 101 color pictures, fully indexed, bibliography, 634 pages . . .

HOLOCAUST ENCYCLOPEDIA

UNCENSORED AND UNCONSTRAINED

The Holocaust is a topic whose public discourse is tightly controlled by powerful groups. Only their side of the story is permitted. In fact, they insist there is no other side. They guard the West's last taboo and enforce swift punishment upon those who dare to ask any questions or unearth any evidence that leads to unwelcome answers.

Undaunted by this threat, and for the first time in history, a team of critical scholars has produced an encyclopedic compendium of cutting-edge information on this topic that pays no tribute to any power, respects no taboo, poses all the questions worth asking and gives answers exclusively based on real evidence. Its contents have not been censored by any legal authority.

The lead editor of *Holocaust Encyclopedia* made sure that all contributors to this project were truly independent, and will defend what they consider to be true and accurate, even when threatened with imprisonment due to censorship laws in many countries.

In this encyclopedia, you are not lectured in so many entries what we think the Holocaust was. Rather, you find the many pieces summarized and explained that comprise the larger picture: Scores of entries present the essence of the most-pertinent witness accounts. They are the mainstay on which the Holocaust narrative rests. All are subjected to painstaking source criticism, which is one of the most important tools of a real historian. This enables the reader to assess which witnesses are trustworthy, if any.

Holocaust Encyclopedia addresses all the major Holocaust crime scenes: Auschwitz, Belzec, Sobibór and Treblinka; Dachau, Bergen-Belsen, Buchenwald and Mauthausen; Babi Yar, Ponary, Janowska and Maly Trostinets, to name but a few. But their entries do not just summarize what today's narrative is. They explain how it was formed, how it has changed over time, what the reasons for these changes are, and which aspects of the narrative are credible and why.

Forensics are the most important tool to investigate any murder case. Therefore, *Holocaust Encyclopedia* contains lots of entries discussing the many tools said to have been employed to commit the mass murders and to erase the traces: execution chambers, gas vans, mass graves, crematoria and cremation pyres. It discusses toxicological issues surrounding the various lethal gases claimed to have been used: gasoline and diesel exhaust gases, carbon monoxide, Zyklon B/hydrogen cyanide, to name only the familiar ones. How did these tools work, if at all? What traces can we expect to find, if any? And, ultimately, which traces were actually found during forensic investigations undertaken since WWII's end.

Holocaust Encyclopedia also has multiple entries on certain more-or-less common claims about aspects of the Holocaust, including a list of "Who said it?" These cover topics such as "flames shooting out of chimneys," "fat extracted from burning corpses," "blood geysers erupting from mass graves," "soap and towels issued to gassing victims," to name but a few.

Finally, several entries address factors that have influenced the creation of the Holocaust narrative, and how we perceive it today. This includes, among others, entries on psychological warfare and propaganda during the war, on conditions prevailing during criminal investigations and trials of alleged Holocaust perpetrators, on censorship against historical dissidents, on the religious dimension of the Holocaust narrative and on motives of all sides involved in this debate that refuses to go away.

In this important volume with 579 short chapters, you will discover—for the very first time uncensored and unconstrained—the bare bones of this skeleton in the West's historical closet.

Be prepared to be mind-boggled and amazed!

Large format (8.5"×11"), 634 pages, hardback, case laminate cover, 579 entries, 357 illustrations (101 color, 256 B&W), bibliography, index, item #1013, **$110** minus 10% for TBR subscribers plus $15 S&H inside the U.S. from THE BARNES REVIEW, P.O.Box 550, White Plains, MD 20695. White Slavery in the Barbary States

This astonishing book provides a fascinating insight into a period of history now largely censored by political correctness—the time when at least 1 million Europeans were seized and sold into slavery by the notorious Black and Arab slavers of North Africa. Charles Sumner provides a full background of the Islamic slave trade in White Europeans and includes little-known details such as how the Muslim pirates seized groups of Pilgrims on their way to North America!

Sumner tells us: "Their corsairs became the scourge of Christendom, while their much-dreaded system of slavery assumed a front of new terrors. Their ravages were not confined to the Mediterranean. They penetrated the ocean, and pressed even to the Straits of Dover and St. George's Channel. From the chalky cliffs of England, and even from the distant western coasts of Ireland, unsuspecting inhabitants were swept into cruel captivity."

Appalled, French King Louis XIV demanded action. Says Sumner: "In 1684, Algiers, being twice bombarded [by the French] sent deputies to sue for peace, and to surrender all her Christian slaves. Tunis and Tripoli made the same submission. Voltaire, with his accustomed point, declares that, by this transaction, the French became 'respected on the coast of Africa, where they had before been known only as slaves'."

The author does point out the evils of slavery worldwide, and tells how Charles V of Spain fought Barbary slavers while granting European traders the right to export slaves to the Spanish colonies in the New World: "It is said that Charles lived long enough to repent what he had thus inconsiderately done. Certain it is, no single concession recorded in history—of king or emperor—has produced such disastrous far-reaching consequences."

A remarkable work which contributes to a greater understanding of the mentality behind slavery—and the reality that Europeans were as much victims of this evil practice as any other people who cry victimhood today.

This 75-page book sells for $10, but can be yours FREE when you renew your TBR subscription!

Bringing History Into Accord With the Facts in the Tradition of Dr. Harry Elmer Barnes

THE BARNES REVIEW

A JOURNAL OF POLITICALLY INCORRECT HISTORY

January / February 2024 ❖ Volume XXX ❖ Number 1

Table of Contents

Patrick Pearse: Forgotten Irish Nationalist

By Marc Roland

4 The Easter Rising, an armed insurrection against British rule in Ireland launched during the week of April 1916, was largely inspired and led by Patrick Pearse. Here is an overview of the life and death of Pearse, one of Ireland's greatest nationalist leaders.

Irish Help Win the Revolution

By Mike Mains

12 "The Fighting Irish" played a key yet overlooked role in America's war of independence from the British Empire. Here is a brief rundown of the important contributions of Irish Americans during the Revolutionary War through the eyes of Phillip Thomas Tucker.

Fr. Leonard Feeney and the St. Benedict Center Revisited

Part One—By Antonius J. Patrick

16 Here is the first part in a two-part series on courageous Catholic dissident Fr. Leonard Feeney. Feeney was a fierce critic of the U.S. alliance with the atheistic Soviet Union and the bombing of Japanese cities. This criticism got Feeney "cancelled."

Was the Hamas Attack Really a Surprise to Israel?

By Vaughn Klingenberg

26 Israel has a long history of staging false-flag attacks to justify military aggression. Here is a perspective on the "surprise" attack launched against Israel by Hamas militants last year from an an astute Mideast observer.

Islamic Scholar Insists Hamas Attack No Flase Flag

By Kevin Barrett, Ph.D.

32 While many in the alternative media claim Israel was involved in staging or allowing Hamas to attack the Zionist state on October 7, 2023, Dr. Kevin Barrett argues Israel's defense and intelligence forces are overrated and the Hamas fighters caught the Israelis off-guard.

A Concise Historical Timeline Of the Creation of Israel

By Al Jazeera

38 In order to comprehend the current conflict in the Middle East, at least a basic historical understanding of the creation of the state of Israel is necessary. That factual historical knowledge is sorely lacking in the broader Western world. Here we rectify that.

One Zionist 'Final Solution' For Ukraine & Palestine

By Pepe Escobar

42 As the U.S.-led proxy war against Russia drags on in Ukraine, Israel is attempting to implement its "Final Solution" to the Palestinian problem in the Middle East with the enthusiastic backing of most D.C. politicians. The Global South, however, led by a budding Russia-China alliance, sides with Palestine.

Holocaust Reparations: A Historical Overview

By John Wear, J.D.

48 How easy is it for "Holocaust survivors" to get reparations? How long have Jewish and/or Zionist groups and individuals been collecting reparations? When will these payments end, and how much has been paid out so far?

National Socialism in America: From 2002 to the Present

By Karl Haemers

58 Here is the fourth and final essay in our very popular series dealing with National Socialist-inspired groups and organizations in modern American history.

Fritsch Examines the Riddle

By David Skrbina

70 Originally written in 1923, Theodor Fritsch's important book *The Riddle of the Jews' Success* is back in a brand new volume prepared by TBR's own Dr. Thomas Dalton. In this book, Fritsch tackles taboo subjects that have as much relevance today as they did when they were first addressed a century ago.

Features:

Personal from the Editor—2
TBR Editorial: Palestine and Ireland—3
The Easter Rising—7
Eoin MacNeill: Irish traitor?—11
The death of Montgomery—13
History You May Have Missed—44-45
***Witness to History* gets high praise**—47
Holocaust Claims Conference—51
Perpetual Holocaust reparations—54
Letters to the Editor—72-78

PERSONAL FROM THE EDITOR

Hoping for a Peaceful MMXXIV

The two-faced Roman god Janus is once again peeking at us through his mysterious doorway, one visage looking to the past, the other gazing to the future. Janus, for whom January is named, was the god of time and transitions, as well as the god of beginnings and endings—especially of war. When his door was open, war was raging somewhere in the Roman Empire. When it was closed, the empire was at peace. Today, it seems, his door is always open, the American Empire sending a constant stream of troops and weapons to far-flung spots across the globe.

Several years ago I was foolish enough to write an editorial wondering out loud whether human beings were advanced enough to reject war as a solution to international problems. I wasn't optimistic, but I always like to enter a new year with some bit of hope. I am allowed to hope, right? Looking around the world today, I think I'm conning myself. Humans may never evolve enough to throw aside the very instincts that put us atop the foodchain in the first place.

But, if I am allowed to hope for 2024, then I hope for at least two wars to end. The first is the one ravaging in Palestine. Israel seems determined to cleanse the western Holy Land of all Palestinian Muslims and Christians. As I write this, 20,000 inhabitants (and counting) of far-western Palestine have been killed, the vast majority of the dead being women, children, the elderly and infirm. The Gaza Strip (Gaza), where this is mostly occurring, is that 139-square-mile sliver of land that originally made its claim to fame as an enormous refugee camp for victims fleeing the Nakba. Those who remain in Gaza today do so because they have nowhere to go or they are fighting invaders. But the civilians are sitting ducks. Tens of thousands more will die if a major power does not step in. I am hoping early in 2024 the United States becomes that power, and works to end this genocide, not abet it.

The other war I would like to see end is still being fought in Ukraine. As many as 1 million Ukrainians have been displaced, 500,000 Ukrainians may have died (soldiers and civilians) and several hundred thousand Russian soldiers are thought to have perished. This war is another godawful affair, with ethnic and cultural brothers killing one another with the most sophisticated weapons man has even devised.

Let's be honest. The U.S. government does not give a rat's derrière about how many Ukrainians die. All our war-fogged leaders want is to "weaken Russia." It has failed. Russia is stronger than ever, despite the worst economic sanctions ever imposed on a nation.

It is now time for the United States to help end the wars in Ukraine and Palestine—not prolong them—through commonsense diplomacy, not precision missiles and AI-guided assassin drones. We know that is a lot to ask of our leaders, but it is, after all, our tax dollars they are using to pay for every dead Palestinian, Ukrainian or Russian. It's time the American people speak up and demand no tax dollars go to fund these wars. That's probably foolish—but you said I could hope.

In this issue of TBR, we present you three inspirational stories of Irish history beginning with our lead story on Patrick Pearse, a prominent leader in the Irish freedom movement. The struggles of the Irish remind us of the current plight of the Palestinians (see John Friend's editorial on page 3), so we also offer a series of thought-provoking, uncensored articles on the events in the Middle East that will get you thinking. That series begins on page 26. ❖

—Paul Angel, Executive Editor

Ireland & Palestine: Brothers in Oppression

At first glance, most casual observers would not identify many similarities between the people of Ireland and the Palestinians living under Israeli occupation. Seasoned observers, however, will clearly recognize that both the Catholic Irish and the Christian and Muslim Palestinians all live under a brutal Zionist occupation, an occupation that jeopardizes the very prospects for their unique peoplehood.

In Ireland and the wider Western world, organized Jewish groups have led the way championing such destructive cultural and social revolutions as: homosexual marriage and the broader LGBTQ+ movement; mass Third World immigration and open borders; radical feminism, taxpayer-funded abortion and the subversion of the traditional family unit; the assault on Christian principles and the undermining of the important role Christianity has played in Western history; public acceptance of pornography and sexual licentiousness; and more.

Indeed, even speaking out against such madness has largely been criminalized in Ireland and other countries in the West, almost exclusively due to Jewish/neo-Marxist lobbying efforts to combat an alleged "explosion of hate speech and anti-Semitism."

All this was made abundantly clear in the wake of a vicious knife attack carried out in Ireland in late November last year against three young Irish children and an adult day care worker. The suspect, Riad Bouchaker, a 50-year-old Algerian national who has lived in Ireland for the past two decades, had not only been previously arrested on a knife-crime charge in 2023 and released, he was also issued a deportation order 21 years ago.

With the help of open-borders advocates and left-wing non-governmental organizations dedicated to advancing the Great Replacement—an "anti-Semitic conspiracy theory," according to the establishment—he was allowed to stay in Ireland and eventually receive an Irish passport. His thank-you present to his host country was this horrific stabbing spree in the heart of Dublin, the capital of the Emerald Isle.

The outrageous knife assault sparked immediate protests among average Irish people, who are increasingly fed up with open borders, mass immigration and the unending stream of so-called asylum seekers entering their isolated island nation. Following a raucous night of protests by irate Irishmen, the mass media and Irish political establishment attempted to censor the foreign identity of the perpetrator—a man who should not have been in the country in the first place.

At the same time, the controlled Irish media expressed contempt not for the attacker but for their own Irish countrymen protesting the obvious culture- and nation-destroying impact of mass Third World immigration.

Immediately, hysterical calls for more "hate speech" laws came from numerous Irish politicians. Dissidents like Conor McGregor—the world-renowned MMA fighter and Irish national hero— who also is a major critic of mass migration to his home country, were placed under investigation for "dissemination of online hate speech."

Critics of the righteous protests against the invasion of Ireland were given a free pass to denounce and slander those calling attention to the madness. Abul Kalam Azad Talukder, a Bangladesh-born migrant to Ireland who serves as a city councilor in Limerick, openly said he'd like to see the anti-migrant protesters "shot in the head" or beaten "until they die." Suffice it to say, the Irish political and media establishment took absolutely no issue with this non-Irishman's hate speech and calls for violence against actual Irish citizens.

Meanwhile, in Palestine, the Christian and Muslims of that historic land have been living under an Israeli regime—aided and abetted by the unlimited financial, military and diplomatic support of the United States—that is dedicated to their ultimate destruction or, if that cannot be attained, expulsion. Following the "surprise" Hamas attack launched on Oct. 7 of last year, an event we have dedicated significant space to discussing in this issue, Israel has engaged in what can only be described as a genocidal ethnic cleansing campaign against the people of Gaza to either kill or displace all non-Jews living there.

According to the World Health Organization, over 90% of the people in Gaza are facing "crisis levels" of hunger as we go to press. (Remember the orchestrated "Great Hunger" waged against the Irish?) Upward of 20,000 people in Gaza have been killed since the Israeli assault on the strip. (Many Irish were hunted down like dogs by the British or enslaved.) Credible reports of mass executions of civilians have emerged while journalists and humanitarian workers and schools, hospitals, and other civilian infrastructure continue to be targets of the Israeli military. (Irish priests and nuns were said to have been murdered in the hundreds by the British occupiers.)

The appalling mass murder spree in Gaza has shocked the world, leading many in the West to wake up to the reality of Zionist oppression both in historic Palestine and their own nations. Israel's slaughter, genocide and ethnic cleansing of the Holy Land would not be possible without unwavering support from the U.S.

As we enter another new year, the world continues to face the same, ages-old foe. May 2024 be the year the people of Ireland and the wider Western world recognize this peril, just as the Palestinians have since their land was seized by Zionist terrorists over seven decades ago. ❖

—John Friend, Assistant Editor

Patrick Pearse

Remembering a great Irish nationalist leader

By Marc Roland

One of the most pristine populations of our imperiled White race is centered on the island of Ireland, home to the Irish people. Accordingly, the Emerald Isle has become the target of Marxist sociopaths determined to render its indigenous inhabitants a minority in their own country, as a necessary precondition for racial extinction.

Anyone in modern "democratic" Ireland who objects to this genocidal agenda is mercilessly punished with stiff fines and a potential long-term imprisonment by government tyrants. They enacted the Prohibition of Incitement to Hatred Act in 1989, which marks an "improvement" in Ireland's "hate-speech legislation" and regulations, according to the Irish government's official October 2019 review of the act.

The act formed "one element in a wider suite of measures across all areas of government which are designed to address hate and intolerance," the review noted. "These measures will span across policies, operational areas, law enforcement and educational measures designed to support a safe, fair and inclusive society, where expressions of hatred and prejudice are not tolerated and are dealt with swiftly and effectively where they occur."

The act essentially criminalized "hate speech," which often amounts to criticism of non-Whites, mass immigration and objection to the systematic displacement of the native Irish people.[1]

"If you strike us down now, we shall rise again and renew the fight. If our deed has not been sufficient to win freedom, then our children will win it by a better deed."—Patrick Pearce

Meanwhile, hordes of immigrants from Africa, Asia and the Middle East are inundating Ireland with street violence and wholesale vandalism. Recent months have witnessed a dramatic surge in alien crimes, accompanied by loud demands by the angry newcomers and their raceless supporters for substituting traditional place names and street signs, even the Irish language, with sub-Saharan, Islamic and Hindu replacements.

The Prohibition of Incitement to Hatred Act cited above was enacted to suppress free speech for Irish citizens alarmed by the demoralizing and often negative impact of non-White immigration on their society and culture. Since then, government enforcers of this draconian law have doubled down in their resolve to race-mix the Irish people out of existence, as soon and as thoroughly as possible, by flinging wide the flood gates of Third World immigration.

Never before in the country's 33,000-year history has her native population stood in greater peril of its life.[2] The early shadows of that existential threat were first observed and effectively opposed during the opening decade of the last century by a man unfamiliar to most American readers, who was, nonetheless, a household name throughout Ireland until he was recently "canceled" by the same Marxist zealots responsible for the Prohibition of Incitement to Hatred Act.

If today they speak of him at all, he is dismissed as "a cynical man, a vain man, a dishonest man, an anti-democrat. He's a proto Fascist."[3] His alleged "sexual immaturity" is heavily nuanced by modern biographers, while psychiatrists suggest he had Asperger syndrome.[4] All these attempts at vilification are mirror images of the character assassination directed against historical American heroes

Immense crowds of mourners were so deeply moved by Pearse's funeral oration for a fallen comrade that Ireland's national rebellion is generally considered to have begun on that day with these powerful words: "And I say to my people's masters: Beware! Beware of the thing that is coming! Beware of the risen people, who shall take what ye would not give! Did ye think to conquer the people? Or that law is stronger than life and than men's desire to be free? We will try it out with you, ye that have harried and held, ye that have bullied and bribed, tyrants, hypocrites, liars!"

by anti-White scandalmongers on either side of the Atlantic Ocean.

The Irish hero they hate most was Patrick Henry Pearse, revered as the Patrick Henry of Ireland—a reference to the Virginia-born American patriot with the same name—by subsequent generations, because both men were martyrs to the independence and survival of their respective Aryan peoples. The Irishman's first and middle names encapsulated a kindred fate that likewise propelled his 18th-century American precursor to self-sacrifice at the hands of the same enemy.

Born in Dublin on November 10, 1879, Pearse grew up surrounded by a rich variety of books collected by his free-thinking, self-educated father—a successful stone mason and monumental sculptor—who encouraged the lad to always question authority. But young Patrick's early and lifelong love for the Gaelic language and indigenous Irish culture, especially as dramatized in Keltic myth, were inspired by his grand-aunt Margaret, herself fluent in Gaelic and something of a nationalist.

Availing himself of the numerous mythology books found in his father's home library, the boy became so conversant in legendary tales of Cú Chulainn, Partholon, Maildune, Balor and all the other ancient gods and heroes that he convincingly impersonated each one, engaging his brother and sisters to participate with him in their juvenile dramatizations of the old deities for the amusement and appreciation of adult audiences. They unanimously applauded Patrick as a young scholar.

In 1896 at age 16, he joined the *Conradh na Gaeilge*, or "Gaelic League," founded for the promotion of Irish culture, then regarded as the only alternative to England's imperial policy of reducing the Irish to obedient colonials. It was here, in the ranks of the Gaelic League, that the adolescent Pearse learned of opposition politics.

An exceptionally facile student, he was awarded a Bachelor of Arts in Modern Languages (Irish, English and French) by the Royal University of Ireland, for which he had studied

two years privately, plus an additional year at University College Dublin. At just 20 years of age, he enrolled as a Barrister-at-Law and was called to the bar in 1901.

His first client was an itinerant poet and songwriter who had been arrested and fined for having his name displayed in "illegible" Irish words on his donkey cart. An appeal was heard before the Court of the English King's Bench, which upheld its guilty pronouncement.

The lost case embittered Pearse, not only for his failure to win an acquittal, but especially because the charge was so flagrantly petty and patently unjust. To him, it epitomized the Irish man's secondary citizenship in his own country and was meant to remind him who governed it. The verdict, he wrote on June 27, 1905, "was, in effect, decided that Irish is a foreign language on the same level with Yiddish."[5]

By then, his exceptional writing skills had elevated him to editor of the Gaelic League's widely read newspaper *An Claidheamh Soluis*, meaning "The Sword of Light." As such, reports he received daily from all parts of the nation gradually persuaded him that Irish identity was being so progressively eroded that it would cease to exist in another generation or two, rendering his fellow countrymen a culturally amorphous populace of non-entities fit only for colonial servitude.

Clearly, immediate and effective counteraction of some kind was vital if Ireland was to survive. Certain that language was intrinsic to a people's self-awareness, he further concluded that preserving the native Irish language from dying out was a cultural priority of existential importance. In order to save the language, children should be educated further in their legacy as a folk, with emphasis on ancient myth and national pride.

To show the way, in 1908, Pearse started St. Enda's School, his own bilingual educational institute for boys. He thereafter founded St. Ita's School for girls, with aims similar to those of St. Enda's. These included fundamental curricula found at conventional educational institutions elsewhere, but with special emphasis on very different subjects, such as courses in the Old Irish language and the neglected and suppressed history of Ireland's cultural greatness, retold in the life-stories of its extraordinary poets and creators.

Pearse's passion for Keltic myth caught fire among his students, who often dressed in theatrical costumes while reenacting the ancient tales of folk heroes, gods and goddesses of pre-Christian days, but also of revered holy men and women, such as Saint Patrick or Saint Brigid. Weather permitting, these performances, with their origins in Pearce's own childhood, were usually staged outdoors.

> The British believed erasing Irish culture would render the Irish better colonial serfs for the empire.

"To accommodate the increased numbers enrolling at the school, Pearse decided in 1910 to relocate St. Enda's to The Hermitage, an 18th-century house set in 50 acres of woods, orchards, a river and lake in Rathfarnham, Dublin," authors Mary and Teresa O'Donnell write. "The project was pioneering in its promotion of child-centered education, creativity and personal development and liberal teaching methods."[6] St. Ita's was similarly established and administered.

Classroom time more commonly gave way to countryside field trips into scenic West Ireland, aimed at impressing the young people with the natural allure of their homeland and acquainting them with its historical, botanical and geological wonders. Physical education was no less important at both St. Enda's and St. Ita's, where hiking and gymnastics were stressed.

More than 50 years later, former students, now pensioners and seniors, recalled their school days at Pearse's unorthodox academies as the happiest years of their lives.[7] The educational experiment won widespread attention and plaudits across the country, even as far as the European continent, but was surveilled with a wary eye by British authorities.

They need not have concerned themselves. For all of the otherwise universal admiration from the general public and professionals alike, the schools were failing financially. The costs of maintaining their high standards were rapidly outpacing Pearce's resources to keep either location functioning. He was thus confronted with the apparent inevitability of foreclosure.

When all seemed lost, a fellow Gaelic League member arranged for Pearse to meet with some American contacts, which might be able to bail out the endangered institutions. In February 1914, Pearce sailed from Ireland on a fundraising trip to the United States. Arriving in New York, he was invited to address a small meeting of potential supporters. But they were far less interested in keeping his radical schools open than "cutting British throats."[8]

Following this first rather low-key presentation, he was lectured by a non-Irish listener:

> See here, young man! Educating a new generation in patriotism is all very well, but if you don't start killing off the English overlords, they'll rub your country down to the nub. Our forefathers tried every peaceful way to gain their liberty. They begged and petitioned for generations, but got nowhere, until they started shooting. That's all tyrants have ever understood. It's no different today. The British Empire is big, and Ireland is small, but we faced the same odds and won—so can you.[9]

The Easter Rising

"The lawyers have sat in council, the men with the keen, long faces, said, 'This man is a fool,' and others have said, 'He blasphemeth!' And the wise have pitied the fool that hath striven to give a life in the world of time and space amongst the bulks of actual things, to a dream that was dreamed in the heart, and that only the heart could hold. Oh, wise men, riddle me this: What if the dream come true?"—Patrick Pearse on the eve of the 1916 Easter Rising. (Above, Irish prisoners are rounded up during the "Rising.")

U.S. sentiment had always been hostile toward England, but it was heated to higher temperatures during the decades following the Civil War, when Britain's covert participation in the divisive conflict was made known and British involvement in Abe Lincoln's assassination was widely suspected. Pearse understood that not a penny could be had from these Yanks unless he catered to their enthusiasm for an armed insurrection for liberating Ireland from the imperialists based in London.

Accordingly, his public speeches grew more revolutionary and impassioned, his audiences larger and increasingly enthusiastic. In the process, he surprised himself by becoming a persuasive orator. With each mass rally, his spirit invigorated by the encouraging cheers of thousands, he grew more deeply convinced that Irish liberty could only be had from a national uprising. Pearse left Ireland as a mild-mannered schoolteacher begging for money. He came back as an eloquent revolutionary demanding firm action.

In an article for *The Sword of Light* titled "The Coming Revolution," he wrote:

> As to what your work as an Irish Nationalist is to be, I cannot conjecture; I know what mine is to be and would have you know

> yours and buckle yourselves to it. And it may be (nay, it is) that your and mine will lead us to a common meeting-place and that, on a certain day, we shall stand together with many more beside us, ready for a greater adventure than any of us has yet had, a trial and a triumph to be endured and achieved in common.[10]

Following his return home, Pearse was sworn into the secret Irish Republican Brotherhood (IRB), an organization dedicated to the overthrow of British rule in Ireland and its replacement with an Irish Republic. His talents as a writer and speaker, augmented by his new-found fame in the United States, soon gained him a place on the IRB's Supreme Council.

When he was shortly thereafter promoted to the Volunteers' director of military organization, he became the highest-ranking Volunteer in the IRB membership and instrumental in the latter's commandeering of the remaining minority of the Volunteers for the purpose of rebellion. Its optimum prospects for success seemed to have arrived on August 4, 1914, when the British were preoccupied with their fresh declaration of war against Germany. But they were not too distracted from safeguarding their back door in the west, where London guaranteed "home rule" for Ireland, as soon as victory was won with the help of her Volunteers.

As intended, the ruse undermined Irish resistance by splitting opinion between 200,000 young men who marched off to France only because they believed they were fighting for the independence of their homeland and others aware that the British, given their centuries-long track record of deceit, were not be trusted. The latter refrained from the continental war in which 35,000 of their fellow countrymen lost their lives. The "home rule" for which they died instead became the fractious and divisive partition of Ireland within the British Empire.

By mid-1915, Pearse sat on the IRB's Supreme Council and its secret Military Council—the core group that began planning for a nationwide uprising, while a life-and-death struggle raged on the Western front in Europe during World War I.

"War is a terrible thing, and this is the most terrible of wars," he said at the time. "But this war is not more terrible than the evils it will end or help to end. England's difficulty is Ireland's opportunity."[11]

On August 1, he gave a graveside oration at the funeral of an old Fenian, Jeremiah O'Donovan Rossa. Fenians were members of a 19th-century revolutionary nationalist organization. Fenians like Rossa had staged an unsuccessful revolt in Ireland in 1867 and were responsible for isolated revolutionary acts against the British until the early 20th century, by which

Central Dublin was virtually demolished by the Easter Rising of 1916. "Blood is a cleansing and sanctifying thing, and the nation that regards it as the final horror has lost its manhood. There are many things more horrible than bloodshed, and slavery is one of them. We have kept faith with the past and handed on its tradition to the future."—Patrick Pearse

time the word "Fenian" served as an umbrella term for the Irish Republican Brotherhood.

Pearse's words were among the most famous he ever uttered and did more to move the country closer to rebellion than any previous public event:

> Our foes are strong and wise and wary; but, strong and wise and wary as they are, they cannot undo the miracles of God that ripen in the hearts of young men the seeds sown by the young men of a former generation. Life springs from death; and from the graves of patriot men and women spring living nations.
>
> The Defenders of this Realm have worked well in secret and in the open. They think that they have pacified Ireland. They think that they have purchased half of us and intimidated the other half. They think that they have foreseen everything, think that they have provided against everything.
>
> But, the fools, the fools, the fools! They have left us our Fenian dead and, while Ireland holds these graves, Ireland unfree shall never be at peace.[12]

With inspiring words such as these, Volunteer enlistments soared. Between December 1914 and February 1916, its rank and file rose from 9,700 to 12,215 recruits.[13] Over the next nine months following his fiery eulogy for Rossa, Pearse became generally recognized as the personification, spokesman and leader of the rebellion as much for his poetically inflammatory speeches as for a series of attractively written pamphlets he published with broad, popular success.

They were reminiscent of Thomas Paine's influential pamphlet titled *Common Sense*, which did so much, 140 years before, to give ideological cohesion and inspiration to the patriotic cause of American independence. Both men pointed out that only sufficient personal courage for armed force could remove the alien stranglehold. However, the void left by its withdrawal needed to be filled with a higher worldview, as expressed, no longer by obsolete despotism but with a constitutional republic—in Ireland's case, a folkish or specifically ethnic republic of, by and for the Irish people.

British troops fire at Irish Volunteers during the Dublin insurrection of 1916. "When I was a child of 10, I went on my bare knees by my bedside one night and promised God that I should devote my Life to an effort to free my country. I have kept the promise. I have helped to organize, to train and to discipline my fellow countrymen to the sole end that, when the time came, they might fight for Irish freedom. The time, as it seemed to me, did come, and we went into the fight. I am glad that we did."—Patrick Pearse after a sentence of death was passed on him at his English court martial.

On April 22, 1916, acting in the name of the IRB, Pearse issued orders to all Volunteer units throughout the country for three days of maneuvers, beginning Easter Sunday—the signal for a general uprising, now known as the Easter Rising.

Some of his fellow commanding officers on the Supreme Council lost their nerve when the moment of decision arrived. The most fateful of these was Eoin MacNeill, the Volunteers' Chief of Staff. He issued a countermand to all Volunteers, canceling the

Irish prisoners are marched into captivity after the collapse of their Easter Rising. "I have just done one of the hardest tasks I have ever had to do. I have had to condemn to death one of the finest characters I have ever come across. There must be something very wrong in the state of things that makes a man like that a rebel."—Maj. Gen. Charles Blackader, the British officer who chaired Pearse's court martial.

mobilization directive issued by Pearse. MacNeill threatened to do everything he could to prevent it, short of informing the British. He did precisely that, however, by publishing his contrary orders in bold headlines on the front pages of every Sunday newspaper in Dublin.

Although he was promptly relieved of command by the Supreme Command, his countermanding order had already done its fatal damage by substantially reducing the number of Volunteers who turned out. Their ranks had been cut by nearly three-quarters, and confusion was naturally rife among those who reported for duty.

But with the otherwise surprised British now alerted, Pearse seized what was left of the initiative and ordered the Rising to proceed the next morning, Easter Monday, April 24, 1916. Whatever doubts there may have been at the time concerning the rebels' morale in view of their attenuated circumstances, they were dispelled when the undaunted and enthusiastic Volunteers unanimously elected Pearse as president of the Irish Republic and commander-in-chief of its army.

"In all things," he confidently quoted the German genius Wolfgang von Goethe, "it is better to hope than despair," then read the Proclamation of the Irish Republic, which he himself had drafted, from outside the General Post Office, headquarters of the Easter Rising.[14]

During the ensuing six days of intense, bitter fighting, the rebels seized strategically important buildings in Dublin, concentrating rifle fire on routes into the city center, where they ground the British advance to a crawl, inflicting many casualties. Isolated rebellions flared up in other parts of Ireland, but the uncertainty and disorientation engendered by MacNeill doomed them all to defeat.

Some wore Irish Volunteer and Citizen Army uniforms, while others dressed in civilian clothes with a yellow Irish Volunteer armband, military hats and bandoliers. They were armed mostly with rifles (especially 1871 Mausers), but also with shotguns, revolvers, a few Mauser C96 semi-automatic pistols and grenades. Against these, the British army brought in thousands of reinforcements, as well as artillery and even a gunboat, the *Helga*, that steamed down the River Liffey to lob 75 mm shells at the insurgents in downtown Dublin. The main rebel positions were thus gradually surrounded and bombarded with cannon fire.

In less than a week, the inner city had been reduced to charred ruins, with some 500 persons killed, more than half of them non-combatants. In excess of 2,600 had been wounded, including at least 2,200 civilians and rebels and at least 370 British soldiers

and 29 policemen. About 40 of those killed were children. To avoid further bloodshed and out of ammunition, Pearse agreed to an unconditional surrender on Saturday, April 29.

He was among 187 people taken prisoner and tried for treason on May 2. Their courts martial would be held in secret and without defense attorneys, which English Crown law officers later ruled to have been illegal. Some of those who conducted the trials had commanded British troops involved in suppressing the uprising, a conflict of interest that the Military Manual prohibited.

Ninety were sentenced to death, executed by firing squad at Kilmainham Gaol, between May 3 and 12. The first of these was Patrick Henry Pearse himself.

"We seem to have lost," were his last words, "We have not lost. To refuse to fight would have been to lose. To fight is to win."[15] ❖

Eoin MacNeill: Traitor?

Eoin MacNeill, the Volunteers' own chief of staff, effectively sabotaged 1916's Easter Rising by countermanding its marching orders. "I want you to see to it that our people know of [MacNeill's] treachery to us."—Rebel leader Tom Clarke to his wife Kathleen on the day before his execution.

How the Irish Helped Win the American Revolution

By Mike Mains

"One of the greatest mysteries of American history has revolved around the intriguing question of how Gen. George Washington and his revolutionaries could have possibly prevailed over a mighty British Empire at the height of its power and prosperity." So begins *How the Irish Won the American Revolution: The Forgotten Heroes of America's War for Independence* by Phillip Thomas Tucker. It's a compelling book in which this author found many little-known historical tidbits and a much-needed new take on the Revolutionary War.*

Popular folklore concerning our country's founding portrays the Revolutionary War as one of English colonists fighting English soldiers. What's overlooked is the huge impact that Irish American soldiers had in defeating King George's boys way back when. "The Fighting Irish," indeed.

In truth, Irish Americans made up a large percentage of George Washington's army. "So many Celtic-Gaelic soldiers filled the Pennsylvania Continental Line that it was widely known as the Line of Ireland at the time: one of America's largest and most distinguished combat units," says Tucker.

The first American monument erected in honor of a fallen war hero was to an Irishman, Maj. Gen. Richard Montgomery, who was killed while leading his men in battle. Few people are aware of the surprisingly high number of generals on both sides who were killed in action while leading their troops on the front lines.

HERCULES MULLIAN
Irish spy saved Washington.

Today, American generals prefer to remain far behind the lines, accumulating ribbons and medals without ever seeing enemy action. In several shameful cases, American generals have actually abandoned their men on the battlefield.

OLD GRUDGES DIE HARD

One reason why the Irish fought so hard in the Revolutionary War was their longstanding hatred of the English earned by enduring the vicious treatment they received from their British overlords dating back centuries. One such villain who comes to mind is England's Sir Humphrey Gilbert, known as the "scourge of Ireland," and a enthusiastic participant in the Tudor conquest of the 1500s.

"If an Irish castle, fort or town refused to immediately surrender, he then put every 'man, woman and child of them to the sword,' in his own words," Tucker writes.

Gilbert had the heads of his Irish victims cut off and laid side by side along the entranceway to his tent "to invoke fear among the Irish people."

There was also Oliver Cromwell, widely regarded as one of the most important men in the history of the British Isles, who led a particularly brutal military campaign against the Irish in 1649.

"No English name was more bloodstained and unforgettable in Irish history than Oliver Cromwell," Tucker explains. "During his ruthless invasion of Ireland, he turned his righteous wrath on Irish Catholics, especially priests who were killed out-of-hand in a Protestant crusade to conquer the Green Isle in the most brutal way."

After arriving in Ireland, with Cromwell and his men "landing in Dublin with war banners flying at the head of an immense invasion force," he pursued a "holy mission 'to extirpate the idolatrous' Irish Catholics without mercy," Tucker notes. "Thousands of Irish Catholics, including civilians and women, were killed on Cromwell's orders."

Thus, it's no surprise that the Irish fought with such zeal against the

English in the Revolutionary War. Many of their ancestors and relatives had been slaughtered indiscriminately by the English in their home country. Additionally, many had seen their land stolen, while countless were forced into indentured servitude, an inconvenient fact rarely mentioned in modern American schools where the history of Black slavery is prioritized.

Under English rule, Irish citizens were not allowed to own land, practice law, hold political office, practice Catholicism, teach school or even attend school. Transplanted across the ocean, these Irish Americans were seething with resentment and eager to extract revenge for what the English had done to them. Thus, the Irish were determined not to lose their newfound freedom to the British yet again.

"Here, in thousands of isolated cabins and small frontier settlements, the seeds of American independence took deep root long before the American Revolution's beginning," Tucker relates. "Once hostilities erupted, the Scotch-Irish and Irish joined the struggle for American independence en masse in an instinctive and collective response."

It wasn't only Irish soldiers who contributed to the war effort. Tucker writes:

> Outside the army's ranks, Irish contributions were as notable as they were extensive. Northern Ireland-born Hercules Mulligan, a former leader of New York City's Sons of Liberty, became one of Washington's most effective spies. He twice saved Washington's life after acquiring timely intelligence to thwart dual plots on the general's life.

Irish merchants also played a part, particularly those engaged in trade between Ireland and Philadelphia, a major trading hub on America's east coast that is intimately associated with America's founding.

"Economic contributions of the Irish were as vital to success as sacrifices on the battlefield," Tucker points out.

The Death of Richard Montgomery

Irish-born Gen. Richard Montgomery is shown above, mortally wounded during the battle to take Quebec in 1775, in this W.P. Snyder-inspired illustration. That Montgomery gave his life for freedom matters not to young liberals of today, however. More than 1,000 students of Richard Montgomery (RM) High School in Rockville, Maryland signed a petition to have his named removed from their school: "RM High School students deserve a namesake that truly represents them … [but] he no longer deserves a place on the front of our school." Students couldn't get past the fact Montgomery allegedly owned slaves.

BATTLE OF KINGS MOUNTAIN

One critical battle of the Revolutionary War took place at Kings Mountain, South Carolina on October 7, 1780, where a patriot militia composed of numerous Irishmen defeated a significantly larger Loyalist militia commanded by British Maj. Patrick Ferguson. *How the Irish Won the American Revolution* describes the lead-up to the battle:

Gen. Daniel Morgan's men surge to victory at a crucial moment in the Battle of Cowpens.

PAINTING BY DON TROIANI

REV. SAMUEL DOAK
Inspirational Scotch-Irish pastor.

These citizen-soldiers in buckskin, homespun cotton and Indian moccasins, including Maj. William Candler who had been born in Belfast, Northern Ireland, were partly inspired to do the impossible against the Loyalists by the righteous words of Rev. Samuel Doak. …

Reading the words from the Holy Bible (Book of Judges) before the bowed frontiersmen, who wore tomahawks in leather belts and with long rifles by their side, Doak emphasized the urgent need for his devoted followers to wage a holy war with the "Sword of the Lord and of Gideon."

Rev. Doak's emotional and righteous appeal "inspired the most seemingly godless of men, who looked like they had never stepped into a church or said a prayer in their lives" on to victory.

Maj. Ferguson was shot seven times and killed in the battle. The Loyalists surrendered, securing the Americans a major victory that proved decisive. "Most importantly, the remarkable success at Kings Mountain was a major turning point of the American Revolution, leading the way to the final showdown at Yorktown," Tucker says.

HEROES BORNE OUT OF BATTLE

Unfortunately, not enough Irish-Americans and certainly not enough Americans know of the numerous exploits of brave Irish men and women doing their part for our independence. For instance, there's the story of Sgt. Timothy Murphy, the army's best sharpshooter and the American Revolution's most famous rifleman. Murphy earned his reputation by adeptly picking off English generals and officers:

> Murphy gained a widespread reputation for shooting down more than forty British soldiers, mostly at long range. But these were no ordinary enemies of America who fell victim to Murphy's skilled marksmanship. As he repeatedly demonstrated, these finely uniformed leaders, especially officers mounted on horseback, made perfect targets.

Then there's William Kennedy, a teenager Tucker tells us was "widely considered one of the best shots in South Carolina." Kennedy played a crucial role in battles fought all across South Carolina.

And there's the case of the valiant acts of 17-year-old Susan Twitty. She spotted a Loyalist aiming his flintlock rifle at her brother William and managed to pull her sibling down just in time to save him from the bullet that would have killed him. She then spotted another Loyalist in a vulnerable position and yelled to her brother, "Now's your chance—shoot the rascal!"

Due to their fighting spirit, Irish Americans quickly became some of the army's greatest leaders. Frontiersman John Stark was one such individual. Stark quickly "became one of Washington's best fighting generals and possessed a brilliant tactical sense that meshed with a natural aggressiveness on the battlefield," Tucker says. "Such characteristics made the unconventional Stark something of a Keltic renegade because he possessed the single-minded goal of winning independence at all costs."

Stark played an important part in the Battle of Bunker Hill, where "he orchestrated a clever ambush" by first masking his men behind clumps of hay. Tucker describes Stark's subterfuge:

> Relying on a trick not found in European military textbooks and manuals, Stark then set a series of stakes in the ground before his defensive line so that the exact range was established for his marksmen to open fire once the British advanced to reach the deadly point. Fairly lusting at such a splendid martial display of courage and discipline, Stark allowed his opponent to get as close to his position as possible before yelling at the top of his voice, "Boys, aim at their waistbands!"

Another great Irish commander of the war was Gen. Daniel Morgan, whose "innovative tactics at the Battle of Cowpens were among the most brilliant of the American Revolution."

Gen. John Stark, whose mother was Irish, played an integral part in defeating the British in the Revolutionary War.

Despite carrying scars on his back from 499 lashes he received for "striking an abusive British officer during the French and Indian War," Morgan was a rare wartime leader who took no revenge on captured soldiers. He considered their defeat in battle to be sufficient retaliation.

Whether or not you have Irish blood coursing through your veins, *How the Irish Won the American Revolution* is a must-read book. You owe it to yourself to see what a tremendous debt of gratitude this country owes to our Irish ancestors. ❖

*The 432-page book is available from TBR Book Club for $18. See ad at right.

Mike Mains is an independent researcher and author of numerous books, including *The Impostor Sister Lucy: The True Story of Our Lady of Fatima*, a detailed exposé of how the Vatican replaced the real Sister Lucy of Fatima with an impostor, and *How to Go to Heaven: Your Proven, Step-by-Step Plan to Achieve Eternal Salvation* along with two companion books *How to Go to Heaven for Teen Boys* and *How to Go to Heaven for Teen Girls*. He focuses primarily on the hidden and suppressed history of America, the history of the Catholic Church and the sinister forces controlling Hollywood.

How the Irish Won the American Revolution:

Forgotten Heroes of America's War of Independence

By Phillip Thomas Tucker. When the Continental Congress decided to declare independence from the British empire in 1776, 10% of the population was from Ireland. By 1790, close to 500,000 Irish citizens were in America. They were very active in the American Revolution, both on the battlefield and off, yet, the important contributions of the Irish on military, political and economic levels have been long overlooked and ignored by generations of historians. New evidence now reveals that Washington's Continental Army consisted of a far larger percentage of Irish soldiers than thought—between 40% and 50%—who fought during the most important battles of the Revolution. Irishmen like John Barry, the colonies' foremost naval officer; Henry Knox, an artillery officer and future secretary of war; Richard Montgomery, America's first war hero and martyr; and Charles Thomson, a radical organizer and Secretary to the Continental Congress were all of Irish blood. Without their timely and disproportionate assistance, America almost certainly would have lost the fight for its existence. Fr. Leonard Feeney and the St. Benedict Center Revisited

Here is part one of a two-part series reevaluating a highly respected Irish Catholic dissident—respected, that is, until he was "canceled" by the Catholic Church and mainstream academia.

By Antonius J. Patrick

More than 70 years ago, on February 13, 1953, the Supreme Sacred Congregation of the Holy Office issued the decree which excommunicated the Rev. Father Leonard Feeney, S.J., (1897-1978). The Holy Office's decision was the culmination of what had become a heated and sometimes violent controversy which began in earnest in 1949 over the issue of *extra ecclesiam nulla salus* (outside the Church there is no salvation).

A number of learned Catholics believe that the excommunication was invalid as was Feeney's silencing by the Boston Archdiocese and his expulsion from the Jesuit order since none of them followed proper canonical procedures.

In his publications—including his newsletter *The Point*, which ran throughout the 1950s—lectures, sermons, and his association with the St. Benedict Center in Boston, Feeney courageously spoke out about the growing power of the Jews in America and the Church's ecumenical and accommodating approach to them long before Vatican II.

FR. LEONARD FEENEY
Outspoken Catholic priest.

Besides discussing Jews, Feeney was an ardent anti-Communist, but, unlike Cold War warriors such as William Buckley, he questioned, as did other members of the St. Benedict Center, America's alliance with Josef Stalin during World War II. The priest also spoke out against America's decision to incinerate Hiroshima and Nagasaki with nuclear weapons, which he considered a war crime. Furthermore, he warned about cultural Marxism, which was making inroads in American higher education, most notably at Harvard University, but also in Catholic schools as well.

As history unfolds, it has become clearer that the "silencing" of Feeney by the Church and his unjust expulsion from the Jesuit order of which he was one of its most well-known members at the time, paved the way, in part, for the revolutionary changes that took place at the Vatican II Council and in its aftermath.

FR. FEENEY'S EARLY YEARS

Feeney was born in Lynn, Massachusetts in 1897 to Irish parents, although his father had Spanish lineage. He had two brothers who became priests and one sister. A precocious young man, he entered the Jesuit order as a novice at 17 and became a priest in 1928. He was sent to England for graduate work at Oxford and, at the time, began to publish both in prose and poetry.

"So successful did he assimilate

Devastation at Hiroshima

Fr. Leonard Feeney was appalled that the United States had detonated atomic bombs on two Japanese cities with devastating loss of civilian life. He also objected to the United States allying itself with the brutal and atheistic Soviet Union. His criticism of U.S. policy earned him the wrath of the pro-war establishment which then tried to "cancel" him. Above, an Allied reporter views the massive destruction in Hiroshima, Japan, on September 8, 1945, just a month after the bomb was dropped.

all that he was taught," writes Catholic journalist Gary Potter, "the day would come when he was hailed by a Jesuit provincial as 'the greatest theologian we have in the United States by far'."[1]

In the coming years of controversy, instead of praise, Feeney's theological acumen would be severely questioned by the Jesuits.

Feeney began to also attract a national following in the 1930s with his move to New York and from a string of books and poetry that were being read not only by Catholics but also by the secular world. He was a highly sought-after lecturer and conversationalist and was referred to as the "American Chesterton."

The priest was also heard by millions on the Sunday evening program *The Catholic Hour* and hobnobbed with celebrities and literary luminaries such as T.S. Eliot, Noel Coward, Fulton Sheen, Sinclair Lewis, Dorothy Thompson and Jacques Martain. Feeney, however, was no flatterer of the various high-profile people he associated with and, even at this stage of his career, sometimes belittled the most revered.

In 1936, while living in New York City, he was appointed to the prestigious post as editor of the Jesuit magazine *America*. While there, he made numerous converts, not only among the upper classes, but dock workers, janitors, waiters and cabdrivers—several of whom were Jewish.

THE ST. BENEDICT CENTER

Fr. Feeney returned to New England in 1940, the same year Catherine Goddard Clarke, who would later become a nun, and two other individuals established the St. Benedict Center. The original center opened in Harvard Square in Cambridge, Massachusetts and provided reading materials and, later, courses and lectures on Catholic subjects. It was approved and often praised by the local ecclesiastical authorities and it also received a blessing from Pope Pius XII. Over time, it expanded its operations and attracted followers worldwide.

Feeney was asked to join the staff and began giving talks and lectures. He was eventually assigned to the center full time. He kept up his priestly duties. This included performing baptisms and marriages, leading Mass, hearing confessions and making numerous converts.

At first, the success of the center was not a problem, as it still was supported by the local Church authorities, with some of the hierarchy

attending Feeney's talks. Over time, and with the increasing popularity of the center and the priest's more pointed critiques of liberal Catholicism, concern grew not only at Harvard but Catholic schools, as well. Many students who came to the center complained about what was being taught, with parochial ones being just as bad off, as Sister Catherine Clarke surprisingly found out:

> Our mistake at this time lay in our misconception of conditions in Catholic colleges. We thought them much better than they were, and it took us two years to learn how heavy were the inroads which Liberalism had made into Catholic education.[2]

Ever since he had come to the center, Feeney had warned about the "evils in postwar secular education." The priest received confirmation of this by speaking directly with students at the center.

"The students to whom [he] spoke were well aware of the truth of what he was saying; indeed, they had complained to him many times of their dissatisfaction and disappointment with their courses," Clarke revealed in her history of the center, originally published in 1950.[3]

A number of students courageously dropped out rather than continue to be indoctrinated. The decision came at a considerable personal cost since prestigious degrees from Harvard and the like pretty much guaranteed lucrative future employment opportunities. Yet, what shocked Clarke and other center members was that when these same students dropped out of the secular schools and decided to enroll in Catholic schools, they found little difference:

> We were completely unprepared, therefore, for the return of these students who transferred to Catholic colleges, bearing the same tale of disappointment and dissatisfaction we had heard from them before. They had found not too much difference between the college they had left and the college to which they had transferred.[4]

Nothing distinguished a Catholic higher school of education from its secular counterpart. This shows that the liberalization of the Church and its schools was going on well before Vatican II in the 1960s:

> For both colleges were similar in aim and in outlook, in presentation of material and in subject matter. The Catholic college, it is true, did not utter such explicit apostasy. Its apostasy was more implicit and took the form of a wholesale aping of secular standards.[5]

The conversions, his criticism of higher education (both Catholic and non-Catholic) and students prematurely leaving their studies all contributed to the eventual excommunication of Feeney. It came to a boiling point with the issuance of the center's newly founded magazine *From the Housetops* and an article by one of its contributors Dr. Fakhri Maluf, titled "Sentimental Theology."[6]

> It took years to learn how heavy were the inroads Liberalism had made into Catholic education.

While the courses and lectures by Feeney and the center's staff were given verbally, Maluf's piece was in black and white and therefore could not be easily dismissed. This gave Feeney's opponents the opportunity to question his stance on the salvation doctrine. However, a closer look at the situation shows that he had been doing more than just expounding on *extra ecclesiam nulla salus*—he had been exposing and criticizing liberal Catholicism.

This is what so many contemporary traditional Catholics miss about Feeney. It was not the salvation doctrine by itself, but the entire Modernist program he saw unfolding before his eyes. Instead of praise for courageously speaking out against it at great personal cost, Feeney has been treated with contempt, both then and now.

In their campaign to silence him, however, his enemies concentrated on the salvation doctrine and, although there was never an official proclamation on the matter from the Vatican despite Feeney's pleas, it was enough to divert attention away from his overall criticism of liberal Catholicism.

In the end, Feeney was excommunicated not for a doctrinal matter or because he held a heretical belief. Rather, he was excommunicated for his disobedience to superiors, which many view with skepticism.

WORLD WAR II

There can be little doubt that WWII fundamentally changed the United States. While America participated in WWI, the conflict was mercifully over before the country would commit more troops or have its economy and society fully mobilized for the war effort. Yet, WWI set the stage for the next cataclysm that the U.S. fully participated in, the effects of which can still be felt today.[7]

While there was deep and bitter disillusionment in America in the aftermath of World War I which lasted right up until the bombing of Pearl Harbor, the outcome of World War II on the national conscious was quite different. Ever since hostilities ceased in 1945, World War II has been seen as the "good war" fought by the "Greatest Generation."

This interpretation has been widely advanced by the forces that pushed the country into the fray to begin with and, afterward, by academia, the educational establishment, the entertainment industry and nearly all of the opinion makers of American society. Anyone questioning U.S. involvement in the war or attempting to present a balanced account of the Axis powers' own motivations or

their reasons to enter the conflict is labeled an anti-Semite.

While there were many connected with the St. Benedict Center who served in the great crusade, some raised questions about the morality of U.S. involvement in the struggle, especially as it teamed up with the atheistic and Communist regime of Josef Stalin. While the alliance with the Soviet Union caused soul searching among some center members, it was America's horrific decision to drop nuclear bombs on the cities of Hiroshima and Nagasaki that provided a catalyst for Feeney and the center to battle for the doctrine of *extra ecclesiam nulla salus*.

While not strictly a matter of theology, the use of nuclear weapons on civilian population centers, especially at that point in the war when the U.S. had, for all intents and purposes, defeated Japan militarily, and the fact that it gave its enemy little opportunity to surrender with a measure of dignity, was certainly a moral issue and one which struck a chord at the St. Benedict Center and with Feeney. What aroused the priest's interest was not only his belief in the immorality of the decision, but the silence from his fellow clergy, the Catholic press and lay intellectuals.

Clarke, like Feeney and others associated with the center, was horrified when news broke about the bombing of Hiroshima:

> I read about it and could not go on. I returned to the St. Benedict Center and told them that hundreds of thousands of women, children and old men had been killed or injured by something called an atom bomb which had been dropped on a teeming Japanese city from an American airplane.[8]

The center released a statement which Clarke paraphrases. The center "was deeply grieved by the news of the atom bombing in the evening papers," and its members and leaders "could not find it in [their] hearts to rejoice over the wholesale slaughter of innocent people."[9]

Prior to the bombing, U.S. military personnel who had visited the center spoke about how they were taught that the Japanese were "subhuman." Clarke recalls that, after these discussions, she was not entirely surprised by the bombing. Since the Japanese were considered subhuman, they were not "endowed" with natural rights and protections and, therefore, the attacks could be justified. The military men also gave "technical reasons" for the bombing of Japan.

Fr. Feeney is shown at the entrance to the St. Benedict Center.

Clarke and other St. Benedict Center members vigorously opposed all the arguments put forth and understood the ominous consequences that were to follow:

> The atomic bombing of Japan, to our thinking, was un-Christian. The discussion which followed this announcement lasted a long time. … We reiterated our ethical and Catholic indignation. Actually, we said, we were fearful for Western civilization.[10]

President Harry Truman's decision to use nuclear weapons on Japan had a profound impact on the St. Benedict Center as it did for many thoughtful Americans:

> We were never quite the same … after the dropping of the atom bomb. It seemed to have shocked us awake. It was almost as if we saw the life around us for the first time. The scales fell from our eyes, and we beheld clearly as actualities many things which we had dreaded might one day be the outcome of our exclusively humanitarian society.[11]

All of the incessant propaganda by the Allies of defending "freedom and democracy" while ridding the world of the Axis menace and avenging their alleged "countless atrocities" was exposed as a cruel farce. The vitriol which emanated from the Allied propaganda machines set the stage for the dropping of the atomic bomb and for identifying the Japanese as subhuman.

Historian Thomas Goodrich describes the atmosphere at the time:

> Simply, Japanese and German propaganda never came close to matching Allied propaganda in pure hate; Japanese and German propaganda never had the dripping venom and murderous malice that American and British propaganda had then and, for the most part, still has now.[12]

With the incineration of Hiroshima and Nagasaki, the U.S. had committed a barbaric act of savagery that it had often accused its foes of doing. In this writer's opinion, it was a clear-cut and entirely unnecessary genocide authorized by the president, an action that will truly "live in infamy," and one which America's former chief executive will no doubt eternally pay for.

While Clarke could not have known it at the time, the Allies had already engaged in aerial genocide with their indiscriminate bombing of Japanese and German cities. Some scholars contend that the repeated fire-bombing of Tokyo was more devastating than what took place in August of 1945.[13] Certainly, the bombing of German cities, such as Hamburg and especially the beautiful and strategically insignificant city of Dresden, were violations of nearly every Christian tenet in the conduct of warfare.

With the suppression of wartime information unfavorable to the Allies by Western governments and a press that was decidedly pro-war, Clarke and most Americans were completely unaware of the peace offers that the Third Reich had made in hopes of ending the conflict and its attempts to limit and restrict aerial bombing to military installations.[14]

It was after the war, and then only through the work of Revisionist scholars and publications, that these inconvenient facts were made known —many of which the general public still remains ignorant.

Certainly, there was a vast amount of literature on just war and the treatment of non-combatants in Catholic thought (see St. Augustine, for example) that should have invoked a response. Instead, there was mostly silence with the only outcry coming from secular Revisionist scholars, including, most prominently, Dr. Harry Elmer Barnes, the namesake of this magazine.[15]

CATHOLIC SILENCE

Despite the obvious violation of Christian rules for the conduct of war, there were very few among the Catholic hierarchy or laity who condemned the act outside of the St. Benedict Center. This was a revelation to Clarke and Feeney and proved to be an ominous portent of things to come. Instead of debating the issue, the Church began to embrace the "new age, the atomic age, born out of the abandonment of a Christian principle!"[16]

> Feeney and many other Christians were horrified when news of the bombing of Hiroshima broke.

Why was this the case? Was it because the nation's Catholics had become so wedded to the American state that it would not oppose its actions whether right or wrong?

It was not, however, until Feeney came to the St. Benedict Center and began to criticize Modernism that those like Clarke saw the world from a different, darker perspective:

> Father Feeney had despaired of doing anything about Catholic Liberalism until he was at the center for several years. When so much came clear to us about the state of a world which would permit the dropping of the atom bomb on Japan … Father knew we at last saw the problem.[17]

With like-minded people surrounding him and away from the liberalism which had infected the Jesuits and could be found in most Catholic colleges and seminaries, Feeney began his fight:

> And when Father had, finally, strong and holy men and girls (become so under his direction) who were as eager as he was to work for the truth, then he knew that something could be done.[18]

ATHEISTIC SOVIET UNION

Another closely related issue which had been festering at the center was the American alliance with the Soviet Union. The Jewish-led and inspired Bolshevik revolution brutally murdered the tzar and his family, established a vast police state terrorizing, imprisoning and murdering millions, and forcibly collectivized Russian agriculture, resulting in massive famines and major suffering.

The establishment of the Soviet Union, an avowed atheistic, anti-Christian state that promised to export Communism throughout the world, and its subsequent alliance with the United States was baffling to critical thinkers like Feeney, as it was to other thoughtful observers.

Despite all of this—and the fact that the U.S. itself had, for a time, not recognized the Soviet regime—the Roosevelt administration eventually aligned with Stalin and provided him with a tremendous amount of aid.

Had it not done so, or better yet, stayed out of the war, the USSR would most likely have collapsed, and the post-WWII world would have looked decidedly different. [See TBR, July/August 2023, "American Support for Stalin Before WWII" and "American Support for Stalin During & After WWII" by John Wear, J.D.—Ed.]

Writing shortly after the war, when there were fears of an infiltration of Communist agents in America, Clarke spoke about the center's courageous stand in questioning U.S.-Soviet relations:

> There was worried talk about the revival of Communism. We had never been happy about America's

> alliance with Russia during the war, and we were unpopular, often, for saying so.[19]

Similar to its silence on the atomic bombing of Japan, the American Catholic hierarchy said little about the nation joining forces with an outright atheistic state hostile to Christianity. In fact, the American Catholic leadership enthusiastically joined in the crusade. After the war, there were some popular anti-Communist figures such as Bishop Fulton Sheen but, by then, it was too late. Nor did any of these spokesmen question why the United States supported the Soviet Union in the first place.

Neither did the Church ask more fundamental questions of itself about the war. Was it a battle to advance the cause of Christianity? Was the war in defense of Christendom as the Crusades once undertook, or the defense of Vienna in 1527 and 1683 against the Ottomans? What did these anti-Communist warriors think would happen if Germany, Japan and Italy were completely destroyed? Who was going to fill the vacuum in Eastern Europe and the Far East?

The answer to such questions is simple: American Catholics had long ago resigned themselves to not criticize U.S. foreign policy adventures, even when they went against Catholic interests. Many even actively supported such misguided endeavors.

From America's war of aggression against Mexico, to its defeat of Spain in 1898, the taking of Spain's possessions in the Caribbean and the Far East, and its entry into WWI under the maniacal drive by President Woodrow Wilson to destroy the Austro-Hungarian and German empires, neither the laity nor the hierarchy had any qualms about participating in the country's foreign policy initiatives, no matter how unjust.

Nor was the New Deal questioned, which gave America its first taste of social democracy whose sociological effects would begin to change the character of the populace to the dependent, dysfunctional and effeminate cultural mess it is today.

Fr. Leonard Feeney's outspoken criticism of the liberalization of Catholic doctrine, his disagreement over the path to salvation for Jews, his public denunciations of what he saw as the barbaric and ill-conceived tactics used against Axis civilians and his condemnation of allying with the Communist Soviet Union eventually pushed the Church to excommunicate him, and the political establishment to smear, shun and silence him.

The Naked Communist

Exposing Communism and Restoring Freedom

By W. Cleon Skousen. Soon after its quiet release during the height of the "Red Scare" in 1958, *The Naked Communist* exploded in popularity, selling almost 2 million copies and finding its way into the libraries of the CIA, FBI, the White House and homes across the U.S. From the tragic falls of China, Korea, Russia and the UN, to the fascinating histories of Alger Hiss, Whittaker Chambers, Elizabeth Bentley and Gen. MacArthur, *The Naked Communist* lays out the entire graphic story of Communism, its past, present and future. Readers gain a unique insight into the inner workings of Communism—its appeal, its history, its unchanging concepts, even its secret timetable of conquest. What are the 45 goals of Communism in the U.S. and how did they implement 44 of them? Updated in 2017, *The Naked Communist* is more relevant now than it was 60 years ago. Hardback, 452 pages, #878, **$27** minus 10% for TBR subscribers plus $5 S&H inside the U.S. from TBR, P.O. Box 550, White Plains, MD 20695. Call 1-877-773-9077 toll free to charge, Mon.-Thu. 8-4 ET.

The casualties of the New Deal (and the succession of social engineering schemes which came in its wake, such as the Fair Deal, the Great Society, the War on Poverty etc.) would be the traditional family, voluntary associations and charities whose functions and duties would be eclipsed by the welfare state. Public education would also be expanded with vast increases in government aid to universities and colleges that would espouse the glories of the liberal democratic order.

In her quest to find answers as to why the Church did not protest the atomic bombing or the alliance with the Soviet Union, neither Clarke nor other members of the center saw that American Catholicism had placed its country above that of the Church and Christian teaching. It was Feeney's stance on the salvation doctrine and his criticism of Liberal Catholicism which could not be tolerated by the hierarchy that led to his condemnation.

CULTURAL MARXISM

While the term "cultural Marxism" did not become popular until decades later, its societal corrupting seeds were planted prior to WWII. Many of cultural Marxism's theoreticians were Jewish intellectuals who had come to America fleeing Adolf Hitler. He had correctly seen their destructive effects on European, Christian society. A number of these thinkers landed in leading universities and began to disseminate their ideas on impressionable American minds.

The most important group of thinkers of cultural Marxism would become known as the Frankfurt School, which was originally associated with the Institute for Social Research at Goethe University Frankfurt. Some of these intellectuals included Max Horkheimer, Theodor Adorno, Herbert Marcuse, Friedrich Pollock, Erich Fromm and Otto Kirchheimer.

Because of its inconsistencies and internal contradictions (a deliberate tactic), cultural Marxism is hard to exactly describe. It does, however, have an underlying principle: to constantly criticize the traditions and morés of a culture and undermine the authority figures and institutions of society.

Thus, cultural Marxism promotes the liberalization of divorce and abortion, racial equality, women's rights and homosexuality while it attacks traditional religion, the nuclear family and White heterosexual men.

The St. Benedict Center would see and feel the effects of cultural Marxism through America's oldest and most revered school—Harvard—since many of its students took part in the center's activities. More troubling, however, was that Catholic schools—and even seminaries—were being infected by it, which Feeney soon recognized:

> Father saw the eagerness go out of their faces after they had been going to school a few months. It was not the normal fading of enthusiasm which so often accompanies the realization of that to which one has long looked forward. It was eagerness replaced by a surprised disillusionment.
>
> At the government's expense and their own time … they were being taught, by professor[s] … the very doctrines that had brought on the war they had just been fighting.[20]

The veterans told Feeney and the center that they had not fought "militant Nazism" to return and be indoctrinated with the "philosophy of Hegel, the psychology of Freud and the sociology of Karl Marx."[21] Yet, while the Soviet Union was founded upon Marxism, the Allies themselves had adopted all sorts of socialistic programs largely based on Marxism, yet disguised by Marxist-inspired propagandists and sold to the American public.

While the militarism of Germany was railed against by the students, what of their own country's militarism stretching back to the Spanish-American War, its numerous interventions in Central and South America and its own disastrous participation in

World War I—a war that never threatened, in the least, the country's national security?

> Being mostly atheists, naturally the cultural Marxists would seek to undermine religion. Some of the points taught to the students were that God did not exist, that religion was devised and concocted as a means to control the masses, and that there was no such thing as an immortal soul.[22]

A breakdown in traditional morality led to many not knowing how to distinguish right from wrong. This not only affected the social sciences, but the natural ones as well. A group of science students sought out Feeney to voice their concerns:

> The concept of God had no meaning in physics, the students came to find out. …
>
> They were shaken by the magnitude of the horror that could come upon the world from their own work, and by what seemed to be a complete lack of moral responsibility on the part of their teachers. …
>
> Moral standards seemed completely to be breaking down everywhere.[23]

Outright despair was evidenced in many students which became so acute that some made the ultimate decision and ended their earthly existence:

> More and more reports reached us of students losing their faith, of students committing suicide. A proctor brought to Father one night three students, each of whom had been contemplating suicide for some time, Father did his best to talk them out of it.[24]

Catholics, as well, were not immune and saw that the work of the cultural Marxists was having its intended and de-stabilizing effects, wreaking havoc in the Church and its educational establishments:

> One morning Father found two war veterans waiting for him. They were unhappy. "We were just thinking, Father, of where we would send our children to school, if we had any. We wouldn't send them to any school we know, Catholic or non-Catholic."[25]

A number had abandoned the faith, while many bewildered veterans lamented that "nothing adds up."[26] ❖

The Soviet Experiment

Challenging the Apologists for Communist Tyranny

Br. Dr. Matthew Raphael Johnson. The USSR remains one of the least understood of all societies despite its having only existed in the 20th century. It stands as the great embarrassment of the globe's liberal elite and they do all they can to mystify their role in creating and supporting this totalitarian disaster. One of the reasons it remains so misunderstood is that very few can wrap their heads around depravity of this magnitude. Johnson explains the catastrophe of the Marxist Soviet Union and the ideological fog behind which it has hid itself for so long—with the help of misguided historians who see something in Stalin that did not exist: humanity. Softcover, 241 pages, #835, **$25** minus $10% for TBR subscribers plus $5 S&H inside the U.S. from TBR, P.O.Box 550, White Plains, MD 20695. Bestselling U.S. History Books From TBR Book Club

Johann Ewald: Jäeger Commander

Johann Ewald began as a commoner in the Holy Roman Empire. As a soldier, he fought in all of the great conflicts of the latter 18th century, and he keenly recorded his observations of both the people he met and places he encountered. Ewald stood as one of the most accomplished practitioners of irregular warfare in his era. Beginning his military career in the Seven Years' War, and continuing through the American Revolution and the Napoleonic Wars, he amassed a vast wealth of experience leading troops in the art of *petite guerre*. He later wrote several works based on his experiences and one of these was read by Frederick the Great. Among all but a small group of dedicated scholars of the American Revolution, however, Ewald has vanished into obscurity. There are no other English-language biographies of Ewald, and James McIntyre's biography of him focuses on the conduct of irregular operations: raids, ambushes and the like. Softcover, 400 pages, #954, **$19**.

Now I Know: The Soviets Invaded Wisconsin?! ... And 99 More Interesting Facts

Did you know that a measles outbreak led to the assigning of phone numbers? How about the fact that pirates are the reason we don't use the metric system in the U.S.? Or that there's actually a reason why stepping on a LEGO hurts so much? This is the ultimate challenge for even the biggest trivia buff. From the time a tomato plant stood up to a volcano to Portland's great garbage battle of 2002, this book will put your general knowledge to the test and explain the most fascinating stories behind the world's greatest facts. Covering 100 topics, the book will surprise anyone who thinks they have nothing to learn. Of the hundreds of topics covered, you will probably agree with the vast majority, though there are a few in here where we are sure you might know more than the author! Still, a great book for you or a gift. Hardback, 288 pages, #951, **$20**.

American History Revised: 200 Startling Facts That Never Made It Into the Textbooks

What was the biggest mistake the Ford Motor Co. ever made? Eleanor Roosevelt and most women's groups opposed the Equal Rights Amendment? The No. 1 bestselling American book of all time was written in one day? The Dutch made a bad investment when they bought Manhattan? Two young girls aimed someday to become first lady—and succeeded? Three times, a private financier saved the U.S. from bankruptcy? Author Seymour Morris Jr. illustrates—via the 200 historical vignettes that make up this book—that much of our nation's past is quite different—and far more remarkable—than we thought. Though we do not necessarily agree with every single conclusion contained in the hundreds of tales presented, it is loaded with enough fascinating history to make it a very worthwhile gift. Dozens more fascinating and little-known facts about U.S. history you may not know. Organized into 10 thematic chapters, the book plumbs American history's least-known and shocking twists. Softcover, 432 pages, #950, **$20**.

The Spy Who Changed History: The Untold Story of How the Soviet Union Stole America's Top Secrets

On the trail of Soviet infiltrator Stanislav Shumovsky, codenamed Agent Blériot, author Svetlana Lokhova takes the reader on a thrilling journey through Josef Stalin's most audacious intelligence operation. One spy was concealed in a group of 65 Soviet students. Stalin had sent him to acquire U.S. secrets to help close the USSR's massive technology gap. Thus, the road to victory began at MIT. Using information gleaned from this mission, the USSR transformed itself into a military powerhouse. Then, in 1947, American innovation exfiltrated by Shumovsky made it possible to build and unveil the most advanced strategic bomber in the world. Later, other MIT-trained Soviet spies would acquire the secrets of the Manhattan Project. Hardback, 496 pages, #947, **$30**.

War on the Border: Villa, Pershing, the Texas Rangers & an American Invasion

Jeff Guinn tells the riveting narrative of Pancho Villa's bloody raid on a U.S. border town that sparked a violent conflict with the U.S.A. The "Punitive Expedition" was launched in retaliation under Gen. John J. Pershing and brought together the Army, National Guard and the Texas Rangers—who were little more than organized vigilantes at the time. Opposing this brigade was Pancho Villa, a guerrilla fighter who commanded a motley force of conscripts in Mexico. Despite some bloody encounters, the expedition eventually withdrew without capturing Villa. Hardback, 368 pages, #941, **$28**.

Secret History of the Wild, Wild West: Outlaws, Secret Societies & the Hidden Agenda of the Elites

Drawing on family diaries, author Daniel J. Duke—the great-great-grandson of Jesse James— unravels the hidden history of the Wild West to expose the outlaws, politicians and secret societies that were pulling strings behind the scenes. He examines Jesse's close ties with outlaws like Johnny Ringo, Jesse Evans and Billy the Kid. He demonstrates how Jesse faked his own death and lived out his life under an alias, and how Billy the Kid did the same. He also details how both Jesse and Billy continued their work for a secret organization after their faked deaths. Also explores how Jesse was related, by blood or marriage, to powerful people in the Baylor family, Copperheads, Knights of the Golden Circle, Lyndon Johnson, Harry Truman and Billie Sol Estes. Exposing the secret agenda behind the outlaw gangs of the Wild West, Duke also reveals the secret war between the clandestine organization and its opposition that has been waged in the shadows for centuries. Softcover, 208 pages, #944, **$17**.

The Way Life Should Be?

By John Q. Publius. Foreword by Dr. Kevin MacDonald. A complete overview of the exact mechanism whereby the internationalist lobby is controlling, directing and actively organizing mass Third World immigration with the explicitly stated aim of destroying America—viewed with special emphasis through events in the state of Maine. Analyzing all aspects of society—the media, economics, environment

and social and political structures—this work exposes in detail who is directing America's decline. It shows neo-liberal capitalists facilitating mass migration into America and actively seeking White people's erasure. This push to mainline as many non-White immigrants into America as possible is verging on hysteria, if not psychosis. One thing is for sure: They want us gone. Softcover, 371 pages, #974, **$34**.

The Curse of Oak Island: The Story of the World's Longest Treasure Hunt

By Randall Sullivan. In 1795, a teenager discovered a mysterious depression in the ground on Oak Island, Nova Scotia. This ignited rumors of buried treasure. Excavators uncovered a mysterious clay-lined shaft. When digging reached a depth of 90 feet, water poured into the shaft and made further excavation impossible. Here is a fascinating account of the history of the island and the treasure hunters who have driven themselves to financial ruin, breakdowns and death in pursuit of answers. Hardback, 396 pages, #831, **$28**.

The Sequel to Appomattox: A Chronicle of the Reunion of the States

By Walter Lynwood Fleming (1919). When the armies of the Union and of the Confederacy were disbanded in 1865, the war really didn't end. The surviving Confederate soldiers came home. Everywhere they saw widows, orphans, destroyed property, unemployment, White people demoralized, and a devastated land. The accumulated capital of the South was gone. The banks had failed, factories were empty, mining industry was paralyzed and schools burned down. How could this devastation be undone? Reprint. Softcover, 322 pages, #989, **$21**.

Ousting the Carpetbaggers from South Carolina

By Henry Tazewell Thompson (1926). South Carolina had been stigmatized as "the nest wherein was hatched the snake of Secession," and it was the purpose of Reconstruction to mete out retribution. At the point of the bayonet, the noblest citizens of the state were relegated to inferiority by their former slaves. This is the history of the revolution of 1876 in which South Carolinians, led by Gen. Wade Hampton and his Redshirts, united to throw off the oppressive yoke of "Carpetbagger" government and halt unquenchable Black revenge. Reprint. Softcover, 182 pages, #990, **$21**.

The Honorable Cause: A Free South—Twelve Southern Essays

Here is a collection of 12 essays written by pro-Southern and pro-secession activists. It places into context what it means to be "Southern" and why Southern identity is so important. It explores secession and how to achieve political and social liberation for the South. Is a free and independent Dixie the most honorable outcome for a unique people? *The Honorable Cause* details how the South can achieve status as a nation-state, with a right of self-determination for its people. Softcover, 301 pages, #988, **$25**.

The Field of Blood: Violence in Congress and the Road to Civil War

Joanne B. Freeman shows that the Capitol was rife with conflict in the decades before the Civil War. Legislative sessions were often punctuated by mortal threats, canings, flipped desks and all-out slugfests. When debate broke down, congressmen drew pistols and waved knives. One representative killed another in a duel. Many were beaten and bullied into compliance—one nearly beaten to death with a cane in the halls of Congress. Softcover, 480 pages, #908, **$20**.

The Darkest Dawn: Lincoln, Booth & the Great American Tragedy

Many have discussed the killing of Lincoln, but few have shown us the immediate aftermath of the president's assassination: public panic, news that other members of the cabinet had been targeted or attacked, the massive manhunt for Booth, the arrest of the alleged conspirators and a populace begging for revenge—all of this happening even as a war was still raging. By Tom Goodrich. Softcover, 376 pages, #842, **$22**.

An Immigrant Remembers

By Harald Hesstvedt Scharnhorst. People came to America to build a new life for themselves, in the process creating one of the most remarkable experiments in national development and self-government in the history of mankind. Knut Scharnhorst Hesstvedt brought his family to these United States in 1949. He was disappointed that bureaucrats had taken power in Norway. For five long years he had given his money and time to the Norwegian Underground to liberate his nation. This is his family's story in Europe and America in both war and peace, as seen through the eyes of his son—a story whose lessons are just as applicable to us today as they were then. Softcover, color interior, 467 pages, #956, **$35**.

The True History of the Conquest of New Spain

Bernal Diaz del Castillo wrote an important firsthand account of his experiences supporting several expeditions into Central America, including that of Hernan Cortes in the conquest of Mexico in 1521. It's the straightforward account of a soldier, not the dainty prose of a diplomat. It is thus devoid of "political correctness." Diaz offers his observations of the Aztec people and their ritual sacrifices—the details of which are excised from modern histories. Softcover, 402 pages, illustrated, #938, **$25**.

Tom Quick: The Man Behind the Legend

Here are all factual documents related to American folk hero and famed Indian fighter "Tom" Quick as could be found discussing this iconic frontier character. Many people deny he existed—but he did. The Indian was a formidable foe, and his customs—scalping, mutilating bodies, taking slaves, kidnapping children, raping White women, torturing prisoners—are whitewashed by "woke" historians. Here is a two-volume anthology on Quick that separates fact from myth on one of America's greatest Indian fighters from multiple pre-1945 writers. Two-volumes, #975, **$60**.

The American Regime: By an Anonymous January 6 Prisoner

After being targeted and locked up by the federal government in the wake of the events of Jan. 6, 2021, the author of *The American Regime* delves into the study of history, philosophy and politics to answer the singular question of our time: "What is the nature of the evil that now openly rules America and, through the American Empire, the broader world?" The great irony of our time is that, while more Americans than ever understand that they live under an oppressive regime, the number of theories about the nature of that oppression, and who is really calling the shots, has only multiplied. The author confronts the prominent theories of political power, searching for one coherent understanding of this oppressive Leviathan. We must identify that what passes for truth is often little more than blinding government propaganda. Softcover, 290 pages, #991, **$22**.

Cui Bono? Was the Surprise Hamas Attack of October 7 Israel's September 11?

By Vaughn Klingenberg

Upon hearing of the September 11, 2001 (9/11) attacks on the United States, Israeli Prime Minister Benjamin Netanyahu was asked what he thought of it. His answer: The attacks were beneficial for Israel.

"We are benefiting from one thing, and that is the attack on the Twin Towers and Pentagon, and the American struggle in Iraq," Netanyahu said during an appearance at Bar Ilan university in Israel. He went on to clarify that the September 11 attacks "swung American public opinion in our [Israel's] favor."[1]

You don't have to be an entry-level Middle East CIA analyst to posit that the purported breathtakingly successful "surprise" attack by Hamas on Israel was an "inside job," both foreseen by the Mossad and reported to ultra-rightwing Likud party chief and Prime Minister Benjamin Netanyahu. I am only relaying here what is forbidden to say out loud by the highest-ranking analysts in U.S. intelligence, so I certainly do not consider myself original. Instead, I see myself as being a liberated free thinker and not, like most people, an intellectual coward, but I will leave that for you to decide.

First of all, it needs to be noted that Egypt has claimed that it warned Israeli intelligence in advance of the devastating, massive and highly coordinated attack on Israel by Hamas of October 7, 2023.[2] While Israel denied that Egypt issued an advance warning to them, Chairman of the U.S. House Foreign Relations Committee Michael McCaul corroborated that Egypt did in fact warn Israel of a "big" attack three days before October 7.

> "By way of deception, thou shalt wage war."
> —Mossad motto

So, who in their right mind seriously believes that, if Egyptian intelligence knew beforehand of the Palestinian attack, and that they alerted the Mossad, the Mossad did not know of the impending attack from their own, personal, on-the-ground, reliable resources?

The Mossad reputedly has the best network of informants, operatives and double-agents worldwide, especially in Palestine and in the Arab world more broadly. It is the most cunning and ruthless intelligence agency in the world, and Gaza and the West Bank are some of the most heavily surveilled regions on the globe. And, yet, the Mossad had no inkling of the coming attack? Did they not notice the seven rendezvous breechpoints where Hamas assembled hundreds of its attackers in preparation for penetrating the defensive walls surrounding Israel?

The Mossad (Israel's nation intelligence agency), Shin Bet (Israel's internal security service) and Israeli military intelligence certainly have numerous Arab informants throughout the Palestinian underground and, yet, an attack on Israel involving massive numbers of militants somehow escaped notice from Israel's vaunted intelligence apparatus? We are supposed to believe that not a single turncoat Palestinian informant squealed to their Mossad handlers warning them of the impending attack.

It is probably because Egypt informed Israel in advance of the impending attack that Egypt now refuses to assist Israel in its retribution campaign against Hamas. Hitherto, Egypt and Israel have been close allies in combating Palestinian militants (or, as I would term them, "freedom fighters"), especially in the Gaza Strip, and the U.S. bankrolls Egypt to the tune of $3 billion a year in economic

Israeli Prime Minister Benjamin Netanyahu (center) addresses IDF soldiers headed for Gaza.

aid to feed its population in exchange for which Egypt has agreed to work collaboratively with Israel and not pose a military threat to the Zionist state. Therefore, for Egypt to refuse to work with Israel in the wake of the October 7 uprising is very telling indeed.

PERFECT FOR NETANYAHU

The October 7 uprising has been devastating to both Palestinians and Israeli Jews. To date, according to the pro-Zionist Wikipedia entry on the 2023 Israel-Hamas War, at least 1,400 Israeli Jews have been killed, 3,400 wounded and over 200 taken hostage. As for the Palestinian casualties, over 20,000 have been killed, tens of thousands wounded and half the population of Gaza—at least 1 million Palestinians—have been forced from their homes. Compounding Palestinian suffering is the fact that Israel has cut off all food, water, electricity, fuel and sewage treatment to Palestinians in Gaza, part of its long-running blockade of the entire Gaza Strip.

The Israeli government likes to exaggerate the effectiveness of Palestinian rocket attacks on Israeli civilians, but even mainstream sources acknowledge that, of the 5,000 rockets fired from Gaza on Israel at the onset of the Palestinian attack in the early morning hours of October 7, only five Israelis died from this thousandfold rocket barrage. That just goes to show you how pitiful Palestinian rocket attacks are against Israel, try as it might to exaggerate and fearmonger the effectiveness of rocket attacks by merely listing the raw number of the virtually harmless and very-low-yield explosive rockets launched by Hamas.

But, if it is true the Mossad and Netanyahu were actually alerted before the attack that it was forthcoming, then it follows that Netanyahu and several high-placed members of the Mossad and Israeli intelligence are complicit in the attack. Worse, they may have done nothing to prevent or stop it from happening. Worser still, they countenanced it and even let it happen, perhaps even collaborating with elements of Hamas in planning it. But why, we may ask, would they do such a thing?

Before we address why the Netanyahu administration would countenance an attack on Israel and sit back and do nothing to stop it, we first need to address the significance of the date of the October 7 attack. It is commonplace when an intelligence agency orchestrates a false-flag attack that they deliberately incriminate themselves, superficially, so as to

have their actual involvement discounted by an incredulous public.

Surely if an agency was involved in an underhanded attack on its own nation—the nation they are sworn to protect—they would not incriminate themselves. Therefore, the simple fact that there is deliberate and consciously placed "evidence" superficially incriminating the said agency orchestrating the false-flag attack, that actually serves to discount in the mind of the naive and uncritical public that the said agency could not be involved in a false-flag attack, especially one against their own nation. Intelligence agencies and their operatives and allies in the mass media are experts in reverse psychology and employ this tactic to influence and manipulate the unwashed and gullible mob.

So, how does the above relate to the "surprise" Hamas attack on Israel? October 7, 2023, marked the Jewish holiday of *Simchat Torah* or *Simhat Torah*, that celebrates and marks the conclusion of the annual cycle of public Torah readings and the beginning of a new cycle. If my dark imaginings here are correct, then the Mossad has operatives or informants at the very top of the Hamas hierarchy with whom they collaborated in order for the timing of the attack to take place precisely on this Jewish holiday.

Now we must explain how exactly Netanyahu and his administration benefited from the attack. The answer is very simple. Learning from the American experience of 9/11, Netanyahu and his allies realized the advantages to "Big Zionist Jews" of unleashing a "new Pearl Harbor" on "Little, Rank-and-File Jews," especially given that the Netanyahu-led administration was becoming more and more beleaguered.

In the wake of Netanyahu's failed attempt to "reform" (actually, diminish) the power and standing of the judiciary in Israel, his popularity has plummeted. Scores of thousands of Israelis took to the streets to protest Netanyahu's attempt to corrupt the judiciary, and the protesters were successful in having Netanyahu shelve this attempt, at least for now.

Certainly, part of his motivation for attempting his so-called "judicial reform" would be that it would enable him to sidestep mounting corruption and bribery charges pending against him in court. Many in the Israeli public realized his self-serving motivation and turned against him. Netanyahu needed something to rehabilitate his image in the eyes of the increasingly skeptical and jaded Israeli public, and he also needed a significant bump-up in the polls. That answer was 10/7, Israel's 9/11.

> Members of Israeli intelligence admit they knew about Hamas's plans a year before the attack.

CUI BONO? WHO BENEFITS?

But there is more to the story. Besides refurbishing Netanyahu's own personal political image, a decisive 9/11-type event would also firmly place the ultra-conservative Likud party in the driver's seat of the Knesset for many years to come. While we all know that the last vestige of a political scoundrel is in appealing to "patriotism," nevertheless, it actually does work (just witness how George W. Bush's popularity rocketed to well over 80% in the wake of his bellicose pronouncements and war-mongering behavior after 9/11.) It worked in the United States. So, no doubt thought Netanyahu and his fellow conspirators, associates and quislings, it will work just as well in Israel, too.

And yet there are very many other benefits accruing to Israel coming in the wake of the 10/7 attacks. First of all, there is the predictable Pavlovian expressions of sympathy by large swaths of the global community to Israel for their deceased, injured and captured, and the contrary expressions of outrage against the purported initiators of the 10/7 violence, Hamas and its Palestinian supporters. Much of the Western world, led by America, have offered their condolences and support to Israel.

Of course, these expressions of sympathy are made in a vacuum. They ignore the more than 75 years of Jewish-Zionist-Israeli brutality and land expropriation directed against the native Palestinian population that should be acknowledged as prologue to this sorry watershed event. The "surprise" Hamas attack is a priceless public relations stunt for the apartheid, supremacist, Zionist state of Israel.

Netanyahu and the hardliners in his government will no doubt employ this orchestrated self-inflicted event to reinforce the typical Israeli canard that the "civilized world" can't negotiate with terrorists. We've already heard repeated calls by Israeli leaders vowing to destroy Hamas and all of Gaza, which they view as one big terrorist enclave.

Related to this, Israel will use the 10/7 attack to justify "collective punishment" (a violation of the Geneva Convention) against all Palestinians, regardless of whether they participated in the uprising or not. Of course, the Israel Defense Forces (IDF) have routinely violated this principle of the Geneva Convention for decades but, at least now, they have, in some jaundiced eyes, plausible legitimacy for doing so.

The 10/7 uprising will also be employed to justify the grossly asymmetrical slaughter now underway of essentially defenseless Palestinians currently living in open-air concentration camps and ghettos surrounded by heartless and brutal Israeli soldiers. These soldiers and concentration camp guards are schooled in a Talmud-inspired sadistic "master race" ideology, and they lord over the "subhuman" Palestinians on questions of life or death on a daily basis.

Furthermore, and very much related to the above, the 10/7 Palestinian

The 400-mile wall dividing Israelis from Palestinians along the West Bank and Gaza features massive concrete slabs that top 25 feet in some sections. Though it has been there for more than 20 years, it is illegal, according to international law, as the wall is actually not on Israeli soil, but on Palestinian land.

uprising will permit the complete and final total expropriation of Palestinian-owned property within Israel (a nod to the uncompromising Eretz Israel Zionists in Netanyahu's administration). Under the cover of rooting out terrorists and their abodes once and for all, the IDF will now initiate the transfer or starvation of millions of defenseless Palestinians in Gaza and, eventually, the West Bank. It is happening right now.

As many mainstream sources have acknowledged, over 1 million Palestinians in Gaza have been forced out of their homes, or what is left of their homes if they haven't already been demolished. Netanyahu and his fellow Zionists probably now want to forcibly transfer the Palestinians in Gaza to Egypt or elsewhere, including perhaps sending them as stateless refugees to the West, a key agenda advanced by many Jewish groups around the world to resettle non-White foreigners in America and Europe. Food, water, shelter, electricity and medical supplies have been almost completely cut off to Gaza, so what are the destitute Palestinian refugees supposed to do?

This certainly appears to be the Netanyahu administration's grand strategy. No doubt the Jewish-controlled Western media will blame the victims—the Palestinians—for their situation, and a majority of the American public will, per usual, not lose any sleep over it.

There are still more benefits accruing to Israel because of 10/7. The Boycott, Divest and Sanctions (BDS) movement to punish Israel economically for its systematic and institutional maltreatment, abuse and murder of Palestinians will now be "dead in the water," so to speak, and go nowhere. In fact, even before 10/7, many states in the U.S. had already outlawed the BDS movement's call to action against apartheid Israel, so 10/7 will be the kiss of death upon that noble endeavor, at least for many years to come.

Instead, even more financial and military aid will be forthcoming to what should be the pariah state of the Middle East (if not the world). The U.S., Germany and the United Kingdom have all already committed additional military aid to Israel, and this is just the beginning. I can already hear the American Israel Public Affairs Committee demanding even more financial aid to Israel to help that "little, besieged, fledgling democracy of Holocaust survivors and their offspring" survive the horrors of being a nation surrounded by anti-Semitic terrorist states.

And all this brings us to the last point: the slanderous, weaponized labels of "anti-Semite" and "Holocaust denier" will have new life breathed into them so that deceitful, demagogic practice of vilification by slanderous labeling will now continue revivified and restored. Already mainstream pundits and politicians of both major parties are hysterically declaring anyone who even mentions a word of sympathy toward the Palestinians is a raving "anti-Semite" and "terrorist enabler."

Now that we have listed some of the benefits to Israel and the Netanyahu regime in the aftermath of the 10/7 attack, the question can turn to addressing whether or not Jews are capable of harming fellow Jews. Jews have been schooled since birth to come to the aid of Jews, never ever

questioning their motives or narratives on account of the "Holocaust of the Jews" during WWII. Harming or even questioning fellow Jews goes completely against their upbringing, so, therefore, it is virtually inconceivable that Netanyahu, his administration (including the Mossad) and his associates would perpetrate a false-flag attack on his own people, at least in the minds of the Jewish masses.

FALSE FLAGS IN HISTORY

There are, however, multiple examples of Israeli or Jewish false-flag attacks in history, including recent history. Let's begin with the Lavon Affair. One popular online encyclopedia gives a decent account of this Israeli false-flag operation:

> The Lavon affair was a failed Israeli covert operation, codenamed Operation Susannah, conducted in Egypt in the summer of 1954. As part of a false-flag operation, a group of Egyptian Jews was recruited by Israeli military intelligence to plant bombs inside Egyptian-, British- and American-owned civilian targets: cinemas, libraries and American educational centers.
>
> The bombs were timed to detonate several hours after closing time. The attacks were to be blamed on the Muslim Brotherhood, Egyptian Communists, "unspecified malcontents" or "local nationalists," with the aim of creating a climate of sufficient violence and instability to induce the British government to retain its occupying troops in Egypt's Suez Canal zone.

The entry goes on to note that Israel publicly denied any involvement in the incident until 2005, when the surviving agents were awarded certificates of appreciation by Israeli President Moshe Katsav, which "ended decades of official denial by Israel" of the false-flag operation.

Here we have Israeli covert operatives arranging an attack on "Egyptian-, British- and American-owned civilian targets," allegedly by local discontented Egyptians, so as to misdirect culpability from the state of Israel which actually orchestrated the attack. Even though this plot was uncovered by Egyptian intelligence and, even though it resulted in the resignation of Israeli Minister of Defense Pinhas Lavon, nevertheless, the surviving agents were honored in 2005 for undertaking this diabolical, criminal stratagem.

By feting the criminal Jewish agents involved in this plot over a half century later, the Israeli government is not only unapologetic for this covert operation, but they also have the *chutzpah* to celebrate it—victimized and gullible Egyptian, American and British historical allies of Israel notwithstanding!

> Israel has a long and sordid history of planning and carrying out deadly false-flag attacks.

Then of course there is the Israeli false-flag attack on the USS *Liberty*, an American spy ship located in international waters off the coast of Gaza during the Six Day War. The attack took place on June 8, 1967. The *Liberty* was there to monitor Egyptian and especially Israeli actions during the war. The *Liberty* was clearly marked as an American ship with its very large Stars and Stripes waving in the aft of the ship.

Nevertheless, the Israelis launched torpedo boat attacks on the U.S. vessel while unmarked fighter jets attacked the ship. The Israeli goal was to sink the *Liberty*, blame Israel's enemies, and draw the United States into the war on the side of the Israelis. The false-flag component of the attack was the disingenuous claim by the Israelis that the attack was being carried out by the Egyptians.

Ultimately, the Israeli attackers were unsuccessful in drawing the United States into the conflict. The *Liberty*, despite taking a direct torpedo hit, somehow managed to stay afloat, and its crew were later able to identify Israel as the culprit, though 175 U.S. servicemen were injured and 34 died.[3]

This unforgivable act of treachery and terrorism has never been properly explained to the American public, at least in an official capacity by the U.S. federal government.

As one final example, Israel and the Jewish neoconservatives dominating Washington, D.C. remain the key culprits behind the 9/11 attacks, an event they even openly wrote about needing as a "new Pearl Harbor" to justify the launching of the Global War on Terror against Israel's adversaries in the Middle East, using Western military and financial might to conquer the region to pave the way for Zionist domination.

The late Victor Thorn and also Christopher Bollyn wrote extensively about Israel's central involvement in the 9/11 attacks, a thesis that has been largely accepted within the broader 9/11 Truth movement. This monumental false-flag attack—said to have been organized by Osama bin Laden operating out of caves in Afghanistan and carried out by 19 Islamic radicals—has led to the death of millions of innocent civilians and military personnel, not to mention the destruction of Iraq, Libya, Afghanistan and other Middle Eastern nations and the expenditure of trillions of U.S. taxpayer dollars.

TREACHERY

What evidence do we have that Israeli soldiers would violate the code of rock-solid Jewish tribal loyalty and solidarity and consciously and deliberately dare to put in harm's way their own people if it suits their purposes?

During WWII, Jews often turned against their brethren in Nazi-occupied Soviet Russia. The German units tasked with pacifying the countryside behind German lines were called the *Einsatzgruppen*. They did not arbitrarily round-up all the Jews they

could find and summarily execute them, as mainstream history would have us believe.

Instead, the *Einsatzgruppen* units would approach local Jewish community rabbis and leaders and find out from them which Jews were part of the Soviet administrative apparatus and guilty of harming, mistreating, abusing or murdering non-Jews. These German units would use the information from the "good" Jews to punish the "evil" Jews.

It is because some Russian rabbis and leaders collaborated with the Nazis that most mainstream scholars do not emphasize this facet of the "Holocaust." Better, they believe, the Jewish community does not know about this aspect of the war. Once again, here we have Jew turning on Jew but with perfectly legitimate reasons—to protect innocent Jews so they are not punished for the culpable misdeeds of their tribesmen.

We cannot talk about Jews turning on Jews without mentioning the Holocaust itself. I have written extensively on this subject, so I would refer you to my essay, "The Holocaust: Big Zionist Jews vs Little Jews," published in September/October 2021 edition of THE BARNES REVIEW.

In a nutshell, I argue that very influential "Big Zionist Jews" cleverly orchestrated the "Holocaust" narrative to exacerbate Jewish suffering and death in the German concentration camps during World War II so as to convert hitherto "Little Non-Zionist Jews" into newly minted, rabid, neo-Zionist Jews—Jews who would agree to abandon the possible postwar comforts of a rebuilt Europe and, instead, emigrate and serve as foot soldiers for the Big Zionist Jewish elite and settle and populate a neo-colonial Jewish state in Palestine.

The bottom line is that—once again—we find a Big Zionist Jewish elite willing to take advantage of their downtrodden and abused fellow Little Jews in order to get these victimized Jews to settle in Palestine and populate the Jewish supremacist state we now refer to as "Israel."

In conclusion, we can see from this brief survey that elitist Big Jews are in fact more than willing to sacrifice fellow Little Jews as pawns in their pursuit of broader elite Big Jewish interests if it suits their purposes. Of course, these oligarchic and shadowy elitist Jews don't want the Little Jews to know of their machinations and manipulations, so they feed them the idea that all Jews look out for one another and that this vow of unequivocal mutual support is solid and unbreakable.

With all this said, does anyone still doubt that 10/7 was a false-flag event played on Little Jews the world over but especially on the Little Jewish foot soldiers who comprise the majority of the population of the state of Israel?

Do you still believe that Netanyahu and the Mossad were taken completely by surprise by the very uncharacteristic lapse in Israel's national security?

Do you still believe that the most heavily monitored and surveilled state in the Middle East, with its ubiquitous manned guard towers and miles upon miles of impregnable high cement walls along with its thousands of Palestinian turncoat informants, somehow got it all wrong on 10/7? If Israelis believe this, then they deserve to have Benjamin Netanyahu as their prime minister. ❖

The Holocaust Hoax Exposed

Debunking the 20th Century's Biggest Lie

Victor Thorn's *The Holocaust Hoax Exposed* dissects nearly every element of what has become the most grotesque conspiracy theory of the 20th—and now the 21st—century. Covered in this book is the mythology surrounding "death camps," the truth about Zyklon B, Anne Frank's diary, how the absurd "6 million" figure has become a laughing stock. From eye-opening facts that not one autopsy exists that shows the use of Zyklon B on work camp inmates to zero photographic evidence of this supposed enormous event to the ludicrous and licentious tales woven by the "Holocaust" historians, survivors and Holocaust hucksters, Thorn's masterpiece should be required reading for anyone interested in understanding the underpinnings of the Zionist power elite. New second edition. Softcover, 184 pages, #609, *$20* minus 10% for TBR subscribers plus $5 S&H inside the U.S. from TBR, P.O. Box 550, White Plains, MD 20695. Hamas Attack Was No False Flag, Though I Understand Why You Might Think So …

By Dr. Kevin Barrett

On October 7, 2023, Hamas and other Palestinian Resistance fighters launched a coordinated attack on Israel from the Gaza Strip, inflicting casualties on Israeli military forces and taking Israeli hostages. Since then, many alternative media commentators and pundits have claimed that Israel was ultimately behind the attack or, at the very least, knew about it in advance and either let it happen or actively facilitated it in order to justify a brutal assault on Gaza and a general crackdown on Palestinians in the occupied territories, justifying the ethnic cleansing of all of historic Palestine.

These commentators and pundits have argued three main points to make their case that the Hamas attack was indeed a false-flag-type attack and that Israel was either directly involved in or allowed to happen to justify its aggression against Gaza. Gaza is in ruins as TBR goes to press with many thousands of civilians killed due to the massive bombing campaigns carried out by Israel's military. They claim that Israel had foreknowledge of the attack and that the Zionist state's vaunted and highly trained security and military forces would never be caught off guard like they were on October 7. They also claim that Israel actually created Hamas, the Islamic political movement that has its origins in the Muslim Brotherhood which has ruled in Gaza since 2007 and maintains control over the organization through its undercover informants, agents and spies.

BENJAMIN NETANYAHU
Corrupt Israeli warhawk.

Before addressing those three points, all of which rest on exaggerations of Israel's capabilities, I'll explain why the false-flag scenario makes intuitive sense to so many people.

Having spent much of the past 20 years explaining that 9/11 and other events have been false flags, I am well aware that, whenever Western media blame an "Islamic terror group" for the latest bloody atrocity, skepticism is warranted. To people who've studied 9/11, it's natural to be suspicious when a massacre attributed to "radical Muslims" is predictably followed by a vastly bigger massacre of Muslims—as happened when the deaths of around 3,000 people on 9/11 triggered the invasions, occupations and pillaging of Muslim countries and the murder of millions of Muslims around the world.

Prior to 9/11, Benjamin "Bibi" Netanyahu and his neoconservative-Zionist friends were looking for a way to trick the United States into staging a multi-nation genocidal massacre in the Middle East. Their aim was to completely change the strategic situation in the region by destroying "seven countries in five years" which all happened to be enemies of Israel.[1] They announced their plan in the 1996 "Clean Break" document and, again in the 2000, call for a "New Pearl Harbor." Then, on 9/11, they blew up the World Trade Center in broad daylight and used their media power to get away with it.[2]

Superficially, Al-Aqsa Storm looks similar. As Richard Medhurst observes:

> A few weeks ago, right before this war in Gaza ignites, Netanyahu goes to the United Nations General Assembly and he holds up a map and declares his plan for a new Middle East: an economic corridor that stretches all the way from India

Palestinians survey the damage and search for survivors after an Israeli missile hit their neighborhood.

> to the United Arab Emirates, into Saudi Arabia, into Jordan, Israel and then, finally, to the entire European continent.
>
> This is a rival to the New Silk Road. … Israel all of a sudden proposes [itself] as a solution to the European Union's gas shortages.
>
> In 2010, they conducted a geological survey and found this monstrous giant gas field in the Middle East. It's called the Leviathan, and it's in the Mediterranean Sea on the Levantine basin. That means it's right off the coast of Palestine, Lebanon [and] Syria.
>
> And so, when Netanyahu shows up at the UN with his brilliant plan, you know, the Israelis thought, oh, it's a done deal, they'll just get Saudi Arabia to normalize ties and thereby extinguish the Palestinian issue once and for all.[3]

So, prior to both 9/11 and Al-Aqsa Storm, Netanyahu unveiled plans to radically remake the Middle East. But there's one huge difference: 9/11 helped him realize his "Clean Break" plan, while Al-Aqsa Storm destroyed his New Middle East plan. The Emiratis, Saudis and Jordanians are now out—permanently. No pipeline to Israel now. And Israel's plan to exploit Mediterranean gas is not going to bear fruit any time soon since the region is in chaos.

Some Americans with only superficial knowledge of the Middle East say that Bibi set up the 10/7 false flag so he could clear the Palestinians out of Gaza in order to exploit gas fields off the Gaza coast. Small problem: He didn't need to clear them out. Israel's navy faces no significant threat from Gaza. It might have to worry about Lebanon, Syria, or even Turkey, but not Gaza.

In short, Al-Aqsa Flood has totally destroyed Israel's (and Bibi's) plan to bypass the Palestinian issue and remake the region. As Medhurst observes, the post-10/7 paradigm favors the Russia-China-Iran-Turkey-Syria "New Silk Road" project and has destroyed the U.S.-backed Zionists' preferred alternative. It has put the Palestinian cause on the front burner and is leading most of the world to rally behind it. This is not the outcome Netanyahu or anyone in Israel (or the U.S., for that matter) wanted.

Let us now address the three main points raised by those who have claimed that Israel was behind the Hamas attack or, at the very least, knew about it in advance and allowed it to happen.

FOREKNOWLEDGE?

Israel did get warnings—from Egypt and even Hamas itself—that something was coming. But there's no evidence they understood Hamas was about to pull off such a huge and successful operation.

They were more worried about the West Bank, where Muslims are angry at the Zionists' escalating desecrations of the Al-Aqsa Mosque and their northern border with Lebanon and Syria. The Zionists have always considered Hezbollah, backed by Iran and Syria, to be their most serious threat. Hamas was considered a nonfactor. So, the Israeli military was fo-

cused on the West Bank and the northern border, not on Gaza, which was assumed to be under control.

And, if you really think Al-Aqsa Storm played out the way Bibi wanted, how do you explain the 200 Israeli prisoners? Al-Aqsa Storm's symbolic purpose was to retaliate for Zionist desecrations of Al-Aqsa, but its operational purpose was to take Israeli prisoners to swap for Palestinian ones.

Anyone who thinks Israel is ever going to stand down and let its people be taken hostage is delusional. Israel recognizes the strategic value of hostages and does everything possible to make sure no Israeli is ever taken hostage. On October 7, that included using tank shells, rocket bombs and heavy artillery to kill hundreds of Israeli civilians and their dozens of would-be hostage takers, in accordance with the Hannibal Directive.

Indeed, the vast majority of the Israeli civilians killed that day were probably killed by their own military, either in "fog of war" crossfire or to stop them from being taken hostage.

The holy Al-Aqsa Mosque in Jerusalem has been the site of violents clashes between Muslim worshippers and ultra-nationalist Zionist Jews as well as Israeli military soldiers.

CAUGHT OFF GUARD?

We have seen claims that not even an insect could approach the Gaza Concentration Camp wall without Israel knowing about it. That may have been true when surveillance and communication signals were flowing. But Hamas knocked out Israel's cell towers with drones, blinding the Zionist defenders and enabling the concentration camp breakout. (Drones are ushering in the next age of warfare and giving underdogs a huge advantage.)

People who don't think Hamas could be so competent and Israel so incompetent have been misled by Zionist propaganda. Israel tries to discourage people from opposing it by pretending to be omnipotent and omniscient. In fact, my U.S. intelligence sources with inside knowledge say Israeli intelligence is good but not that good.

Their biggest asset is billionaire *sayanim*, diaspora Jews who act as helpers or assistants to Israeli intelligence, in the United States and Europe. People like Arnon Milchan, Larry Silverstein, Les Wexner and his protégé Jeffrey Epstein (and before them Meyer Lansky) are great for stealing American nuclear weapons, blowing up the Twin Towers and gathering dirt on American leaders. And the Jewish-Zionist billionaires who own

Israeli soldiers prevent Muslim worshippers from entering the Al-Aqsa Mosque in Jerusalem.

Hollywood and dominate the media can make sure their crimes get covered up and their propaganda trumpeted.

None of that, however, helps them keep a handle on Hamas.

ISRAEL CREATED HAMAS?

It sometimes seems that Israelis always lie about everything, but that isn't entirely true. Ronan Bergman's important book *Rise and Kill First* may be censored by the Israel Defense Forces, but its accounts of the origins of Hamas and Hezbollah are credible.

Sheikh Yassin, fresh out of an Israeli prison, created Hamas way back in 1987 and did indeed obtain modest funding from his former captors, at least initially. The Israelis hoped that Hamas would divide the Palestinians and weaken the Palestine Liberation Organization (PLO). But the Islamic resistance group quickly escaped control, and Israel has spent most of the past 30 years regretting that they ever let Yassin out of prison. They wound up assassinating him, as well as a long list of other Hamas leaders.

But doesn't Israel infiltrate Hamas? They try to, with mixed success—just like Hamas infiltrates Israel, and everybody infiltrates everybody. Compared to the United States, Israel is quite good at infiltrating Arab groups. Half of Israel's "Jews" are Arabs, i.e., native speakers of Arabic and indistinguishable from non-Jewish Arabs.

The United States, for its part, has fewer native-speaker operatives to choose from, and doesn't trust the ones it has. But, though Mossad's fake Arabs beat the CIA's and may have had great success long ago infiltrating the PLO and other secular Palestinian groups, they have had more problems infiltrating religiously based groups like Hamas and Hezbollah, as Bergman stresses in *Rise and Kill First*.

Additionally, there is no reason to think that Hamas is especially bad at operational secrecy, and Al-Aqsa Flood was a highly compartmentalized operation. It was carried out by small teams, each of which knew its own orders, but not the scope of the attack. Only a few trusted individuals would have been privy to the big picture.

SUPERFICIALLY PLAUSIBLE?

So, despite its superficial plausibility, the notion that Netanyahu orchestrated or deliberately enabled Al-Aqsa Flood rests on misleading comparisons, vague impressions and, above all, boastful Zionist propaganda whose purpose is to exaggerate Israel's prowess and intimidate opponents. And now that propaganda bubble has been punctured.

Just as Hezbollah's victory in 2006 demoralized Israel and inspired the Palestinian Resistance, Al-Aqsa Flood has had the same effect, despite—and even to some extent because of—the horrific war crimes that Israel is committing almost by the minute. (Those war crimes are likely to prove counterproductive in the long term since they have alienated most of the world and are creating ever-increasing fervency on the anti-Zionist side.)

But what about Netanyahu's personal political situation? Won't this crisis save him? The answer: almost certainly not, as publisher and writer Ron Unz has persuasively argued:

> For many months, the Israeli government of Prime Minister Benjamin Netanyahu had been facing enormous public demonstrations by his bitter political opponents, representing a historic division in his own society that was even verging on civil war. So according to this theory, Netanyahu had deliberately allowed that attack to take place, hoping to use it as his "Pearl Harbor" or "9/11" to solidify his own political position, perhaps even providing him an excuse to expel the Palestinians from Gaza and the West Bank, thereby achieving the political goal of the more extreme members of his coalition by expanding Israel's frontiers while permanently solving the festering "Palestinian problem."
>
> Despite its apparent popularity, the likelihood of this scenario disintegrates upon any careful consideration. Israel probably suffered the worst one-day defeat in its national history, a strategic disaster. Even aside from the huge loss of life in such a small population, the tre-

FROM HERVÉ RYSSEN

A History of Anti-Semitism

By Hervé Ryssen. The history of Judaism is that of a sect constantly at war with the rest of humanity. According to prophecy, after the great war against the last enemies of Israel, the Messianic times will be a blessed time for the Jews. All the Earth will be unified and the Jews will be recognized by all as God's chosen people. To succeed in reaching this universal peace and hasten the coming of the Messiah, fanatical Jewish sects must work unceasingly to destroy all the differences among men—nations, races, religions and local customs. It is this messianic tension which motivates their energy. It is on the ruins of the nations that the long-awaited world government will be erected. If you look around the Western world in particular, you can see that this aim is coming true. Softcover, 453 pages, #768, **$35** minus 10% for TBR subscribers plus $5 S&H inside the U.S. from TBR, P.O. Box 550, White Plains, MD 20695. Call toll free 1-877-773-9077 to charge, Mon.-Thu. 8-4 ET or visit TBR online at www.BarnesReview.com.

Jihad

Islam's 1,300 Year War Against Western Civilization

By Arthur Kemp. For centuries, Muslims have been trying to capture Europe for Islam. Sweeping out from its origin in Saudi Arabia, Islam has expanded through conquest into North Africa, the Middle and Near East—and very nearly into Europe itself, attacking through Spain, Italy and the Balkans. Each time, the Muslims were turned back by a united European military effort. Few people know that all the regions currently thought of as "Muslim"—North Africa and the entire Middle East—were all invaded by Muslim armies, and the local populations converted to Islam by force. Even the Crusades were not "European aggression" but defensive measures aimed at countering the Islamic invasion of Christian lands in the Middle East. Today, the Islamic invasion is not being carried out with sieges, scimitars, or cannon, but rather by immigration, birth rates and demography. Given current trends, Europe is set to be overrun before the end of this century. This book dares to say what must be done if Europe is to avoid succumbing to the new invasion. Softcover, 88 pages, indexed, #726, **$12** minus 10% for TBR subscribers plus $5 S&H inside the U.S. from TBR, P.O. Box 550, White Plains, MD 20695. Call 1-877-773-9077 to charge.

mendous Hamas success punctured the powerful myth of Israeli military strength, which for three generations has been the cornerstone of the country's national security strategy.

Such heavy losses suggested that the IDF had become a paper-tiger, greatly amplifying the lesson of its 2006 military setbacks at the hands of Hezbollah in Lebanon. If poorly armed Hamas militants could achieve such a serious blow, all of Israel's regional adversaries were surely emboldened, and this would have been obvious to any Israeli national security officials who might have considered such a gambit.

We should also remember that Israel had been on the very verge of achieving normalized relations with Saudi Arabia, the wealthiest and most influential Arab state, a prospect that has now completely vanished. Israeli leaders had been pursuing that particular objective for decades and it seems very unlikely that Israel's government would have sacrificed that opportunity by deliberately enabling a large Hamas attack.[4]

SHOULD YOU SUPPORT HAMAS?

The ruling regime and Deep State really do not want Americans supporting the Palestinian Resistance movement, that much is clear. After Hamas, alongside other Palestinian Resistance groups, led a mass breakout from the Gaza Strip Concentration Camp, the Zionist-owned mainstream media has drowned the Western world under a tidal wave of lies: "Hamas beheaded babies!" "Hamas raped grandmothers!" "Hamas is ISIS!"

Give the Zionist liars credit: They have plenty of *chutzpah*. But the truth is that, compared to Israel, Hamas is a host of angels. Israel systematically and deliberately slaughters civilians in enormous numbers, abuses and tortures prisoners, desecrates Christian and Muslim holy sites and commits war crimes and crimes against humanity on an industrial scale.

Hamas, by contrast, focuses on attacking the Israeli military, even when massively outgunned, and treats civilians far more humanely than it is required to under international law, which deems occupation settlers as legitimate targets.

Israelis captured by Hamas have described their captors as kind and considerate. They have testified that most of the alleged mass murder of Israeli civilians on October 7 was perpetrated not by Hamas, but by the Israeli military, in accordance with its Hannibal Doctrine mandating the use of massive firepower to annihilate both hostages and hostage takers to avoid the political liability of hostages.

Though these facts are well known to everyone in the region—and to most of the non-Western world—they have been systematically suppressed by Zionist-owned Western mainstream media. You can find some of them in English by reading Jewish journalist Max Blumenthal's reporting at *The Grayzone* website.[5]

If our media wasn't owned by Zionist billionaires, you might have spent the past months watching Israel slaughter children by the thousands—and cheering as stunningly courageous, massively outgunned Hamas fighters film one another sprinting toward Israeli tanks, climbing on them under fire and destroying them with improvised explosives.

The stark difference between the cowardice of the Zionist child-killers, who have, since Hamas's surprise attack, murdered more than 20,000 civilians—the majority of them women and children—from a safe distance, and the bravery and chivalrousness of Hamas and the rest of the Palestinian Resistance, would be obvious to everyone on Earth were it not for the Zionist oligarchs' stranglehold on Western media.

No decent human being who knows the history of Occupied Palestine could fail to support Hamas. There has never been a more obviously just war than the Palestinian struggle against Zionist invasion, occupation and genocide.

Every just war theory, whether Christian, Islamic or secular, is based on the non-aggression principle: The side that initiates aggression, in this

case, by crossing the seas to invade, murder and steal the other side's land, property and people, is in the wrong, while those fighting to stop that aggression are in the right.

That obvious reality becomes even more stark when one notices that the aggressors are child-killing cowards and pathological liars, while the defenders are courageous and stoic.

Aside from the rights and wrongs, there is another very good reason to support Hamas: "They" really, really don't want you to. The strategists who are trying to keep the genocide of Palestine going apparently realize if significant numbers of Westerners start openly supporting Hamas and the rest of the Palestinian Resistance, the Zionist goose will be well and truly cooked. That's why they've used advanced propaganda techniques to inject the obligatory "I don't support Hamas, but" disclaimer deep into the collective subconscious of the West.

"They" don't really care if you deplore the massacre of 10,000 Gazan women and children. "They" don't mind if you support a two-state solution or even a one-state solution. "They" can live with you calling for a ceasefire. "They" could care less if you utter words like apartheid or even genocide.

It's like when Joel Stein said, "I don't care if Americans think we're running the news media, Hollywood, Wall Street, or the government. I just care that we get to keep running them."[6] The Zionist position is: "I don't care if Americans think we're committing human rights violations, apartheid or genocide. I just care that we get to keep committing them."

Americans complaining about Zionist human rights violations, apartheid and genocide won't stop those things. They will only be stopped at gunpoint. And it really does matter that people support the right of genocide victims to pick up guns and stop the genociders from finishing the job.

Finally, and most importantly, patriotic Americans shouldn't just support Hamas—they should emulate it. Americans, like Palestinians, are losing their country to a Zionist-Occupied Government (ZOG). Just as Palestine has been shrinking geographically since 1947, to the point that there is now hardly anything left, so, too, the once-great American republic has been largely obliterated.

Hamas has bravely risen up against ZOG. Do we Americans have the courage to do the same? ❖

Palestine Timeline

A short history of the creation of the state of Israel

The Israeli-Palestinian conflict has claimed tens of thousands of lives and displaced millions of people. It has its roots in a colonial act carried out over a century ago. Here is a simple historical guide.

By the *Al Jazeera* Staff

With Israel declaring war on the Gaza Strip after an unprecedented attack by the armed Palestinian group Hamas recently, the world's eyes are again sharply focused on what might come next.

Hamas fighters allegedly killed more than 1,200 Israelis—soldiers and civilians—in assaults on multiple towns in southern Israel. In response, Israel launched a bombing campaign in the Gaza Strip, reportedly killing more than 20,000 Palestinians. It quickly mobilized troops along the Gaza border, in preparation for a ground attack. Shortly after Hamas's "surprise" attack on Oct. 7, Israel announced a "total blockade" of the Gaza Strip, stopping the supply of food, fuel and other essential commodities to the already besieged enclave in an act that, under international law, amounts to a war crime.

But what unfolds in the coming days and weeks has its seed in history. For decades, Western media outlets, academics, military experts and world leaders have described the Israeli-Palestinian conflict as intractable, complicated and deadlocked.

LORD ARTHUR BALFOUR
Facilitated Zionist homeland.

Here's a simple guide to break down one of the world's longest-running conflicts.

THE BALFOUR DECLARATION

More than 100 years ago, on November 2, 1917, Britain's then-Foreign Secretary Arthur Balfour wrote a letter addressed to Lionel Walter Rothschild, a figurehead of the British Jewish community.

The letter was short—just 67 words—but its contents had a seismic effect on Palestine that is still felt to this day. It committed the British government to "the establishment in Palestine of a national home for the Jewish people" and to facilitating "the achievement of this object." The letter is known as the Balfour Declaration.

In essence, a European power promised the Zionist movement a country where Palestinian Arab natives made up more than 90% of the population.

A British Mandate was created in 1923 and lasted until 1948. During that period, the British facilitated mass Jewish immigration—many of the new residents were fleeing Nazism in Europe—and they also faced protests and strikes. Palestinians were alarmed by their country's changing demographics and British confiscation of their lands to be handed over to aggressive Jewish settlers.

HAPPENINGS IN THE 1930s

Escalating tensions eventually led to the Arab Revolt, which lasted from 1936 to 1939.

In April 1936, the newly formed Arab National Committee called on Palestinians to launch a general strike, withhold tax payments and boycott Jewish products to protest British colonialism and growing Jewish immigration.

The six-month strike was brutally repressed by the British, who launched a mass arrest campaign and carried out punitive home demolitions, a practice that Israel continues to implement against Palestinians today.

The second phase of the revolt began in late 1937 and was led by the Palestinian peasant resistance move-

The Deir Yassin Massacre

It is estimated by Arab and Jewish historians alike that there were as many as 70 massacres of Palestinians during the 1948 Nakba alone. One of the most notorious took place at the village of Deir Yassin, where the Jewish paramilitary groups Irgun and Lehi massacred an estimated 200 innocent Palestinians. According to Israeli historian Benny Morris, "[The militias] ransacked unscrupulously, stole money and jewels from the survivors, and burned the bodies. Even dismemberment and rape occurred."

ment, which targeted British forces and colonialism.

By the second half of 1939, Britain had massed 30,000 troops in Palestine. Villages were bombed by air, curfews imposed, homes demolished and administrative detentions and summary killings were widespread.

In tandem, the British collaborated with the Jewish settler community and formed armed groups and a British-led "counterinsurgency force" of Jewish fighters named the Special Night Squads.

Within the Yishuv, the pre-state settler community, arms were secretly imported and weapons factories established to expand the Haganah, the Jewish paramilitary that later became the core of the Israeli army.

In those three years of revolt, 5,000 Palestinians were killed, 15,000 to 20,000 were wounded and 5,600 were imprisoned.

THE UN PARTITION PLAN

By 1947, the Jewish population had ballooned to 33% of Palestine, but they owned only 6% of the land.

The United Nations adopted Resolution 181, which called for the partition of Palestine into Arab and Jewish states.

The Palestinians rejected the plan because it allotted about 55% of Palestine to the Jewish state, including most of the fertile coastal region.

At the time, the Palestinians owned 94% of historic Palestine and comprised 67% of its population.

THE 1948 NAKBA

Even before the British Mandate expired on May 14, 1948, Zionist paramilitaries were already embarking on a slash-and-burn operation to destroy Palestinian towns and villages to expand the borders of the Zionist state that was to be born.

In April 1948, approximately 200 Palestinian men, women and children were massacred in the village of Deir Yassin on the outskirts of Jerusalem.

That set the tone for the rest of the operation and, from 1947 to 1949, more than 500 Palestinian villages, towns and cities were destroyed in what Palestinians refer to as the Nakba, or "catastrophe" in Arabic.

During this time, an estimated 15,000 Palestinians were killed, including in dozens of massacres.

The Zionist movement captured 78% of historic Palestine. The remaining 22% was divided into what are now the occupied West Bank and the besieged Gaza Strip.

An estimated 750,000 Palestinians were forced out of their homes.

Today their descendants live as 6 million refugees in 58 squalid camps throughout Palestine and also in the

neighboring countries of Lebanon, Syria, Jordan and Egypt.

On May 15, 1948, Israel announced its establishment as a nation.

The following day, the first Arab-Israeli war began. Fighting ended in January 1949 after an armistice between Israel and Egypt, Lebanon, Jordan and Syria.

In December 1948, the UN General Assembly passed Resolution 194, which called for the right of return for Palestinian refugees.

AFTER THE NAKBA

At least 150,000 Palestinians remained in the newly created state of Israel and lived under a tightly controlled military occupation for almost 20 years before they were eventually granted Israeli citizenship.

Egypt took over the Gaza Strip and, in 1950, Jordan began its administrative rule over the West Bank.

In 1964, the Palestinian Liberation Organization (PLO) was formed and, a year later, the Fatah political party was established.

THE SIX-DAY WAR

On June 5, 1967, Israel occupied the rest of historic Palestine, including the Gaza Strip, the West Bank, East Jerusalem, the Syrian Golan Heights and the Egyptian Sinai Peninsula during the Six-Day War against a coalition of Arab armies. For some Palestinians, this led to a second forced displacement, or Naksa, which means "setback" in Arabic.

In December 1967, the Marxist-Leninist Popular Front for the Liberation of Palestine was formed. Over the next decade, a series of attacks and plane hijackings by leftist groups drew the world's attention to the plight of the Palestinians.

Settlement construction began in the occupied West Bank and Gaza Strip. A two-tier system was created with Jewish settlers afforded all the rights and privileges of being Israeli citizens, whereas Palestinians had to live under a military occupation that discriminated against them and barred any form of political or civic expression.

Above, but a handful of the estimated 750,000 Palestinians abruptly thrown from their homes and forced into concentration camps.

THE FIRST INTIFADA 1987-1993

The first Palestinian Intifada (meaning "to shake oneself") erupted in the Gaza Strip in December 1987 after four Palestinians were killed when an Israeli truck collided with two vans carrying Palestinian workers.

Protests spread rapidly to the West Bank with young Palestinians throwing stones at Israeli army tanks and soldiers. It also led to the establishment of the Hamas movement, an offshoot of the Muslim Brotherhood that engaged in armed resistance against the Israeli occupation.

The Israeli army's heavy-handed response was encapsulated by the "Break Their Bones" policy advocated by then-Defense Minister Yitzhak Rabin. It included summary killings, closures of universities, deportations of activists and destruction of homes.

The Intifada was primarily carried out by young people and was directed by the Unified National Leadership of the Uprising, a coalition of Palestinian political factions committed to ending the Israeli occupation and establishing Palestinian independence.

In 1988, the Arab League recognized the PLO as the sole representative of the Palestinian people.

The Intifada was characterized by popular mobilizations, mass protests, civil disobedience, well-organized strikes and communal cooperatives.

According to the Israeli human rights organization B'Tselem, 1,070 Palestinians were killed by Israeli forces during the Intifada, including 237 children. More than 175,000 Palestinians were arrested.

The Intifada also prompted the international community to search for a solution to the conflict.

THE OSLO YEARS

The Intifada ended with the signing of the Oslo Accords in 1993 and the formation of the Palestinian Authority (PA), an interim government that was granted limited self-rule in pockets of the occupied West Bank and Gaza Strip.

The PLO recognized Israel on the basis of a two-state solution and effectively signed agreements that gave Israel control of 60% of the West Bank and much of the territory's land and water resources.

The PA was supposed to make way for the first elected Palestinian government running an independent

state in the West Bank and Gaza Strip with its capital in East Jerusalem, but that has never happened.

Critics of the PA view it as a corrupt subcontractor to the Israeli occupation that collaborates closely with the Israeli military in clamping down on dissent and political activism against Israel.

In 1995, Israel built an electronic fence and concrete wall around the Gaza Strip, snapping interactions between the split Palestinian territories.

THE SECOND INTIFADA

The second Intifada began on September 28, 2000, when Likud opposition leader Ariel Sharon made a provocative visit to the Al-Aqsa Mosque compound with thousands of security forces deployed in and around the Old City of Jerusalem.

Clashes between Palestinian protesters and Israeli forces killed five Palestinians and injured 200 over two days.

The incident sparked a widespread armed uprising. During the Intifada, Israel caused unprecedented damage to the Palestinian economy and infrastructure.

Israel reoccupied areas governed by the Palestinian Authority and began construction of a separation wall that, along with rampant settlement construction, destroyed Palestinian livelihoods and communities.

Settlements there are illegal under international law but, over the years, hundreds of thousands of Jewish settlers have moved to colonies built on stolen Palestinian land. The space for Palestinians is shrinking as settler-only roads and infrastructure slice up the occupied West Bank, forcing Palestinian cities and towns into Bantustans, the isolated enclaves for Black South Africans that the country's former apartheid regime created.

At the time the Oslo Accords were signed, just over 110,000 Jewish settlers lived in the West Bank, including East Jerusalem. Today, the figure is more than 700,000 living on more than 390 square miles of land expropriated from the Palestinians.

THE BLOCKADE

PLO leader Yasser Arafat died in 2004 and, a year later, the second Intifada ended, Israeli settlements in the Gaza Strip were dismantled and Israeli soldiers and 9,000 settlers left the enclave.

A year later, Palestinians voted in a general election for the first time.

Hamas won a majority. However, a Fatah-Hamas civil war broke out, lasting for months, resulting in the deaths of hundreds more Palestinians.

Hamas expelled Fatah from the Gaza Strip, and Fatah—the main party of the Palestinian Authority—resumed control of parts of the West Bank.

In June 2007, Israel imposed a land, air and naval blockade on the Gaza Strip, accusing Hamas of "terrorism." It is still in place today.

WARS ON THE GAZA STRIP

Israel has launched four protracted military assaults on Gaza: in 2008, 2012, 2014 and 2021. Tens of thousands of Palestinians have been killed, including many children, and tens of thousands of homes, schools and office buildings have been destroyed.

Rebuilding has been next to impossible because the siege prevents construction materials, such as steel and cement, from reaching Gaza.

The 2008 assault involved the use of internationally banned weaponry, such as phosphorus gas.

In 2014, over a span of 50 days, Israel killed more than 2,100 Palestinians, including 1,462 civilians and close to 500 children.

During the assault, called Operation Protective Edge by the Israelis, about 11,000 Palestinians were wounded, 20,000 homes were destroyed and half a million people displaced. ❖

Al Jazeera is a Qatari state-media conglomerate founded in 1996 and headquartered at Qatar Radio and Television Corporation Complex in Wadi Al Sail, Doha. It presents news from an Arabic, Muslim perspective usually at odds with pro-Israel media corporations in the Western world. Currently, *Al Jazeera* broadcasts in over 150 countries and territories.

The Ethnic Cleansing of Palestine: 1948-2008

Renowned Israeli historian Ilan Pappe's groundbreaking book revisits the formation of the state of Israel. Between 1947 and 1949, over 400 Palestinian villages were deliberately destroyed, civilians were massacred and around 1 million men, women and children were expelled from their homes at gunpoint. Denied for almost six decades, had it happened today it could only have been called "ethnic cleansing." Decisively debunking the myth that the Palestinian population left of their own accord (an estimated 750,000) in the course of this war, Pappe offers impressive archival evidence to demonstrate that, from its very inception, a central plank in Israel's founding ideology was the forcible removal of the indigenous population. Indispensable for anyone interested in the roots of the current crisis in the Middle East. This book ends in 2008, but, unfortunately, little has changed since; life has only gotten worse for the average Palestinian. Softcover, 336 pages, **$20** plus $5 S&H inside the U.S. from AFP, 117 La Grange Avenue, La Plata, MD 20646. Call 1-888-699-6397 toll free to charge, Mon.-Thu. 8-4 ET or visit our online store at AmericanFreePress.net.

One Zionist 'Final Solution' for Ukraine & Palestine

The ongoing war with Russia in Ukraine and the Israeli "war on terror" in Gaza are just parallel fronts of a single, horrifyingly evolving, global war that could turn very, very ugly. What follows is the analysis of the situation by outspoken Brazilian journalist Pepe Escobar.

By Pepe Escobar

It's by now confirmed that Egyptian intelligence warned their Israeli counterparts only three days before the Hamas attack that something "big" was coming. Tel Aviv, its multi-billion-dollar security apparatus and the IDF (Israel Defense Forces), "the strongest army in the world," chose to ignore it. That configures two key vectors:

1) Tel Aviv get its "Pearl Harbor" pretext to implement a remixed "war on terror" plus a sort of Final Solution to the "Gaza Problem" (in effect); and

2) The hegemon abruptly changes the narrative away from the incoming, inevitable, cosmic joint humiliation of the White House and North Atlantic Treaty Organization (NATO) in the steppes of Novorossiya—a strategic defeat that, in comparison, makes the previous U.S. humiliation in Afghanistan look like a masquerade ball in Disneyland.

The total blockade of "human animals" (copyright Israeli Defense Ministry) in Gaza, in fact a civilian population of 2.3 million, was imposed shortly after the October 7 Hamas "surprise" attack. No food, no water, no fuel, no essential commodities.

That's a war crime and a crime against humanity, thrashing the four basic principles of the Law of Armed Conflict—everything duly applauded or at best completely ignored by NATOstan and its assorted oligarch-controlled mainstream media.

Christians, Muslims, Jews and other ethnic groups lived peacefully in Palestine for centuries until the imposition of the racist Zionist project—complete with all the divide and rule attributes of settler colonialism.

The Nakba is an old memory from 75 years ago. We are now way beyond apartheid—and entering total exclusion and expulsion of Palestinians from their ancestral homeland.

In January 2023, Israeli Prime Minister Benjamin Netanyahu himself stressed that "the Jewish people have an exclusive and unquestionable right to all areas of the Land of Israel."

Now, the IDF sent no less than a direct order to the United Nations to completely evacuate all residents of northern Gaza—1.15 million people—to southern Gaza, close to Rafah, the only border crossing with Egypt. This forced mass deportation of civilians would be the prelude to raze all of northern Gaza to the ground, coupled with expulsion and confiscation of ancestral Palestinian land—edging closer to a Zionist Final Solution.

SOCIOPATHS UNITED

Netanyahu, a sociopath with a proven track record, can only get away with serial war crimes because of total support by the White House, the "Biden" braintrust and the State Department—not to mention inconsequential EU vassals.

We recently witnessed U.S. Secretary of State Antony Blinken—a low-IQ functionary out of his depth on every single issue—going to Israel to support collective punishment "as a Jew, as well."

He said his grandfather "fled pogroms in Russia" (that was in 1904). Then came the direct Nazi connection, when Blinked noted, "My stepfather survived Auschwitz, Dachau and Majdanek." Impressive, that's three concentration camps in a row. The secretary is obviously oblivious to the fact that the USSR "liberated" all three. Then came another connection: Russia-Nazis-Hamas. At least it's all clear.

Internally, Netanyahu is only able to stay as prime minister because of two especially rabid ultra-Zionist, racist, supremacist coalition partners. He named Itamar Ben-Gvir as national security minister and Bezalel Smotrich as finance minister—both de facto in charge of proliferating settlements all across the West Bank on an industrial scale.

Smotrich has been on the record saying that "there is no such thing as Palestinians because there is no such

thing as a Palestinian people."

Ben-Gvir and Smotrich, in record time, are on their way to double the settler population in the cantons across the West Bank from 500,000 to 1 million. Palestinians—de facto non-citizens—number 3.7 million. Illegal settlements—not formally approved by Tel Aviv—are popping up all across the area.

In Gaza, where poverty hovers at 60% and youth unemployment is massive, UN agencies desperately warn of an impending humanitarian catastrophe. Over 1 million people in Gaza, mostly women and children, depend on UN food assistance. Tens of thousands of kids go to UNRWA schools. (UNRWA is the agency for Palestinian refugees.)

Tel Aviv is now killing them—softly. At least 11 UNRWA workers have been killed recently (including teachers, a doctor and an engineer), at least 30 kids, plus five members of the International Red Cross and Red Crescent.

To top it all off, there's the "Pipeline-istan" angle—as in stealing Gazan gas. At least 60% of the vast gas reserves discovered in 2000 along the Gaza-Israel coastline legally belong to Palestine. A key consequence of the Final Solution applied to Gaza translates as sovereignty over the gas fields switched to Israel—in yet another massive trampling of international law.

GLOBAL MAJORITY IS PALESTINE

Amid the horrifying prospect of Israel depopulating the entire northern half of Gaza, live on TV and cheered on by hordes of NATOstan zombies, it's not far-fetched to consider the possibility of Turkey, Egypt, Syria, Iraq, Iran, Lebanon, Yemen and the Persian Gulf monarchies joining together, at various levels, to create overwhelming pressure against the implementation of the Zionist Final Solution.

Virtually the entire Global South/Global Majority is with Palestine.

"You have stolen the orchards of my ancestors and the land that I cultivated. And you left nothing for us except for these rocks. If I become hungry, the usurper's flesh will be my food."—Poem by Palestinian national poet Mahmoud Darwish, pictured above.

Turkey, problematically, is not an Arab nation, but has been ideologically close to Hamas in the recent past. Assuming the current Netanyahu gang would engage in diplomacy, the possible best mediation team would be formed by Saudi Arabia, Qatar and Egyptian diplomacy.

Then there are the "Big Sovereigns": the Russia-China strategic partnership. Russia and Iran are themselves connected by a strategic partnership, including at all state-of-the-art military levels. The Iran-Saudi rapprochement mediated and clinched by China has led to Mohammad bin Salman and Ebrahim Raisi on the phone for the first time ever, coordinating their unwavering support for the legitimate rights of the Palestinian people. Syria's Bashar al-Assad has just visited China. He was received with full honors.

China's trademark diplomatic sophistication—way beyond Al-Aqsa Flood—amounts to supporting legitimate Palestinian rights. The whole Arab world and the lands of Islam clearly feel it—while Israel and NATOstan are impervious to nuance.

With Russia we reach heavy metal territory. Recently, Israeli Ambassador to Russia Alexander Ben Zvi was finally received following several unsuccessful attempts by Deputy Foreign Minister Mikhail Bogdanov. It was Israel who begged for a meeting.

Bogdanov cut to the chase, bluntly: Ben Zvi was warned that the IDF plan to literally destroy Gaza, expel the indigenous population and practice the ethnic cleansing of those "human animals" is "fraught with the most devastating consequences for the humanitarian situation in the region."

That advances a quite possible scenario whose consequences can be equally devastating: Moscow—in collaboration with Ankara—launching a Global South-supported blockade-busting operation against Israel.

It's no secret—apart from the modus operandi—that Vladimir Putin and Recep Erdogan have discussed a possible Turkish humanitarian naval convoy to Gaza, which would be protected from an Israeli attack by the Russian navy out of its Tartous base in Syria and the Russian air force out of Hmeimim. That would raise the stakes to unforeseen levels.

What's clear already is that the hegemon proxy war against Russia in Ukraine and the Israeli "war on terror" remixed in Gaza are just parallel fronts of a single, horrifyingly evolving global war, the stakes of which cannot be underestimated. ❖

Pepe Escobar is a politically incorrect (by Western standards) Brazilian journalist and geopolitical analyst. He regularly discusses the multi-national competition for dominance over the Middle East in his writings. His articles have appeared in *Asia Times* and *Al Jazeera*.

HISTORY YOU MAY HAVE MISSED

A digest of interesting historical news items gleaned from various sources around the world that most likely did not appear in your local newspaper or on your mainstream television broadcasts.

✠ ✠ ✠

Declare Israel Terrorist State

During a virtual summit organized by the BRICS alliance and chaired by South African President Cyril Ramaphosa, Iranian President Ebrahim Raisi argued that Israel should be declared a terrorist state due to its military campaign in Gaza. "It is necessary that this fake regime be recognized as a terrorist regime and its army be regarded as a terrorist organization," Raisi stated during the summit, a position more and more people around the world are taking after horrific images and videos continue to emerge out of Gaza. BRICS is a budding international network of rising nations led by Russia and China that also now includes Iran, Saudi Arabia, Egypt and three other nations challenging U.S. and Israeli hegemony around the world. Their commonsense talking points and cooperative, respectful mindset stand in stark contrast to the warmongers dominating Western governments.

✠ ✠ ✠

Historic Greek Church Targeted

In response to the surprise Hamas raid launched from the besieged and blockaded Gaza Strip late last year, Israel's military initiated a devastating bombing campaign that has resulted in the deaths of thousands of innocent civilians. Missiles and drones have rained down on Gaza, targeting both civilian and alleged military infrastructure, including hospitals, schools, refugee facilities and even churches. According to *Al Jazeera*, Israel bombed a historic Greek Orthodox church shortly after the Hamas raid, resulting in the death of at least 16 Christian Palestinians. The Saint Porphyrius Church in Gaza City was targeted after numerous Palestinians had sought refuge in the 12th-century house of worship. The Israeli military claims that Hamas, the demonized Palestinian Resistance group that has ruled in Gaza since 2007, intentionally places its assets in civilian infrastructure, including schools, hospitals and churches, rendering them legitimate military targets. The Greek Orthodox Patriarch, meanwhile, condemned Israel's barbaric targeting of an ancient Christian Church. "Targeting churches and their institutions, along with the shelters they provide to protect innocent citizens, especially children and women who have lost their homes due to Israeli airstrikes on residential areas ... constitutes a war crime that cannot be ignored," a statement from the patriarch's office declared.

At left, the Greek Orthodox church of Saint-Porphyrius and, to its right, the mosque in the city center of Old Gaza, Palestine.

Right, Palestinians search the destroyed annex of St. Porphyrios Church, severely damaged in an Israeli strike on Gaza City in October. Gaza's oldest church was, at the time, sheltering hundreds of Palestinians left homeless by Israel's invasion.

Daycare Center Changes Name

A daycare center in Tangerhütte, a small town in northern Germany, has sparked controversy for moving forward with plans to change its official name from "Anne Frank" to "World Explorer," a move that has drawn the ire of organized Jewish groups, Holocaust memorial organizations, German politicians and others. Linda Schichor, a manager at the daycare center, explained that the daycare center's increasingly diverse student population struggled understanding the story of Frank, the iconic Jewish girl whose diary and life story are promoted across the Western world as part of a global "Holocaust" indoctrination program. The desire to change the daycare center's name was something Schichor said the organization had been con-

templating for months, with staff and parents seeking an updated name "without a political background," according to RT.com. Christoph Heubner of the International Auschwitz Committee expressed outrage with the daycare center's decision. "If you are willing to dismiss your own history so carelessly, especially in these times of new anti-Semitism and right-wing extremism, and, if Anne Frank's name is perceived as unsuitable in public space, you can only become fearful and anxious when it comes to the culture of remembrance in our country," Heubner declared.

✠ ✠ ✠

More Austrian Restitution

The Conference for Material Claims Against Germany has successfully extorted another European government into increasing "Holocaust restitution" payments to "Holocaust survivors," it was reported in early November last year. The Claims Conference, which amounts to an organized international Jewish extortion racket, entered into extensive negotiations with the Austrian Ministry of Finance, who eventually agreed to increase payments to alleged survivors, the first increase in payments in nearly 20 years. According to the Jewish Telegraphic Agency, every living Austrian-born "Holocaust survivor"—no matter where they live currently—will receive a direct compensation payment of about 5,000 euros. Alleged survivors with "special needs" will reportedly be eligible for a second payment of roughly the same amount later this year, as well as additional annual payments. One wonders what sort of direct compensation payments Austrian-born veterans of WWII receive or whether the Austrian government even cares about them.

✠ ✠ ✠

2023 Free Speech Award

On October 12, 2023, Jurgen Neumann was awarded the George Orwell Free Speech Award for 2023 by the Canadian Association for Free Expression (CAFE), Canada's foremost free speech and immigration watchdog organization. Neumann was awarded for his dogged pursuit of truth and for his longstanding commitment to collecting and preserving some of the most vital historical speeches, documentaries, interview series and events in video format. Neumann has an extensive collection of video documentaries and interviews featuring the late Ernst Zündel as well as other important Revisionists and their works. Diane King and Jim Rizoli, who post highly censored documentaries, interviews and other videos online, acquired several videos from Neumann on a visit to Canada a few years ago. They have since uploaded many of the videos online. King and Rizoli noted that Neumann possesses an "immensely valuable archive of information dealing with the truths about the Third Reich and WWII." Neumann has an unparalleled "dedication to the truth concerning the Germans in WWII and the Third Reich," according to the duo. TBR congratulates Neumann on his well-deserved prize and salutes CAFE for its important work in championing the cause of free speech.

✠ ✠ ✠

Confederate Cultural Purge

The long-running campaign to purge and desecrate virtually all aspects of Confederate history, including iconic statues and monuments of cherished and respected Southern political and military figures, is tragically proceeding full steam ahead. In late October, the nearly 10,000-pound bronze statue of Confederate Gen. Robert E. Lee that towered in downtown Charlottesville, Va. for roughly one century began the seemingly sacred desecration ritual favored by the "woke" cultural Bolsheviks hell bent on purging, eliminating and replacing any sign or symbol of reverence for Confederate history in America. The iconic statue, an objectively marvelous piece of art, was removed from public display in July 2021. Following a protracted legal battle with those who sought to preserve the statue, including the Sons of Confederate Veterans and other Confederate history groups and activists, the City of Charlottesville donated the bronze statue to the Jefferson School African American Heritage Center, which vowed to dismantle and melt the massive piece of art down in a foundry and use its melted remains to "create a more inclusive public art installation," according to NPR. The "woke" activist organization and its leaders are currently in the process of choosing an artist to create a new "inclusive" piece of public art to be created using the remains of the melted down Lee statue, a brazen example of the ruthless nature of the far-left in its war on traditional America—especially the few remaining remnants from the Confederacy.

✠ ✠ ✠

More Bases Renamed

The last U.S. Army base named in honor of a Confederate general was officially renamed late last year, becoming the last of nine total bases that were renamed following the recommendations of the congressionally mandated Naming Commission. The Naming Commission was established in the aftermath of the death of George Floyd, a career criminal and drug abuser who died after consuming a fatal dose of drugs as police were attempting to detain him in an event that sparked mass protests, rioting and looting across the country. Fort Gordon, an Army base in Georgia, was renamed Fort Eisenhower, the final Army base to be officially renamed. The base had been named after Confederate Lt. Gen. John Brown Gordon. According to the Naming Commission and Pentagon officials, the legacies of Confederate leaders whose names were used for military bases "were only deepening our social and political divides." In the next stage of the "woke" cultural revolution, street and school names featuring Confederate leaders are on the chopping block. There is no telling where this cultural purge and desecration will eventually lead, as the anti-American, anti-White radicals pushing this Bolshevik agenda show no signs of taking their foot off the gas.

Witness to History is now in stock!

IT'S HERE! *Witness to History: The Reich Legend Uncensored*

RESCUED! By Mike Walsh. *Witness to History* was 25 years in the making with one purpose in mind: a single, comprehensive book that divulges previously censored information while effectively debunking the propaganda of the victors. At the same time, the author puts into perspective the catastrophic 20th century by presenting the big picture surrounding the so-called Russian Revolution of 1917 up to and through the attempted genocide of the people of defeated Germany. In this book, Walsh gives those who made this epoch their chance to tell us their unfiltered, spin-free comments in their own words. *Witness to History* is that book with the actual words of literally hundreds of eyewitnesses to the events of WWII—from high-ranking world leaders and military men to the average citizen on the streets. Softcover, 416 pages, illustrated, #995, **$35**.

Life in the Reich: Hitler's Germany—1933–1945

By Mike Walsh. The quality of life in the Third Reich was far superior to elsewhere in the developed world. Ordinary German workers enjoyed a lifestyle previously reserved for the upper classes of the West. Germany led the world in fashion, medicine, cinema, lifestyle, manufacturing, transport infrastructure, public facilities, science, healthcare and education. For good reason, the Germans were the cheeriest people on Earth. The claim that this was achieved through investment in militarism is absurd. Despite being war economies, the debt-ridden U.S. and European Union suffered the collapse of their infrastructure whilst their indebted populations even now live hand-to-mouth. Prosperity in the Reich set an example that exposes the failures of the mutually supportive capitalist and Communist systems. A taboo topic for media and palace publishers, *Life in the Reich* was removed by Amazon because it dared to show Hitler's Germany as it was and not as the propagandists would have us believe it was. Mainstream media and court publishers consider this a taboo topic because they don't want you to know—in case you draw the right conclusions. Softcover, 120 pages, #960, **$18**.

Heroes Hang When Traitors Triumph: Martyrs of World War II

By Mike Walsh. Character assassination inevitably follows a defeat in war. Had peace terms with National Socialist Germany been equitable, it is likely that non-German figures since denigrated would be more accurately portrayed by modern media. Had Hitler's Germany defeated the forces of the British, Soviet and American empires, then one can presume London's Whitehall would be Adolf Hitler Esplanade whilst Hyde Park would have been renamed Lawrence of Arabia Park. Norway's monuments would celebrate Vidkun Quisling and the revered writer Knut Hamsun. Romania would pay tribute to Corneliu Codreanu whilst in Ireland, Britain and New York, instead of statues to Lenin, the name of Irish-American William Joyce might be affixed to great shopping edifices. *Heroes Hang When Traitors Triumph* gives a different perspective of these vilified foes. Softcover, 115 pages, #961, **$20**.

Adolf Hitler: My Last Testament

By Mike Walsh. Adolf Hitler said he was dumbfounded as "an enormous human dragon slowly uncoiled itself before me." The young laborer's description of a protest march calling for work and bread perhaps inspired Hitler to join the revolt against the oppression of the working class. Whatever challenges Germany faced, the highly decorated war veteran would not blame the Jews, for he had earlier remarked that anti-Semitism was repugnant. There is much that is enigmatic about this man who became almost a religious figure. No other leader in history has achieved more in uniting social classes and inspiring those of various religions and races. So far, an estimated 750,000 book titles have been published on The Third Reich. Hitler's *Mein Kampf* is more widely read today than ever before. Yet, few books actually record the rise of the Third Reich in Adolf Hitler's own words. Drawn from his speeches and media interviews *My Last Testament* is Hitler's self-assessment, but it also includes personal observations about the Führer from many others as well. As such, it is an invaluable first-hand source of information for scholars of the period. Softcover, 195 pages, #962, **$25**.

HISTORY IN THE WORDS OF THE PEOPLE WHO MADE IT …

Witness to History: The Reich Legend Uncensored

By Marc Roland

Of all the innumerable written source materials I have read during the last 70 years concerning Adolf Hitler, *Witness to History* is the most compelling, realistic overview of the Third Reich in print, because its events are told by those who made them.

This vast collection of often sharply contrasting statements held by diverse personalities is deftly woven together through the author's own, interlacing narrative into a truly epic tapestry, as brilliantly colorful, as it is ferociously dramatic. Readers stand before its broad scope in awe of the monumental result achieved, and are left breathless with the feeling that they themselves have become witnesses to history. In a single volume of 416 pages, Mike Walsh has composed a comprehensive masterpiece to accurately encompass the most decisive and multifarious epoch of modern history, all in a consistently readable and self-evidently convincing form. As such, *Witness to History: The Reich Legend Uncensored* makes an ideal introduction to the subject for anyone less acquainted with it than better informed students who will, notwithstanding, treasure the text for its rich abundance of enlightening information, much of it unfamiliar, even to National Socialist scholars.

For example, Britain's prophetic author of that classic, dystopian novel, *1984*, is quoted as having stated, "I should like to put it on record that I have never been able to dislike Adolf Hitler. The fact is that there is something deeply appealing about him. One feels, as with Napoleon, that he is fighting against a destiny that he can't win and, yet, that he somehow deserves to." When that overwhelming destiny George Orwell mentioned reached its climax in 1945, Anwar

Sadat, who, 25 years later, became the third president of Egypt, wrote to the German leader, "My dear Hitler: I congratulate you from the bottom of my heart. Even if you appear to have been defeated, in reality, you are the victor."

According to Harry Elmer Barnes, the great American historian, in whose name this magazine is published, "In no country has the historical blackout been more intense and effective than in Great Britain. Here, the able English lawyer and historian of warfare Frederick J.P. Veale christened it 'The Iron Curtain of Discreet Silence.' Virtually nothing has been written to reveal the truth about British responsibility for the Second World War and its disastrous results."

British Prime Minister Neville Chamberlain concurred. He privately lamented in little more than a month after England declared war on Germany:

> History will judge the press generally to have become the principle cause of the war. Of all Germans, Hitler is the most moderate … In three days last week, I had 2,450 letters, and 1,860 [76%] of these were 'stop the war,' in one form or another.

His successor, Winston Churchill, saw things differently: "The war is not just a matter of the elimination of Fascism in Germany, but rather of obtaining German sales markets."

These and many dozens more like them form, as it were, a dialogue from the past that allows history to speak for itself. Combined, they make for an historical tour de force of the most significant turning point in the development of human civilization.

Witness to History: The Reich Legend Uncensored (softcover, 416 pages, illustrated, #995, $35 minus 10% for TBR subscribers plus $5 S&H inside the U.S.) is available from TBR, P.O. Box 550, White Plains, MD 20695. Call 1-877-773-9077 toll free to charge, Mon.-Thu. 8-4 ET or visit our online bookstore at www.BarnesReview.com.

Holocaust Reparations: A Historical Overview

Analyzing moral and material restitution for victims

TBR Contributing Editorial Board member John Wear is an active commentor on news and history websites. There he often engages in vigorous debates with commenters, some of whom appear to be paid shills of the Anti-Defamation League and like-minded groups. In autumn 2022, one commentator claimed Wear was lying about how easy it is for "Holocaust survivors" to get reparations for their "suffering." Here is his response to that allegation.

By John Wear

This author has been accused of falsely claiming that it was easy for Jewish "Holocaust" survivors to get restitution, and that I have lied about the number of claims applied for by Jewish "Holocaust" survivors versus the number of claims paid. This article analyzes the reparations given to Jewish survivors of the so-called Holocaust and acts as a factual defense of my position.

HISTORICAL BACKGROUND

In September 1945, Jewish leader Chaim Weizmann sent a memorandum on behalf of the Zionist Jewish Agency to the governments of the United States, the Soviet Union, Britain and France demanding reparations, restitution and indemnification from Germany owed to the Jewish people. The German government set up by the Western Allies responded favorably to this demand.

West German Chancellor Konrad Adenauer declared to the Bundestag on September 27, 1951:

> The federal government and the great majority of the German people are deeply aware of the immeasurable suffering endured by the Jews of Germany and by the Jews of the occupied territories during the period of National Socialism. …
>
> In our name, unspeakable crimes have been committed and they demand restitution, both moral and material, for the persons and properties of the Jews who have been so seriously harmed.[1]

Adenauer promised a speedy implementation of restitution and indemnity laws, and announced that reparations negotiations would soon begin. Accordingly, delegations representing the West German government formed in Bonn in the aftermath of WWII, the state of Israel and an ad hoc organization of Jewish groups called The Conference on Jewish Material Claims Against Germany, Inc. (Claims Conference) began talks in the Netherlands in March 1952.[2]

The Claims Conference, a nonprofit organization with offices in New York, Israel and Germany, had been formed in 1951 by representatives of 23 major international Jewish organizations. Its purpose was to secure material compensation for "Holocaust survivors" around the world.[3]

Zionist leader Nahum Goldmann, president of the World Jewish Congress and chairman of the Claims Conference, warned of a worldwide campaign against Germany if the Bonn officials did not meet Zionist demands. Adenauer and other German leaders took Goldmann's threat seriously. The talks culminated in the Luxembourg Agreement, which was signed on September 10, 1952, by Konrad Adenauer, Israeli Foreign Minister Moshe Sharett and Nahum Goldmann.[4]

West German reparations have been paid out through several different programs, including the Federal Indemnification Law (BEG), the Federal Restitution Law (BReuG), the Israel Agreement and special agreements with 12 foreign countries. The BEG indemnification law has been by far the most important of these. The BEG was based on a compensation law promulgated earlier

in the American zone of occupation in Germany.[5]

The Claims Conference has continued to negotiate for and disburse funds to individuals and organizations and seeks the return of Jewish property allegedly stolen before and during World War II.

As a result of negotiations with the Claims Conference, since 1952, the German government has paid over $90 billion in indemnification to Jewish individuals for suffering and losses resulting from persecution by the National Socialists in Germany.[6]

The Claims Conference has also conducted a social media campaign highlighting daily videos of "Holocaust survivors." It has implored Facebook CEO Mark Zuckerberg, himself of Jewish ethnic heritage, to add Holocaust denial and distortion to the platform's hate speech policy. The Claims Conference is constantly adapting to the changing needs of "survivors," yet its mission remains the same—to secure material compensation for "Holocaust survivors" around the world.[7]

MORE COMPENSATION

There have been additional types of Holocaust compensation and restitution agreements over the decades.[8] These include:

1) Agreements between governments and industry and various parties representing victims and heirs, such as the establishment of the German Foundation in 2000, primarily to compensate former slaves and forced laborers.

2) Agreements arising out of class-action lawsuits, such as the 1998 Swiss Banks Settlement.

3) Agreements between parties, such as the one that established the International Commission on Holocaust Era Insurance Claims (ICHEIC), in which corporations, insurance regulators and the Claims Conference participated.

All Aboard the Holocaust Gravy Train

The above cartoon illustrates the massive burden subsequent generations of Germans have borne for the alleged crimes their ancestors committed in the WWII era, i.e., "the Holocaust." The cartoon, however, is quite out of date. The actual estimated total Germany has paid out, according to AP News, is, as of June 2023, $86 to $90 billion. And don't be surprised if that sum keeps going up in perpetuity for, just when you think it might all be over, you'll see headlines like these pop up: "Germany Will Pay More Than $1.4 Billion Next Year to Survivors of Nazi Atrocities"(NPR); "Germany Marks 70 Years of Compensating Holocaust Survivors"(AP News); "Germany Sets Aside an Additional $767 Million for Holocaust Survivors" (*New York Times*); and last, but not least, "Germany Increases Reparations for Holocaust Survivors In a Ceremony at Berlin's Jewish Museum—Finance Minister Announces Help for a Rapidly Aging, Often Poverty-Stricken Population" (*Times of Israel*). The real show will be to see how Israel will manage to bilk more money out of Germany (and Austria) after the last Holocaust survivor is dead and buried. There are children of Holocaust survivors who believe they should get paid, as well, for the "pain and suffering" of their parents.

Compensation stemming from alleged abuses, atrocities and crimes committed against Jews (and, to a lesser extent, other persecuted minorities) has evolved over the years, comprising a lucrative industry even to this very day—more than 75 years after WWII.

THE CLAIMS CONFERENCE

It might have been difficult for Jewish "Holocaust" survivors to get restitution at first. However, the Claims Conference tells us in numerous statements that its diligent and relentless efforts have made it much easier for survivors to get restitution. The Claims Conference has continually and successfully fought for the liberalization of existing programs. It brags about how successful it has been.

For example, the 2021 Claims Conference report states:

> The Claims Conference helped rebuild Jewish communities devastated by the Nazis, revive Jewish cultural life in Europe and provide essential services to Nazi victims in 40 nations in its first 12 years of existence. 450 million Deutsche Marks (DM) received from the Federal Republic of Germany was allocated towards these causes.[9]

The Claims Conference report further states:

> At first, benefits were not provided universally, and eligibility for the program was limited to Nazi victims who were former German citizens or who had a recognized status as refugees and stateless persons, and who were in the West.
>
> In the 1950s and 1960s, ongoing Claims Conference negotiations significantly expanded the scope of those eligible under the BEG. Subsequently, the Claims Conference has continually pursued the establishment and expansion of other compensation programs and has succeeded in achieving considerable liberalizations.[10]

The Claims Conference has been diligent in its efforts to receive compensation for the pain and suffering of "Holocaust" survivors. Its 2021 report states:

KONRAD ADENAUER
Agreed to reparations.

> From day one, the Claims Conference was relentless in its efforts. In 1953, the Claims Conference expanded its original mandate and formed the Committee for Jewish Claims on Austria. …
>
> In addition, the Claims Conference has sought compensation for Jewish slave laborers and, by 1966, reached agreements with six German companies for payments for slave labor.[11]

The 2021 Claims Conference report says it has even expanded its role:

> The Claims Conference's original role further expanded with the creation of the Hardship Fund in 1980. Established after five years of negotiations, the fund issues direct payments to Nazi victims who had received no prior compensation and primarily benefitted those who had emigrated from the Soviet Union in the 1970s.
>
> The Claims Conference, rather than the German government, processed the applications and determined who would be eligible and administered the payments. Continuing negotiations have liberalized the criteria for this and other subsequent Claims Conference compensation programs.[12]

The successful efforts of the Claims Conference have continued into the 21st century. The 2021 Claims Conference report states:

> Negotiations have continued well into the 21st century. In 2000, a $5 billion agreement was reached with German industry and the government that was primarily for payments for slave and forced labor.
>
> A few years later, the Claims Conference successfully negotiated funding from the German government for in-home services for Holocaust survivors. The first home care agreement was for €6 million in 2004. In the present, the Claims Conference obtained agreements for €554.5 million for 2021 and €622.9 million in 2022.[13]

The Claims Conference states that it has successfully liberalized existing programs:

> In the most recent years, the Claims Conference has continued fighting for liberalizations of existing programs. Significant liberalizations of the Hardship Fund included hundreds of thousands of survivors including those in former communist countries, those in Morocco, Leningrad and Algeria.
>
> New programs such as the Child Survivor Fund were established, a pension program for 6,500 Holocaust survivors and pensions for Righteous Gentiles in need. Liberalizations in the Article 2 and Central and Eastern European pension programs expanded those programs to tens of thousands of additional Holocaust survivors.
>
> Payment increases were also secured for the programs and 200,000 Hardship Fund recipients received supplemental payments.

Despite its expansive shakedown of various European governments and corporations, the Claims Conference has the shameless nerve to

The Holocaust Claims Conference

Saul Kagan, the founder and former chief of the Claims Conference (right), sits with Nahum Goldmann, founder of the World Jewish Congress and president of the World Zionist Organization. Goldmann was also the first president of the Claims Conference. In 1952, Israeli PM David Ben-Gurion was ecstatic about the reparations agreement they helped hammer out. He wrote, "For the first time in the history of the Jewish people, oppressed and plundered for hundreds of years … the oppressor and plunderer has had to hand back some of the spoil." In that spirit, it would seem fair if Israel were to begin paying reparations to the millions of Palestinian families who have been "oppressed and plundered" for 75 years.

insist that, "Ultimately, no compensation can adequately address the horrors, pain and loss experienced by Holocaust survivors."[14]

The 2021 Claims Conference report concludes that its mission is far from over. The report notes that the organization's success "is a testament to 70 years of extraordinary accomplishments by the Claims Conference that have led to approximately $90 billion and counting in compensation for Jewish victims of Nazi persecution."

"However," the report insists, "the Claims Conference's mission is not complete and its commitment to Nazi victims remains unwavering."[15]

The massive swindle will apparently continue well into the future, as long as submissive Western governments and corporations allow it.

MORE RESTITUTION EFFORTS

Historian Michael R. Marrus writes that, in the mid-1960s, former slave laborers sought to sue the I.G. Farben corporation for what they had suffered during World War II. The United States Court of Appeals for the District of Columbia declared that the crimes of Nazism were too remote to be reached by civil courts.

It stated in part that "the span between the doing of the damage and the application of the claimed assuagement is too vague" and that "the time is too long."

"The identity of the alleged tort feasors is too indefinite," the court argued. "The procedure sought—adjudication of some 200,000 claims for multifarious damages inflicted 20 to 30 years ago in a European area by a government then in power—is too complicated, too costly, to justify undertaking by a court without legislative provision of the means wherewith to proceed."[16]

However, the courts began to think otherwise 30 years later. The evolution of class action lawsuits, plaintiff's initiatives in the mid-1990s and the decision of Jewish Judge Edward Korman in the precedent-setting Swiss banks case enabled successful litigation of Holocaust-era cases.[17]

SWISS SUITS SET PRECEDENT

A series of class action lawsuits were filed in several U.S. federal courts against certain Swiss banks and other Swiss entities in late 1996 and early 1997. These lawsuits alleged that Swiss financial institutions knowingly retained and concealed assets

of "Holocaust" victims and accepted and laundered illegally obtained German loot and profits of slave labor.

In August 1998, an agreement in principle was reached to settle the lawsuits for $1.25 billion. In exchange for this settlement amount paid by the Swiss banks, the plaintiffs and class members agreed to forever discharge Swiss banks, the Swiss government and other Swiss entities from all claims related to the "Holocaust," World War II and its prelude and aftermath.[18]

American attorney Robert A. Swift writes that the settlement with Swiss banks was the opening shot for future litigation of "Holocaust" claims against German, Austrian and other corporations that benefited from the Axis's wartime use of slave labor and confiscation of "Holocaust" victims' assets. A new cooperation developed between the U.S. government and plaintiffs' counsel.

OTHER AGREEMENTS

The German government announced in 1999 that it was prepared to compensate wartime forced laborers from Eastern Europe as part of an overall settlement between victims and German industry. As previously mentioned, this resulted in a $5 billion "Holocaust" settlement. A comparable agreement with the Austrian government and industry was later mediated.[19]

By the end of 2003, more than 1.5 million elderly forced laborers had received the first installment of their payments. These payments totaled approximately $3 billion. After 2003, payments to forced laborers from the Czech Republic, Poland, Belarus and other countries were received by forced laborers.[20]

Multiple class actions and individual actions were also filed in various state and federal courts seeking the proceeds of unpaid Holocaust-era insurance policies from European insurance companies. The ICHEIC was created as an alternative to litigation. As a result of the lawsuits and the attention the issue was receiving from insurance commissioners, legislation addressing "Holocaust" insurance was enacted at both the state and federal levels. Such legislation was designed to assist and facilitate the "Holocaust" litigation by providing access to information on policies, easing burdens of proof and extending statutes of limitations.[21]

A law creating the Remembrance, Responsibility and Future Foundation (the Foundation) entered into force on August 12, 2000. This law paved the way for settling individual claims on unpaid Holocaust-era German insurance policies. A Trilateral Agreement among the Foundation, the German Insurance Association (GDV) and the ICHEIC was reached in October 2002. The three parties to the Trilateral Agreement have agreed that, while the processing and payment procedure is certainly difficult and takes time, it has been working well.[22]

> There were 260,000 "Holocaust" survivors in 83 countries in 2021, a number some would say is remarkable.

The New York State Banking Department's Holocaust Claims Processing Office (HCPO) was also formed to recover art stolen during the National Socialist era. The HCPO has been effective in resolving numerous art disputes. It has been a steadfast advocate for "Holocaust" survivors and their heirs, assisting individuals of all backgrounds to achieve "justice" in the resolution of their claims.[23]

SURVIVAL RATE OF JEWS

A critic of mine has said that I overstate the survival rate of Jews in the "Holocaust." While no one can say exactly how many Jews survived the so-called Holocaust, it is notable that the Claims Conference states: "In 2021, the Claims Conference will distribute approximately $658 million in direct compensation to over 260,000 survivors in 83 countries and will allocate approximately $654 million in grants to over 300 social service agencies worldwide that provide vital services for Holocaust survivors, such as home care, food and medicine."[24]

The over 260,000 "Holocaust" survivors in 83 countries in 2021 is a remarkably large number of survivors for an alleged event that occurred 76 years prior to the year 2021. These survivors have lived extremely long lives. There would not be 260,000 "Holocaust" survivors in 2021 if 6 million Jews had died in the so-called Holocaust. The total compensation in 2021 of $1.312 billion in direct compensation and grants is also a lot of money to still be paying more than 260,000 survivors of the "Holocaust."

In December 1981, the Canadian Jewish News reported concerning the BEG that by the end of 1980, "The number of successful claimants is 4,344,378." A *Focus On* article noted that between October 1953 and the end of December 1983, the West German government had paid a total of 4,390,049 claims to individuals under the BEG legislation.[25] The great majority of these successful restitution claims were from Jews. Raul Hilberg estimated that about two thirds of these allowed claims had been from Jews.[26] Using Hilberg's conservative estimate would mean that over 2.9 million successful BEG claims to Jews had been made by January 1984.

These successful Jewish BEG claims understate the number of potential BEG claims to Jews because, as of 1985, Jews in Poland, the Soviet Union, Hungary, Romania and Czechoslovakia were not eligible for BEG restitution. Also, some European Jews who survived World War II died before the German BEG restitution law was enacted in 1953.

The *Atlanta Journal and Constitution* newspaper estimates that only half of the Jewish "Holocaust" survivors around the world in 1985 had received restitution under BEG.[27] If this 50% estimate is accurate, it would mean there would have been approximately 5.8 million successful BEG claims if all Jewish survivors of World War II had been eligible to receive BEG restitution.

Since the number of BEG compensation claims is larger than the number of BEG claimants, the exact number of Jewish recipients of BEG compensation cannot be obtained. Nevertheless, these BEG compensation figures indicate that not anywhere close to 6 million Jews died during World War II.[28]

CONCLUSION

The "Holocaust" reparations programs against Germany have been widely accepted and often praised in the West. However, they are unfair because:

1) Germany did not conduct a program of genocide against Jews during World War II; and

2) Even Germans who were born after World War II are still collectively assumed to be guilty of crimes they could not have committed.

Germany's unparalleled payoff to Israel and world Jewry is the unfortunate result of Germany's catastrophic defeat during World War II and its subsequent domination by foreign powers.[29] ❖

Ten Myths About Israel

In this groundbreaking book, outspoken Israeli historian Ilan Pappe examines the most contested ideas concerning the origins and identity of the contemporary state of Israel. The "10 myths" that Pappe explores—repeated endlessly in the media, enforced by the military, accepted without question by the world's governments—reinforce the regional status quo. He explores the claim that Palestine was an empty land at the time of the Balfour Declaration, as well as the formation of Zionism and its role in the early decades of nation building. He asks whether the Palestinians voluntarily left their homeland in 1948, and whether June 1967 was a war of "no choice." Turning to the myths surrounding the failures of the Camp David Accords and the official reasons for the attacks on Gaza, Pappe explains why the two-state solution is no longer viable. Softcover, 192 pages, ***$16*** plus $5 S&H inside the U.S. from AFP, 117 La Grange Avenue, La Plata, MD 20646. Call AFP at 1-888-699-6397 toll free to charge, Mon.-Thu. 8-4 ET.

Holocaust Reparations: Will They Ever End? Don't Count on It.

By John Friend

As TBR detailed in the previous article, the German government has been paying organized Jewish groups massive amounts of money since WWII in the form of "Holocaust" reparations. WWII, we must point out, was a global conflict that impacted nations and peoples across the world—not just the Jews—and it ended nearly 80 years ago.

It is difficult to determine exactly how much money the German government and taxpayer have given organized Jewish groups and the state of Israel, but no doubt it's in the hundreds of billions of dollars at this point. And the brazen extortion racket shows no signs of abating.

The Conference on Jewish Material Claims Against Germany, known simply as the Claims Conference, admits on its website that "since 1952, the German government has paid more than $90 billion in indemnification to individuals for suffering and losses resulting from persecution by the Nazis." Meanwhile, according to Wikipedia, the Germans have given Israel at least 25 billion Euros as a result of the Reparations Agreement between the Jewish state and the Federal Republic of Germany.

The amount of money that has been extorted out of Germany by organized Jewish groups is simply breathtaking.

The primary weapon used by the Jews to extort the Germans, as well as other Western governments, is the fake "Holocaust" story, a completely weaponized, fabricated narrative of WWII that has been systematically debunked by honest historians and investigators many times over.

Even if the official narrative of the "Holocaust" were true—and it most certainly is not—how much money do the Jews need, decades after the war ended? How are there still "Holocaust survivors" left today and why do they need so much money from the Germans and other Western governments? Don't they have their own resources and social service agencies and programs to help them in their old age?

One would think that "Holocaust" reparations paid out by Germany would be winding down or ending. That's not the case, even as we enter 2024.

Despite rising inflation, endless piles of cash for the neocon-driven proxy war against Russia via Ukraine and other pressing economic needs, the German government agreed to a record $1.4 billion for "Holocaust" reparations last summer, in one of the more brazen swindles in the history of the reparations racket.

In a report published on June 14, 2023, the Jewish Telegraphic Agency (JTA) acknowledged that "conditions didn't seem favorable" when Stuart Eizenstat, who has served as the special negotiator for the Claims Conference since 2009, entered the annual negotiations with the German government regarding "Holocaust" reparations. According to the report, there are still an estimated 240,000 "Holocaust survivors" worldwide, to whom the German government and taxpayer have a seemingly sacred and never-ending obligation to provide financial assistance.

"We're dealing with German taxpayer money," Eizenstat told the JTA at the time. "That has to be accounted for. And we've been in an era in the last couple of years and particularly this year with negative factors that would seem to have an inauspicious impact."

Eizenstat and his team were still able to secure more than $1.4 billion for the Claims Conference from the German government, marking "the largest monetary figure agreed to for a single year since German reparations began more than seven decades ago," the JTA reported.

The unprecedented amount of money demonstrated that "even as the number of Holocaust survivors dwindles with each passing year, the needs of the remaining survivors are increasing as they age."

The JTA went on to report that while some of the $1.4 billion would be sent directly to survivors in the form of a direct cash payment, the vast majority of the money would be funneled through the Claims Conference, which funds "social welfare serv-

The Endless Holocaust

ices such as home care and food packages, administered through about 300 agencies across 83 countries."

A press release directly from the Claims Conference notes that "nearly $105.2 million in additional funding for home care programs to address survivors' increased needs" was part of the package while "a one-time payment per year to recipients of the Hardship Fund will continue to be paid until 2027" which will impact "more than 128,000 Holocaust survivors globally."

"Every year these negotiations become more and more critical as this last generation of Holocaust survivors age and their needs increase," Greg Schneider, Executive Vice President of the Claims Conference, said following the negotiations. "Being able to ensure direct payments to survivors in addition to the expansions to the social welfare services we are able to fund is essential in making sure every Holocaust survivor is taken care of for as long as it is required, addressing each individual need."

As part of the negotiations, the German government also pledged to increase funding for "Holocaust" education programs as well.

"This is perhaps the most productive session we've ever had," Eizenstat boasted following the successful conclusion of the negotiations. "And the fact that it has occurred almost 80 years after the war is a testimony to the Claims Conference's relentless pursuit of justice and the partnership that we've had with the German government."

The "relentless pursuit of justice" described by Eizenstat amounts to a well-organized, highly funded extortion racket, which has netted the international Jewish community billions of dollars and endless sympathy. Will this swindle ever end?

As the article notes, part of the money Germany is handing over to these shameless Jewish extortionists will go towards "Holocaust education around the world" in an effort "to counter findings from recent surveys showing that the public is growing less knowledgeable about the Holocaust as it recedes further into the past."

Simply put, the organized Jewish community aims to instill the fake "Holocaust" narrative into the minds of young children for perpetuity in order to advance their anti-White, nation wrecking agenda across the world.

But how exactly did Eizenstat and the Claims Conference manage to successfully negotiate this record setting $1.4 billion commitment from the German government?

According to Eizenstat, direct exposure to "Holocaust" survivors and "Holocaust" education are what made the negotiations so successful. In the lead up to the formal negotiations, Eizenstat took chief German negotiator Luise Hölscher on a tour of some of the more iconic Jewish "Holocaust" museums and memorials around the world. They visited the Yad Vashem Holocaust Museum in Jerusalem, a Jewish history museum in Warsaw and the United States Holocaust Memorial Museum in Washington, D.C.

"I took Luise for three hours before the negotiation and introduced her to three of our survivors who are docents at the Holocaust Memorial Museum," Eizenstat told the JTA. "It really gave her a historical sense of the Holocaust, but also how much these funds mean to the dignity of survivors."

After visiting and speaking with a "Holocaust" survivor, how could the chief German negotiator not agree to a record setting $1.4 billion reparations agreement? Anything less than that would be "anti-Semitic," after all.

The unbelievable fraud the Claims Conference and other organized Jewish groups shamelessly perpetrate is simply astounding. ❖

A Potpourri of Popular Revisionist Titles from TBR

The Talmud Unmasked: Secret Rabbinical Teachings Concerning Christians

Written by Iustinus Bonaventura Pranaitis, a Lithuanian Catholic priest and professor of the Hebrew language at the Imperial Ecclesiastical Academy of the Roman Catholic Church in St. Petersburg, this startling book contains a full list of the slurs, vilifications, insults and abuse contained in the Talmud that are directed specifically against Christians. First published in 1882, this book caused a stir in Russia and beyond, and every effort was made to suppress it and smear its author. A marked man, he was targeted by the Bolsheviks and executed in St. Petersburg—his only crime having been authoring this book. Fr. Pranaitis was one of the few men of his time able to read the original Hebrew manuscripts and thus able to provide the non-Jewish world with its first comprehensive glimpse into what Jews are really taught about non-Jews. A reading of *The Talmud Unmasked* shows the reason for this: The quotes from the Talmud reveal a shocking and deep-seated hatred of Christians—and all "goyim," for that matter—using terms and ideas that the reader will find deeply insulting and disturbing. Softcover, 98 pages, #980, **$13**.

Mussolini's War: Volume 1—The Triumphant Years

Among the great misconceptions of modern times is the assumption that Benito Mussolini was Hitler's junior partner, who made no significant contributions to the Axis effort in WWII. That conclusion originated with Allied propagandists determined to boost Western morale. The Duce was constantly ridiculed, his successes pointedly demeaned or ignored. Mainstream historians love to say that Italy's navy, air and land forces were nothing more than a bungling bunch of clowns. So effective was this campaign of lies that it became postwar history and is still generally taken for granted, even by well-informed students of WWII—and even by Italians themselves! But a closer examination by historian Frank Joseph of often neglected, recently disclosed materials presents a different picture. Softcover, 275 pages, #808, **$27**.

Mussolini's War: Volume 2—Apotheosis

The ongoing caricature of Mussolini's servicemen as laughable buffoons is laid to rest by this book. It views Italy's participation within the context of its industrial disadvantage. For example, her total production for the entire war amounted to approximately 3,500 tanks, less than all those used by the German Army in its 1940's invasion of France. Britain mass-produced 27,528 tanks between 1939 and 1945. When Mussolini declared war on the Western Allies in June 1940, his country produced 4.4 megatons of coal to Britain's 224.3 megatons; 1.2 megatons of iron ore against Britain's 17.7 megatons; and 2.1 megatons of steel for Britain's 21.5 megatons. Disparities in crude oil were even more extreme. Given such fundamental disadvantages, the numerical superiority possessed in virtually all engagements by the Allies and their eventual cracking of Axis military codes, that Fascist Italy was able to sustain five years of unremitting combat and score significant victories against overwhelming enemy forces testifies to her terrific fighting spirit and human resilience. Softcover, 316 pages, #902, **$27**.

BOTH VOLUMES FOR $40—save $14 (Item #889).

The Six Million: Fact or Fiction?

By Peter Winter. New 6th edition. New appendices. How Zionists and Nazis cooperated on Germany's racial laws; how Zionists offered to take up arms against Britain; how Nazi policy was aimed at encouraging Jews to emigrate, and then evacuating them; how official German records show that there were 4.5 million Jews under Nazi control, and 4.3 million lodged claims as "Holocaust victims" after the war; how the USSR used torture to produce "confessions" from Germans and much more! Considered by some to be the most important, easy-to-access, information-filled Holocaust resource ever published. Covers nearly every myth and fact ever reported about the incarceration of Jews in work camps during the Hitler era and why so much of the mainstream Holocaust narrative simply cannot be trusted. Softcover, 80 pages, 8.5" x 11," 160 illustrations, #604, **$25**.

The International Jew: The Full Unexpurgated Version—2 Book Set

This newly composed two-book set contains all four volumes of the original *International Jew* and is the only complete set of all 80 unexpurgated articles published by Henry Ford in *The Dearborn Independent*. The 80 articles were later republished in book form but were severely redacted by the editors for fear of accusations of anti-Semitism. Now, the full version of Ford's groundbreaking study is available again and contains all the content and prefaces. Book 1 contains Volume I: The International Jew—The World's Foremost Problem, and Volume II: Jewish Activities in the United States. Book 2 contains Volume III: Jewish Influence in American Life and Volume IV: Aspects of Jewish Power in the United States. Book 1: Softcover, 413 pages, #977, **$35**. Book 2: Softcover, 396 pages, #978, **$35**.

BOTH BOOKS (four volumes) for just $60. Item #987.

Germany's War: The Origins, Aftermath and Atrocities of World War II

By John Wear. *Germany's War* documents that the Allied leaders were primarily responsible for starting and prolonging WWII—costing millions of lives. FDR's numerous provocations forced Germany to declare war on the U.S.A. despite Hitler's desire for peace. Also covers Stalin's plan for European conquest, America's second crusade, how WWII was planned and instigated, the Allied conspiracy to prolong the war, the Allied POW camps that killed a million Germans, the appalling plight of expelled Germans, history's most terrible peace, crimes committed in German camps, the alleged genocide of 6 million Jews, and more. Softcover, 514 pages, #717, **$25**.

Victory or Violence: The Story of the AWB of South Africa

The *Afrikaner Weerstandbeweging* (AWB) and its leader Eugene Terre'Blanche have become famous as the face of militant Afrikaner nationalism. This is the true story of the origins of that movement, its ideology, activity, membership—and, finally, its dramatic climax, which included the most violent and far-reaching terrorism and sabotage campaign in South African history. So serious was the AWB's campaign of resistance against African National Congress (ANC) rule, that

the then-government was forced to declare a state of emergency as AWB sabotage squads targeted power networks, railway lines, and ANC offices in a wave of attacks that made all of the ANC's previous efforts at "armed resistance" pale in significance. Historian Arthur Kemp details the early founding of the AWB, the backgrounds of its leaders, the militancy that accompanied the then-government's political reform program, the movement's ideological basis, and, finally, the turn to violent resistance. No understanding of South Africa's history is complete without this eyewitness account of hard-line Afrikaner resistance to the end of White rule. This edition contains three new chapters and 153 exclusive photos. Softcover, 376 pages, #612, **$34**

Léon Degrelle In Exile: 1945-1994

By José Luís Jerez Riesco. Stripped of his Belgian citizenship and sentenced to death in absentia for fighting Bolshevism in WWII, Leon Degrelle lived the rest of his life in exile in Spain, harbored by Franco. During these 49 years, Degrelle refused to remain silent as fictional narratives were woven about the war and the "atrocities" of the Germans in the decades following. Despite attacks on his family, vilification by the world and conflicts with the church, he never wavered in his Catholic faith or his conviction in National Socialism. Here is the story of those years, complete with extensive letters between Degrelle and his friends and family, interviews, speeches and anecdotes from those who knew him. Softcover, 518 pages, #993, **$30**.

The Burning Souls: A Poetic Memoir

Leon Degrelle's *The Burning Souls* is now available in English. Born to a Belgian family in the year 1906, Degrelle rose to prominence as a newspaper editor and head of the Catholic and anti-Communist *Parti Rexiste*. Following the German occupation of Belgium, Degrelle and his party loyalists enlisted in the *Wehrmacht*'s Walloon Legion to aid in the liberation of the Soviet Republics. After the fall of Berlin, Degrelle escaped to Spain, where he was safeguarded by Franco. *The Burning Souls* is Degrelle's reflection on his experiences and on the soul—part poetry but mostly memoir. He traces his journey, from his childhood to the steppes of Russia, a physical and spiritual journey He says to give oneself completely in service of a transcendent ideal is what is required to overcome the spiritual malaise of our day. Softcover, 112 pages, #901, **$19**.

Race and Racial Differences: A Handbook for the 21st Century— How DNA Shapes Mankind Into Seven Major Races

By Arthur Kemp. Race is real, it is biological in nature, and it is shaped and determined by genetics alone. This book is the first to conclusively show exactly how races are physically and psychologically shaped by individual genes. Using data and references from dozens of highly reputable scientists and journals, this fully referenced work starts with an overview of the development of the study of race, from the earliest times up to the very latest advancements in DNA analysis. From there, it explains how human DNA works and how it relates to geographic locations. When analyzed, the DNA differences divide into seven distinct regions. Each region clusters according to genetic similarity—the definition of race. This provides proof of the biological existence of race, and destroys claims that race is a "social construct." This work builds on the DNA reality by probing deeper and revealing the exact genes that determine the physical differences we see before us. What are the seven races? Softcover, 194 pages, #959, **$22**.

Mass Murder at Katyn

Here is the first-ever complete English translation of the forensic report by the Germans detailing the mass murder of Polish officers and officials by Stalin's secret police in the Katyn Forest, originally published in 1943. Dismissed as "propaganda" and ignored for 50 years, this report starts with an overview of the basic facts surrounding the discovery of the mass graves and then offers eyewitness accounts of the captive Poles transported to their execution. Next comes a thorough account of the environment and its effect upon buried bodies—establishing the time of death. Then, a series of postmortem studies on the bodies is presented. It also provides correspondence between the Red Cross and other parties, while the next section details the Allied response, which alleged the murders hadn't occurred and then that the Germans did it. Also includes a list of identified victims and a complete photo record of the graves. Softcover, 290 pages, 8.5" x 11" format, #929, **$28**.

The Search for Life on Mars: The Greatest Detective Story of All Time

Mars has excited our imaginations as the most likely other habitat for life in our solar system. Now the Red Planet is coming under scrutiny as never before. With rockets launched just recently from the U.S., China, and the EU, this book recounts in full the greatest scientific detective story ever. For the first time in 40 years, the missions heading to Mars will look for signs of ancient life. It is the latest chapter in an age-old quest that encompasses myth, red herrings, and bizarre coincidences—as well as triumphs and failures. This book, by two journalists with deep experience in space exploration, is the definitive story of how life's discovery has eluded us to date, and how it will be found this century. Softcover, 424 pages, #932, **$18**.

War on the Border: Villa, Pershing, the Texas Rangers & an American Invasion

Jeff Guinn tells the story of Pancho Villa's bloody raid on a U.S. border town that sparked a violent conflict with the U.S.A. The "Punitive Expedition" under Gen. John J. Pershing was launched in retaliation and brought together the Army, National Guard and the Texas Rangers—who were organized vigilantes at the time. Opposing this brigade was Pancho Villa, a guerrilla fighter who commanded a motley force of conscripts in Mexico. This was the first time the Army used autos and trucks, limited in value in Mexico, a country with no paved roads or gas stations. Curtiss Jenny airplanes did reconnaissance, another first. But, despite some bloody encounters, the expedition eventually withdrew without capturing Villa. Today, the U.S.-Mexico border remains as vexed and volatile as ever. Hardback, 368 pages, #941, **$28**.

National Socialism in America: From 2002 to the Present

HERE IS THE CONCLUDING ESSAY IN OUR SERIES addressing the history of National Socialism and National Socialist-inspired groups and organizations in modern American history. Against all odds, these groups struggled mightily to get their message out and educate the American public about the subversive forces manipulating, exploiting, and degrading American society—and what must be done about it.

By Karl Haemers

In previous parts of this series, we tracked the development of German American groups from 1924 up through the pre-WWII Bund, then through the tempestuous 1960s and George Lincoln Rockwell's dramatic leadership of the American Nazi Party and its antecedents, and next following other groups and individuals. This includes the National Alliance and William Pierce, active into the early 2000s.

In our final installment, we examine groups and individuals associated with National Socialism in America up to the present day. The first four organizations addressed below complete their stories from Part 3.

NATIONAL ALLIANCE (NA)

After the death of its founder and leader, William Luther Pierce, in July 2002, the history of the National Alliance continued. According to an official history published on the organization's website:

> [I]n the leadership vacuum, persons unfamiliar with—or opposed to—the foundational principles of the Alliance, both organizational and spiritual, took power. A "big tent" approach was tried, and the sections of the Membership Handbook listing Christianity as an opposed ideology were gutted.
>
> The qualities that had set the National Alliance apart from other pro-White groups—its spiritual basis, its high standards, its uncompromising ideology—were discarded. The Alliance was converted into just another competing "White rights" organization, something for which there was essentially no need or demand.
>
> The quality of Alliance publications began to suffer, as less competent staff were hired. As time passed, the radio program, print publications and web publications ceased. Membership and supporter numbers—and quality—plummeted.[1]

WILLIAM PIERCE
Death sparked power struggle.

Core members resigned or were expelled during these "dark years." Will Williams, a prominent figure in the NA, left but continued publishing, including the William Pierce Legacy website, while Kevin Alfred Strom continued with the *National Vanguard*, a news and commentary website that is still operational today.

In 2005, Strom and four members of the Executive Committee, along with many other members, signed a document titled, "A Time for Leadership: the declaration of National Alliance leaders and members demanding honesty, openness, accountability, and reorganization." It advised then-Chairman Eric Gliebe to appoint Strom and the other Executive Committee members who signed the document

to a new board of directors, place all the assets and properties of the NA under their management, and discharge Gliebe's second-in-command Shaun Walker. Gliebe failed to respond, and the NA continued its internal power struggle for another decade.

By 2014, after Gliebe disbanded it, Williams and Strom reformed the organization in alignment with its founding principles. Williams became the new chairman and Strom became the media director.

They built an office and media center in rural Tennessee and resumed radio broadcasts of *American Dissident Voices* (also an internet podcast), while *National Vanguard* online once again became the official magazine. They reclaimed Pierce's library and possessions at auction.[2]

More recently, Williams led the NA in efforts to resist "attempts by our enemies" to dissolve it. Today, the National Alliance carries on with its educational work among race-conscious Whites, with the *National Vanguard* website, *American Dissident Voices* radio program, a member's website (Natall.com), a website dedicated to Cosmotheism (CosmotheistChurch.org) which presents the spiritual basis of the NA as articulated by Pierce, and an interactive forum called "White Biocentrism" (WhiteBiocentrism.com).

The critics of the National Alliance have more history to add. As we have seen throughout this series, a number of well-funded organizations monitor right-wing, pro-White activist and educational groups sympathetic toward (or who outright endorse) National Socialism, working in various ways to undermine, slander and disrupt them. They include the Southern Poverty Law Center (SPLC) and the Anti-Defamation League (ADL), among others. They reported on the power struggles within the NA through the 2000s, accusations of criminal misconduct by NA leaders, and the leadership transition from Gliebe to Williams in 2014.[3]

George Lincoln Rockwell is shown in front of the Nazi Party's headquarters on Ridley Road, Arlington, Virginia in 1965. After the assassination of Rockwell in 1967, Matthias "Matt" Koehl became the leader and served in that position from 1967 to 2014.

NA's membership requirements state that "any White person (a non-Jewish person of wholly European ancestry) of good character and at least 18 years of age who accepts as his own the goals of the National Alliance" may join. Readers interested in learning more about the current version of the NA can visit Natall.com or NationalVanguard.org for more information.

THE NEW ORDER

Since the early 2000s, this National Socialist organization, formerly known as the National Socialist White People's Party, has remained relatively dormant compared to its previous activism, which included high profile street demonstrations. The late Commander Matt Koehl, who took over the organization following the death of George Lincoln Rockwell in 1967, continued to write and distribute material through its NS Bulletin, either

White America: The American Racial Problem as Seen in a Worldwide Perspective

RESCUED—Here is a survey by Ernest Sevier Cox of the relationship between racial homogeneity and the preservation of civilization, described against a sweeping historical backdrop which includes Egypt, India, South America, South Africa and, finally, the U.S.A. In this book, the author proves how "diversity" has in every case led to the collapse of the original founding civilization, and that the only solution to the problem is not segregation but total physical geographical separation. The only solution for America, this work argues, is the repatriation of its non-White population to the continents of their origin. Written in the 1930s, the fulfillment of the predictions of what would happen if a policy of separation was not followed makes the book's thesis more urgent. This new edition has been edited and the text completely reset. It contains the full original text, nine new illustrations and a complete index. New cover. Softcover, 250 pages, #610, **$25** minus 10% for TBR subscribers plus $5 S&H inside the U.S. from TBR, P.O. Box 550, White Plains, MD 20695. Call toll free 1-877-773-9077 to charge, Mon.-Thu. 8-4 ET. Shop online for more books at www.BarnesReview.com.

quarterly or bimonthly, and also posted promotional material and commentary on The New Order website (TheNewOrder.org) until his death. Others wrote as well, particularly Martin Kerr, the Chief of Staff of the New Order. The organization also maintains a social media presence on Gab (Gab.com/new_order), as well as the White nationalist discussion forum Stormfront.org.

Koehl died in his sleep at age 79 from cancer complications in 2014.[4] The group still maintains a post office box in Milwaukee, Wisconsin, from which it receives donations and distributes literature, with Kerr serving as the main officer. He stated in an email that the New Order views Whites as one large racial family, which does not hate other racial families. He accused the SPLC of labeling everyone opposed to their views as "hate groups."

The New Order official website links to NS Publications (NSPublications.com), which sells National Socialist-themed books, posters, and audio cassettes featuring original marching music, songs, and speeches from the Third Reich era.

The New Order occasionally arranges in-person gatherings for members, notably on Adolf Hitler's birthday, April 20. The New Order supporters regularly distribute National Socialist printed materials to the general public. For example, in May 2021, activists in Virginia distributed leaflets "touting the White race," according to a local newspaper. No quotation from the literature was provided.[5]

NATIONAL SOCIALIST MOVEMENT (NSM)

The National Socialist Movement calls itself "America's Nazi Party, the largest and most active National Socialist party in America today."

"We are the political party for every patriotic White American of moral strength and good character," the NSM claims on its official website, NSM88.org.

NSM describes its own history:

> The National Socialist Movement was founded in 1974 and saw its largest membership surge under the [current] leadership of Commander Burt Colucci. Commander Colucci has worked to implement a new direction for the Party, one that includes focusing on making this a truly American National Socialist Movement, one which will give Americans the choice of supporting a party that will combine the best of both National Socialism and private, free market Capitalism, to create a system that will stop our foundational decay, while bringing innovation, prosperity, and security to all of White America.[6]

In Part 3, we saw Jeff Schoep lead the NSM to become the largest NS group in the U.S. In 2005, a planned NSM march to protest the city's failure to address Black gang violence in Toledo, Ohio ignited a large riot, in which counter-protesters were arrested, police were assaulted, and property was vandalized. The mayor said the "Nazis got exactly what they wanted."[7]

Nearly 50 NSM members returned two months later and marched in the presence of 170 counter-protesters and 700 police. No violence occurred and the NSM completed their rally and withdrew in good order.[8]

In 2006, about 80 NSM members demonstrated at the state capitol building in Lansing, Michigan, provoking rioting and assaults on three NSM members, along with animated press coverage.[9]

Later in 2006, Citizens Against Hate discovered that the NSM's Tulsa, Oklahoma post office box was the same as the Joy of Satan Ministry (JoSM). NSM founder Cliff Herrington's wife was said to be a "high priestess" of JoSM. This caused a division among NSM members, but the NSM's then-media officer Bill White defended JoSM as "similar to Aryan Paganism shared by most of the NSM's leadership." Schoep and White parted ways and White founded the American National Socialist Workers' Party; 130

NSM members came with him.[10] Herrington quietly left the party.

Since then, White has consistently outed the FBI for setting up satanist groups across the country in an attempt to ensnare young, White nationalists. *American Military News*, for instance, pointed out in November 2023 that "the FBI consistently ignored a satanist pedophilia ring until it found a 'White supremacy angle'." Was it a satanic ring set up by the FBI itself?

The NSM chapter in Springfield, Missouri then ignited a crisis when it sponsored a stretch of highway for roadside clean-up. The authorities' reaction was to rename the highway after a rabbi.[11] Another NSM demonstration involving 70 members occurred at Los Angeles City Hall in 2010, opposed by hundreds of counter-protesters.

A number of incidents potentially damaging to NSM's credibility occurred during this time, most of which are difficult to assess for accuracy given media distortion. However, Lt. Col. Harry Hughes, the NSM's current public relations director, replied to inquiries sent by this writer via email.

Commenting on the 2006 JoSM controversy, Hughes explained that "as a rule, the NSM doesn't focus on religion" and that its "members come from various faiths, while others are agnostic."

Perhaps the most serious scandal the NSM has faced, especially in recent years, is the public recanting of its former leader Jeff Schoep. In 2019, Schoep publicly disavowed his previous "Nazi affiliations," and the Detroit-based chapter of NSM he was long affiliated with disbanded.

Schoep describes himself as being "once one of America's most notorious neo-Nazi" leaders who is "now a consultant for the Simon Wiesenthal Center and an inspirational speaker for Conscious Campus." He also founded a 501(c)(3) organization called Beyond Barriers, a "non-profit organization dedicated to a world devoid of extremism, radicalized organizations, hate, violence, coercive and violent ideologies," according to Schoep's official website at JeffSchoep.com.[12]

Jeff Schoep was the leader of the National Socialist Movement (NSM) for 25 years. In 2019, he renounced the organization and, for the past four years, Schoep has been working as a consultant for the Simon Wiesenthal Center and as a paid speaker. Schoep says his new goal in life is to "educate communities about the dangers of extremism and help individuals disassociate." It is suspected he was working as an FBI informant for a goodly portion of his NSM tenure.

Commenting on Schoep's mysterious actions, Hughes noted that "a lot of people on both sides feel that Jeff Schoep is not serious about this 'conversion'. … The only question I have is, 'How much did they pay him?'" Hughes asked, inferring that Schoep may have been compromised or bribed to publicly disavow the organization and his past affiliations.

Following the Schoep scandal, "the NSM regrouped under the new commander, Burt Colucci, in the state of Florida," Hughes explained. "NSM Detroit was done."

As recently as September 2023, libertarian journalist Ken Silva reported on the NSM in an article titled, "How an FBI Informant Created One

of Largest Nazi Groups in U.S. History." It presents conflicting evidence that NSM had been infiltrated at its founding and throughout its existence by the FBI's Joint Terrorism Task Force and the department of Alcohol, Tobacco and Firearms. It supports the claims that some NSM leaders were offered bribes, but that current leader Colucci refused such a bribe.

Silva affirms that Schoep "now openly collaborates with the FBI." Overall, this account is self-contradicting, and it remains difficult to assess the validity of NSM infiltration—or any of these groups we are considering for that matter.[13]

The NSM does not report its member count, because it has a "long standing standard operating procedure to never discuss numbers, as we wish to maintain OPSEC," Hughes explained, referring to the concept of "operations security."

Since "the present and intense misinformation campaign and internet censorship is making the promotion of our organization far more challenging," NSM is relying on printed material "to engage high school students and the general public" more broadly, according to Hughes.

Hughes defended the NSM's controversial display of the swastika, noting that the ancient symbol "is very powerful and is an excellent attention-getter." Hughes says, "Whether or not we use the swastika, the opposition will still call us 'Nazis.' A single swastika flag at the right time and place can get us international media coverage."

One of the main goals of the organization currently is to "continue trying to educate people on what National Socialism really is."

"Thanks to propaganda, inaccurate memes and blatant misinformation, a large portion of our population does not know the difference between a Communist and a National Socialist," Hughes stated. "The NSM is hoping to play a key role in returning our nation to a prosperous and nationalistic country. Watching the anti-Marxist economic principles that made the German economic miracle of the 1930s possible applied to 21st century America would be my ultimate goal."

Though NSM has chapters in other states, under Colucci its center is in Florida.

CHURCH OF JESUS CHRIST CHRISTIAN—ARYAN NATIONS (AN)

Part 3 ended with the 2001 destruction of the main AN church in Idaho, which, according to the organization, was allegedly done by Jews, whom they refer to as "children of Satan," and with the death of founder Richard Butler in 2004. AN had lost its property in 2001 following a $6.3 million judgment against the organization in a lawsuit filed by the SPLC on behalf of two "Native Americans" following a confrontation with AN guards on the road next to the compound. The burning of the AN church appears to have been part of a training exercise for a local fire department after the organization sold ownership of the property.[14]

> After two hung juries, Turner was convicted in a third trial and sentenced to 33 months in prison.

During the transition, Butler appointed Ray Redfairn to lead AN, but, according to Barry Lynn in an April 16, 2008 article in *Culture Shocks*, Redfairn brought in an apparent FBI informant named Dave Hall.

Butler expelled Redfairn and others, who then formed a new group. Redfairn died in 2003.

After AN declared bankruptcy, a number of new factions formed, with bases in Pennsylvania, South Carolina and Tennessee. In 2005 the Aryan Nations Revival (ANR) formed, based in New York City, and returned to a pure Aryan Christian membership since a separate faction had allowed a diverse pagan and Islamic membership. The Revival became the largest AN group.

AN Revival produced *The Aryan Nations Broadcast* radio show and webcast weekly until 2009. In June of that year, host Hal Turner wrote an editorial about a court's ban on handguns. "[T]hese judges deserve to be killed," Turner argued. "Their blood would replenish the tree of liberty, a small price to pay to assure freedom for millions."

After two hung juries, in an unprecedented third trial, Turner was convicted and sentenced to 33 months in a maximum-security prison for terrorists. Turner is still producing radio shows and other content today, unaffiliated with AN.[15]

Aryan Nations Radio continued with different hosts on the All Nationalist Network until 2015. The organization still maintains an extensive website (CJCC-Aryan-Nations.com) which features a section on Aryan Nations membership, a Bible studies section, and other historical details of the organization and its worldview, goals, and philosophy.

The group claims it is "the most feared and revered White supremacist organization the world has ever known."

"WE, A REMNANT OF OUR RACIAL ARYAN NATION, who have not and will not bow the knee to the destroyer, do hereby seek a convocation, a Congress to meet in solemn assembly to HOIST A STANDARD and commence a great Aryan Racial Regeneration, to separate ourselves individually and nationally from laboring for that which destroys US," the group demands on its official website. (Capital letters in original.)

* * *

This completes our review of NS groups first presented in Part 3. Other groups are active and operating in our modern era, many with overlapping membership and support as well as ongoing challenges and allegations of federal infiltration.

Supporters of the Atomwaffen Division (AWD) pose with James Mason (seated in uniform), in the fall of 2019 in Las Vegas, at an event called the Nuclear Congress. Mason said he believed that "25% of the attendees were feds." Mason was the author of the influential *Siege* newsletter (1980-86). In it, Mason called for Whites to engage in an armed struggle for control of the nation rather than wasting their time—as he saw it—voting in elections for candidates who would never truly address the concerns of White people.

What follows is a summary of some of the most prominent organizations openly affiliated with National Socialism today.

ATOMWAFFEN DIVISION (AWD)

First organized in 2013, part of its mission statement says: "The failure of democracy and capitalism has given way to the Jewish oligarchies and the globalist bankers resulting in the racial and cultural displacement of the White race."[16]

Martin Kerr of the New Order replied to inquiries: "Atomwaffen had about 100 members: 75 FBI infiltrators and 25 well-meaning but naive teenagers waiting to be entrapped." It is unclear whether this is an accurate assessment or hyperbole.

Once active on the "Iron March" website, a right-wing web forum that has since been shut down, AWD members posted flyers at university campuses, appeared in 2016 at a public protest against a vigil for the Orlando gay nightclub shooting and at a White Lives Matter (WLM) demonstration. Since its founding, the group has largely been concentrated in Florida but was also active in other states.[17]

Group members openly display National Socialist iconography and symbolism including swastika and SS thunderbolts. Members train at so-called "Doomsday Hatecamps," and the organization itself has been reportedly influenced by the views of James Mason and his book *Siege*. Over the years, Mason—who was acquainted with Charles Manson—had grown increasingly disillusioned with National Socialist movements and believed direct action was needed, i.e., a White revolution through aggressive, even violent actions.

Over an eight-month period in 2017, in four unrelated incidents, four young men each with affiliations to AWD were involved in multiple alleged murders and one conspiracy to bomb infrastructure.[18]

Serious allegations that the AWD was deeply infiltrated by federal agents who had played a part in driving the actions of several members have been widespread on social media.

The FBI looked upon the organization, as it does other dissident groups, as a possible target for infiltration and entrapment operations. However, only through FOIA requests and other research can the involvement of the FBI in undermining a group be determined. Possibly a majority of AWD's members are dedicated and loyal, as it is with many National Socialist groups.

The group officially disbanded under pressure in 2020, but rumors quickly emerged that the AWD had rebranded itself as the National Socialist Order.[19]

BLOOD TRIBE/*BLUTSTAMM* (BT)

If National Socialist groups in U.S. history are like a scatter of stars across the night sky, Blood Tribe appeared like a supernova in 2023.

An organized troupe of about 20 men wearing uniforms consisting of a crimson shirt with a bind rune symbol, black trousers, black boots, black face masks and sunglasses, with two carrying swastika battle flags and led by commander Chris "Hammer" Pohlhaus, marched in formation to the edge of a large drag queen story hour in a park in Wadsworth, Ohio.

Once there, they commenced coordinated call-response chants such as "Sieg Heil!" while casting Roman salutes. Hammer strode before his unit, near the fence behind which the drag queen story hour attendees, including children, watched stunned. Hammer coordinated the synchronized movements and chanting of the unit as the swastika flags waved above and a large banner unfurled before the troupe read: "There Will Be Blood!"

They then withdrew in good order and moved to a nearby synagogue where they conducted another demonstration.[20]

Blood Tribe formed in 2017 when Hammer was in San Antonio, Texas, and later developed more thoroughly in Wisconsin. It now has units in four regions: the Upper Midwest, "Dixie," the Ohio region and the Northeast. Members travel to attend events across a wide area.

This group says it has a carefully vetted multi-tiered hierarchy, with members initiated through a ceremony—cutting the hand on a spear and anointing the spear shaft with blood. A lower tier of the group is called Blood Nation. Those members provide support as they advance upward. They must attend two public rallies before being elevated to the Blood Tribe tier, and both tiers must meet physical fitness standards.

Hammer sees National Socialism as a system of priorities, devoted to race and tribe first, including protection of women and children. Blood Tribe views our times as a Judaic age, with Jewish power ascendant. It aims to provide a living example and legacy of strong White power, internally and externally, as history returns to a proper White ascendancy.

Hammer believes Blood Tribe must be an exemplar, claiming the swastika symbol as the ultimate expression of this mission. He sees his organization as the "anchor at the end of the Overton Window," holding solid ground while the Judaic age erodes beneath.[21]

As seems evident with all National Socialist groups in our current era, suspicions that Blood Tribe may be a target of infiltration and entrapment operations by federal law enforcement agents persist. This coud be false, and the accusations and suspicions used as a tactic of disruption.

Blood Tribe works with other activist groups and attempted a large joint demonstration in Florida in September of last year with members of the Goyim Defense League (GDL) and others. Turnout was less than expected. However, this ostentatious display of bright crimson shirts, swastika flags, Sieg Heil salutes, shouts of National Socialist slogans and spontaneous media interviews with Hammer and the leader of the GDL did succeed in drawing some larger media attention. But the optics might have been better, especially if assessed by the standards of the original inspiration of the German National Socialists.

That said, Blood Tribe is committed to overt display of National Socialist symbolism similar to Rockwell's American Nazi Party, and it may assess the event along with its media depiction as a genuine success.

A Blood Tribe protest against a "drag queen story hour."

GOYIM DEFENSE LEAGUE (GDL)

The GDL first appeared in 2018 led by Jon Minadeo, who is known as Handsome Truth online and among members and supporters of the GDL. Its name and symbol are counter to the Jewish Defense League and the Anti-Defamation League, respectively.

The GDL presents a strong counter-Semitic message through distributing literature, banner drops, public demonstrations and other activities. The GDL has been active in at least 17 states, particularly Florida, California, Texas and New York.[22] GDL also espouses a Revisionist view of National Socialism, Adolf Hitler and the events known today as the Holocaust, but does not often appear in uniform or display overt National Socialist symbolism.

Recently, the GDL launched an online video platform called GoyimTV (www.GoyimTV.com), which has been banned and restored multiple times,

but is currently active. It offers videos and merchandise featuring t-shirts, soap and busts of Hitler. The GDL also runs Goyimdefenseleague.com, with Revisionist, counter-Semitic, White nationalist and other content.

In June last year, Minadeo was arrested for disorderly conduct and public disturbance outside a synagogue in Georgia, but was released on bail. The demonstration included lynching a balloon effigy of a homosexual Jew on a street sign.

Earlier in 2023, the GDL displayed signs at the Daytona 500 stating, "Henry Ford was right about the Jews." Also, Minadeo and a colleague picketed outside the Auschwitz Museum in Poland, displaying a sign denouncing the Holocaust as a hoax.[23]

Additionally, the GDL partnered with Blood Tribe and other groups at the "Red Shirt" demonstration in Florida last September, described above. Minadeo gave impromptu interviews and statements to reporters at that event, reaching a wider audience. More recently, in early November of last year, Minadeo was sentenced to 30 days in jail for distributing "anti-Semitic" literature and fliers, which authorities dishonestly characterized as "littering."[24]

Members of the NSM raise flaming swastikas in Georgia, 2018.

CONCLUSION

Over the course of the past century, from 1924 to the present day, National Socialist-inspired groups in America rose across the country. Motivated and influenced by the National Socialist German Workers' Party and National Socialism as an ideology, the groups and organizations outlined in this essay series faced—and continue to face—numerous challenges and obstacles operating in a political and media environment so hostile toward National Socialism in any form.

Many of these groups and organizations experienced scandals and controversies, allegations of misconduct or infiltration and persecution and harassment from both government and organized activist groups. Lawfare, impoverishment, declining membership, censorship, infiltration and internal subversion and disruption, arrest and imprisonment and ongoing public demonization challenged these groups over time—challenges that persist today.

Still, as the injustice of Zionist power and its various manifestations—mass non-White immigration, anti-White propaganda, declining socio-economic prospects for Whites, anarcho-tyranny, the promotion of LGBTQ+ propaganda and lifestyles, endless wars and needless foreign intervention—grows ever more obvious, the necessity and relevance of National Socialist-inspired groups also grows.

For many younger White Americans, meaning and purpose—focus and hope—are found in National Socialist-inspired groups and organizations in an otherwise hopeless alien-dominated environment. Today, new National Socialist-aligned groups are growing in numbers and popularity and are having an impact.

Establishment policies and programs against them also grow, and the two forces are driving toward more confrontations. For much of its history, National Socialist-inspired groups and the "far-right" in general have lacked coalition, cohesion and a sense of camaraderie, while the overall movement has been plagued by infighting, rivalry, gossip and disunion, disrupted by infiltration and internal sabotage, as we have seen in parts 3 and 4 of this series especially. The enemies of National Socialist-inspired groups and organizations are well-funded, well-organized and motivated. They also enjoy access to the highest level of the U.S. government.

The original German NSDAP faced all of these struggles as well.[25] Its trajectory to success and then devastating defeat reads like an epic Germanic saga. It remains both an inspiration and source of hope for many of today's groups in America.

History marches on and, after 100 years in America, we have many more National Socialist groups and far more members of different types than their predecessors before the U.S. entry into World War II in 1941. Currently they are increasing and expanding along with the resistance to them by their varied and well-financed, highly organized enemies. We will present more of these groups and topics in a future essay. ❖

Mein Kampf
The Stalag Edition

This is the only complete, unabridged, and officially authorized English translation ever issued by the Nazi party, and is not to be confused with any other version. Translated by a now-unknown English-speaking party member, it was printed for the Central Press of the NSDAP in limited numbers during the years 1937 to 1944.

Most copies were distributed to the camp libraries of English-speaking POW camps, and became known as the "Stalag" editions (Stalag is a contraction of the German word Stammlager, or POW camp) because they all carried a camp library rubber stamp on the title page.

Only a handful of copies survived the war, and the text contained in this edition has been taken directly, without amendment, from one of these extremely rare editions.

Contrary to postwar propaganda, *Mein Kampf* does not contain a "plan for world domination." It does consist of a short autobiography, the effect of World War I upon Germany, a discussion of race and the Jewish Question, the constitutional and social make-up of a future German state, and the early struggles of the NSDAP up to 1923. Softcover, 584 pages, 6 x 9, #675, **$40** minus 10% for TBR subscribers plus $5 S&H inside the U.S. from THE BARNES REVIEW, P.O. Box 550, White Plains, MD 20695. National Socialism: Yesterday & Today

By William A. White. National Socialism as a political philosophy that brings order to the state while empowering and enriching the people at the same time. This is the antithesis of the American state which punishes its people with police state brutality, steals their money, violated privacy and tortures those who rise up against it. National Socialism is not an invention of the modern era. Akhenaten and Charlemagne, for instance, could be considered National Socialists. Men like these were few and far between, but their terms in power were "golden times" for the citizenry. The names of these avatars who served all stations of society live, though their reputations have been slandered. Could a National Socialist state develop in America today? Softcover, 109 pages, **$12** minus 10% for TBR subscribers plus $5 S&H inside the U.S.

Special Theme Issues from TBR!

DEFENDING DIXIE

September/October 2017—The truth about the Fort Pillow "massacre"; an honest appraisal of the Gray Ghost; tariffs were the real cause of the war; interviews with monument activists and Southern historians Lochlainn Seabrook, Ed deVries and Charles Edward Lincoln III; secret societies and the Civil War; blockade-runners of the South; Sherman's annihilation policy; Dixie's dark secret: rich, black slaveholders; memoirs of a Rebel private; the Cherokee general; the Missouri exodus; the cultural cleansing of the South; Maryland state song on the chopping block; the Jim Crow double-cross; and more. 112 pages, ***$15*** each.

HOLOCAUSTS: REAL AND IMAGINED

September/October 2018—Topics covered include: American Indian holocaust; Bolshevik holocaust in Russia; Hitler and the World War I holocaust; the WWII holocaust on the Eastern Front and the activities of the *Einsatzgruppen*; evidence for Babi Yar massacre lacking; holocaust of Tokyo; Dresden holocaust; how the Cossacks avoided a holocaust; Northern greed and the holocaust of the American South; the WWII mass expulsion holocaust; the MK Ultra "mind holocaust"; the modern-day holocaust of European culture; more. 132 pages, ***$15*** each.

WERWÖLFE OF THE REICH

September/October 2019—Topics covered include: The German underground resistance *during* WWII; the German underground resistance *after* WWII; Hitler's views on Christianity; why Hitler invaded Norway and Denmark; how Churchill instigated and prolonged World War II; investigating the deaths of Soviet prisoners in German concentration camps; uncensored interview with James Bacque; how Hitler reunited French wartime workers with their families; the horrors of "de-Nazifiction"; Allied sinking of German passenger liners; ransacking the Reich and the Trophy Affair; more. 112 pages, ***$15*** each.

DEFENDING AMERICAN HEROES

September/October 2020—Honest biographies of some of America's slandered heroes. Includes articles on Fr. Junipera Serra; Thomas Jefferson; Andrew Jackson; Robert E. Lee; J.E.B. Stuart; abolitionist Matthias Baldwin; Charles Lindbergh; Mayor Frank Rizzo; how Abe Lincoln messed up George Washington's America; what they are hiding about Judah. P. Benjamin; slavery in the words of slaves; the Congo-Arab War: when White Europeans fought to end Black slavery in Africa; Antifa, BLM team up to destroy America; incredible glassmaking techniques of ancient cultures; more. Great gift for a young person being brainwashed in public school! 144 pages, ***$15*** each.

HITLER VS. THE BANKERS

September/October 2021—Adolf Hitler locks up members of the Rothschild family; why Josef Stalin is really the founding father of the Zionist state of Israel; the Spanish Civil War as a warning for the West today; the forgotten legacy of José Antonio Primo de Rivera; the Zionist hand instigating for World War II; Big Zionist Jews vs. Little Jews and "the Holocaust"; why the Zionists want David Irving silenced; Dr. Sigmund Rascher's medical experiments; Canada's Great Upheaval of the Acadians; the Aryan race in antiquity; more. 128 pages, ***$15*** each.

ANCIENT MYSTERIES

September/October 2022—Here is an amazing collection of articles detailing some of the most confounding mysteries of the ancients: Technical marvels of ancient cultures—precision gears, hydraulic pumps, earthquake predictors, and more; the incredible mathematics of the Great Pyramid; the pale-skinned Cloud Warriors of the Andes; lost cultures; the phenomenon of skull deformation across the globe; the recent discovery of Superhenge; Doggerland and the Reich; much more. 124 pages, ***$15*** each.

ORDERING FROM TBR

ORDERING: TBR subscribers may take 10% off retail prices. Prices do not include S&H. Inside the U.S. add $5 on orders up to $50. Add $10 on orders from $50.01 to $100. Add $15 on orders from $100.01 to $200. Add $20 on orders from $200.01 to $300.Call for best S&H over $300. Box 550, White Plains, MD 20695.

Three Radio Shows You Just Can't Miss!

TBR History Hour

Listen to provocative interviews at www.BarnesReview.com 24 hours a day.

TBR Radio Network is back on track with **TBR History Hour** hosted by Assistant Editor John Friend! John has taken over as host of **TBR History Hour** since the untimely death of Revisionist Pastor Dr. Edward DeVries. **TBR History Hour** is a podcast program featuring special guests as well as some of the great contributors to **THE BARNES REVIEW** history magazine. Politically incorrect guests have included TBR's longtime Executive Editor Paul Angel, writer and TBR contributor Karl Haemers, TBR Board of Contributing Editors member Harry Cooper, TBR's regular French-Canadian contributor Rémi Tremblay, free speech advocate Henry Herskovitz, "thought criminals" Alfred and Monika Schaefer, and nationalist historian Dr. Matthew Raphael Johnson, also a member of TBR's Board of Contributing Editors and the former editor of TBR, and many more.

All podcast programs may be accessed at our official website: **www.BarnesReview.com.** Check out the archives and stay tuned for more unique podcast programs from your favorite TBR writers!

The AFP Report

Listen to provocative breaking news interviews 24 hours a day at www.AmericanFreePress.net.

The AFP Radio Network is going strong once again with **The AFP Report** hosted by longtime AFP contributor John Friend, who is also the host of **TBR History Hour**.

The AFP Report is a podcast program featuring special guests as well as regular contributors to AMERICAN FREE PRESS—America's last real newspaper. Some of our many provocative guests include AFP contributors Dr. Kevin Barrett, bestselling author Donald Jeffries, former CIA analyst Philip Giraldi, longtime Bilderberg sleuth and on-the-scene reporter Mark Anderson, and award-winning historian and newsman Mike Walsh. Special guests appearing on the podcast include attorney Glen Allen of the Free Expression Foundation, Christelle Néant of "The Donbass Insider," Tony Gosling, an independent journalist based in the United Kingdom, and Phil Tourney, a U.S. Navy veteran and survivor of the Israeli assault on the USS *Liberty*, among many others.

All podcast programs may be accessed at AFP's official website: **www.AmericanFreePress.net.** Check out the archives and stay tuned for more unique podcast programs featuring your favorite AFP contributors!

The Political Cesspool

Tune into THE POLITICAL CESSPOOL every Saturday from 6-9 p.m. Central!

The Political Cesspool is an award-winning LIVE radio broadcast that can be heard on its flagship station AM 1600 WMQM in Memphis, Tennessee, and via the Liberty News Radio Network's internet stream. Hosted by James Edwards, one of the leading pro-White advocates and Southern nationalists in America. His **Political Cesspool radio program** offers hard-hitting news, history and analysis every weekend not found anywhere else. Featuring regular guests and outspoken contributors, the insights and perspectives presented on **The Political Cesspool** are thought-provoking and refreshingly politically incorrect. Co-host Keith Alexander, with his encyclopedic knowledge and expansive historical recall, adds much to the discussion every week, and has become a fan-favorite and indispensable contributor.

Visit www.ThePoliticalCesspool.org for more details and program archives! **We also encourage you to support the efforts of Edwards and Alexander with a financial donation.** You have rarely seen TBR urge you to donate to other organizations. So many other groups end up using the money in unproductive and sometimes selfish ways. We 100% endorse the efforts of Edwards and Alexander and can assure you that any contributions will go to spreading the word and increasing their outreach, not their bank accounts.

The Riddle of the Jews' Success

Outspoken anti-Semite influenced young Adolf Hitler with incendiary book on non-Germanic business practices

By David Skrbina

Among the most influential German critics of the Jews in the late 19th century was Theodor Fritsch. A self-made businessman, publisher, and politician, Fritsch had an intimate view of events in Germany of the 1880s. He was influenced by notable anti-Semites of the day, including such writers as Frederick Milligen (*Conquest of the World by the Jews*; 1873) and Wilhelm Marr (*The Victory of Jewry over Germandom*; 1879). As a young businessman, he could see firsthand the effect of Jews in German society and especially their various business tactics and ploys, which were unethical at best and illegal at worst.

Medieval manuscript shows Jewish moneychangers and merchants.

Thanks to his personal experiences and inside knowledge, Fritsch became increasingly critical of Jews in general. In 1882, at age 30, he attended the first International Anti-Jewish Congress in Dresden, and in 1886 he co-founded the German Anti-Semitic Association. The following year he published the first edition of his highly influential work *The Anti-Semitic Catechism*. Later renamed *The Handbook of the Jewish Question*, it would go on to become a landmark book of the 20th century, ultimately being released in an astonishing 49 editions by 1944.

Through the 1890s, Fritsch founded the German Social Party, got married and prepared the ground for a new periodical he called *The Hammer*. It eventually came to fruition in 1901. Into the 20th century, he continued to be active in business, serving on a number of trade boards and business organizations.

By this time, German Jews had come to totally dominate several sectors of the German economy, accruing vast wealth in the process. From the outside, the Jews seemed successful. But, from the inside, from Fritsch's view, Jews were distorting and corrupting traditional German economic and political practices. It was this hidden, unseen, malicious action that truly accounted for their "amazing success," Fritsch came to believe.

After spending a decade observing and documenting pernicious Jewish practices, Fritsch wrote a book titled *The Jews in Trade and the Secret to their Success*, which first appeared in 1913, when he was 61. It appeared under the pseudonym F. Roderich-Stoltheim. Ten years later, the book would appear as a second and expanded edition, with a new title: *The Riddle of the Jews' Success*. Along with his *Handbook*, these two works would become very influential with a young Adolf Hitler, Joseph Goebbels and other founders of the National Socialist movement.

In terms of content, much of *Riddle* is a response to the then-newly

released book *The Jews and Modern Capitalism* (1911) by economist Werner Sombart. Sombart offers an unvarnished but largely dispassionate examination of the topic. But he repeatedly declines to give critical evaluations of obviously detrimental Judaic practices. Fritsch has no such inhibition. He leaps right into the fray, attacking head-on every negative practice he associates with Jews. These include predatory culture, usury, cornering markets, bait-and-switch, disregard for historical practices and social norms and secret coalitions. All of these are laid out in clear detail and specific example.

But Fritsch seems most appalled by the utter disregard shown for German morals, German well-being, and the stability of German society. He rightly notes that Jewish communities have long functioned as states-within-states, creating separate rules, practices and even laws that, in many ways, directly conflict with those of host nations. The lives of Jews, says Fritsch, center on money, wealth, power and "success." Other religions, Fritsch believed, more strongly valued trust, care, love, good faith, honesty and fidelity. These traits, he was convinced, were being ground into dust by these alien, un-Christian traders and marketeers.

In order to explain this striking phenomenon, Fritsch is compelled to make enlightening digressions on Judaism, the Old Testament, the Talmud and the origins of the Jewish race. He even dedicates a lengthy chapter to "the influence of the Jew upon women"—a disgraceful situation that Fritsch maintained would rouse every self-respecting German male to the heights of indignation.

In the new Thomas Dalton translation of the 1923 edition, we find a supplemental chapter, "The Jews and the World War," and a short postscript. In the former, Fritsch insists that "Jews have emerged as the real victors from the monstrous war of nations." He writes that the German Revolution of 1918—which cost Germany the First World War—"was principally the work of Jews." This was just at the time that the new Jewish Weimar government was beginning to show its real colors, much to the dismay of the defeated German people. But this is a short chapter, and one senses that Fritsch has much more to say on the matter. Readers interested in more details are recommended to read Dalton's *The Jewish Hand in the World Wars*, available from TBR.

The short postscript includes a highly relevant mention of Henry Ford's then-recent work *The International Jew*, which Fritsch calls "masterly" and which "works irresistibly." And, indeed, Ford's book is, in many ways, the American parallel to Fritsch's study of German society. Both books expose malicious activity that undermines society, and both lay bare the profoundly detrimental consequences for the future of society.

Overall, *The Riddle of the Jews' Success* is yet another daring achievement from the publishing house Clemens & Blair, and editor Tom Dalton. Fritsch's classic text reads extremely well, in clear, smooth American English. Helpful footnotes are scattered throughout the book, and a bibliography and index aid the scholar and layman alike.

Dalton is to be congratulated once again for bringing yet another "lost" classic back to life. Lord knows, in times like these, we need every uncensored tome we can muster. ❖

David Skrbina, Ph.D., was a senior lecturer in philosophy at the University of Michigan, Dearborn from 2003 to 2018. He has also taught graduate courses in technology and sustainability at the University of Helsinki. See more at www.davidskrbina.com.

The Riddle of the Jews' Success

Around 100 years ago, a prominent German critic of the Jews—one could rightly call him an anti-Semite—Theodor Fritsch began to closely observe a variety of shady business practices and underhanded methods with the aim of truly understanding how a foreigner on German land had acquired so much wealth so quickly. Himself a businessman, Fritsch had ample first-hand financial dealings, and he came to develop a keen insight into the various manipulations, trickery, deceit and alleged immorality he believed led to Jewish financial success. Long out of print and shunned by mainstream scholars as overtly biased, this book, edited by Thomas Dalton, brings into sharp relief a whole range of nefarious practices, all of which have echoed down to the present. It is truly astonishing how many current tactics have their roots in the much simpler life of early 20th-century Germany. Most striking of all, we are offered here a look at how degrading modern life has become. In a straightforward and clear manner, Fritsch provides us with what many believe are important lessons for the modern day. Softcover, 254 pages, #999, **$25** minus 10% for TBR subscribers plus $5 S&H inside the U.S. from TBR Book Club, P.O. Box 550, White Plains, MD 20695. Call toll free 1-877-773-9077 to charge, Mon.-Thu. 8-4 ET. Purchase online at www.BarnesReview.com.

LETTERS TO THE EDITOR

INSIDE INFORMATION

I continue to look forward to every issue of TBR. It is pretty much the last bastion of historical truth left in our once great nation. I deeply appreciate your work.

As someone who participated in the original Church of Jesus Christ Christian (CJCC)/Aryan Nations (AN) during its formative years, and later fell to prison because of my participation in The Order, I would like to share some thoughts on TBR's July/August 2023 edition and the article by Karl Haemers titled "National Socialism in America: From the 1980s to 2000." There is much I could say, but I feel these highlights are important cogs left out of the gears of the story.

Pastor Richard Butler didn't simply attend an Aryan Nations Congress in Kansas to advocate for unity among all pro-White groups, he organized it and invited every "movement" leader he could think of to attend. To the lasting shame of our leadership, very few attended and fewer were willing to agree on anything. Butler stated at that meeting he was ready to give up Aryan Nations in favor of creating whatever party or leadership structure everyone agreed upon. No one fell behind the proposal, so Butler continued forward with Aryan Nations as the political branch of the CJCC.

The CJCC was an Israel Identity Church, which at that time was somewhat of an open forum for differing White Christian denominations. Aryan Nations was one of the few pro-unity organizations among our people, one which had an open-door policy for anyone who was pro-White and understood who the Zionists were, regardless of religious preference. Christian principles were not overlooked by the founders of the organization.

I find it very interesting that, at the time, we were branded as radicals. Yet, for decades last, everything we were warned about has come to pass. Now, people on the "right" are saying many of the very things we said so long ago. These are things "right-wingers" would never have uttered at the time.

In 1981, the evening before our church was bombed in northern Idaho, the Jewish Defense League radical Mordechai Levi had called Tom Metzger of White Aryan Resistance in California to taunt him. Metzger was in the habit of recording Levi's rants and always goaded him into saying as much as he would.

He bragged that evening about the bombing that was about to occur. This recording, along with a stack of potential evidence, was provided to the local police and FBI, who were allegedly investigating the bombing.

Attempts to follow up on the progress of said investigation were ignored for months. The local sheriff eventually stated that all of the evidence was "lost" and the investigation was over, a seeming admission that no investigation ever took place.

Incidents like this are what helped radicalize a number of Aryan Nation members. I was an activist throughout my teenage years, even managing the CJCC/AN print shop. Such incidents are also what led me to eventually join what later became known as the Order. I was its youngest member.

Robert Mathews, the leader and co-founder of The Holy Order of the Bruders Schweigen (The Silent Brotherhood, or what is now known as The Order), began participating in right-wing groups in his youth. He later became a strong supporter of The National Alliance. In the late 1970s, he moved to eastern Washington where he later started his own small group, The White American Bastion.

While not a member of Aryan Nations, Mathews participated in a number of CJCC/AN functions, where all the founding members of The Order first met.

Many think the purpose of The Order was armed resistance, but that is not the case. We founding members were activists of various pro-White movements who were all painfully aware of how every pro-White organization was run on a shoe-string budget. Several members first tried to make money for the movements legally through logging projects and other businesses. But, in the depressed economy of the time, these ventures failed. Then, The Order was formed.

Our original intent was to fund the various movements of the time anonymously and prepare for the future, although a few in the group also wanted to wage war on the enemies of our race.

This created something of a divide within our group.

Our initial criminal act was counterfeiting, which failed. At this point, it looked as if it would all fall apart, but Mathews felt so strongly about his sense of duty to the group, he went out and robbed a bank on his own so we would be able to fund the first of three armored car robberies. This sense of duty to our endeavor marked the character of Bob Mathews. I have never known anyone to work so hard at something in my life.

The Order was divided into separate cells, some unaware of the others, each working toward its particular agenda. The rental home where the FBI cornered Mathews was not the hideout of our organization, but simply where his cell was located. Mathews was betrayed, his whereabouts had been revealed to the FBI.

A NICE OVERVIEW

Your series of articles on National Socialist organizations in the United States is a nice overview of the topic. However, it is incomplete. I know because I personally started an organization known as Defenders of the Reich in 1999. My organization was primarily geared toward education.

I established a small website and a few Defenders of the Reich groups in a variety of states. I had my doubts

that I was reaching any significant number of people, but, apparently, I was prominent enough to warrant attention of the powerful Jewish groups in the United States.

Thus, our website was shut down shortly after appearing in a list by *The New York Times* titled "Top Ten Anti-Israeli websites." Interestingly, my website was careful not to mention Jews, "the Holocaust" or Israel in any way, admittedly because I knew to do so would get me on the fast track to being shut down or possibly even see criminal prosecution in some countries where the site was accessible. I only mentioned the good things National Socialism brought for the common man, various Allied war crimes, a piece for reasons for the war and the continuous propagation of propaganda lies and listed some suggested reading.

Two further attempts were made to reestablish a web presence, but the ease with which they were shut down compared to the effort required to establish them, proved too frustrating for me to warrant any further attempts.

I found spreading word of my organization nearly impossible. Print advertisements for my site were rejected. The checks I wrote for ads were returned and even magazines like *World War II*, that had ads for replica National Socialist memorabilia, refused to print my ads.

The bank where I housed my organizational funds began taking money from my account, supposedly for insufficient activity. No apologies or refunds were given and I was forced to close the account.

When attempting to hand out educational literature in front of the Holocaust Memorial Museum in Washington, D.C., I was told by police I would have to move across the street unless I wanted to be arrested.

I find it very difficult to educate the brainwashed masses, even when speaking with individuals alone. I find people are not really listening or paying attention to what I said because they are chiefly interested in attacking me for my alleged beliefs. Attempts to educate them as to their false pretenses of their conceptions seemed an exercise in futility. Only those who have already begun to awaken on their own seem ready or eager to converse in a civilized, sane and rational manner on the topics.

I will never be entirely inactive, but past experiences have definitely had their impact on the fervor with which I pursue my original goals.

I write to you only to inform you of this humble information, which I am in no way surprised you had no knowledge of.

Robert Stockhausen
Missouri

HINDU, NOT MINOAN

In the interest of accuracy, it should be noted that the object described as a "Minoan seal" found in the Penobscot River in Maine (article "Ancient Minoans in Pre-Columbian America" by Marc Roland, TBR, September/October 2022, page 40) is not Minoan, but Indian (Hindu) or more probably Thai.

I have good reasons for believing this. The votive tablet finds its origins in India and depicts a seated yogi with a *trishul* (trident) behind him. The lines underneath represent planes of existence described in Hindu-Buddhist teaching. Tablets of this type always contain an odd number of lines, ranging from one, three, five, seven, nine or more lines. In Thailand, the tablet is known as *Som Dej Sam Chun*. (*Sam* meaning three, and *Chun* meaning lines or levels.) Very good article otherwise.

William Deregibus

[Add them to the list of people who made it to America before Columbus.—Ed.]

A CHRISTMAS PICKLE

As a German-American, it is a tradition in our family to hide a pickle or a pickle-shaped ornament deep in the boughs of the evergreen tree. According to German folklore, whoever finds the pickle on Christmas morning will have good luck the following year. The truth behind the pickle (also called a *saure gurke* or *Weihnachtsgurke*) is a little more complicated.

The historical origins of the Christmas pickle in the tree is anecdotal in nature. A German-born Union private named John C. Lower was captured and imprisoned at the Confederal prison at Camp Sumter (also known as Andersonville), Georgia. Lower was in bad health and starving to death. When a Confederate guard saw Lower begging for food, he took pity on him and gave him a pickle.

Lower survived his captivity and, after the war, began the tradition of hiding a pickle in his Christmas tree in remembrance of that Confederate guard's compassion.

Another possible and earlier origin for the Christmas pickle comes from the tale of St. Nicholas, who is said to have saved two Spanish children who were trapped and died in a barrel of pickles by an evil tavernkeeper. This actually comes from a Medieval legend involving a butcher who killed and then stored a group of boys in a wooden cask. As the story goes, St. Nicholas miraculously resurrected them.

Whatever the true origins of the tradition, in the late 1800s, F.W. Woolworth began selling Christmas ornaments made in Germany. (The first Woolworth store was opened by Frank Winfield Woolworth in 1879 as Woolworth's Great Five Cent Store. It has now transformed into the Footlocker Company.)

Immigrants from England and Germany, who wanted to practice American Christmas traditions, bought glass Christmas ornaments from France and Germany in the shape of vegetables. One of these was in the form of a pickle.

The tradition of glass-blown Christmas tree ornaments may actually go back as far as 1597 to the town of Luascha, now in the German state of Thuringia. Whatever the origins or whatever reasons, the pickle-shaped ornaments caught on.

The pickle in the tree should be a reminder of how evil it is for White men to be killing White men. Actually, killing anyone is awful, but especially

Continued on page 74

Continued from page 73

racial suicide. As in the Ukraine-Russia war of today, the Confederates were trying to win their independence. Interestingly today, the Confederacy is vilified but the Ukrainians are lauded. In my opinion, Volodymyr Zelensky is the equivalent of Benjamin Judah—a Zionist traitor. He is using the Azov militia in Ukraine as cannon fodder. They are dying on the frontlines of this unnecessary war fueled by billions of U.S. tax dollars.

Either way, our racial kin are in a pickle from which Zelensky will not allow escape. We must unite against "wokeism." We should boycott the financiers who make this racial tragedy possible.

May the pickle in the tree be a reminder of this. Keep German-American traditions alive!

MOCKINGBIRDS

Is it possible for TBR to publish an update on Operation Mockingbird, books, investigators etc? The effort seems to have increased intensely. Also, do you have any estimates of the number of paid informants working in the federal playground?

Marcus Dansby
Hawaii

[Operation Mockingbird, for those who do not know, is the ongoing effort by the CIA and other intelligence agencies to bribe and coerce mainstream news broadcasters to repeat the "official" governmental line on major events as a mockingbird repeats the songs of other birds. This operation began during the Cold War and had, since then, attempted to manipulate domestic American news media organizations for propaganda purposes. That is different from the federal wiretapping effort called Project Mockingbird. Watch the news, TBR readers, and you will see it obviously in action today. For instance, U.S. media willingly repeats obvious propaganda lies in regard to the war in Palestine and the war in Ukraine, to name just two topics.

As for federal informants, it is estimated that, in the past few years, according to watchdog group Open the Books, federal law enforcement has paid out more than a half a billion dollars of taxpayers' money to thousands of federal informants operating all across the United States. The FBI has multiple informants deep inside conservative organizations like the Proud Boys and the Oath Keepers.

At the Jan. 6 protests, the FBI had so many informants it reportedly lost track of them.

On Jan. 6, the FBI had at least one informant who was on the phone with his federal handler when he marched into the Capitol building alongside other protesters.

During the conspiracy and sedition trial of Enrique Tarrio, the former Afro-Cuban chairman of the Proud Boys, U.S. prosecutors conceded that, he, too, had served as a federal informant for multiple years. In the seditious conspiracy trial for Oath Keepers leader Stuart Rhodes, it was revealed that Greg McWhirter, the former vice president of the conservative group, was a confidential informant for the FBI. In 2023, during the trial of the 13 men accused of attempting to kidnap Michigan Gov. Gretchen Whitmer (D), defense attorneys learned that the FBI had as many as 12 informants operating inside that small group. And the list goes on.—Ed.]

LIKE FATHER, LIKE SON

Rep. Bobby Rush (D-Ill.) led the House in voting 422-3 for the Emmett Louis Till Anti-Lynching Act. The three who voted against it were Andrew Clyde (R-Ga.), Thomas Massie (R-Ky.) and Chip Roy (R-Texas). Sens. Corey Booker (D-N.J.) and Tim Scott (R-S.C.) introduced the Senate version. It passed unanimously.

On March 29, 2022, Joe Biden signed the act into law. At the White House signing, Kamala Harris observed, "Lynching is not a relic of the past. Racial acts of terror still occur in our nation. When they do, we must all have the courage to name them and hold the perpetrators to account." The act makes lynching a federal hate crime. Rep. Hakeem Jeffries (D-N.Y.) and Al Sharpton praised the act.

On July 25, 2023, Biden signed a proclamation establishing three national monuments honoring Emmett Till and his mother, Mamie. Why wasn't Emmett's father also honored?

In the summer of 1955, Mamie put her son on a train to Mississippi where he was to spend time with his uncle and his cousins. She gave him his father's ring to wear. The U.S. Army had returned the ring to Mamie after Louis was tried, convicted and hanged for several hate-crime rapes and murders of White women while in Italy.

Louis was hanged in Aversa, Italy on July 2, 1945 for the violent rapes of Benna Lucrezian and Frieda Marie. He was also convicted of the savage murder of Anna Nanchi in Civitavecchia, Italy, in June 1944.

The NAACP and Black groups in America hid these barbaric hate crimes from the jury of Roy Bryant and J.W. Miliam, the pair tried for murdering Emmett Till. It is my opinion that Emmett, on August 24, 1955, intended to follow in his father's footsteps of rape and murder.

For 68 years, America has heard the tale ad nauseam: "A Black Chicago teenager was lynched after flirting with a White woman in Mississippi." All he had done, they say, was to whistle at Carolyn Bryant, a petite White beauty.

In truth, Emmett, from what I can ascertain from court records, was a gang member in Chicago who was shipped off to Mississippi to see if his uncle could straighten him out. At trial, Bryant testified that Emmett lept over the counter, grabbed her,

grabbed her chest and forced his hand down her panties—an act of sexual assault. He also used extremely profane language to describe what he would do to her should he ever find her alone, and what he had done to other White women. Sen. Tim Scott, that is not just a "whistle."

According to testimony, three much larger Black men had to use force to pull Emmett off of Bryant.

A Black teen female told the group of 22 people who had witnessed the events that, "They will kill him for that." She then referred to Emmett's sexual assault on Bryant. Oprah Winfrey, this is a violent hate crime, not harmless whistling or flirtation.

Present in Bryant Grocery and Meat Market in Money, Mississippi on August 24, 1955 were Bryant, Juanita Milam (Bryant's sister-in-law), 17 Black men of various ages and three Black girls.

Defense attorney Sidney Carlton asked Bryant, "Did you have any White men there to protect you?" "No. I was scared to death," she answered. In fact, she was so frightened of "poor, little Emmett Till" that, when she broke free with the help of the aforementioned Black men, she ran to Milam's car to get a handgun. Do you know anyone who is so scared of being whistled at that they have to get a handgun? Sorry, Hakeem Jeffries, but you don't grab a gun because someone just whistled at you. Emmett Till: Like father, like son.

Ronald Williams
West Virginia

KEEP SAVING BOOKS

Thanks, TBR, for the books you save from the memory hole. I believe that destroying books and monuments recounting past events is a great evil. That is how we discover what people actually thought in past eras before our own.

When I was a teenager, I was curious about what our supposed enemies thought. I read Russian publications and listened to Radio Moscow.

When I was sent Russian publications, I had to sign a form from the government in which I had to say I was subscribing to printed material that contained war propaganda.

I was allowed to receive the material, but, no doubt, I was placed on a governmental list of "subversives."

I never thought I would live in a dictatorship until Mr. Joe Biden became president. Now I live in fear.

Robert Null
Via email

OPEN INVITATION

I did not intend my original letter containing criticism of an article in TBR by Mr. Mike Mains about the Catholic Church to cause such upset to so many people. I have a long formal and informal religious education and would be happy to communicate with anyone about points I raised in my original letter. However, I am not on the internet or email and thus require anyone wishing to communicate with me to write to me at Erwin Sickinger, 28832 Private Road, Seligman, MO 65745-8449.

Erwin Sickinger
Missouri

BROUGHT BACK MEMORIES

One of your articles by John Wear in an issue several years ago titled "Instigating World War II" caught my eye, especially the portion about the "uncivilized bombings of German cities." That sure brought back memories. I was 14 at the time.

We lived about 40 miles from Dresden. At that time, the area between the modern-day Czech Republic and Germany was called the Sudetenland. After the war, Czechoslovakia was handed that ethnically German area.

All apartment buildings had basements which were divided into sections for each tenant to store potatoes, coal, some fresh produce and other essential items. Due to the bombings of these civilian centers, space was carved out for tenants to take cover during the attacks. An appointed resident ward made sure everyone was accounted for.

So far our area had been spared the severe horrors of the northen cities … but not this time. Fear! There seemed to be no end to the attacks. Bombs exploding and artillery shells smashing into buildings was deafening to my ears.

After awhile, my father, who had been appointed a warden for our building, decided to peek outside. I screamed: "Don't do it Papa!" I was afraid he might be killed.

Then it was quiet, finally. My father appeared unscathed but disappointed in his daughter for being so frightened.

Finally, the steady sound of the siren announced the end of the attack. Luckily, only one building was severely damaged.

Later, we received the news. Dresden had been the target. The city was filled with refugees fleeing the approaching [Soviet] army. The United States offered a reason for the bombings. U.S. leaders alleged that German soldiers occupied the city. The truth is, the vast majority of German soldiers that were in our hometown and in Dresden were all wounded and in hospital beds—hardly a threat. So, the Americans continued west and the Soviets east to squeeze the life out of Germany.

As my fellow TBR readers know, Dresden was "the Florence on the Elbe." Besides many gorgeous buildings and art masterpieces, it also contained treasures acquired by Saxon kings over the centuries. Hitler hid some of these artworks in the forest nearby for safety. After the war was finally over, these were returned to a museum in Dresden and placed in a special room called the Green Vault.

Kurt Vonnegut, an American POW, wrote a book about all of this called *Slaughterhouse Five*. It is no surprise that his book is listed on several websites as the 15th most suppressed book of all time.

MULTIPLE TERROR FAMINES

In light of all the Russophobia taking place here in the United States and the rest of the decadent West, I would like to recommend TBR write an article about the manmade Ukrainian Terror Famine of 1932-1933.

Continued on page 76

MORE LETTERS TO THE EDITOR

Continued from page 75

The Russian government doesn't deny that a famine took place, only that more than Ukrainians died. Millions of ethnic Russian Orthodox Christians also tragically perished, especially in the Don and Volga regions.

Today, however, the Ukrainians are acting as though they were the only ones who suffered.

In addition to the famine in Ukraine, there was also a famine in Kazakhstan that killed 1.5 million Kazakhs. Few people know about this.

Very few people know about the Kazakh famine because they do not have a powerful lobby in Washington, D.C. like Ukraine and Israel do.

For more information on the Kazakh famine, please see Sarah Cameron's fairly recent book *The Hungry Steppe: Famine, Violence and the Making of Soviet Kazakhstan*.

I think it is important to note that the architect of the Kazakh famine was a Bolshevik Jew named Filipp Goloshchyokin, who was also integrally involved in the cold-blooded murder of holy Tzar Nicholas II and his family in Yekaterinburg.

Yehuda Littmann
New York

ITALIAN LEADER A HERO

I have been a subscriber to TBR since 2014. It is a pleasure to read a publication that is keeping free speech and real history alive, even as everyone else is going full censorship mode. I still have a 2015 edition where then-publisher Willis Carto named Vladimir Putin the "Man of the Year" as he began rebuilding that crippled nation into a powerhouse once again.

I am calling on TBR to name Giorgia Meloni to be named "Woman of the Year." We need to support and discuss her holy mission to defend God, country and family. As the Baby Boomers are getting old, Meloni is only 46 and this gives me hope for the future of the West. As she defends traditional values, by making her "Woman of the Year," this will help expose Italy's struggles on the frontlines of today's culture war. I hope she can reclaim Italy from the nation-wreckers and stop their global agenda.

In addition, I noticed TBR is no longer carrying Arthur Kemp's *March of the Titans: A History of the White Race*. I wondered why. It is inconceivable to believe this book is irrelevant. This is the best history book I have ever read. It is a book everyone should have in his library and should be handed down generation to generation. It would make a great gift for avid lovers of real history.

Kris Lawless
California

[We have never stopped selling *March of the Titans* and have advertised the larger, more affordable edition for some time. The only lull we have had is waiting for Kemp's constant new editions in his quest for perfection. And that brings us to some exciting news. Kemp is dividing the book into four smaller volumes covering specific eras. The new series will be in full color and, according to the author, has been completely rewritten and updated. This includes the latest genetic evidence from around the globe. He won't be finished with the entire rewrite and reformatting for some months, but we will be able to offer *March of the Titans the Prometheus Edition: The Complete History of the White Race, Volume I: The Rise of Europe from the Earliest Times to the Fall of Rome*. Volume I includes the latest archeogenetic evidence on the origin of the White race and concludes with the fall of the Roman Empire. This volume (8.5" x 11") alone contains 581 full-color illustrations and is 308 pages. The cost is $35 minus 10% for pre-orders.

This is an immense undertaking, and the remaining three volumes will be released by Kemp when they are ready. We expect that will be months from now, so look for announcements.—Ed.]

MORE ON HARRY TRUMAN

On several occasions, TBR has asked readers for article suggestions. Recently, I have received two requests through the mail for contributions to the Harry S. Truman Presidential Library. In past TBR issues, if I remember correctly, there were references about how President Truman outsmarted the Zionists.

Therefore, I would like to see an article on Truman about his time as president.

Here is what I know about Truman: He was an officer in World War I. He was a 33rd-degree Freemason. He was vice president while FDR was in his fourth term (January 20 to April 12, 1945). He authorized the dropping of atomic bombs on Japan, hastening the end of World War II. In 1947, while he was campaigning, he received a $1 million campaign contribution from powerful Zionist interests in return for U.S. recognition of the new state of Israel. He used that money to defeat Thomas Dewey in 1948.

While the Korean War was raging, Truman put the United Nations in charge of Allied forces in South Korea. He also placed Gen. Douglas MacArthur in charge of Allied forces in South Korea. Several years later he removed MacArthur from his position as he refused to inform Truman on a daily basis what his battle plans were. It has been alleged by some historians that Truman would immediately call the North Koreans and tell them exactly what MacArthur had planned. Suspecting this, when MacArthur refused to reveal his battlefield strategies, Truman removed him from command.

NEED MORE ON 9/11

Thanks you for your publication. I enjoy all your articles and appreciate the labor you invest in the magazine. Have you ever considered putting out

an issue on the 9/11 event? I am sure much has been discovered since then, just like we have uncovered many falsehoods related to the Covid catastrophe. You are doing a great job exposing the truth about World War I and World War II.

These are wicked times we are going through. May God bless your labors and all the staff.

Chuck Schwalenberg
Missouri

A SOLID FOOTHOLD

What can the righteous do when the foundations are destroyed (Psalms 11:3)? The word "foundations" is defined in Strong's Dictionary of the Hebrew Language as the "moral and the political." As we look upon the world around us, can there be any question that the foundations our nation was based on have been destroyed?

The culture of moral and Christian values—such as do not lie, do not steal, do not take a reward against the innocent (bribery), love thy neighbor as thyself—as defined in Psalms 15:5 has been destroyed and taken over by cultural Marxists who have crept into our schools, our economic system and our government. All of this rests on the slippery slope of cultural Marxism.

At the bottom of the slope is a deep abyss ready to swallow up everything that is true and decent.

If the foundations are destroyed, what can the righteous do?

The answer is cling to the God-given values upon which our nation was founded. Do not succumb to the lies coming out of the mouths of the fake news pundits. Our government lies to us. Our economic system steals from us. Our schools have been turned into cultural Marxist indoctrination centers.

Realize all these things for what they are and cling to what you know to be righteous and true, not believing what you are being told by the liars is the truth. The wicked walk on every side when the vilest men are exalted (Psalms 12:8). This is exemplified in a book by Mike Walsh that TBR has recently rescued called *Heroes Hang When Traitors Triumph.* So true. Thank you, TBR, for being a beacon of light as we navigate this great sea of darkness. May God who guided Columbus and our founding fathers guide you, as well, in your efforts to preserve truth and moral values in this ever-darkening world of cultural Marxism.

Every great truth that you present is a solid foothold on that slippery slope into oblivion. People must never forget that great and solid foundation on which our nation was founded.

Hubert L. Masters
Missouri

BLACK SOLDIERS IN THE SOUTH

Thanks for the article by David Doddridge in the March/April 2023 issue. I was especially interested in that article because it discussed Confederate attitudes about arming Blacks for the Confederate Army.

I am aware that C.S.A. cabinet member Judah P. Benjamin, Irish-born Maj. Gen. Patrick J. Cleburne and Louisiana planter Brig. Gen. St. John Richardson Liddell were proponents of this idea.

Army of Northern Virginia commander Gen. Robert E. Lee and C.S.A. President Jefferson Davis were not supporters of the Cleburne proposal.

Although 94% of C.S.A. soldiers were not slaveowners, I believe the average Southern soldier would have resented Black slaves and freemen serving in their ranks during the war.

Brig. Gen. Johnson Hagood of South Carolina, whose troops (along with those of Gen. William Taliaferro) successfully battled the Black Union 54th Massachusetts Regiment during the Second Battle of Fort Wagner on Morris Island (July 18, 1863), personally resented Black armed troops.

White patriots and nationalists should never forget that, during America's troop escalation in the Vietnam War (August 7, 1964), several White non-commissioned officers were targeted and murdered by Black troops simply because they openly flew and displayed the great symbol of Anglo-Saxon heritage and freedom—the Confederate battle flag.

Jordan Gollub
Mississippi

AVOID THESE TOPICS

I was a brand-new ensign when I reported to my first ship as a deck watch officer. While gathering in the ward room for lunch, a senior officer took me aside and said, "Bruce, there is a 106-year-old Naval tradition that there are three subjects that are never discussed in the ward room. They are politics, sex and religion."

It was Harry Elmer Barnes who first endeavored to bring history into accord with the facts. He focused mainly on World War I. It was Barnes, of course, who motivated Willis Carto to establish *The Journal of Historical Review* and focus on the World War II era. That continued with The Barnes Review. I am sure that neither Barnes nor Carto had in mind bringing 2000-year-old religious history into accord with the facts.

In the May/June 2023 issue, there were three full columns of the Letters section devoted to a missive from Mr. John Stanley subheadlined "Was Jesus a Jew," yet all Mr. Stanley could refer to was "2,000-year-old biblical history."

I think TBR should take a hint from Naval tradition when selecting letters from the readership for distribution in The Barnes Review.

Dr. Bruce Gathy
Connecticut

[As far as sex and religion, I think you have a good point, and I am going to try my best to take your advice. But a ban on politics, too? Trust me, Willis Carto—someone I worked with for 22 years on a daily basis—had no problem discussing the ramifications of political views on history in the pages of TBR, and we simply can't stop that tradition.—Ed.]

PAID MY DUES

Best wishes! Recently, I have noticed in recent editions of TBR your requests for donations to help alleviate the problem of publishing houses squeezing our kind of publications and authors into extinction. Over the decades, I have done what I can to help. This includes donating and also

Continued on page 78

MORE LETTERS TO THE EDITOR

Continued from page 77

serving in the U.S. WWII Army Air Force. At 96, I think I have paid my dues, but I have collected a library of TBRs and issues of AMERICAN FREE PRESS that will live long beyond me.

I also go back to the days of *The Spotlight* newspaper and have many great reads by Michael Collins Piper and Victor Thorn in my library as well. As a matter of fact, I just finished reading Thorn's *9/11: Made in Israel*. As I recall, that was trilogy. If so, I want multiple sets of that.

AL SESONA
Florida

[You have done your part over the years and we ask for no more. Thorn published many books on 9/11 but never a trilogy. The other related book from Thorn was *9/11 Evil: Israel's Central Role in the September 11, 2001 Terrorist Attacks*, which is available from TBR for $20. Thorn did have a trilogy on the New World Order, two volumes of which AMERICAN FREE PRESS (AFP) sells. They are *New World Order Assassins* and *New World Order Exposed*. We do not have the publishing rights to the third book, *New World Order Illusion*, but used copies can be found online. AFP mentioned above also put together a trilogy called *Thorn*, which contained a massive compilation of news articles written during his time as a reporter and editor for AFP. That is available from TBR or AFP as well.—Ed.]

BRAINWASHED ALT MEDIA

The alternative news media is far more reliable and accurate about most things than is the mainstream news media, which is totally biased and obviously controlled by the Deep State. However, people need to become aware that, along with the truths they tell, there is also a significant tendency to promote false narratives.

The most prominent lie in this carpet bag of prevarication is the preoccupation with blaming everything and anything on the defeated German Nazis of World War II. This effort never ends. Even honest alternative media are thoroughly brainwashed by these lies they grew up with that they cannot let them go, regardless of the facts that disprove them. When they must, out of necessity, acknowledge Zionist power and Communist organizations as evil parts of this Deep State network, they can never see them as Jewish or Communist, but instead label them as Nazi, Fascist and Fourth Reich. How these anti-Nazis can possibly be the Nazis is something they never explain because it is impossible.

Some examples of the ongoing smear campaign include: False claims about a non-existent "Holocaust" of Jews, almost all of which has been demonstrated as being a fraud. False claims about Dr. Josef Mengele, which are only possible if the "Holocaust" lies are accepted as true, based on discredited testimony. False claims about the captured German scientists of Operation Paperclip.

The Communists—the vast majority of whom were Jewish—won the war and received the spoils. As such, the Germans who lost the war continue to be vilified by them regardless of their innocence.

So many alternative news media outlets have been so heavily brainwashed over the decades that their cognitive dissonance will simply not allow them to let go of their favorite fairy tales.

MAKERS OF WAR

I have been searching for the book *The Makers of War* by Francis Neilson with no luck (not surprisingly). Since THE BARNES REVIEW has its OBR [Operation Book Rescue], I thought I would recommend this particular book, which has also been flushed down the memory hole.

TIMOTHY SHAY
Via email

[We will add it to the list of books that need to be rescued. Thanks for the suggestion.—Ed.]

BUILDING A NETWORK

We have been lied to about our past. These lies continue to cause massive suffering and destruction to humanity and, unless they are exposed and the perpetrators brought to justice, humanity will see a very dark future.

Now is the time to stand up and do something. We are witnessing a global awakening thanks to the "sloppiness" of the Covid "scamdemic." Millions of people are starting to realize things are not right in the world and with the history we've been taught.

But solitary, independent actions in this war for humanity will always be defeated. We need to organize and plan intelligent, coordinated, peaceful actions. It is the only way we'll win this vital war for our future and defeat the evil psychopaths who are intent on turning us into their serfs.

If you are tired of the wars, the destruction and suffering, the lies and guilt, stand up and do something for your future and the future of humanity! Let's get together virtually and plan.

I am primarily interested in building a network of activists and organizing actions in Germany. It is at the heart and origin of this war against humanity. (I speak German and English.) I am open to anyone anywhere in the world who would like to help. If interested, please contact me at my email: cristiyan@proton.me.

The truth is on our side, and there are many more of us than there are of them. Together we will win!

CRISTIYAN

Inspire future generations in a few short minutes

Please remember TBR in your estate planning decisions

REMEMBERING TBR IN YOUR WILL

During your life you have made many decisions that have helped people, causes, crusades and organizations that reflect your most important values. You've been good about using your resources wisely to help further the goals of your favorite organizations. One of those organizations is The Barnes Review.

Here's your chance to make sure that your generous commitment is transformed into an everlasting inspiration for others. And the good thing is, you can choose what people will remember about you by how you structure your legacy.

To ensure TBR survives long into the future—further into the future than any of us will—we suggest you consider remembering The Barnes Review in your will or trust.

It's not as complicated as many people believe. In fact, it can be done in a few minutes. TBR's Legacy Department specialists are ready to assist if you need help. Call us at 202-547-5586 and tell the operator you'd like to talk to someone about remembering TBR in your will or trust. TBR has plans for tax-deductible charitable giving as well. For a simple, free brochure, write TBR Legacy Department, P.O. Box 550, White Plains, MD 20695.

MONTHLY CREDIT CARD DONATIONS

And, if you'd like an easy way to support the efforts of TBR before your passing, we have a great idea. Every month TBR is set up to automatically deduct whatever amount you choose from the credit card of your choice—and your subscription will never expire! Donate $5, $10, $20 or more every month—no hassle. All you need to do is call 1-877-773-9077 toll free to get the ball rolling. Our operators can take care of the rest.

Beautiful Gift Books from TBR Book Club

A History of the World in 100 Animals—in Full Color

NEW! Fully illustrated in color, a fascinating exploration of the 100 animals that have had the most profound influence on humanity through the ages. The fact is, we humans are as much members of the animal kingdom as the pets we surround ourselves with, the animals we eat and the bees who pollinate our foodplants. Author Simon Barnes selects those animals who've had the greatest impact on humanity and vice versa. He shows how we have domesticated animals for food and transport, and how animals powered agriculture, making civilization possible. He posits that: The wholesale slaughter of bison was responsible for the U.S. becoming the nation it is; a plague spread by fleas led to changes in religion; and that whales increased human productivity. He also explains how pigeons made possible the biggest breakthrough in the history of human thought—and much more. The author finds examples from around the planet that will amuse and educate you. Vivid illustrations. Hardback, full color, 496 pages, #930, **$40**.

March of the Titans: The Complete History of the White Race

UPDATED! Here it is: the complete and comprehensive history of the White race—by prolific scholar Arthur Kemp—spanning 350 centuries of tumultuous events from the steppes of Russia to the African continent, to Asia, the Americas and beyond. This is their inspirational story—of vast visions, empires, achievements, triumphs against staggering odds, reckless blunders, crushing defeats and stupendous struggles. Most importantly of all, revealed in this work is the hidden, politically incorrect fact that all civilizations rise and fall according to their racial homogeneity and nothing else. A nation can survive anything but racial dissolution. This is a revolutionary new view of history and of the causes of the crisis facing modern Western civilization. Covering every continent, every White country both ancient and modern, and then stepping back to take a global view of modern racial realities, this book not only identifies the cause of the collapse of ancient civilizations, but also applies these lessons to modern Western society. The author, Arthur Kemp, spent more than 25 years traveling over four continents doing primary research for the book. There is no other like it in existence—a book to pass on from generation to generation so that all will know our true history. Deluxe softcover, signature sewn, 8.25" x 11" size, updated with 100 new pages—now 694 total pages—with hundreds of B&W pictures, indexed, appendices, bibliography, #464, **$36**.

Arminius: The Liberator

NEW! Two thousand years ago, the mighty Roman Empire—just like many Western democracies of today—was marked by decline and corruption. The once noble and altruistic attitude of the *civis romanus* had given way to the coarsest and most selfish morés. The middle class had almost totally vanished. An oligarchy, making a show of ostentatious wealth, brutality and perversion, had seized control. *Arminius: The Liberator* is the story of a young Germanic prince, trained to serve the Roman Empire, who united the tribes of Germania in 9 A.D. to crush three Roman legions, thereby changing the course of history. Its later cultural and social emanations would radiate to North America, Australia and other regions and have lasted more than 2,000 years so far. *Arminius: The Liberator* is the true story of one man's incredible quest to defy an oppressive, all-powerful empire and lead his people to freedom. Arminius's victory is a lesson to be learned by our people for our times—that unity and clear-headed focus are crucial to overcoming political tyranny and rampant corruption. Softcover, 8.5 x 11, hundreds of illustrations, 324 pages, #1008, limited quantity, **$55**.

ORDERING

Box 550, White Plains, MD 20695. S&H charges not included. Add $5 on orders up to $50. Add $10 S&H from $50.01 to $100. Add $15 from $100.01 to $200. Add $20 from $200.01 to $300. Add $25 from $300.01 to $400. Over $400? Call 202-547-5586 for best S&H rates to your locale. Please remember: You get free "Bonus Bucks" gift certificates depending on how much you spend!

Timely Books from TBR Bookstore

The American Regime: By an Anonymous January 6 Prisoner

NEW! After being targeted and locked up by the federal government in the wake of the events of Jan. 6, 2021, the author of *The American Regime* delves into the study of history, philosophy and politics to answer the singular question of our time: "What is the nature of the evil that now openly rules America and, through the American Empire, the broader world?" The great irony of our time is that more Americans than ever understand they live under an oppressive regime, yet the number of theories about the nature of that oppression and who is really calling the shots has only multiplied. The author confronts the prominent theories of political power, searching for one coherent understanding of this oppressive Leviathan. We must accept that what passes for truth is often little more than blinding government propaganda. Softcover, 290 pages, #991, **$25**.

Léon Degrelle In Exile: 1945-1994

NEW! By José Luís Jerez Riesco. Stripped of his Belgian citizenship and sentenced to death in absentia for fighting against Bolshevism in WWII, Degrelle lived the rest of his life in exile in Spain, harbored by Franco. During these 49 years, Degrelle refused to remain silent as fantastical narratives were woven about the war and the "atrocities" of the Germans in the decades following. Despite attacks on his family, vilification by the world and conflicts with the church, he never wavered in either his Catholic faith or his staunch conviction in National Socialism. Here is the story of those years, complete with extensive letters between Degrelle and his friends and family, interviews, speeches and anecdotes from those who knew him. Softcover, 518 pages, #993, **$30**.

The Transgender-Industrial Complex

NEW! Author Scott Howard exposes those financing the institutionalization of transgenderism. Behind the medical research into gender transitioning of children, pride parades and drag queen story hours is a lot of money. "Sex education" and global propaganda are all pushed and paid for by very wealthy people. Howard proves the transgender phenomenon is not the grassroots movement its advocates want the public to think. Impeccably sourced and researched, this book exposes the complex network of influential groups responsible, and the author takes a deep dive behind the scenes of "Big Gay," exposing its goals. This book is essential reading for anyone who wants to understand why every institution with power is uniform in supporting the inversion of biological reality. Softcover, 447 pages, #992, **$30**.

The Suppressed History of The West: Immigration, Subversion and Colonization from Rome to America and Russia

NEW! George Larson, Ph.D. delves into those who have been pulling the strings of history since as far back as the Roman Empire and how mass immigration is one of the tools they use to destroy nations. Each chapter is based upon the research of dozens of familiar authors and the books they have published that prove Larson's contentions. What is the Secret Society of Moses? What role do the Venetians play in history? What is the "Babylonian Connection"? Who created the Roman Catholic Church? How, really, did Europe sink into a Dark Age? What is the purpose of modern art? Was there a Khazar invasion of the West? What about the "elite" presidencies of Roosevelt I, Roosevelt II and Wilson? What was Solzhenitsyn warning us about? Much more. Softcover, 384 pages, #952, **$24**.

By Demand: More Books from Dr. Tom Dalton

The Poisonous Mushroom

NEW! Among the most controversial of Nazi publications was a book for children, published in 1938 under the title *Der Giftpilz*—or *The Poisonous Mushroom*. Here, the perceived Jewish threat to German society was portrayed in elemental terms. Ernst Hiemer put together 17 short morality stories intended to warn children of the dangers allegedly posed by Jews. Jews were depicted as conniving, thieving, treacherous liars who would do anything for personal gain. Though aimed at children 8 to 14, Hiemer's lessons were intended for all readers. Long out of circulation and banned in Germany and elsewhere, this historic edition reproduces full color artwork by German cartoonist Philipp Rupprecht ("Fips"). The book was repeatedly cited at the Nuremberg Trials as evidence of "Nazi cruelty," and was used by prosecutors to justify a death sentence for its publisher, Julius Streicher. Edited by Thomas Dalton. Softcover, full color, 72 pages, #1000, **$17**.

The Riddle of the Jews' Success

NEW! Jewish power, critics say, derives from Jewish money. But how do Jews become so wealthy? What, exactly, is the secret to their remarkable success? Around 100 years ago, Theodor Fritsch began to closely observe Jewish business practices, with the aim of truly understanding how this alien on German land had acquired so much wealth so quickly. Fritsch had ample, first-hand experience dealing with Jews, and he came to develop a keen insight into their tactics—the very things that led to their fabulous "success." Long out of print and shunned by mainstream scholars as anti-Semitic, this book, edited by Thomas Dalton, discusses a whole range of Jewish practices, all of which have echoed down to the present. Most striking of all, we obtain here a firm grasp on exactly how coarsened modern life has become, thanks to non-Christian commerce. In a straightforward and clear manner, Fritsch offers the facts. Softcover, 254 pages, #999, **$25**.

Unmasking Anne Frank: Her Famous Diary Exposed as a Literary Fraud

NEW! As a 13-year-old Jewish girl living in wartime Amsterdam, Anne Frank hid out with seven others for more than two years. During this time, she kept a diary of her thoughts, feelings, and experiences. Eventually the Frank family was discovered and deported. Anne later died of typhus in Bergen-Belsen. But there is a problem. Anne's tale is rife with absurdities, logical problems, inconsistencies and incoherent claims. Here, Japanese researcher Ikuo Suzuki deconstructs the famous dairy. In the process, he reveals that the notorious diary was likely written by a middle-aged Jewish man who worked with Anne's father, Otto, to foist upon the public a deceptive and misleading story of a young girl who perished in a German camp. Here, for the first time, is a thorough, detailed and highly readable critique of the global bestseller that is *The Diary of Anne Frank*. Softcover, 192 pages, #998, **$22**.

Protocols of the Elders of Zion: The Definitive Edition

NEW! As mysterious as it is notorious, "The Protocols" has been called the most influential piece of anti-Semitic literature in history. Here we find an express desire for world domination, along with a plan to attain it. In the Protocols' world-to-come, there will be a Jewish king of the world who will guide all humanity on behalf of Jewish interests. Serving at his behest will be the detested Goyim, who will gratefully submit to their ruler. Written in the form of meeting minutes, this document purports to be a transcription of a talk by an unnamed influential Jew, speaking around the year 1900. It first appeared in Russia in 1902, and then, in its final version, as part of a book by Sergei Nilus. But little beyond this is certain. It was denounced as a "forgery" in 1922—but is it? And what does that mean in this context? This new English translation includes commentary from Ford, Rosenberg, Evola and others. Softcover, 278 pages, #997, **$27**.

Get a FREE copy of *White Slavery in the Barbary States* when you renew your U.S.A. subscription!

White Slavery in the Barbary States provides insight into the time when more than 1 million White Europeans were seized and sold into slavery by the notorious Black and Arab slavers of North Africa. Charles Sumner provides the background to the Islamic slave trade in Whites and includes little-known details about how the Muslim pirates seized groups of Pilgrims on their way to North America, carried out a multinational reign of terror; how their raiders became the scourge of Christendom; and how their ravages were in no way confined to the Mediterranean coast. In fact, they penetrated the vast Atlantic Ocean, pressed even to the Straits of Dover and St. George's Channel and from the chalky cliffs of England to the distant western coasts of Ireland and Iceland. **This 75-page book regularly sells for $10, but can be yours FREE when you renew your subscription today!**

Bringing History Into Accord With the Facts in the Tradition of Dr. Harry Elmer Barnes

THE BARNES REVIEW

A JOURNAL OF POLITICALLY INCORRECT HISTORY

November / December 2023 ❖ Volume XXIX ❖ Number 6

Table of Contents

1913: The Momentous Year America's Fate Was Sealed

By Marc Roland

4 Few history professors long dwell on the year 1913. After all, they say, not much happened. How wrong they are. That year the Federal Reserve Act was passed, the Anti-Defamation League was founded, the income tax was approved and senate races were put up for sale.

Man in the Iron Mask Revealed

By Mike Mains

14 Everybody has heard of the infamous "Man in the Iron Mask," the hero of the Alexandre Dumas novel of the same name. But few know this character was based upon a real prisoner whose identity King Louis XIV demanded remain a secret in perpetuity.

Lyin' Lyndon: The Real LBJ

By Pat Shannan

20 Lyndon Baines Johnson (LBJ) is primarily know as the man who took over as president after the assassination of John F. Kennedy. He's also the architect of the "Great Society." What is less publicized is LBJ's dark side, one filled with election-rigging and murder for hire.

What Really Happened in Dallas?

By James Fetzer, Ph.D.

30 We know a lot more now than we knew in the 1960s about the assassination of President John F. Kennedy. In this article, famed JFK scholar James Fetzer fills us in on the most important details of the assassination, including the factions involved in the conspiracy.

Lee & Harvey: Controversial Theory of Two Oswalds Revisited

By Pat Shannan

36 TBR's Pat Shannan has long been on the trail of the real killers of JFK. During his decades of research, he has discovered there were two men claiming to be Lee Harvey Oswald in the days and weeks before the shooting of Kennedy. Why were there two Oswalds? What are the implications? What evidence is there?

Suspicious Deaths of Witnesses To the JFK Assassination

By Donald Jeffries

42 U.S. intelligence agencies have resorted to murder in the past to hide criminal conspiracies from the public. But just how many people would the FBI and CIA, for instance, kill to protect their secrets? Here, TBR explores the unusually high number of JFK murder witnesses who ended up dead—before getting the chance to tell their stories.

Rose Cherami: The Mystery Woman Who Tried to Save JFK

By Dr. Michael Marcades

48 Few people know the name Rose Cherami, but this troubled woman tried to warn law enforcement officers that President John F. Kennedy was going to be killed in Dallas. How did she know? She had been traveling with several of the killers. But nobody would listen. Here is Rose's story as told by her son.

Theory of Mossad Link to JFK Assassination Gets a Boost

By John Friend

58 If you have been reading TBR for any length of time, then you are no doubt familiar with JFK assassination researcher Michael Collins Piper. Piper passed away in 2015, but he left many monumental history books behind as his legacy, one being his bestseller *Final Judgment: The Missing Link in the JFK Assassination Conspiracy*. In this two-volume work, Piper alleged Mossad involvement in the killing of Kennedy. Now, years later, new revelations have given his theory a major boost.

Why Was George Patton Stopped From Conquering Europe?

By John Wear, J.D.

62 At the end of World War II, Gen. George Patton understood the threat the Soviet Union posed to Europe. He and his troops were thus primed and ready to invade, occupy and defend Eastern Europe from Stalin. So, why wouldn't the U.S. High Command let him do it?

PERSONAL FROM THE EDITOR

TBR Officially Turns 30

Every year with our November/December issue, we celebrate. Why? Because it means TBR has made it another year. The next issue you receive will have volume XXX on it, not for explicit content, but because we will be entering volume 30 of The Barnes Review's publishing history. Thirty years: I think that's quite an accomplishment for a magazine that powerful and well-funded grievance groups have tried to gag since we started in 1994. Coincidentally, one of those organizations is mentioned in our lead story "1913: The Year That Sealed America's Fate." Granted, 1913 is not necessarily one of the years we immediately recognize as a watershed time in U.S. history. Years such as 1776, 1812, 1861, 1917 and 1944 steal all the headlines. Agreed, they do mark pivotal years in our national history, but, after you read that story by Marc Roland, you will have to admit that 1913 should be listed right up there with the most transformational years of our country's history.

MIKE WALSH'S *WITNESS TO HISTORY* IS HERE!

Good news. TBR has rescued more books from the memory hole. (Turn to page 13 for a few of those.) Using donations made to Operation Book Rescue (OBR), as promised, TBR can now announce that Mike Walsh's masterpiece *Witness to History: The Reich Legend Uncensored* is back in a new edition and ready for sale. (See page 73.) We vow to save even more classic Revisionist books in the months and years ahead. All donations to TBR's Operation Book Rescue are reinvested in TBR's new publishing division, which is dedicated to giving deplatformed authors a way to keep their books in print.

MASSIVE TBR BOOKLIST ENCLOSED!

With all the new books we are saving and printing, we had to expand TBR's booklist by an additional eight pages. Along with scores of new books we are publishing ourselves, we continue to find great Revisionist books from other publishers who are also trying to counter the thought police. We have also expanded the DVD section of the catalog significantly. Note: Anything marked "new" in the enclosed 2023 catalog was not included in last year's listings. Every purchase of a book from TBR helps us survive another year. We have also added a bonus for customers ordering $100, $200, $300, $400 or more in items from the catalog: "Bonus Bucks" gift certificates you can use like cash on future orders from TBR magazine or TBR Book Club.

GIFT SUBSCRIPTIONS SO IMPORTANT

Please, please, please consider sending a friend a subscription to TBR's print magazine (gift rate for six issues is $28 in the U.S.) or TBR's electronic edition (*TBR Online*, six PDF issues, gift rate $18 anywhere in the world). Those low prices are made available for gift subscriptions because new subscribers are so important to TBR's survival. See the back cover for more or see the full-color pages in the front of this issue.

PLEASE ORDER EARLY

As TBR is now printing many of its own books, we are not quite as fast as the mega-printers just yet, and delivery times could extend to 30-45 days on some books. Your understanding is much appreciated. We suggest you order early and often to make sure your books arrive for holiday gift-giving. And please enjoy this issue! ❖

—Paul Angel, Executive Editor

1913 & 1963: Pivotal Years in U.S. History

November 22, 2023, will mark the 60th anniversary of the assassination of President John F. Kennedy, a watershed moment in American history. Various aspects of the assassination feature prominently in this issue of TBR, one of the first times we have dedicated such significant space to addressing this still-relevant topic, even 60 years after the fact.

Our lead story, however, makes a strong case that America's disastrous fate was already sealed well before the Deep State eliminated a sitting U.S. president. In the year 1913, several developments took place that fundamentally altered the course of America's political, economic and cultural progression. This included: the implementation of a long contested federal income tax; the direct election of U.S. senators, which allowed for wealthy plutocrats and big financiers to buy and manipulate members of the upper chamber of the U.S. Congress; the establishment of the Federal Reserve Banking system for the benefit of the wealthy elite; the free-speech-crushing creation of the Anti-Defamation League; and the takeover by hostile forces of America's nascent but influential Hollywood movie-making industry.

Marc Roland's timely and well-researched article thoroughly demonstrates how America was subverted well over 100 years ago. The dismantling of this once-respected republic had arguably begun well before 1913. However, the major developments that occurred during that fateful year have seriously undermined the essential foundation upon which this nation was erected.

The public murder of President Kennedy just 50 years later demonstrated to the entire world the low regard the Powers That Be have for the people of this country and the entire world. The fanciful "lone gunman" fairy tale, outlined and codified by the Warren Commission and systematically institutionalized by the mass media and political establishment, proved just how much contempt the forces of the Deep State have for the American public. The people were expected to uncritically accept one of the more absurd official narratives peddled in U.S. history, namely that Lee Harvey Oswald acted alone when killing JFK.

Readers will likely know that, shortly after his inauguration, Kennedy became a target of the various factions comprising the Deep State. Following the Bay of Pigs debacle in April 1961, JFK cursed the Joint Chiefs and the intelligence community, threatening to "shatter the CIA into a thousand pieces and scatter it to the winds" due to that agency's habitual criminality, which made him no friends in Langley.

Additionally, due to his balanced, principled stance on U.S. foreign policy in the Middle East and his skepticism of granting Israel permission to pursue a nuclear arsenal, JFK soon found himself in the crosshairs of the Zionist state of Israel and its worldwide network of sympathizers and agents, including many deeply embedded within the U.S. federal government.

Israel's role in the JFK assassination has long been suppressed and rarely addressed even within the JFK assassination research community, a topic that the late Michael Collins Piper, one of America's most well-known dissident historians and writers who sat on the Board of Contributing Editors of TBR until his death in 2015, addressed at great length in his masterpiece *Final Judgment: The Missing Link in the JFK Assassination Conspiracy*.

As we report in this issue, Piper's theory got a big boost earlier this summer when formerly classified CIA documents were released showing that a mysterious Lithuanian-born Jewish spy named Reuben Efron monitored Lee Harvey Oswald at the behest of the U.S. government in the years leading up to the hit on JFK.

While much remains classified in regard to the assassination of Kennedy, what we have discovered in the 60 years since the murder of the 35th president thoroughly demolishes the official "lone gunman" narrative. At this point, the "lone gunman" narrative has been as debunked as the official conspiracy theory explaining the 9/11 terrorist attacks or the alleged "Holocaust" of 6 million Jews at the behest of Hitler's government during WWII.

This, of course, goes to the heart of the purpose and mission of TBR: bringing history into accord with the facts. This is an increasingly difficult challenge, but we are committed 100% to that mission. The dishonest fake news media and the mainstream academic establishment are certainly not up to the task. In fact, they often run cover for the outrageous lies and deceptions foisted upon the public by the Deep State and the plutocrats who are laying waste to America and much of the wider Western world.

It is the job of independent historians and investigators to set the record straight—without bias or preconception—on the most important historical and contemporary topics facing the world. That is exactly what our editorial staff has done with this final issue of 2023. ❖

—John Friend,
Assistant Editor

On the front cover: Woodrow Wilson is shown in the foreground while behind him is a portion of the 1923 painting *President Wilson Signing the Federal Reserve Act* by Wilburg G. Kurtz. Later, when commenting on the state of the nation, Wilson said: "We have restricted credit, we have restricted opportunity, we have controlled development, and we have come to be one of the worst ruled, controlled and dominated governments in the civilized world—a government run by the opinion of small groups of dominant men"—just like those who control the Fed.

1913

The Year that Sealed America's Fate

Shortly before the outbreak of World War I, a series of unfortunate developments occurred in the U.S. that entirely subverted the constitutional republic created by the founders of this country. Although the republic had already been seriously subverted, 1913 proved to be a fatal blow to the original founding and purpose of this once great nation. Reversing and combating these developments will first require an accurate understanding of them, which this article aims to provide.

By Marc Roland

Many of our fellow countrymen are today deeply bewildered by the self-evident collapse of their once prosperous and well-ordered society. They cannot understand how things could have changed so quickly, nor imagine what kind of an even darker future must inevitably come from such widespread cultural rot and public chaos. They are unable to grasp what is going on around them, largely because most Americans have no sense of the past thanks to their school teachers and television indoctrinators, who have for generations replaced the genuine study of history with politically correct narratives.

Had our people been allowed to learn what led to their country's presently deplorable condition, they would know that the dividing line separating our originally free republic from its current slide into a terminal dystopia was boldly drawn in the early part of the last century.

The U.S. Constitution was rendered a dead letter when:

- An arguably illicit federal income tax was instituted.
- An amendment that allowed the buying and selling of U.S. senators by wealthy investors was ratified.
- A multi-million-dollar organization censoring Americans' First Amendment right to freedom of speech, going so far as to deprive them of their livelihood for speaking the truth, was established.
- America's film industry was transformed overnight into a morally subversive propaganda factory based in Hollywood.
- The prerogative of Congress to issue and regulate the nation's wealth was lost.

WOODROW WILSON
Inaugurated March 4, 1913.

All this happened in a single fateful year—1913.

The catastrophic effects set in mo-

Rep. Charles A. Lindbergh correctly warned fellow congressmen that legalizing the Federal Reserve System would displace our constitutional republic with "an invisible government."

Gregor Duncan's editorial cartoon appearing in *Life* magazine in April 1934 portrayed President Franklin Roosevelt sowing the seeds of prosperity when, in fact, by 1941 he was sowing the seeds of war with a bottomless sack of Federal Reserve System dollars.

tion by these quiet usurpations began to be felt just nine months later in World War I, which murderously deposed native European rulers with international Communist gangsters at the cost of more than 20 million dead, plus another 21 million wounded.[1] Little more than 10 years after the hypocritical "War to End All Wars," the cascading repercussions of Wall Street's deliberately engineered "crash" bankrupted Western civilization.[2]

Two decades following the conclusion of WWI, the lives of 85 million human beings—3% of the 2.3 billion people on Earth at the time—were consumed by World War II.[3] They were killed to preserve a global money power with its transnational headquarters at the Marriner S. Eccles Federal Reserve Board Building in Washington, D.C.[4]

Following the end of global hostilities in 1945, the United States has engaged in a series of seemingly endless military conflicts around the world, with escalating possibilities for a nuclear Armageddon more likely today than in all the 78 years since the first atomic bombings of Hiroshima and Nagasaki. Meanwhile, our urban population centers are progressively overwhelmed by criminal violence, as officially sanctioned immorality poisons every level of public education and entertainment. These, however, are not the causes of American decline, but rather consequences resulting from the emergence of a shadow government born in 1913.

Sigmund Livingston (1872-1946), above, was a German-born Jewish attorney based in Chicago, Illinois. Livingston became the founder and first president of the Anti-Defamation League of B'nai B'rith in September 1913. The league was initially created to combat the bad press received after Leo Frank, Jewish, was convicted of molesting and killing 13-year-old Mary Phagan. Frank was kidnapped from prison and lynched by a mob two years later, just after his death sentence was commuted. Below, **Jonathan Greenblatt**, the current chairman of the ADL.

INCOME TAX ENFORCERS

Its first apparition materialized on February 3, 1913, when the 16th Amendment to the U.S. Constitution was ratified. For the previous 112 years, the U.S. Supreme Court consistently ruled that Congress's attempt to tax incomes uniformly throughout the United States was unconstitutional. A tax on incomes derived from property, the court declared, was a direct tax, which Congress, under the terms of Article I, Sections 2 and 9, could impose only by the rule of apportionment according to population.[5]

Traditionally strict observation of the U.S. Constitution had gone slack after the turn of the 20th century. Originally sold to suspicious congressmen by deceiving them that just the top 1% or 2% of wage earners would be taxed, yet another lie promised skeptics that the federal income tax was only "temporary." This indefinite assurance betrayed itself after only three years, when directors of the Bureau of Internal Revenue (forerunner of the Internal Revenue Service), under cover of early U.S. participation in World War I, modified the federal income tax on a permanent basis, all previous protestations and guarantees to the contrary.[6]

Since then, the IRS has grown to become feared as a domestic terrorist organization by many Americans—and not without cause. As the largest, most well-funded tax collection entity on Earth—arguably, in all history—the IRS operates an army of 87,000 agents, who must "be willing to use deadly force" in the execution of their duties.[7]

They spy on American taxpayers by monitoring their spending and donations and have been accused of selectively auditing individuals associated with groups opposed by federal authorities as a form of intimidation. A case in point—one of many in recent years—is illustrated by The Buckeye Institute, a right-wing, free market public policy think tank based in Columbus, Ohio.

"The Buckeye Institute has experienced firsthand the chilling effect that forced donor disclosure has on the freedom of association," Robert Alt, the organization's president and chief executive officer, said when announcing a lawsuit challenging collection of donor data by the IRS.

> In 2013, shortly after the Buckeye Institute publicly urged Ohio's governor and general assembly to reject the federal efforts at Medicaid expansion, our organization was selected for audit by the IRS.
>
> Some Buckeye donors feared that this conspicuous audit was likely instigated as retaliation for Buckeye's prominent role as the leading voice opposing the administration's proposed Medicaid expansion, and those same donors expressed serious concern that, if their names appeared on Buckeye's audited records, they too could be potentially subjected to retaliatory individual audits or other such government antagonism.
>
> The Buckeye Institute believes that some Buckeye donors stopped giving entirely, and others made smaller, anonymous cash donations to the Buckeye Institute in the aftermath of Buckeye's politically motivated IRS audit—often foregoing donation receipts and, with it, tax-deductibility—hoping to avoid any political retribution.[8]

By contrast, and far more generally known, is the Hunter Biden scandal. Writing for the website "Townhall" earlier this year, Jared Whitley concisely explained the details, revealing the double standards and politicization of the agency:

> Whistleblowers have alleged that the president's son received preferential treatment in an IRS probe into tax evasion, with the agency deviating from its normal investigatory processes to "benefit the subject." While Hunter Biden recently agreed to plead guilty to "willful failure" to pay over $200,000 in taxes on income exceeding $3 million from foreign business deals in 2017 and 2018, the whistleblower complaints suggest that any other American would have faced a much tougher investigation.[9]

The opening of the final session of the 62nd Congress, December 2, 1912. Their session would not end until late in 1913. Some of the senators did come up for reelection in 1913 under the altered rules of the newly ratified 17th Amendment.

Text of the 17th Amendment

"The Senate of the United States shall be composed of two Senators from each State, elected by the people thereof, for six years; and each Senator shall have one vote. The electors in each State shall have the qualifications requisite for electors of the most numerous branch of the State legislatures.

"When vacancies happen in the representation of any State in the Senate, the executive authority of such State shall issue writs of election to fill such vacancies: Provided, That the legislature of any State may empower the executive thereof to make temporary appointments until the people fill the vacancies by election as the legislature may direct.

"This amendment shall not be so construed as to affect the election or term of any Senator chosen before it becomes valid as part of the Constitution."

The Hunter Biden saga continues to play out to this very day, despite the obvious criminal misconduct both he and his father—President Joe Biden—have engaged in. These and numerous other similar cases demonstrate the desire by federal authorities to intimidate patriotic individuals and groups while showering favoritism on behalf of establishment celebrities and cronies.

As such, the federal income tax and its well-armed enforcers amount to a surveillance and intimidation phenomenon aimed at overawing and intimidating Americans with the frightening power of government to impoverish and imprison them at will if they choose to deviate or criticize the official narrative coming from Washington or the liberal mass media.

The IRS also provides "a new source of government funding and a potential tool for redistributing income and social engineering," writes Seth Rogovoy in the *Forward*, a historically left-wing, Marxist inspired Jewish publication. The "social engineering" he mentions has become all too familiar with the numerous, anti-White social and cultural programs foisted on society, concocted by federal agencies with many millions of revenue dollars paid under duress by mostly White taxpayers—the same victims of these devious governmental schemes.[10]

SENATORS FOR SALE

On April 8, 1913, little more than two months after the federal income tax had been imposed, the 17th Amendment superseded Article I, Section 3, Clauses 1 and 2 of the U.S. Constitution. Previously, men were elected by the state legislature, based on their recognizably good character and demonstrable competence, without recourse to campaign funding or popularity contests.

This was Thomas Jefferson's bulwark against the potentially corrupting influence of wealth, a threat endemic to politics. Deleting this constitutional safeguard meant that senators now owed their position to direct, public elections.

In other words, to the highest bidders and financiers who expected to get generous returns on their investment in winning campaigns for their purchased politicians.

Since ratification of the 17th Amendment, capable though less well-funded candidates for the U.S. Senate regularly lose to less qualified, less competent and more malleable contenders. The office usually goes to the man or woman with the most campaign financing, but not the better brain or dedication to the U.S. Constitution. Enacting the 17th Amendment reduced U.S. senators from genuine statesmen to big money puppets.

Their transfiguration transformed the United States from a constitutional republic into a corrupt plutocracy—the rule of high finance—in the guise of a popular democracy, as personified today by the former senator and vice president, President Joe Biden, who is nothing more than a doddering laughingstock to the entire

world. Worse still, with passage of the 17th Amendment, politicians have been reduced to mere puppets of their financiers, bought by the haters of everything American, thereby becoming, in effect, enemy agents occupying the seats of power in our country.

INSIDIOUS ADL FOUNDED

Roughly six months later, the Anti-Defamation League (ADL) was founded in September 1913. A secret society, the ADL engages in domestic spying on Gentiles in the United States and around the world for the primary function of suppressing anything its directors deem "anti-Semitic." This includes making basic, easily demonstrable observations about the reality of Jewish power and influence in America and the wider Western world.

The ADL's perception has a broad range. Just last year, ADL CEO and National Director Jonathan Greenblatt declared that criticism of Israel is anti-Semitic. *The Times of Israel* rejoiced that Greenblatt's statement "marked a rare moment of the organization, un-

Hollywood Weaponized

Photo above: Cecil B. DeMille (standing) with Jesse Lasky, two of the leading men who weaponized the film industry to promote subversive, Marxist and anti-Christian themes to the masses. DeMille was an active Freemason with Jewish roots from Massachusetts, while Lasky hailed from a Jewish family in San Francisco.

At left, a promotional poster for *The Squaw Man* (1914), the first film directed by DeMille. The movie was one of the first to ever be filmed and produced in Hollywood, paving the way for the future success of the film industry there. *The Squaw Man* was one of the first inter-racial films shown to an American audience. DeMille would later found Paramount Pictures with Jesse Lasky and Adolph Zukor, both Jewish, by the way.

equivocally stating that anti-Zionism is an expression of anti-Semitism."[11]

Fueled by a truly psychotic level of paranoia, ADL agents are feverishly engaged in espionage against anyone —real or imagined—attempting to expose unflattering facts about "God's Chosen People." The ADL's headquarters are located in Murray Hill, a posh neighborhood in the New York City borough of Manhattan, from which it operates 25 regional offices throughout the United States, including a government relations office in Washington, D.C., as well as an office in Israel, plus staff in Europe. In its 2019 consolidated financial statements, the ADL reported total operating revenue at $80.9 million—all this, supposedly, to prevent innocent Jews from being slandered.[12]

What the ADL regards as slanderous, however, are the documented facts about Jewish involvement in Communism, organized crime, the slave trade, unjust wars of aggression based on total lies, and multiple other ills currently afflicting Western civilization. ADL agents stay busy feverishly monitoring all newspapers, magazines and telecasts for the merest utterance of "anti-Semitism."

When an offender is suspected, retaliatory methods include boycotts and threatening advertisers, among other malicious measures. Since being labeled an "anti-Semite" in modern American society is the kiss of death to any career—particularly in the public information and entertainment industries—publishers, editors plus television and movie producers can be counted upon for a knee-jerk reaction acceptable to ADL demands.

A recent case in point was made in September 2021, when Greenblatt insisted that Fox News fire commentator Tucker Carlson for having dared to suggest that White Americans were being deliberately displaced and replaced through mass immigration and other anti-White policies without, however, mentioning Jewish involvement in what has come to be known as the Great Replacement. Fox executives were reluctant to dismiss their most popular host, but finally caved in under mounting ADL pressure earlier this year, when Carlson was dismissed by Fox.[13]

Since the 1970s, the ADL has partnered with the FBI, sharing information learned from snooping on disapproving Americans, getting them similarly fired, socially ostracized, or worse.[14] In 2020, it was revealed the ADL trained its staff to edit Wikipedia pages, in keeping with that organization's determination to re-write the past entirely from the perspective of the Jewish people, demeaning or cancelling historical figures deemed "anti-Semitic," while exaggerating or concocting their own dubious contributions to civilization.[15]

The over-arching objective of these activities is clear: the complete elimination of all Gentile opposition or even recognition of just what the organized Jewish community has in store for America.

HOLLYWOOD SEIZED

Three months after founding the ADL, a trio of New York Jews seized control of Southern California's nascent movie-making industry, after its mostly Gentile artists convincingly demonstrated the power of their early flicks to emotionally sway the passions of many millions of viewers.

Aware of its potential for raking in untold profits while manipulating, exploiting and propagandizing the masses of otherwise uninformed people, they industrialized American cinema into a massive deception operation by forming the Jesse Lasky Feature Play Company on December 22, 1913.

Hollywood's first major studio was named after its chief executive, Jesse L. Lasky, a two-bit Vaudeville talent scout. His general manager was Samuel Goldfish, a glove salesman, while Cecil B. DeMille, the son of a German-born Jewish mother, served as director general.

"They knew nothing much about movies," according to film historian

AMERICAN HISTORY REVISED

200 Startling Facts That Never Made It Into the Textbooks

What was the biggest mistake the Ford Motor Co. ever made? Eleanor Roosevelt and most women's groups opposed the Equal Rights Amendment? The No. 1 bestselling American book of all time was written in one day? The Dutch made a bad investment when they bought Manhattan? Two young girls aimed someday to become first lady—and succeeded? A private financier saved the U.S. from bankruptcy three times? Author Seymour Morris Jr. illustrates—via the 200 historical vignettes in this book—that much of our nation's past is quite different—and far more remarkable—than we thought. Though we do not necessarily agree with every single conclusion contained in the hundreds of tales presented, it is loaded with enough fascinating history to make it a very worthwhile gift. Dozens more fascinating and little-known facts about U.S. history you may not know. Organized into 10 thematic chapters, the book plumbs American history's least-known and shocking twists. Softcover, 432 pages, #950, **$20** minus 10% for TBR subscribers plus $5 S&H inside the U.S. from TBR, P.O. Box 550, White Plains, MD 20695. Call 1-877-773-9077 toll free to charge, Mon.-Thu. 8-4 ET.

Richard Cavendish,[16] but they did know exactly what they wanted.

The Squaw Man, their first motion picture—and the first full-length feature film shot in Hollywood—was an inter-racial love story. From its inception, Hollywood has aggressively pushed miscegenation, certainly not between Jewish characters and non-Jews, but most often between Black men and White women, such as 1967's alleged comedy *Guess Who's Coming to Dinner?* The film was produced and directed by Stanley Kramer, was written by William Rose, and the cinematographer was Sam Leavitt—all three were Jewish.

Today's ubiquitous, pornographic race-mixing imagery, spewed out by the 21st-century successors of the clique that took over Hollywood, traces its origins back to *The Squaw Man* of more than 100 years ago.

Since then, the U.S. film industry has lost none of its driving energy to promote anti-White agendas and demonize Gentiles. As such, it has become the most effective and poisonous mass behavior modification medium of all time. More than any other single factor, visual entertainment has molded and continues to form the beliefs and attitudes—and hence the actions—of countless millions of people, inciting them to rebel against and actively oppose their own best interests while infecting their minds with thoughts of racial suicide.

Paul Warburg, mastermind of the Federal Reserve conspiracy, stole America's economy for his fellow bankers in 1913.

ROTHSCHILD TAKEOVER

On December 23, 1913—the very next day after corporate Hollywood came into being—the Federal Reserve System was created as the central banking system of the United States. On that day, Woodrow Wilson signed the Federal Reserve Act. Before he did, Rep. Charles August Lindbergh (R-Minn.), father of the famous aviator, prophetically warned, "This Federal Reserve Act establishes the most gigantic trust on Earth. When the president signs this bill, the invisible government of the Monetary Power will be legalized."[17]

Without hesitation, Wilson invalidated the U.S. Constitution with the stroke of his pen. Until that fateful moment, Congress alone had lawful power to issue and regulate the nation's currency. Now that constitutional prerogative had been stealthily grabbed away from the American people's elected representatives and handed over to a gaggle of unelected, faceless bankers for whom America was nothing more than a springboard for world power.

Jerry Voorhis, the Democratic House representative for California's 12th congressional district for five consecutive terms (1936-1946), explained the sinister development thusly:

> This Federal Reserve Act gave the power to coin our money to the Federal Reserve Banks, a system owned and operated not by the United States government, as many have been led to believe, but by a group of private Rothschild and affiliated bankers sent here from Europe for the express purpose of gaining control of this nation's money system, just as they had done in every nation in Europe, with the exception of Czarist Russia, up to that time [1913], and involved that continent in war after war.[18]

Their leader was Paul Warburg, himself a Rothschild among Rothschilds, who, writes G. Edward Griffin in his definitive exposé of the subject, "became the dominant and guiding mind throughout all the discussions [which led to the Federal Reserve Act]."

Griffin continues:

> Even a casual perusal of the literature on the creation of the Federal Reserve System is sufficient to find that he was, indeed, the cartel's mastermind. Professor Galbraith says, "Warburg has, with some justice, been called the father of the [Federal Reserve] System."
>
> Professor Edwin Seligman, a member of the international banking family of J&W Seligman, and head of the Department of Economics at Columbia University, writes that "in its fundamental features, the Federal Reserve Act is the work of Mr. Warburg more than any other man in the country."[19]

Harold Kellock, Warburg's admiring biographer, writes he was "probably the mildest-mannered man that ever personally conducted a revolution. A shy, sensitive man, he imposed his idea on a nation of a hundred million people."

Warburg's "master plan," according to Griffin, "was designed from top to bottom to serve private interests at the expense of the public."[20]

Antony Sutton, a professor of economics at California State University in Los Angeles, stated that the "Federal Reserve System is a legal, private monopoly of the money supply operated for the benefit of the few

Woodrow Wilson signed America's death warrant by endorsing the Federal Reserve Act of 1913.

under the guise of protecting and promoting the public interest."[21]

1913—A FATEFUL YEAR

As we've seen, 1913 began with the federal income tax and ended with the Federal Reserve System.

"The two creations work together as a far more delicate mechanism for control over the economic and social life of society than either one alone," Griffin observers. "This must always be done in the name of social justice or equality, but the real objective is to override the free market and bring society under the control of the master planners."[22]

The same may be said of the 17th Amendment to our dismembered and moribund U.S. Constitution, the ADL's increasingly obvious and subversive influence in American society, and the permanent occupation of Hollywood by enemy propagandists. In each one of these five transgressions against the American republic, their shared motivation stands out in bold relief.

In a word, it is all about control:

• Control over voters by purchasing their elected representatives with campaign contributions.

• Control over all working citizens by threatening them with 87,000 IRS agents empowered to use deadly force in the name of a federal income tax.

• Control exercised by an international thought police over anyone who questions the politically correct norm, while censoring out all truths that even remotely undermine the ADL's multi-million-dollar secret society.

• Control and corruption of popular opinion and cultural values through skillfully crafted propaganda in the motion picture industry.

• Control of the nation's wealth through the Federal Reserve banking system, which is private, not federal; which has no reserves, but only debt management; which is not a bank, but

a cartel—a union of private banks to dominate the country's money supply.[23]

THE CARTEL RULES

Griffin observes that, "when there is a conflict between the public interest and the private needs of the cartel—a conflict that arises almost daily—the public will be sacrificed." Truer words may never have been spoken.

"That is the nature of the beast," Griffin powerfully avers. "It is foolish to expect a cartel to act in any other way."[24]

That all these institutions of control—as covert as they are powerful, disfiguring America's constitutional republic into a monstrous tyranny administered by aliens and their puppets—arose together in the same year seems, logically, beyond all possibilities of random chance.

These subversive developments bespeak deliberation of forethought undoubtedly preceded by years—more likely decades—of planning and preparation, which coalesced in a single 12-month period.

Our history since then has demonstrated a legacy of steadily shrinking freedom strangled by the hands of psychotic, malicious control-freaks. The inmates took over the asylum from its administrators in 1913 and have been running it ever since.

Coincidence or conspiracy? You decide. ❖

"The banks—commercial banks and the Federal Reserve—create all the money of this nation, and the nation and its people pay interest on every dollar of that newly created money. Which means that private banks exercise unconstitutionally, immorally and ridiculously the power to tax the people."—California Rep. Jerry Voorhis.

Operation Book Rescue: Latest Books Saved

Communism With the Mask Off

BACK—By Dr. Joseph Goebbels. Here are two dramatic speeches made by the German minister of propaganda at the famous Nuremberg rallies of 1935 and 1936 that sum up the National Socialist interpretation of Communism and its threat to the world. In *Communism with the Mask Off* (1935), Goebbels describes in detail the Jewish origins of Marxism and Communism and lists the Jewish leaders and instigators of that ideology in Russia, Germany, many European nations and even China. "As far as we ourselves are concerned, we have completely overcome this menace. Indeed perhaps, outside of his work in Germany, the greatest service which our Führer has rendered the world is that here in Germany he has set up a barrier against world Bolshevism." In B*olshevism in Theory and Practice* (1936), Goebbels discusses the social, political and economic consequences of Marxism—and how Germany had broken that menace. New cover. Softcover, 64 pages, #673, **$12**.

White Slavery in the Barbary States

RESCUED—This astonishing book provides a fascinating insight into a period of history now largely censored by political correctness—the time when at least 1 million Europeans were seized and sold into slavery by the notorious non-White slavers of North Africa. Charles Sumner provides a full background to the Islamic slave trade in White people and includes little-known details such as how the Muslim pirates even seized groups of Pilgrims on their way to North America. The author also points out the evil of slavery worldwide, and of how Charles V of Spain fought Barbary slavers while granting European traders the right to export slaves to the Spanish colonies in the New World: "It is said that Charles lived long enough to repent what he had thus inconsiderately done. Certain it is, no single concession recorded in history—of king or emperor—has produced such disastrous far-reaching consequences." A remarkable work which contributes to a greater understanding of the mentality behind slavery—and the reality that Europeans were as much victims of this evil practice as any other people. Softcover, 75 pages, #1001, **$10**.

Lost in the Jungle

BACK—A classic study of African wildlife, culture and native tribes as they existed in the mid-1800s, written by the first European explorer to confirm the existence of gorillas and pygmies. Adventurer Paul du Chaillu describes in vivid detail African life before the advent of European colonization, and the astonishing practices, culture and environment that existed. Read of witchcraft trials and the tribe members' astonishment at their first sight of a White man, their amazement at everyday items such as clothes, shoes, socks, hats, a music-box and a mirror, and of how the Apingi tribe appointed him king. This is a restored and reset edition, complete with original illustrations. New cover. Softcover, 200 pages, #794, **$20**.

The Aryan Race: Its Origins and Its Achievements

RESCUED—A beautiful cultural history of the Indo-European peoples. The author, a classical scholar, defines "Aryan" as a "linguistic race" spanning the areas occupied by the great Indo-European invasion, reaching from India to Ireland, and proceeds to analyze all aspects of the cultures across this vast region. Along the way, he proves that the broad family of Indo-European language speakers had a common origin at some distant point in the past. It includes an overview of the development of ancient Indo-European households, farming, legal systems, culture, religion, language and political development. Read of the tales from the Rig-Vedas, their similarity to Greek and Roman myths, and the parallels with the Norse Eddas. It is a treasure trove of facts and myths that reflects the genius of the Indo-Europeans. New cover. Softcover, 252 pages, #829, **$25**.

Back Door to War: The Roosevelt Foreign Policy 1933–1941

BACK—By Charles Callan Tansill. This masterpiece of 20th-century Revisionist history is now back in print. Charles Callan Tansill, one of the foremost American diplomatic historians of the 20th century, convincingly argues that Franklin Roosevelt wished to involve the United States in the European war that began in 1939. When his efforts came to naught, Roosevelt determined to provoke Japan into an attack on U.S. territory. Doing so would involve Japan's Axis allies in war also, and so America would thus enter the war through the "back door." The strategy succeeded, and Tansill maintains that Roosevelt therefore welcomed Japan's attack on Pearl Harbor. Tansill proves his central theme: that FDR sought to include the United States in World War II on the side of the Soviet Union from the very beginning, and duped the Japanese into firing the first shot. Tansill offers extensive primary material from U.S. State Department files, current periodicals and sound reasoning. New cover. Softcover, 712 pages, #651, **$40**.

White America: The American Racial Problem as Seen in a Worldwide Perspective

RESCUED—Here is a survey by Ernest Sevier Cox of the relationship between racial homogeneity and the preservation of civilization, described against a sweeping historical backdrop which includes Egypt, India, South America, South Africa and, finally, the U.S.A. In this book, the author proves how "diversity" has in every case led to the collapse of the original founding civilization, and that the only solution to the problem is not segregation but total physical geographical separation. The only solution for America, this work argues, is the repatriation of its non-White population to the continents of their origin. Written in the 1930s, the fulfillment of the predictions of what would happen if a policy of separation was not followed makes the book's thesis more urgent. This new edition has been edited and the text completely reset. It contains the full original text, nine new illustrations and a complete index. New cover. Softcover, 250 pages, #610, **$25**.

ORDERING: TBR subscribers get 10% off. Prices do not include S&H. Inside the U.S. add $5 S&H on orders up to $50. Add $10 S&H on orders from $50.01 to $100. Who was the Man in the Iron Mask?

By Mike Mains

The film *The Man in the Iron Mask*, starring Louis Hayward in the dual role of King Louis XIV and his identical twin brother, has long been a favorite of this writer. I knew the movie was based on an adventure novel by Alexandre Dumas. I never knew until recently, however, that Dumas's novel was based on a true story.

A new book *The Man in the Iron Mask* by Josephine Wilkinson tells that true story and it is riveting from beginning to end.

The mystery of the man in the iron mask—who he was and why he was imprisoned—has held a centuries-long fascination for the people of France, not unlike our own country's fascination with the assassination of President John F. Kennedy. The question of who killed JFK and why led to a never-ending series of scurrilous accusations, ridiculous lies and extravagant conspiracy theories until Michael Collins Piper finally cracked the case and revealed who was behind the assassination with his landmark book *Final Judgment.**

Wilkinson serves the same purpose with her book, finally unveiling the identity of the mysterious prisoner known to the world as the man in the iron mask.

LOUIS XIV
Wanted prisoner executed.

Wilkinson's book is actually the story of three men, or even four if you count Benigne Dauvergne de Saint-Mars, the jailer who oversaw the various prisons where the mysterious man in the iron mask was held. The others are Eustache Dauger, the legendary prisoner himself; Antonin Nompar de Caumont, marquis de Puyguilhem, comte de Lauzun, an inmate at the Pignerol fortress prison in Italy, where Eustache was first held; and Nicholas Foucquet, another inmate at Pignerol. The lives of these three prisoners were closely intertwined for years, and each of them was a character in his own right.

Saint-Mars was the jailer for all three men. He was also Dauger's personal jailer and oversaw the famous captive through four prisons, beginning at Pignerol in 1669 and ending at the Bastille, where Dauger arrived in 1698 and died five years later.

As the years rolled by and rumors of the mysterious man in the iron mask circulated throughout France, the jailer achieved a certain notoriety of his own. Saint-Mars, who was known to skim money off the prison expense account for his own use, actually started some of the more exotic rumors about the man in the iron mask as a way of inflating his own fame and importance.

FOUCQUET WAS THE FIRST

Foucquet, the superintendent of finances and one of the most powerful men in France at the time of his arrest, was the first of the three prisoners to arrive at Pignerol under the watchful eye of Saint-Mars in 1665. He was accused of negligence in his duties. King Louis XIV, only 22-years-old at the time, sought the death penalty for the prisoner.

Foucquet claimed he was being framed. Wilkinson agrees:

> The truth of this argument was secretly recognized and accepted by a majority of Foucquet's judges and, after more than three years of investigations and interrogations, followed by a show trial based upon unsound evidence, the packed panel of judges could not find sufficient cause to condemn Nicolas Foucquet to death, as Louis wanted.

Instead, Foucquet was banished from the borders of France for life and promptly sent to the prison at Pignerol under heavy guard.

THE MAN IN THE IRON MASK

Eustache Dauger, the man in the iron mask, was the second inmate to arrive at Pignerol in 1669. Saint-Mars was not told why Dauger was to be jailed, only that it was to the king's service "that the man whose name was given as 'Eustache d'Auger' should be kept under conditions of the strictest security."

Dauger was a valet. Many have speculated over the years that he was a figure of noble birth, even the king's own brother. However, as Wilkinson points out in the latter part of her book, no one of nobility in French society disappeared when Dauger was arrested and jailed.

From all accounts, Dauger was never tried in court, only arrested and immediately taken to the prison at Pignerol. And he wasn't wearing an iron mask. "There was never any mention of hiding the man's face or disguising who he actually was," Wilkinson notes.

Eustache Dauger: The Man in the Mask?

Above, an artists's rendering of the "man in the iron mask" and his jailers. Why he was sent to prison or how he so obviously earned the ire of the French king is unknown. What we do know is that Eustache Dauger, the alleged mystery man, was to be kept "under conditions of the strictest security." He was incarcerated in various prisons in Europe from 1669 until his death in 1703. At far left is Benigne Dauvergne de Saint-Mars, the man who oversaw the various prisons where the mysterious man was held captive.

LAUZUN THE LAST

Lauzun was the last of the three principal prisoners to be jailed under Saint-Mars at Pignerol. He was a personal friend of the king but was driven mad with jealousy when King Louis fell for the charms of Lauzun's cousin, Mme. de Monaco, the same woman that Lauzun was in love with.

When Lauzun caught wind of a planned tryst between Mme. de Monaco and King Louis, he rushed to a private back entrance in the rear of the palace that was routinely used to

The Man in the Iron Mask:

The True Story of Europe's Most Famous Prisoner

By Josephine Wilkinson. This book has all the hallmarks of a thrilling adventure story: a glamorous and all-powerful king, ambitious ministers, a cruel and despotic jailor, dark and sinister dungeons—and a secret prisoner who actually existed. It is easy to forget that this story, made famous by Alexandre Dumas, is that of a real person, Eustache Dauger, who spent more than 30 years in the prison system of Louis XIV's France—never to be freed. This narrative brings to life the true story of this mysterious man and follows his journey through four prisons and across decades of time. It introduces the reader to those with whom he shared his imprisonment and those who decided his tragic fate—and why they saw him as such a threat. *The Man in the Iron Mask* reveals one of the most enduring mysteries of Louis XIV's reign and, using contemporary documents, this book shows what life was really like for state prisoners in 17th-century France—and offers insight into why this mysterious man was arrested and why. Hardback, 352 pages, #945, **$29** minus 10% for TBR subscribers plus $5 S&H inside the U.S. from TBR, P.O.. Box 550, White Plains, MD 20695. Call 1-877-773-9077 toll free to charge, Mon.-Thu. 8-4 ET. See www.BarnesReview.com.

discreetly usher female company into the king's chambers and swiped the key. Then he hid in the shadows and listened.

Louis's faithful valet Bontemps soon arrived with Mme. de Monaco and searched in vain for the key. Louis, on the other side of the locked door, insisted that he'd left the key in its usual place.

"When, after frantic searching on both sides of the door, the key could not be found, the lovers had to admit defeat," Wilkinson recounts. As for Lauzun, he "gloated over the trick he had played from the safety of his hiding place."

On another occasion, Lauzun sought the coveted post of grandmaster of the artillery. To plead his case, he enlisted the help of Mme. de Montespan, now the chief royal mistress of the court. He then bribed her chambermaid to hide him under the bed while Mme. de Montespan entertained the king.

"At the appointed hour, Louis duly arrived and, after the couple had made love, Lauzun was treated to the pillow talk he was so desperate to hear," Wilkinson explains.

As promised, Mme. de Montespan brought up the subject of the vacant post of grandmaster of the artillery, but Louis told her he had no intention of giving the post to Lauzun.

Mme. de Montespan, not knowing that Lauzun was hiding under the bed, then "recounted how she had duped Lauzun by promising to intercede for him. Lauzun could only listen as the couple ridiculed and laughed at him."

When he saw Mme. de Montespan only hours later, Lauzun called her "a liar, a rascal, a hussy, and a piece of dog dirt before repeating, word-for-word, the conversation that had passed between her and the king." The chief royal mistress fainted.

Antics like that eventually led to Lauzun's arrest in 1671, and he was taken to Pignerol under the escort of 100 musketeers and a letter from the king instructing Saint-Mars that his new prisoner was to be guarded with "all the precautions imaginable."

THE PRISON AT PIGNEROL

Due to their stations in life, Foucquet and Lauzun both enjoyed certain privileges while imprisoned. Their cells consisted of several rooms, outfitted with fine furniture and linens. Both men also had valets to serve them. The valets were free men and they were paid for their services, but, for reasons of security, they were not allowed to leave the prison. Thus, they were no better off than the men they served.

Foucquet, Lauzun and Dauger were all allowed to attend Mass, though they were kept apart and not allowed to talk with one another. Dauger seemed resigned to his fate and did his time stoically, but Foucquet and Lauzun were constant sources of aggravation for Saint-Mars.

Foucquet had many friends in France who thought he had been made a scapegoat for mistakes made by Cardinal Mazarin and, in 1669, after four years of imprisonment, Foucquet's former valet, a man named La Foret, and another man named Honneste formulated a plan to break Foucquet out of prison. The ever-vigilant Saint-Mars "was alerted to what was happening and the plot was thwarted," according to Wilkinson.

Honneste was found guilty of attempting to smuggle a letter from Foucquet to his wife and sentenced to five years as a galley slave. La Foret was hung on a scaffold outside Foucquet's window, along with several soldiers at Pignerol who had been bribed to act as accomplices. Foucquet would eventually die in prison.

While Foucquet's friends tried and failed to break him out of prison, Lauzun sought to escape, and dug a series of tunnels. One of those tunnels took him into Foucquet's cell.

Wilkinson recounts the scene: "It can only be imagined with what shock and surprise the former superintendent received the little man who suddenly and unexpectedly appeared in his chamber one dark night with soot all over his clothes and hair and staining the broad beam on his face."

EUSTACHE DAUGER
Man in the velvet mask?

NICHOLAS FOUCQUET
Accused of negligence.

ANTONIN DE CAUMONT
Thorn in his jailer's side.

Another time Lauzun tunneled his way into the prison courtyard but was spotted by a serving woman. Lauzun offered her money to help him escape but, instead, she alerted the guards. Lauzun was taken back to his cell and security at the prison was increased.

REALLY AN IRON MASK?

Perhaps the most surprising thing to find out about Dauger is that he may not have had to wear an iron mask at all. No effort was made to conceal his face or identity when he was first arrested and taken to Pignerol, and no mention is made of any type of mask in the many letters about Dauger that were exchanged between Saint-Mars and Francois-Michel Le Tellier, marquis de Louvois, the minister of war, and the man who oversaw every detail of the prisoners at Pignerol on behalf of the French king.

Later, when Dauger was moved from Pignerol to a new prison, Saint-Mars was instructed by Louvois to hide Dauger's identity and that is likely when the rumors of an iron mask began. Saint-Mars had his men carry Dauger on a makeshift carriage covered with a cloth when transferring him from one prison to another. Of course, that only aroused the curiosity of every citizen they passed, who wanted to know who the mysterious prisoner was.

Saint-Mars added to the mystery by concocting some of the wildest rumors about Dauger himself and, before long, the more imaginative citizens of France were writing letters about the mysterious prisoner with "two musketeers ready to kill him if he took off his mask."

Facts are weaker than fiction and that appears to be the case with Eustache Dauger. Even before his death, he was in the process of becoming "the Man in the Iron Mask."

Dauger's last prison was the infamous Bastille, where he died quietly in 1703. Etienne Du Junca, an administrator at the Bastille, recorded the death in his ledger and described Dauger as "the prisoner—unknown, always masked with a mask of black velvet." So, Eustache may have worn a velvet mask at the Bastille, his last prison, but he almost certainly never wore the horrible iron mask that we've all seen portrayed in various fictional movies.

As for why Dauger was arrested in the first place, the author's well-researched opinion is that, while working as a valet, he either heard or witnessed something he shouldn't have, or betrayed the trust of someone important.

If you're a history buff or someone who likes reading about the various court intrigues of 17th-century France, you'll love *The Man in the Iron Mask* by Josephine Wilkinson. It's a fascinating historical portrayal of France in the time of Louis XIV. ❖

Mike Mains is an independent researcher and author of a number of books, including *The Impostor Sister Lucy: The True Story of Our Lady of Fatima*, a detailed examination of how and why the Vatican replaced the real Sister Lucy of Fatima with an impostor, and *How to Go to Heaven: Your Foolproof Step-By-Step Plan to Achieve Eternal Salvation*. He focuses primarily on the hidden and suppressed history of America and the Catholic Church and the sinister forces controlling Hollywood.

Books Expose Historical Conspiracies

The American Regime: By an Anonymous January 6 Prisoner

After being targeted and locked up by the federal government in the wake of the events of Jan. 6, 2021, the author of *The American Regime* delves into the study of history, philosophy and politics to answer the singular question of our time: "What is the nature of the evil that now openly rules America and, through the American Empire, the broader world?" The great irony of our time is that, while more Americans than ever understand that they live under an oppressive regime, the number of theories about the nature of that oppression, and who is really calling the shots, has only multiplied. The author confronts the prominent theories of political power, searching for one coherent understanding of this oppressive Leviathan. We must identify that what passes for truth is often little more than blinding government propaganda. Softcover, 290 pages, #991, **$25**.

The Trigger: The Lie That Changed the World Who Really Did 9/11 and Why?

Controversial British researcher David Icke takes a look back at the event that shook the world in 2001, the Sept. 11 attacks in New York and Washington, D.C. He looks at who was really behind it and why, what has happened in the years following 9/11, the increasing evidence to show the official story doesn't stand up to research and what has happened in the world since. Icke places Israel and the Mossad at the center of the event. In his own words, the official explanation of the attacks is a lie to cover up the "massive and central involvement in the Sept. 11 attacks by Israeli government, military and intelligence operatives." Softcover, 898 pages, #898, **$30**.

Crimes Discreetly Veiled: Seven Lies of the WWII Era Exposed

By F.J.P. Veale. Foreword by Lord Hankey. This new edition of the classic work deals with seven of the most appalling lies created by the Allies during and after World War II. The first lie is that of the image of "Uncle Joe" Stalin—who was transformed from an "evil Communist dictator" into "a fighter for freedom." The second lie deals with the massacre at Katyn—where the Communist secret police murdered over 21,000 Poles. The third deals with Mussolini's "execution." This was a blatant murder carried out to cover up a massive gold theft. The fourth deals with Dr. Marcel Petiot and his wartime killing spree. The fifth deals with the "Marzabotto Massacre." The sixth with the persecution of Gen. Ramcke and the seventh with Adm. Raeder and his imprisonment for "waging aggressive war." Softcover, 304 pages, #965, **$27.50**.

Royal Blood Lies

Susan Bradford takes the reader back to the days of ancient Rome to reveal the origins of the "divine right (rite) to rule," and why those who held claim to this right posed a threat to the world's would-be rulers. The author documents how the elites established and used international spy networks to win wars and conquer nations and how populist revolutions, religion, and wars were weaponized against the people. Steeped in the philosophy of the Enlightenment, a warrior-merchant class came to dominate the corporate and political establishment, with some amassing trillion-dollar fortunes. With the secrets of rulers encoded in the works of Shakespeare, *Royal Blood Lies* documents the origins and practices of a secret cult that came to rule humanity and became a powerful force for global imperialism that paved the way for the Great Reset. Softcover, 136 pages, #899, **$25**.

The Politics of Heroin: CIA Complicity in the Global Drug Trade

Here is the first book to prove CIA and U.S. government complicity in global drug trafficking. Alfred W. McCoy includes meticulous documentation of dishonesty and dirty dealings at the highest levels from the Cold War until today. Maintaining a global perspective, this groundbreaking study details the mechanics of drug trafficking in Asia, Europe, the Middle East and South and Central America. New chapters in this revised edition detail U.S. involvement in the narcotics trade in Afghanistan and Pakistan before and after the fall of the Taliban, and how U.S. drug policy in Central America and Colombia has increased the global supply of illicit drugs. Note: The CIA tried to block publication of this book. Softcover, 754 pages, #905, **$33**.

Unmasked: The Coronavirus Story

Susan Bradford uncovers the political and financial networks of the Deep State forces that shaped the government's response to Covid-19 and the riots inspired by the death of George Floyd. This book reveals: how the Affordable Care Act financially devastated the healthcare industry and independent health insurance providers; what the collaboration between the Department of Defense and the Department of Health and Human Services means for the healthcare industry and citizens; the networks surrounding the extremely powerful lady whose multinationals are driving defense and healthcare policy around the world; striking parallels between the Chinese communist revolution and the riots; how community organizers undermine democracy; the fragility of the global system juxtaposed with the power of Big Pharma; and much more! Softcover, 118 pages, #875, **$20**.

The Suppressed History of The West: Immigration, Subversion and Colonization from Rome to America and Russia

By George Larson, Ph.D. *The Suppressed History of the West* delves in depth into those who have been pulling the strings of history since as far back as the Roman Empire and how mass immigration is one of the tools they use to control and destroy nations. Each chapter is based upon the well-researched works of dozens of familiar, respected authors and the books they have published that prove Larson's contentions. What is the Secret Society of Moses? What role do the Venetians play in history? What is the "Babylonian Connection"? Who created the Roman Catholic Church? How, really, did Europe sink into a Dark Age? What is the purpose of modern art? Was there a Khazar invasion of the West? What about the "elite" presidencies of Roosevelt I, Roosevelt II and Wilson? What was Solzhenitsyn warning us about? Much more. Softcover, 384 pages, #952, **$29**.

The Talmud Unmasked: Secret Rabbinical Teachings Concerning Christians

Written by Iustinus Bonaventura Pranaitis, a Lithuanian Catholic priest and professor of the Hebrew language at the Imperial Ecclesiastical Academy of the Roman Catholic Church in St. Petersburg, this startling book contains a full list of the slurs, vilifications, insults and abuse contained in the Talmud that are directed specifically against Christians. First published in 1882, this book caused a stir in Russia and beyond, and every effort was made to suppress it and smear its author. A marked man, he was targeted by the Bolsheviks and executed in St. Petersburg—his only crime having been authoring this book. Fr. Pranaitis was one of the few men of his time able to read the original Hebrew manuscripts and thus able to provide the non-Jewish world with its first comprehensive glimpse into what Jews are really taught about non-Jews. A reading of *The Talmud Unmasked* shows the reason for this: The quotes from the Talmud reveal a shocking and deep-seated hatred of Christians—and all "goyim," for that matter—using terms and ideas that the reader will find deeply insulting and disturbing. Softcover, 98 pages, #980, **$13**.

The Nameless War

By Archibald Maule Ramsay. A dramatic historical work that exposes the behind-the-scenes Jewish lobby in Britain which forced that country into war in 1939 against Nazi Germany, written by a leading member of Parliament for the British Conservative Party and confidant of then-Prime Minister Neville Chamberlain. The author—imprisoned without trial by the Churchill government for opposing the war—starts with an overview of the Jewish lobby's involvement in revolutionary activity in Britain, France and Germany, and then moves on to discuss the Jewish declaration of war against Germany in 1933. Ramsay also reveals many details about how the build-up to the war was engineered, the Churchill government's use of the mass bombings of civilians as a means of spreading terror, and of the backdoor machinations to bring the U.S.A. into the war. Ramsay then discusses his own detention under the infamous "Regulation 18B." There has long been an unofficial ban on books dealing with what Ramsay called "the Nameless War," the conflict which has been waged from behind the scenes for centuries, which is still being waged and of which very few are aware. This book is the result of the personal experiences of this public figure who, in the course of duty, discovered firsthand the existence of a centuries old conspiracy against the whole of Christendom. *The Nameless War* reveals a link between the major revolutions in Europe—from King Charles I to the attempt against Spain in 1936. One factor is common in all of them. Softcover, 196 pages, #972, **$20**.

Secret History of the Wild, Wild West: Outlaws, Secret Societies & the Hidden Agenda of the Elites

Drawing on family diaries, author Daniel J. Duke—the great-great-grandson of Jesse James—unravels the hidden history of the Wild West to expose the outlaws, politicians and secret societies that were pulling strings behind the scenes. He examines Jesse's close ties with outlaws like Johnny Ringo, Jesse Evans and Billy the Kid. He demonstrates how Jesse faked his own death and lived out his life under an alias, and how Billy the Kid did the same. He also details how both Jesse and Billy continued their work for a secret organization after their faked deaths. Also explores how Jesse was related, by blood or marriage, to powerful people in the Baylor family, Copperheads, Knights of the Golden Circle, Lyndon Johnson, Harry Truman and Billie Sol Estes. Exposing the secret agenda behind the outlaw gangs of the Wild West, Duke also reveals the secret war between the clandestine organization and its opposition that has been waged in the shadows for centuries. Softcover, 208 pages, #944, **$17**.

Lyin' Lyndon

A retrospective on Lyndon Johnson: He was a scoundrel, a liar and a cheat, but was he in on JFK's assassination?

HERE'S AN UNCENSORED LOOK at Lyndon Baines Johnson, a deceitful, corrupt career politician who had a hand in some of the most scandalous and treacherous acts in modern U.S. history. Covering up the attack on the USS *Liberty* to his role in the assassination of JFK, LBJ will go down in history as one of the greatest villains to occupy the White House.

By Pat Shannan

LBJ, architect of "the Great Society," and his wife Ladybird.

While the mainstream news media, deluded liberals, radical leftists and America-lasters want to label former President Donald Trump as the "most unpresidential president ever," the truth is that those who believe this don't have a historical clue about the most truly "unpresidential president" that this nation has ever seen sit in the Oval Office.

Just over a half century ago reigned the most base and power-hungry president this nation has ever seen in the White House. His name was Lyndon Baines Johnson (LBJ). He was a liar, a philanderer, a cheat, a power-mad schemer—and was possibly the mastermind behind multiple assassinations. Trump is a stainless choirboy in comparison, and anyone who says differently is not familiar with Johnson's true legacy.

JOHNSON'S FABRICATED PAST

Johnson had no problem fabricating details of his own life that would make P.T. Barnum blush. Born in 1908 on a ranch owned by his father and mother, Samuel Ealy Johnson Jr. and Rebekah Baines, the ranch had a dilapidated shack on the back property where his grandfather had been born, but it had been vacant for many years. After he became a politician, this shack is what LBJ had photographed and then publicly embraced as his "birthplace."[1]

His father was no tenant farmer. The truth is that the Johnson family and its ancestors were prominent ranchers and cattle speculators. Lyn-

don's daddy was a six-term state legislator, having been a Democratic member of the Texas House of Representatives representing the 89th district. According to his online biography, Samuel served in the 29th, 30th, 35th, 37th and 38th Texas Legislatures.

"Though Johnson was a pragmatist who throughout his life dismissed fiction because 'it isn't true,' he revealed a novelist's imagination in reporting his own early life," *Texas Monthly* writer Larry King argued in the January 1976 issue, revealing the dishonesty LBJ used to advance his political career and reputation. "One clue to a man's values is in noting what he claims to be that he is not."

Indeed, Lyndon so often exaggerated or improvised new identities for himself that it is not easy to decide where to begin reporting. Many of his false claims border on the ridiculous, such as being a war hero and a descendant of Alamo defenders, just to name a few.

The "war hero" fable was concocted in 1942, after young Congressman Johnson went along as an observer on a photo-and-recon flight in the Pacific theater during WWII and imagined being fired on by a Japanese fighter pilot. Somehow, he hornswoggled the U.S. pilot into going along with the cock-and-bull story about some sort of bravery, and LBJ got a Silver Star, presumably in the mail, when all he had done was take a ride in an airplane.

According to "History News Network," the website of Columbian College of Arts and Sciences:

> Johnson, you'll recall, was awarded the Silver Star for gallantry in the summer of 1942 by Douglas MacArthur. LBJ, then a member of Congress, had persuaded Franklin Delano Roosevelt to send him on an inspection tour of our forces in the Pacific. The trip had always seemed like a political stunt by a

The Johnson Treatment

Lyndon Johnson was strange. Whether pleased or angry, Johnson was known for "invading your personal space." Here he gets up close and personal with Abe Fortas, a Supreme Court justice Johnson was quite enamored with. This photo has become symbolic of what became known as "the Johnson Treatment," LBJ's bullying tactics described by American journalist Mary McGrory as "an incredible, potent mixture of persuasion, badgering, flattery, threats, reminders of past favors and future advantages."

The Precinct 13 Scam

When LBJ looked to have lost his 1948 Senate primary race to Coke Stevenson, mysterious ballots, many cast by dead people—in alphabetical order and in the same ink and handwriting—appeared in a ballot box in Precinct 13. Above, the picture of the notorious ballot box (actually a metal drum) in the hands of several precinct officials who look to have bypassed the usual chain-of-custody requirements. Below, LBJ poses for a photo in front of a helicopter while campaigning for the Senate.

politician who wanted to burnish his credentials in anticipation of future campaigns for higher office. Johnson, who had been the first congressman after Pearl Harbor to sign up for active military duty, had agreed to fly as an observer on a single bombing mission over Lae, New Guinea. But, before the plane could reach the target, a generator went out, forcing the pilot to turn back home to base.

This much is agreed on. Where accounts differ is on what happened next. Johnson always claimed the plane came under enemy fire. His Silver Star citation says, "As our planes neared the target area, they were intercepted by eight hostile fighters." A book published in 1964, *The Mission*, quotes two members of the crew who substantiated Johnson's story, adding that the future president was "cool as ice" under fire.

But critics always suspected LBJ had inflated the danger he faced. Now there's reason to believe they were right. The lone member of the crew still living, Bob Marshall, the gunner, insists the plane never came under fire that day.

"No way," Marshall told CNN. "No, that story was made up, put in there in my mind by the author of the book. We never seen [a] Zero, was never attacked. Nothing."

ELECTION THIEVERY

In 1948, Lyndon Johnson became forever notorious in Texas by stealing the Democratic primary for Senate, and thus the ensuing senatorial election, from former Texas Gov. Coke Stevenson. After Stevenson had won the primary by over 70,000 votes, it was still not a majority among all Democratic candidates, and a run-off or second primary was called against second-place Johnson. With nearly a million votes cast, Stevenson won that by the narrowest of margins (113 votes) in a run-off close enough for a recount.

Then, the Johnson crew amazingly "found" a sign-in sheet with 203 uncounted votes at Precinct 13, the infamous voting district in south Texas, of which 202 were for Johnson and but one vote for Stevenson. Even though the vote sheet showed the 203 voters' names listed in alphabetical order and written in the same handwriting (and, even more coincidentally, all in the same blue ink), Johnson prevailed. Some of the voters contacted later swore they hadn't even voted at all. Many of those who "voted" were dead.

Johnson won the run-off by a mere 87 votes. After this he was facetiously nicknamed "Landslide Lyndon."[2]

WARTIME MASS MURDERER

Johnson's greatest wartime deception was not the tale he crafted to get a Silver Star, but rather when he was president in August 1964. He, along with Secretary of Defense Robert McNamara, dreamed up the mythical attack by the North Vietnamese on the U.S. Navy destroyer *Maddox* in the Gulf of Tonkin. Allegedly, North Vietnamese torpedo boats launched an attack against the *Maddox*. The captain of the *Maddox* then claimed he returned fire. Several days later, on August 4, another incident allegedly occurred in which the U.S. Navy claimed ships of the North Vietnamese navy had menaced U.S. ships in the gulf.

The truth was—not admitted publicly until decades later—that the *Maddox* had fired three warning shots on August 2 at North Vietnamese torpedo boats that had been monitoring the U.S. destroyer's actions in the gulf. The U.S. Navy admitted as well that the incident of August 4 never happened. Evidently, a U.S. Navy radar operator misread his instruments, mistaking "radar ghosts" for North Vietnamese ships. Perhaps he had been ordered to misread the radar; nobody knows for sure. At any rate, the National Security Agency (NSA) knew what had happened. According to a once-classified report finally released in 2005:

> [A]t 1500G, Capt. [John] Herrick ordered Ogier's gun crews to open fire if the [North Vietnamese] boats approached within 10,000 yards (9,150 meters). At about 1505G,

A Quirk of Fate

LBJ IN WORLD WAR II: LBJ was the first member of Congress to enlist in the armed services after the attack on Pearl Harbor. He convinced FDR to send him to the Pacific theater as an observer. After losing his seat on a bomber to another observer, Johnson hitched a ride on one of the other planes. That was lucky. The plane he was scheduled to be on was shot down with the loss of the entire crew.

> *Maddox* fired three rounds to warn off the communist [North Vietnamese] boats. This initial action was never reported by the Johnson administration, which insisted that the Vietnamese boats fired first.

Johnson knew that the "Gulf of Tonkin incident," as it became known, never really happened the way the U.S. was pitching it, but it was a good enough false flag to con Congress into passing the Gulf of Tonkin Resolution. This resolution gave the president a free hand in attacking any Communist regime that he deemed, in his own limited judgment, was a threat to any of America's Southeast Asian allies. (Before he died in 2009, McNamara admitted his part in the deception.)

Johnson now had the authority to send U.S. troops into the jungles of Vietnam, and he used that mandate with vigor. Within a decade, more than 41,930 Americans had been killed in battle, 9,100 killed in wartime accidents, 1,200 declared dead, 380 had committed suicide, and almost 1,000 had died of illnesses contracted while in Vietnam. The total U.S. dead was thus more than 58,220.

In 1995, Vietnam released its estimates of war casualties. The nation estimates that more than 2 million total Vietnamese civilians from the north and south combined died, more than 1 million North Vietnamese and Viet Cong soldiers died, and approximately 225,000 South Vietnamese soldiers died during the conflict. These numbers do not even include the huge numbers of human beings from both sides of the conflict who were poisoned by Agent Orange and other toxic defoliants nor the number who were maimed and wounded during the contrived conflict.

THE USS *LIBERTY* ATTACK

In June of 1967, the same two war criminals, Johnson and McNamara, engineered the disgraceful and treasonous cover-up of the intentional attack by Israel on the USS *Liberty* in the Mediterranean Sea. The *Liberty* was not a war ship but a reconnaissance vessel recording the progress of the Six-Day War between Israel and Egypt. The attack resulted in 34 American sailors, Marines and NSA personnel dead and 171 officers and crew wounded.

The motive for the attack has been debated ever since, but the consensus of opinion is that Israel launched the attack with the intent of blaming it on Egypt in order to get the United States involved in the war on Israel's side. Had this happened, there is little doubt that the USSR would have intervened on behalf of the Egyptians, possibly igniting World War III. Following LBJ's explicit orders to hush things up, the Navy brass threatened the survivors of the *Liberty* with court martial "or worse" if they uttered a word of truth to anyone, including their own families. Thirty years passed before the story began to go public.[3]

Everything They Ever Told Me Was a Lie

Investigative journalist Pat Shannan has been in pursuit of the truth for nearly half a century. Intrigued by the deception and ongoing cover-up of the JFK assassination, he began to notice a similar pattern in the 1968 murders of Martin Luther King and Robert F. Kennedy. Then he found altered and intentionally fabricated FBI official reports regarding these and other cases and began to notice the cooperative news media ignoring blatant and pertinent facts as well. The films of Ronald Reagan exiting the Washington Hilton clearly show Secret Service Agent Tim McCarthy being shot by someone other than John Hinckley, Jr. Why did the wounded Reagan arrive at the hospital 15 minutes after Jim Brady, when his limo left the scene five minutes before Brady's ambulance? How could Arthur Bremer fire seven shots from a five-shot revolver? Why was Pat Tillman murdered in Afghanistan? He shows that government plots survive because of little or no investigation, and only through the aid of a cooperative news media can such ridiculous conspiracy theories as the 9/11 official story not only survive but thrive. Softcover, 280 pages, $25 plus $5 S&H inside the U.S. from AMERICAN FREE PRESS, 117 La Grange Avenue La Plata, MD 20646. Call 1-888-699-6397 toll free to charge, Mon.-Thu. 8-4. MULTIPLE MURDERS

Lyndon Johnson was a killer in the private sector as well—inevitably with the help of his private hitman, Malcolm "Mac" Wallace, one-time president of the student body at the University of Texas. Wallace, at Lyndon's direction, was the No. 1 suspect in at least a half-dozen murders in Texas. He even confessed to one but, with then-Sen. Johnson's intervention, Wallace spent no time in prison.

This was in 1951 when Wallace shot John Douglas Kinser, 33, multiple times at the shop counter of the Pitch & Putt golf course Kinser owned. Evidently, Kinser was having an affair with Wallace's wife and also with his former girlfriend, none other than Johnson's younger sister Josefa Johnson. It was a clear-cut case of premeditated murder, but Wallace, who coincidentally used LBJ's lawyer John Cofer, as his defense attorney, was the apparent beneficiary of LBJ's intercession. According to Spartacus Educational ("Spartacus"), "Wallace … was released on bail after Edward Clark arranged for two of Johnson's financial supporters, M.E. Ruby and Bill Carroll, to post bonds on behalf of the defendant."

But the plot gets thicker than a Texas oil gusher. Wallace was later found guilty of "murder with malice" but, miraculously, wiggled out of a prison stretch. He was granted a five-year suspended sentence by trial judge Charles O'Betts. Suspicious as it seems, there was never any evidence that O'Betts took a bribe, though it has been rumored for decades that LBJ picked up Cofer's legal tab, providing an obvious connection between Wallace and Johnson, according to *Blood, Money & Power: How LBJ Killed JFK* by Barr McClellan.

"Spartacus" additionally informs us that, "According to Bill Adler of *The Texas Observer*, several of the jurors telephoned John Kinser's parents to apologize for agreeing to a suspended sentence but said they did so only because threats had been made against their families."

It is also suspected that LBJ had Josefa murdered. Again, the No. 1 suspect was Mac Wallace, who had been her on-again, off-again lover. Josefa, an alcoholic who "knew too much and had a big mouth," according to Lyndon, died allegedly of a cerebral hemorrhage on Christmas Day 1961. Despite state law requiring it, no autopsy was conducted.

On August 9, 1984, "Twenty-three years [after Josefa's death], the lawyer Douglas Caddy wrote to Stephen S. Trott at the U.S. Department of Justice. In the letter Caddy claimed that Billie Sol Estes, Lyndon B. Johnson, Mac Wallace, and Cliff Carter had been involved in the murders of several people including Josefa Johnson and John Kinser," as reported by "Spartacus."

According to the letter, in which Estes volunteers to talk about Johnson's murderous past:

> Mr. Estes was a member of a four-member group, headed by Lyndon Johnson, which committed criminal acts in Texas in the 1960s. The other two, besides Mr. Estes and LBJ, were Cliff Carter and Mac Wallace. Mr. Estes is willing to disclose his knowledge concerning the following criminal offenses [including the murder of]: 1. Henry Marshall, 2. George Krutilek, 3. Ike Rogers and his secretary, 4. Harold Orr, 5. Coleman Wade, 6. Josefa Johnson, 7. John Kinser, and 8. President J.F. Kennedy.
>
> Mr. Estes is willing to testify that LBJ ordered these killings, and that he transmitted his orders through Cliff Carter to Mac Wallace, who executed the murders. In the cases of murders Nos. 1-7, Mr. Estes's knowledge of the precise details concerning the way the murders were executed stems from conversations he had shortly after each event with Cliff Carter and Mac Wallace.[4]

Estes attested to the same in front of a 1983 grand jury and repeated it yet again to this author during a very congenial face-to-face interview in Dallas in 2001. By that time, the former LBJ cohort and aging convicted felon

LBJ and JFK were in no way friends. Here Johnson is shown speaking with John F. Kennedy in the Oval Office. Even at that distance, Kennedy is leaning away from the aggressive Johnson. Kennedy chose Senate Majority Leader Johnson as his runningmate for the 1960 election because Johnson allegedly gave balance to the JFK ticket: Johnson was a Southern Protestant, Kennedy a Northeastern Catholic. Some believe Kennedy thought Johnson would turn down the offer and claim JFK sent his brother Robert F. Kennedy to talk Johnson out of accepting. But Johnson saw the vice presidency as a possible stepping stone to more power and, after JFK was assassinated, Johnson's gamble paid off.

appeared to be more forthcoming and unafraid of telling the truth.

MORE WITNESSES TO SILENCE

Early in 1952, Sam Smithwick, a former south Texas deputy sheriff who was serving life for murder, was found dead. The story was that Smithwick committed suicide in his cell, but it was more probable that he was murdered to keep him from speaking with former Texas Gov. Coke Stevenson, who had arranged to meet the prisoner on the day that the "suicide" took place.

Smithwick, an associate of Duval County boss George Parr, had been the deputy who produced the famous "Ballot Box 13" that swayed the 1948 Texas Democratic Senate primary to Johnson. Stevenson was traveling to meet Smithwick in an attempt to get to the truth of the matter. Some writers have deduced that this was the first contract killing engineered by Mac Wallace.[5]

Phillip Nelson, author of *LBJ: From Mastermind to "The Colossus,"* said, "The point that is generally overlooked—one which I've stated over and again, with limited success—is that in 1961-1963 (and beyond, until the end of his presidency in 1969), Lyndon B. Johnson was CEO and chairman of the board of the Deep State."[6]

THE COTTONFIELD MURDER

In 1960, when Henry Marshall was a senior officer with the Agricultural Adjustment Administration (AAA) in the Robertson County office, he began to investigate the suspicious activities of LBJ cohort Estes. He discovered that, over a two-year period, Estes had purchased 3,200 acres of cotton allotments from 116 different farmers. Suspecting fraud or something more nefarious, Marshall wrote to his superiors in Washington in August of 1960 that regulations should be strengthened to disallow allotment transfers.

Marshall would be dead less than a year later in what officials declared was a suicide, with author John Simkin providing the details:

> On June 3, 1961, Marshall was found dead on his farm beside his pickup truck. His rifle lay next to him.
>
> He had been shot five times with his own rifle. Soon after County Sheriff Howard Stegall arrived, he decreed that Marshall had committed suicide. No pictures were

After the assassination of John F. Kennedy, Lyndon Johnson took the oath of office of the president on Air Force One (above). He was adamant that the shell-shocked Jackie Kennedy be there at his side. In fact, he insisted she accompany him back to Washington just hours after her husband's assassination. The coat she wears above is stained with the blood of her husband. Asked if she wanted to change out of her bloodstained clothing, the former first lady refused, saying, "Let them see what they have done to him." Ironically, Johnson may have been one of the "they" who was involved in JFK's killing.

> taken of the crime scene, no blood samples were taken of the stains on the truck (the truck was washed and waxed the following day), no checks for fingerprints were made on the rifle or pickup.

Suicide by five rifle shots? How does one do that?

In 1982, the *Los Angeles Times* published an article titled "Federal Official Killed During Inquiry 21 Years Ago," which revealed what really happened:

> A judge has ruled that a federal official killed by five rifle shots 21 years ago when investigating Billie Sol Estes, who later was convicted of a massive swindle, did not commit suicide but was murdered. Estes told a grand jury last year that then-Vice President Lyndon B. Johnson had ordered the Agriculture Department official killed to prevent him from exposing Estes's fraudulent business dealings and his ties with Johnson. The official, Henry Marshall, was investigating Estes's cotton allotments at the time of his death.

Nolan Griffin, a gas station attendant in Robertson County, had been asked by a stranger for directions to Marshall's farm on the day of Marshall's death. An artist with the Texas Rangers drew a facial sketch of the stranger based on a description given by Griffin that looked remarkably like Mac Wallace.

JFK AND THE COVER-UP

Mac Wallace, LBJ's hitman, was also implicated in the JFK assassination. Years after the fact, a fingerprint on one of the boxes in the Texas School Book Depository's sixth-floor "sniper's nest" was finally examined by renowned expert Nathan Darby and determined to be—"without a doubt," as Darby said—a definite match to the previous arrest records of Wallace. Also, Wallace's picture was identified some 30 years later by one of the sixth-floor shooters, Loy Factor, as the man who had hired him for $10,000 to participate in the assassination.[7] If Wallace was passing around that kind of money, it likely would

have come from Johnson.

While "Lyin' Lyndon" was always suspected of being involved in the Texas street execution of Kennedy that put him in the White House, no solid evidence could ever be uncovered to prove it, even though the circumstantial evidence was overwhelming. However, to anyone paying attention, his participation with J. Edgar Hoover in the cover-up of the assassination and protection of those involved with the murder was never in doubt.

LBJ called Parkland Hospital from the White House on Sunday morning attempting to intimidate the doctors into getting a confession out of a mortally wounded Lee Harvey Oswald after he had been shot by Jack Ruby. The following week, he hand-picked the Warren Commission members, most of whom were insiders that could be identified as "Deep State" operatives in today's terminology.

LYNDON'S LOVE CHILD

Lyndon, both before and after his marriage to Lady Bird, was often careless in his yearnings for freelance romance. In 1948, he met Madeleine Duncan Brown, a 23-year-old divorcee with one child, and promptly gave her another. Steven Mark Brown, the illegitimate son of Lyndon Johnson, was born in 1950.

Johnson, as a powerful U.S. Senator, could ill afford such negative publicity and bought off Ms. Brown with a weekly package of $500 cash delivered by LBJ's lawyer every Friday. During one of our interviews, this author asked Madeleine, "Do you mean $500 a month (which was a healthy amount of lawful money in those days—plenty to take care of child support and her needs)?" She replied, "No, it was every week, and I knew it was hush money, but I loved Lyndon and only wanted him to acknowledge our son. He never would, even though I had his name listed as the father on Steven's birth certificate."

At age 37, Steven sued the Johnson estate for his quarter-share as Lyndon's child. A few months later, following much harassment and threats, Steven disappeared, and his case was conveniently dismissed for "failure to appear."

Madeleine then hired a private detective. The detective eventually found Steven where people go to be "suicided"—in the infamous Bethesda Naval Hospital. She took him back to Dallas where he remained bedridden for two more years before succumbing to cancer at the age of 39. Madeleine said to me, "Lyndon won again, even from the grave."

In a late-night interview at her home in 2001, Madeleine laughingly told me of the night she and nine-year-old Steven were at the Adolphus Hotel in the summer of 1960, during the heat of the presidential campaign. It was there that Rebekah, another sister of Lyndon, remarked, "My, my, that boy sure does look like my brother!" Rebekah's husband and someone else in the crowd agreed.

"It wasn't funny then," the 75-year-old Madeleine said, "and I decided we should make a hasty retreat for home."

Mac Wallace: LBJ's Personal Assassin?

It is believed LBJ had a hand in knocking off multiple people who threatened to expose his political and financial crimes. Inset left is a police artist's sketch of the man who witnesses said shot and killed John Douglas Kinser. Kinser was having an affair with LBJ's younger sister Josefa and also the wife of Mac Wallace, an acquaintance of Johnson. LBJ was worried Josefa had revealed some damning family secrets to Kinser and arranged for Wallace to kill him. Wallace was willing, as he already had his own grudge against Kinser. The LBJ crony was easily identified (photo above of Wallace entering the courtroom for his murder trial), but LBJ made sure Wallace served no time in jail. Wallace is believed to have been involved in even more murder-for-hire plots for LBJ. For instance, at least one expert has identified Wallace's fingerprint in the room in the Texas Book Depository where Oswald was alleged to have shot JFK, the inference being that Wallace was involved in the murder at the behest of Johnson.

According to those he pranked, Lyndon Johnson loved a good practical joke. One of his favorite tricks was to pretend that the brakes of his car had failed and that he had lost control of the car. Little did unwary passengers know, as the car plummeted into a lake, that Johnson had a amphibious car. Perhaps passengers should have known something was up when Johnson kept multiple life preservers in the back seat. Above, Johnson is shown driving his amphibious car.

UNCONTROLLABLE APPETITE

Homosexual activist Ray Hill of Houston used to work at the Kinsey Institute in the 1960s, and he read about LBJ's secret. Hill told authors Nelson and Caddy that LBJ's libido was insatiable.[8]

According to LBJ researcher Robert Morrow, Johnson was completely depraved. Morrow argued:

> Lyndon Johnson was also maximum-deranged when it came to his abusive sexuality. His intimate physical relations with his secretaries were *de facto* rapes. At one point in the summer of 1963, Lyndon got two secretaries pregnant—Yolanda Boozer and Mary Margaret Wiley Valenti, who Jack Valenti had "married" the year before as a cover for LBJ. His children Lyndon Boozer and Courtenay Lynda Valenti are alive today. Courtenay sits on the board of trustees of the LBJ Library.

CONCLUSION

Lyndon Baines Johnson was a defiant narcissist to the end. Historian Michael Beschloss reports:

> On Inauguration Day (January 20, 1969), Johnson saw Nixon sworn in, then got on the plane to fly back to Texas. When the front door of the plane closed, Johnson pulled out a cigarette—the first cigarette he had smoked since his heart attack in 1955. One of his daughters pulled it out of his mouth and said, "Daddy, what are you doing? You're going to kill yourself." He took it back and said, "I've now raised you girls. I've now been president. Now it's my time!" From that point on, he went into a very self-destructive spiral.

LBJ had three more heart attacks before dying four years later. He was, in the opinion of many of his biographers, one of the most unpresidential of presidents ever to sit in the Oval Office—and possibly the only one who can challenge Bill Clinton as the president with the most dead bodies around him. ❖

New from Dr. Thomas Dalton

The Poisonous Mushroom

NEW! Among the most controversial of Nazi publications was a book for children, published in 1938 under the title *Der Giftpilz*—or *The Poisonous Mushroom.* Ernst Hiemer put together 17 short morality stories intended to warn children of the dangers allegedly posed by Jews. Jews were depicted as conniving, thieving, treacherous liars who would do anything for personal gain. Though aimed at children aged 8 to 14, Hiemer's lessons were intended for all. Long out of circulation, and banned in Germany and elsewhere, this historic edition reproduces full-color artwork by German cartoonist Philipp Rupprecht ("Fips"). The book was repeatedly cited at the Nuremberg Trials as evidence of "Nazi cruelty," and was used by prosecutors to justify a death sentence for its publisher, Julius Streicher. For the sake of history, the public should have access to this notorious publication of the Third Reich. Edited by Thomas Dalton. Softcover, full color, 72 pages, #1000, **$17**.

The Riddle of the Jews' Success

NEW! Around 100 years ago, a prominent German critic of the Jews, Theodor Fritsch, began to closely observe Jewish business practices and methods, with the aim of truly understanding how this foreigner on German land could manage to acquire so much wealth so quickly. Himself a businessman, Fritsch had ample, first-hand experience dealing with Jews, and he came to develop a keen insight into their various manipulations, which, he believed, were the very things that led to their fabulous "success." Long out of print and shunned by mainstream scholars as anti-Semitic, this book, edited by Thomas Dalton, discusses a whole range of Jewish practices, all of which have echoed down to the present. It is truly astonishing how many current business tactics have their roots in the much simpler life of early 20th-century Germany. Most striking of all, we obtain here a firm grasp on exactly how coarsened, how degraded and how humiliating modern life has become, thanks to "modern" commerce. Much of modern society has been dragged through the mud, and continues to be so, as a direct consequence of these financial manipulations. In a straightforward and clear manner, Fritsch provides us with many lessons for the modern day. Softcover, 254 pages, #999, **$25**.

Unmasking Anne Frank: Her Famous Diary Exposed as a Literary Fraud

NEW! By Ikuo Suzuki. Edited by Thomas Dalton. As a 13-year-old Jewish girl living in wartime Amsterdam, Anne Frank hid out with seven other Jews for over two years. During this time, she kept a diary of her thoughts and feelings. Eventually the Franks were discovered and deported. Anne later died of typhus in Bergen-Belsen at 15, but her diary lives on. Millions of people know the story, but very few know of its many problems. Anne's tale is rife with absurdities, logical problems, inconsistencies, and incoherent claims. Here, Japanese researcher Ikuo Suzuki deconstructs the famous dairy. In the process, he unmasks the truth: that the notorious diary was likely written by a middle-aged Jewish man who worked in conjunction with Anne's father, Otto, to foist upon the public a deceptive story of a teenage girl who perished in a German camp. Here, for the first time, is a thorough, detailed and highly readable critique of *The Diary of Anne Frank.* Far and away the best critical analysis of the famous diary, this book fills a large gap in Revisionist literature. Softcover, 192 pages, #998, **$22**.

Protocols of the Elders of Zion: The Definitive Edition

NEW! Edited and translated by Tom Dalton. No study of the "Jewish Question" is complete without a detailed look at the document known as *The Protocols of the Elders of Zion.* As mysterious as it is notorious, it has been called the most influential piece of anti-Semitic literature. Here we find a desire for world domination, along with a plan to attain it. In the Protocols' world-to-come, there will be a Jewish king of the world, who will guide all humanity on behalf of Jewish interests. Serving at his behest will be the lowly Goyim. Written in the form of lecture notes or meeting minutes, this document purports to be a transcription of a talk by an unnamed influential Jew, speaking around 1900. It first appeared in writing in Russia in 1902, and then, in its final version, as part of a book by Sergei Nilus. But little beyond this is certain. It was denounced as a "forgery" in 1922—but is it? And what does that mean in this context? This new, English translation far surpasses anything on the subject. The volume includes commentary from Ford, Rosenberg, Evola and others. Softcover, 278 pages, #997, **$27**.

ORDERING: TBR subscribers may take 10% off retail prices. Prices do not include S&H. Inside the U.S. add $5 on orders up to $50. Add $10 on orders from $50.01 to $100. Add $15 on orders from $100.01 to $200. Add $20 from $200.01 to $300. Over $300 call 202-547-5586 for best rate to your location. To order, mail the handy form at the back of this issue to TBR, P.O. Box 550, White Plains, MD 20695. Call TBR toll freet at 1-877-773-9077 to charge, Mon.-Thu. 8-4 ET. Bonus Bucks awarded for orders over $100, $200, $300 and $400.

What Really Happened: Nov. 22, 1963

What we know now, but didn't know back then, about the Kennedy assassination

By Jim Fetzer, Ph.D.

We all know the official narrative of the assassination of President John F. Kennedy: Three shots fired from the 6th floor of the Dallas School Book Depository by Lee Harvey Oswald, a disgruntled ex-Marine, scoring two hits and one miss. What you don't know is that Lee was standing in the doorway of the building when the JFK motorcade passed by, which means he could not have been "the lone gunman" but likewise cannot have been one of the eight shooters we have identified in Dealey Plaza that day.

As it happens, I have engaged in collaborative research on JFK since 1992 and would like to share some of our discoveries. The case is so complex and interpretations so varied that, unless otherwise specified, this author alone is responsible for what is reported below, some of which is not widely known—even to experts on the assassination—including new and suppressed revelations about the "the magic bullet."

JAMES FETZER
Longtime truthseeker.

Take these as clues to understanding what really happened. What follows are some of the major highlights of what we know now that we didn't know then.

TWO HITS

Two hits from the front were widely reported on radio and TV that day.

On radio and television that afternoon and into the evening, two hits were widely reported, one a small, clean puncture wound to the throat, which was described (three times) by Malcolm Perry, M.D., as "a wound of entry." The second was a bullet that entered at the vicinity of the right temple and exited at the back of the head, blowing half of his brains out and—according to the mortician who prepared him for the funeral, Thomas Evan Robinson—killed him instantly. This report was attributed to Adm. George G. Burkley, the president's personal physician.

When you combine those shots with the "official account" of JFK having been hit in the back (a wound that was moved up by Gerald Ford to fit "the magic bullet" scenario) and in the back of the head (which was true), you get a total of four hits. The vast skepticism that greeted the publication of *The Warren Report* (1964)

At Parkland Hospital, where mortally wounded President John F. Kennedy was taken after the shooting, a Secret Service agent took a bucket and began cleaning up the blood and brain matter from the presidential limousine. When onlookers noticed a bullet hole in the windshield, which had penetrated the glass, the vehicle was removed. (Photo from Richard Trask's *Pictures of the Pain* (1994).)

probably derived from having watched those reports on radio and TV that day and realizing something did not add up. David Mantik, M.D., Ph.D., the leading expert on the medical evidence, now believes another fifth shot hit the right side of JFK's head.

BULLET FOUND AT PARKLAND

A whole bullet was found at Parkland and left on a stretcher at the hospital.

The bullet that hit JFK in the throat was fired from inside the Triple Underpass and passed through the windshield en route to its target. The mortician had to pack two small shrapnel wounds to the face with wax because they were leaking embalming fluid. David Mantik brilliantly inferred they were from tiny shards of glass that were unleashed when the bullet passed through the windshield. The Secret Service would later produce another windshield in an effort to obfuscate the facts.

A Secret Service agent was given a bucket of water and a sponge to clean up the brains and blood from the back seat, which was destruction of evidence. That man appears to have been Sam Kinney, the driver of the Secret Service Cadillac, who told his neighbor and friend he had found a whole bullet (which seems to have worked its way out of the shallow wound to the back) and taken it inside the hospital to leave on a stretcher. When it turned out one shot had missed, they invented "the magic bullet" theory and claimed that this was the round. But there was nothing "magic" about it.

ZAPRUDER FILM EDITED

The Zapruder film was edited to combine two hits as though they were one.

The most significant contribution by Josiah Thompson, Ph.D., in his book *Six Seconds in Dallas* (1967), which focused on the home movie attributed to Abraham Zapruder, is known as "the double-hit theory,"

whereby the hit to the back of the head (which was actually fired from the Dal-Tex Building) was combined with the shot to the right temple (actually fired from the intersection of the picket fence and the Triple Underpass) to create the impression of being one-and-the-same shot. It didn't work. Everyone who watches the extant version of the film believes that shot was fired from the front.

Thompson would subsequently deny that his book provides proof of conspiracy, which many of us have found very odd. But the "double-hit" theory was confirmed (independently) by no less an authority than Richard Feynman, the Nobel-winning physicist from CalTech, when David Lifton brought him frames from the film and he confirmed the forward motion between frames 312 and 313 and the backward motion thereafter, which he published in his masterpiece *Best Evidence* (1980).

I regard my efforts as sequels to Lifton's brilliant research on the body and the film.

Left, superimposition of Zapruder frames 312 (white outline) and 313 (black outline) shows a sharp forward movement (in 1/18th of a second) before the left, backward snap.

Right, when Zapruder frames 313 (black outline) and 316 (white outline) are superimposed, it is clear the president was forced left and backward under impact of the fatal shot.

MANIPULATED X-RAYS

They "patched" X-rays to conceal a fist-sized blowout at the back of JFK's head.

In late 1992, David Mantik (with the permission of the Kennedy family) entered the National Archives to study the autopsy materials. His specialty is radiation oncology, which is the treatment of cancer using X-ray therapy (and today proton therapy as well). Using a technique from physics (where he earned a Ph.D. in physics from the University of Wisconsin-Madison and his M.D. from the University of Michigan), he conducted hundreds of very precise measurements using optical densitometry and discovered areas that were too dense to be human bone, which he identified as "Area P" (for "patched").

While they had painted over the blow out in earlier frames (314-317, for example), I surmised that they might have overlooked that it was visible in later frames and, lo and behold, found it could be seen in frame 374 and others. In a full-color version of the photo one will see the bluish-grey area (brains are often called "grey matter"), where the pinkish extension is a crescent-shaped skull fracture still attached by skin to his head. The mortician had noted this extension, which appears to have been blown open by that third shot to the head that Mantik now believes occurred. [See his books on the JFK head wounds.—Ed.]

Researchers speculate that Area P on the X-Ray of JFK's skull was filled in to mask the massive gunshot hole in JFK's cranium. Area F is a large void that would normally be filled with grey matter.

OTHER FOOTAGE ALTERED

They used the Zapruder film to alter the other films, but they didn't always succeed.

There were eight different films that captured parts of the motorcade approaching and entering Dealey Plaza, the two most important of which are the Zapruder and the Nix, which was taken from the opposite side by Orville Nix. One of the key failures to fix the films—which appears to have been carried out at a secret CIA film laboratory known as "Hawkeye Works" adjacent to Kodak Headquarters in Rochester, New York, as David Lifton discovered—was the actions of Clint Hill, the Secret Service agent who was assigned to protect Jacqueline "Jackie" Kennedy, who rushed forward to assist her.

In the Zapruder film, Clint and Jackie never touch, even though Clint would report that he had pushed her back into the car and laid across their bodies, where he observed the bloody, fist-sized blow out at the back of JFK's head. In the Nix film, by contrast, he contacts Jackie as he has repeatedly claimed. Remarkably, Clint's observation of the blow out made it into a book, *The Kennedy Detail* (2011), about the Secret Service performance that day, even though it contradicts the claim that all the shots were fired from above and behind, which of course includes *The Warren Report* (1964) and similar depictions.

OSWALD IN DOORWAY

The most famous photo from Dealey Plaza caught Lee Harvey Oswald in the doorway.

An AP photographer, James "Ike" Altgens, took several photos of the motorcade that day, the most famous of which not only includes the bullet hole in the windshield but Oswald standing in the doorway to the Dallas School Book Depository. In the final pages of his second book exposing the cover up, *Whitewash II: The FBI-Secret Service Cover Up* (1966), author Harold Weisberg documents how the Warren Commission staff was frantic about concealing that Oswald had been captured in the doorway by Altgens.

Indeed, when the House Select Committee on Assassinations reinvestigated the deaths of JFK and of MLK, they assigned Robert Groden the task of investigating "rumors" that Oswald had been in the doorway. Groden, like Thompson, has made many contributions to JFK research and published several important books about it.

But in this case, he falsely claimed that the man in the doorway was instead a co-worker named Billy Lovelady, which was exactly what the committee wanted to hear. It pains me to report his role in the cover-up, but we have proven that he was complicit.

PLOT TO FRAME OSWALD

Blaming Oswald may have been the most successful psyop in American history.

Subsequent research by Ralph Cinque and especially Larry Rivera has confirmed that the man in the doorway indeed was Lee Harvey Oswald. He was not only the same height and weight and build but was also wearing the same T-shirt and the same over-shirt (or at least ones that were strikingly similar). Richard Hooke published a series of studies showing the number of similarities between Oswald (when arrested) and the man in the doorway, which began with seven or eight but eventually ran up to 100 or more.

The fraud perpetrated by Groden was extraordinary, since Billy Lovelady had been called in by the FBI for an interview on February 29, 1964, and asked to wear the same clothing he was wearing at the time, which turned out to be blue jeans and a short-sleeved, red-and-white vertically striped shirt. We have the FBI report and photos of Lovelady taken by the FBI at the time. Rivera has subsequently confirmed that the facial features of the man in the doorway are also those of Oswald and not those of Lovelady. For detailed photographic analytic proof, see Rivera's book *The JFK Horsemen* (2018).

MASSIVE CONSPIRACY

This was a large-scale conspiracy where each of the sponsors put up its own assassin.

The simplest way to think about the JFK assassination requires us to separate the sponsors from the facilitators. The sponsors and facilitators must also be separated from the mechanics of the operation—the shooters on the ground and their supervisors, who we have discovered appear to have included George H.W. Bush and Edward Lansdale, who was responsible for Operation Phoenix in Vietnam. The sponsors wanted JFK out and LBJ in the White House (primarily for reasons of policy), and included the CIA, the Joint Chiefs, the anti-Castro Cubans, the mob, the Eastern Establishment (surrounding the Federal Reserve Bank), the Texas

oil men, and Israel. Each sponsor had their own shooter—plus LBJ's personal hitman.

The facilitators who made it all happen were Lyndon Baines Johnson (of the assassination) and J. Edgar Hoover (of the cover up). The plot began in Los Angeles in 1960 when JFK beat LBJ for the nomination. JFK invited Stuart Symington of Missouri to be his running mate but gave him overnight to think about it. Robert "Bobby" Kennedy went to the Johnson suite to extend a pro-forma invitation to run with his brother, never expecting he would have the least interest. Instead, he threatened to expose that JFK suffered from Addison's Disease and was not expected to live a long life. Also, LBJ threatened to make public JFK's various dalliances, including one with a beautiful woman who was a spy for East Germany.

Is that Oswald in the doorway of the Texas School Book Depository at the time of the assassination? The answer (emphatically) is "Yes!" Larry Rivera has undertaken sophisticated overlays of the facial features of Lee Oswald and of Billy Lovelady, whom the government claims to be the "Doorman," and they fit Lee to a "t" and falsify Billy. See his brilliant book *The JFK Horseman* for more details.

LBJ AT THE TOP

To put it most concisely, the JFK assassination was motivated by LBJ's 1964 campaign slogan, "All the Way with LBJ!"

JFK and Bobby Kennedy were dumbfounded, but LBJ had them boxed in. When one of Johnson's wealthy backers learned they were running together, he burst into the Johnson suite, cursing and swearing, since LBJ was going to help JFK become president. Bobby Baker took him into a bedroom and explained what they had in mind. He came out smiling, saying he thought that was an excellent plan. Baker would later declare in public that JFK would not live out his first term and that he would die a violent death.

BOBBY KENNEDY
Outmaneuvered by LBJ.

LBJ would eventually send his chief administrative assistant, Cliff Carter, to Dallas to make sure all of the arrangements for the assassination were in place.

Perhaps the first to put the "big picture" together regarding the assassination was Noel Twyman, author of *Bloody Treason* (1997), who recognized that the most perfect plan—with the highest probability of success—would bring together the CIA and military with the Secret Service, the mafia, and the FBI, where LBJ was in the ideal position to make it happen. He and Hoover both hated the Kennedys and wanted to end what threatened to be a dynasty: JFK serving two terms, then Bobby serving two terms, and then Teddy two more. This was a grave concern among Texas conservatives, including H.L. Hunt, who even printed and distributed a handbill with mugshots of JFK labeled "Wanted for Treason."

NARROWING DOWN SUSPECTS

The fabrication of evidence to conceal the true causes of death narrows the range of suspects who could have successfully carried out the assassination and subsequent cover up.

The fabrication of evidence to conceal the true cause of JFK's death is revealing. The KGB, for example, could not have extended its reach into Bethesda Naval Hospital to alter X-rays under control of medical officers of the U.S. Navy and the Secret Service. Anti-Castro Cubans could not have substituted another brain for that of JFK, which was also done. Nor could the mafia have got ahold of the Zapruder film to edit it and do their

best to conceal what really happened. The only parties in the position to carry out these activities were the Secret Service and U.S. Navy medical officers.

Some have argued that the Zapruder film was impossible to edit because it was always in the hands of the Secret Service. But that begs the question by ignoring that the Secret Service was very much "in on it" and played a key role in the assassination. Indeed, I have enumerated 15 indications demonstrating Secret Service involvement in setting JFK up for the hit and then covering it up.

As we learned from Sir Arthur Conan Doyle, when you have eliminated the impossible, whatever remains, no matter how improbable, must be the truth. That worthy adage has perhaps never been exemplified so well as in solving the world's greatest murder mystery, which the government and mass media continue to conceal from the American public to this very day. ❖

Jim Fetzer, a former Marine Corps officer and retired professor of philosophy, has pioneered collaborative research to sort out the most complex and controversial events of our time. On JFK, see his (edited) books, *Assassination Science* (1998), *Murder in Dealey Plaza* (2000), *The Great Zapruder Film Hoax* (2003) and—more recently—*JFK: Who, How, and Why* (2017).

Wanted for Treason

The "Wanted For Treason" flyer distributed in Dallas before JFK's fateful visit. The flyer was paid for by Texas oil tycoon H.L. Hunt (top left) who was a fierce JFK critic and a strong supporter of LBJ. The poster accused Kennedy of treasonous activities, betraying the Constitution, turning the sovereignty of the U.S. over to the "Communist-controlled United Nations," betraying friendly nations while befriending Communist nations, being wrong about the Berlin wall, missile removal, various wheat deals, the nuclear test ban treaty and more. The poster also accused Kennedy of being lax in enforcing Communist registration laws and being too soft on "Communist-inspired racial" rioters. The poster also alleged JFK appointed too many "anti-Christians to federal office," illegally invaded a sovereign state with federal troops and repeatedly lied to the American people about an alleged secret marriage to and subsequent divorce from a young socialite named Durie Malcolm.

Lee & Harvey

Controversial Theory of the "Two Oswalds" Revisited

Why were two different men claiming to be "Lee Harvey Oswald"?

By Pat Shannan

After 60 years, as most TBR readers well know, the government, mass media, academia, and Deep State forces lurking behind the scenes continue to suppress the many hidden truths regarding the assassination of President John F. Kennedy. The two most effective establishment propagandists who have worked tirelessly to maintain the deceptions surrounding the murder of JFK are Gerald Posner and the late Vincent Bugliosi, who passed away in 2015.

This seems to be the regular pattern when it comes to any high-profile, highly disputed event that has major political ramifications for the country. Skeptics of officially promoted narratives about such events are derided as "conspiracy theorists." Indeed, the term "conspiracy theory" was unheard of until the CIA propagandizers brought it to the surface in the mid-1960s to combat Mark Lane, Jim Garrison and other private investigative reporters who were getting too close to the truth. Today it is a popular household term of diversion.

Despite the uncomfortable facts exposed by real investigative reporters in the countless books published over the years critically examining the official narrative of the assassination of JFK, the only ones that get any publicity and positive advertising are those obscuring and suppressing the truth while promoting the government's (now easily disproven) cover story and the "Warren Omission's" fraud on the American and world public.

Are these people CIA-hirelings following instructions? It often appears that way, but that certainly has not been proven conclusively.

One of these establishment propagandists is Joe Nick Patoski who wrote a controversial article for *Texas Monthly* in 1998 titled, "The Two Oswalds," which attempted to refute the theory that there were two separate individuals playing "Lee Harvey Oswald," the man blamed for killing Kennedy. Despite its title, Patoski's article did not endorse the idea of multiple Oswalds. Rather, he claimed the very notion of two lookalikes under FBI or CIA direction was another ridiculous conspiracy theory and "ludicrous on its face."

The attack on the subject was undoubtedly provoked by the emergence of one John Armstrong, who had not yet published his thousand-page, fact-filled epic *Harvey and Lee* but had acquired enough evidence and done enough research about the two different characters playing Oswald to be invited to speak at the annual conference organized by the JFK Lancer research community in 1997.

Every November, the JFK Lancer group holds a conference in Dallas to commemorate the assassination, bringing together some of the top researchers to present their findings regarding the murder of JFK. Patoski's piece in *Texas Monthly* was published just in time to be read by attendees prior to their arrival at the conference organized in 1998, after it had been announced that Armstrong would once again be a featured speaker.

PATOSKI DOUBLES DOWN

Having quoted Patoski's scoffs from the *Texas Monthly* article in my book 10 years ago, this writer was reminded of the hit piece once again when a colleague recently sent the article to me 25 years after it was published. I immediately emailed Patoski asking if he still felt the same way all

THE TWO OSWALDS: At left is Lee "Harvey" Oswald, the man arrested for the killing of JFK and who was murdered allegedly by Jack "Ruby" Rubenstein, a mafia-connected nightclub owner. At right is "Lee" Harvey Oswald, who many researchers believe served as a double of the patsy set up for the assassination of JFK.

these years later. Could the existence of any new evidence have managed to change his opinion?

He wrote back a friendly greeting that included, "The story speaks for itself. Nothing has transpired since then to make me reconsider what I wrote."

For the uninitiated reader unfamiliar with the facts in evidence proving the existence of two young men going by the name of Lee Harvey Oswald for 10 or more years prior to the assassination of President John F. Kennedy, "Harvey" was the one arrested and later murdered.

It appears Patoski has been paying little attention to the facts for the past quarter century. Incredibly, his own 1998 article has actually done more to strengthen Armstrong's case rather than to decimate it by the publishing of the evidentiary testimony of some of the key witnesses in his own article. First, he wrote, "The existence of two Oswalds would be simple enough to prove. All that would be necessary is valid physical evidence showing Oswald at place A and valid physical evidence showing a second Oswald at place B at the same time."

Then, Patoski effectively did exactly that himself in his own article.

Patoski wrote that Frances Irene Hise claimed "she met 'Ozzie' Oswald in the company of her friend Jack Ruby several times at the Carousel Club in Dallas in the summer and fall of 1963." Hise was not the only person to corroborate the same, which included some of the dancers and waiters who worked for Ruby. Therefore, this person had to have been "Lee" because "Harvey" and his family spent the summer of 1963 in New Orleans, only returning to Dallas in September. Robert Oswald also described the lengthy amount of time he spent with his brother "Lee" in Dallas during the summer of 1963.

Patoski also wrote that Mary Lawrence, the head waitress at Lucas B&B Café in Oak Lawn, a neighborhood in Dallas, said she saw Ruby and Oswald together at the restaurant the night *after* the assassination. However, we know that Patoski misquoted the waitress because she reported that it was at 2:00 a.m. on November 22, 1963, in the early morning hours before the noontime assassination of Kennedy took place. Again, she had to have encountered "Lee," because that night "Harvey" was asleep with Marina at Ruth Paine's house in Irving, Texas.

Furthermore, Patoski reported that Dub Stark, the owner of the Top Ten record shop in Oak Cliff, another Dallas neighborhood, said that Oswald and Officer J.D. Tippit were both in his store on the morning of the assassination. This "Oswald" had to have been "Lee" once again, as "Harvey" was working at the Texas School Book Depository until the assassination took place at half past noon.

These examples are mere tidbits stacked on the mountain of evidence Armstrong collected and are cited here because even Patoski, in his failed attack, included them himself in his magazine article.

STRONG EVIDENCE

In 2013, a full decade after Armstrong published *Harvey and Lee*, I was flabbergasted that so many powerful pieces of proof could continue to be ignored by not only the understandably controlled mainstream press but even allegedly honest truth-seeking investigative journalists and reporters.

My defense of the truth and Armstrong evolved into the 158-page book *The JFK Assassination and the Story of the Two Oswalds*, kind of a *Reader's Digest* version of *Harvey and Lee*. Rather than inspired, it could be said that my book was provoked by what was mentioned above. The truth was being suppressed even by those who knew better—or

Best Kept Secret of the JFK Assassination? Shown is the famed picture of Jack Ruby gunning down Lee Harvey Oswald as stunned cops look on. But here's the kicker: Longtime JFK truthseeker Dr. Ralph Cinque of Houston, Texas says that is not Ruby doing the shooting and shows very convincing pictorial proof on his website.* According to Cinque, at the time of the shooting, the FBI had already kidnapped, drugged and confined Ruby upstairs while a much shorter, rounder-faced FBI agent with a far different rear hairline is the man in the dark suit and hat waving the pistol. The special agent's name was James Bookhout. "Jack Ruby was innocent," says Cinque. "It is the best kept secret of the JFK assassination."

*See https://oswaldinthedoorway.blogspot.com/ and also www.oswald-innocent.com.

most certainly should have.

Some of the more emphatic and convincing evidence proving Armstrong's case is found in the above publication, which is still available from TBR. [See ad page 41.—Ed.]

The most powerful evidence is summarized below.

"OSWALD" ON CIA'S RADAR

In June of 1960, nearly three-and-a-half years prior to the JFK assassination, FBI Director J. Edgar Hoover announced, via an in-house letter to all his special agents, that someone was using Lee Harvey Oswald's ID. At that early date, how could he even have known of "Oswald" and why did he care? Oswald would not be identified to the world until November 22, 1963, and was supposedly known only to the CIA as a turncoat and defector to the USSR in 1959.

Skeptics characterize it as an absurdity that two lookalikes would have been brought together as young teenagers to assassinate a sitting president a decade later and, of course, it is, but that is not why the coalition was formed.

The late Jim Marrs, who authored the bestselling book titled *Crossfire* in 1989 and knew more about the JFK assassination cover-up than anyone, opined to me personally that, when federal intelligence agents uncovered an orphaned immigrant who spoke the Russian language fluently, it was deemed to be a gold mine for future use in the Cold War. A short time later, when the lad's near-twin brother was discovered in a separate school in New York City, the idea was born to rename the foreign lad "Lee Harvey Oswald," hook him up to be raised by a stepmother and have him go by the name of Harvey Oswald.

John Armstrong uncovered more evidence of that with his video interview of Dr. Milton Kurian, who was President of the American Psychiatric Association in the 1950s. Dr. Kurian interviewed Harvey Oswald in 1953 in New York City. He remembered that this Oswald was very short, slight, and soft-spoken. Armstrong showed him the "Bronx Zoo" photo of a small Harvey Oswald taken in the fall of 1952, which he identified as the boy that he had interviewed. This is the same photo that, when shown by the Warren Commission to Lee Oswald's half-brother John Pic, he said, "I do not recognize that as my brother."

This photo, when compared to Lee Oswald's 6th grade classroom photo from Fort Worth, shows the distinct difference between these two 12-year-old boys.

In fall of 1952, Harvey was in junior high at New York City Public School 117 in the Bronx, where he missed school 47 times in the first 64 days. Not a good student (probably due to his lack of comprehending the English language at that young age), he eventually dropped out of school when his new mother took him to Stanley, North Dakota for reasons unknown.

During the same period, according

to both his brother Robert and half-brother John in separate testimonies, Lee was in Public School 44 in Manhattan. According to Armstrong's research, the FBI resolved the problem of Harvey in the Bronx and Lee in Manhattan by merging the school records, which was easy to do because both boys attended Public School 44, with one in Manhattan and one in the Bronx. The FBI obtained Oswald's school records from both Public School 44 schools and then merged them into a single school record.

PHYSICAL DIFFERENCES

The size of the two Oswalds was always a problem even after they were fully grown when they reached their 20s. Harvey was always smaller than Lee, as indicated by a photo of him standing next to Marina in Minsk around 1961 and being only slightly taller than she. Military records showed that Lee was about three inches taller than Harvey as an adult.

In 1954, both boys ended up at Beauregard Junior High School in New Orleans and, in 1997, Armstrong produced a blockbuster video interview with Harvey's home room teacher Myra DaRouse Larue, who remembered him well, having taken the lonely boy under her wing of concern. She also remembered him being unusually small for his age.

Based on her own height of 5'4", Larue estimated Harvey's height at 5'6" to 5'8" (same height estimated by Dr. Kurian). Lee Oswald's height was measured and recorded in the NYC Public School System health records during the 1953-54 school year and published in the Warren Volumes. Beauregard Junior High School records show Lee's height while in the 9th grade at 5'5" and his weight at 135 lbs. We now know that Lee Oswald was 5'4" tall in 1953 and 5'5" tall in 1954—about 8 inches taller than the much shorter and thinner, Harvey Oswald.

Mrs. Larue also remembered Harvey as being "Harvey," the name he

MULTIPLE OSWALDS

Investigator Jack White—a brilliant photo examiner and perhaps one of the men most responsible for educating the public about the many anomalies in the Kennedy assassination via photographic evidence—assembled 77 photos of Oswald in a poster (the 25 photos shown above are just a partial selection). He, like John Armstrong, believed these photos showed at least two different Oswalds, although some of the photos are, he believed, composites with elements of both men. Due to confusion over the conflicting images of Oswald, White created a color poster using the best facial images of Oswald to conclusively demonstrate to the public that two separate individuals used the name Lee Harvey Oswald. "You can prove to yourself, by comparing these pictures, that Oswald loaned his identity to an intelligent agent," White once stated. That conclusion is "inescapable when you see that there are two or more Oswalds." White also investigated other key characters and imagery associated with the assassination, including the iconic Zapruder film and the infamous "Umbrella Man."

Officer J.D. Tippet

The Tippit Murder

Officer J.D. Tippit, 39, was shot four times outside of his car at 10th and Patton in Oak Cliff. Police conveniently found a wallet containing the ID cards of both Lee Harvey Oswald and Alek Hidell. Also found on the street were four ejected .38 caliber shell casings. When Harvey was arrested in the Texas Theater some 40 minutes later, he was carrying a .38 revolver which, of course, does not eject its shells and still held six unfired .38 cartridges. Harvey, astonishing to detectives, had a wallet carrying the same two ID cards as were just found on the street.

> "If Oswald's dual identity was discovered, it would link multiple intelligence agencies directly to the assassination.

preferred after she asked his name that first day of school. He first had replied with his full name, "Lee Harvey Oswald," she said. His new teacher then asked him which name he went by, and he emphatically replied, "Harvey," and that was what she always called him. However, Robert Oswald's younger brother never used "Harvey" and always went by "Lee."

FBI INVOLVEMENT

Speaking of FBI interest in school records and cover-ups after the assassination, none was more blatant than the visit paid on Saturday, November 23, 1963 to the home of Frank Kudlaty, vice principal at Stripling Junior High in Fort Worth who handed over the school records of one of the Oswalds to federal agents. Kudlaty recalled those events to Armstrong (and later Patoski) and remembered briefly examining the records before handing them over.

"I do recall the grades were not good," he said, and that has bothered him ever since. "A person of that mind could teach himself Russian and pass himself as Russian? I don't think so," Kudlaty said.

This was the initial problem that sparked this writer's suspicion way back in 1966 after reading that Lee had quit high school in New Orleans at 17 and joined the Marines. Yet, after immigrating to the USSR and meeting his future wife Marina, Harvey spoke the language so well that she believed him to be a native.

It is a matter of unknown fact that Professor Vladimar Petrovski, head of the Slavic Language Department at Yale, read a letter written by Harvey to Texas Sen. John Tower. Professor Petrovski said that the person who wrote this letter was not a native-speaking English person but more likely one with Russian as a first language.

According to the Warren Commission, Lee Harvey Oswald attended junior high schools in New York and New Orleans but not in Fort Worth. The FBI "deep-sixed" those captured records from Stripling Junior High and always denied their existence.

CO-WORKER PROVES THEORY

One of the more entertaining episodes of the case proving the longtime existence of both Harvey and Lee is the exchange of letters between expert JFK researcher and author David Lifton and one Palmer McBride, who had published with Armstrong that he had not only been best high school friends with Harvey Oswald but worked with him in 1957 and 1958 at the New Orleans Pfisterer Dental Lab.

In 1998, Lifton published an open letter accusing McBride of deception or, as he noted, of "at least erring by a year," because the Marine records plainly showed that Lee Harvey Oswald had joined the Marines in 1956 and was already in Japan at the time that McBride recalled. Well, of course he was. That was Lee, and David Lifton most unwittingly helped further cement the certainty of the existence of the two Oswalds by sticking his foot in his mouth with what was a fair and most logical conclusion at the time—that is, if there really was only one Oswald.

McBride also remembered in detail that day on October 4, 1957 when the Russians launched their satellite Sputnik into space, thereby taking the lead in the space race. Harvey was very much a student of that mission, and he and McBride discussed the situation at length for several days.

We learned and chuckled at this scene and quickly made plans to get the information into our book appendix just prior to publication. Therein one can see the other details in a long letter McBride wrote back to Lifton

The Mystery of the Two Marguerites

At left is Lee's mother at age 50 in 1957; on the right is Harvey's "caretaker" mother at his November 25, 1963 Fort Worth funeral, the first time the public saw her. Friends of the real Marguerite, who last saw her in New Orleans only four years earlier, did not believe that the elderly woman on TV could be "the Margie we knew."

On the left is the real mother of John Pic, Robert Oswald, and Lee Harvey Oswald. She was born in 1907, making her 32 at the time she gave birth to Lee on October 18, 1939. On the right is Harvey's adoptive mother who was apparently assigned the new name of "Marguerite Oswald" when she took on Harvey. Born in 1892, she would have been 47 at the time of Lee's birth on October 18, 1939.

explaining their Sputnik experience and the impossibility of that experience if Oswald had been in Japan. He also enlightened Lifton with the names of several other people who were affiliated with Harvey at both school and work. Lifton never responded again.

It seems that Patoski did very little honest research before writing his November 1998 magazine article and none since, judging from his recent email comment to me.

Knowing what we know about numerous past cases of FBI, CIA and DOJ clandestine behavior, particularly when we think about what has been exposed in recent years, we are always wondering who is being influenced or paid off by which members of these same intelligence agencies to hide the truth of historic crimes they themselves may have very well had a hand in perpetrating.

Thus the obvious question: "Why the massive effort to protect the myth of the singular Oswald?"

The answer is simple: If Oswald's dual identity was discovered, it would link the multiple intelligence agencies —those who created and concealed the dual identities—directly to the assassination. ❖

Pat Shannan is a seasoned investigative reporter who has worked at *Media Bypass* magazine and American Free Press newspaper. He is currently a member of TBR's Board of Contributing Editors. He is the author of multiple books including *Everything They Ever Told Me Was a Lie.* See more at www.ini-world-report.org.

The Uncensored Story of the Two Oswalds

Certainly the Warren Commission was aware that there were two men in Dallas who looked very much alike and called themselves "Lee Harvey Oswald." For instance, even as "Lee Harvey Oswald" was working at the Texas School Book Depository, he was somehow identified by multiple witnesses at the Dobbs House Restaurant, the Top Ten Record Store in Oak Cliff and the Jiffy Store on Industrial Boulevard. At 11:30 a.m. on November 22, 1963, one of the two Oswalds was seen being dropped off by a man identified as Jack Ruby in front of the "Grassy Knoll," 50 yards west of the Texas School Book Depository. Moments after Officer J.D. Tippit was shot dead, detectives conveniently found a wallet containing the ID cards of both "Lee Harvey Oswald" and Alek Hidell. When "Lee Harvey Oswald" was arrested in the Texas Theater 40 minutes later, mystifying detectives was the fact that this Oswald was carrying the same two ID cards. Amazingly, he was also positively identified as being seated with Jack Ruby after midnight, some 10 hours after he was jailed on November 22. Here is an examination of the entire shocking story of the "two Oswalds." Softcover, 172 pages, $20 plus $5 S&H inside the U.S. from TBR, P.O. Box 550, White Plains, MD 20695. Call toll free 1-877-773-9077 to charge, Mon.-Thu. 8-4 ET.

Suspicious Deaths

How many JFK assassination witnesses and investigators were murdered to prevent key facts about the crime from being released to the public?

By Donald Jeffries

It has become fashionable in the JFK assassination research community to accept claims that an inordinate number of those connected to the case died naturally, albeit suspiciously. These lists of suspicious deaths—an early "body count" if you will—formed the basis for four classic books by the late Warren Commission critic Penn Jones Jr.—the *Forgive My Grief* series. Here we will review some of the most high-profile and important witnesses of the JFK assassination who died mysteriously and under extremely suspicious circumstances.

DOROTHY KILGALLEN

Perhaps the most significant death related to the Kennedy assassination was that of high-profile columnist and television personality Dorothy Kilgallen. Ernest Hemingway called her "the greatest female writer in the world." Publisher William Randolph Hearst Jr. said she was "as good a reporter as ever came down the line." One of her many celebrity friends, actress Joan Crawford, claimed she was "one of the greatest women who ever lived."

JACK RUBY
Full story never really told.

Best known for being a long-time regular panelist on the popular TV game show *What's My Line?*, Kilgallen launched her own investigation into the death of John F. Kennedy, something almost no other mainstream journalist was willing to do. Kilgallen's investigation lasted a year and a half and included getting the only private interview with Jack "Ruby" Rubenstein, Lee Harvey Oswald's killer.

As early as November 29, 1963, Kilgallen wrote a newspaper column headlined, "Oswald File Must Not Close." In contrast, her peers, like then-local Dallas CBS reporter Dan Rather (who went on national televi-

The sudden, highly suspicious deaths of key witnesses and investigators of the assassination of JFK have long raised red flags among serious researchers.

sion right after seeing the home movie taken by Abraham Zapruder and lied about the impact from the fatal head shot) and NBC (who agreed in writing to only broadcast information consistent with the FBI report), were content to regurgitate official government statements.

In a February 1964 column, Kilgallen speculated about Lee Harvey Oswald's slew of intriguing connections, writing, "It appears that Washington knows or suspects something about Lee Harvey Oswald that it does not want … the rest of the world to know."

"Who is Oswald anyway?" Kilgallen genuinely asked, suspecting the American public was not getting the full story about this mysterious figure.

RUBY CONNECTION

Throughout 1964, the plucky Kilgallen devoted numerous columns to the controversial subject with a concentration on Jack Ruby. An FBI memo dated September 30, 1964 was an attempt to smear both Kilgallen and her husband Richard Kollmar. Kilgallen boldly responded to the agency in an October 4, 1964 column by saying, "From what I have read, I would be inclined to believe that the FBI might be more profitably employed in probing the facts of the case rather than how I got them—which does seem a waste of time to me."

She went on to state, "At any rate, the whole thing smells a bit fishy. It's a mite too simple that a chap kills the president of the United States, escapes from that bother, kills a policeman, eventually is apprehended in a movie theater under circumstances that defy every law of police procedure, and subsequently is murdered under extraordinary circumstances."

Kilgallen, in an exclusive story, published excerpts from Jack Ruby's mind-boggling Warren Commission testimony in August 1964, after one of her many inside sources (said to be from the commission itself) leaked it to her. Insisting to the commission that his life was in danger, Ruby had literally begged to be taken out of Dallas and transported to Washington, D.C., where he could tell them the whole truth.

The response on the part of Chief Justice Earl Warren, future President Gerald Ford and the other members of the commission in attendance must be read to be fully appreciated. Warren clearly refused to have one of the most important witnesses imaginable moved to a location where he would feel safe, even though he freely admitted that he had the power to do so. Incomprehensibly, after counseling Ruby to be careful about what he said, at one point Warren told Ruby that the only reason they called him to testify was because his sister asked them to. Ruby even prodded Warren and the others to push him further, because they could "get more out of" him.

Kilgallen wrote about Ruby's testimony:

> He opened the floodgates of his mind and unloosed a stream of consciousness that would have dazzled a James Joyce buff and enraptured a psychiatrist. There was a great

Prominent Reporter Dies

On November 8, 1965, prominent investigative reporter Dorothy Kilgallen was found dead in a Manhattan townhouse. Her death was officially determined to have been caused by a fatal combination of alcohol and barbiturates, consumed either by accident or suicide. In the months leading up to her demise, she conducted several interviews with Jack Ruby, who told her he had personally known Lee Harvey Oswald, and detailed a government conspiracy to kill John Fitzgerald Kennedy. Kilgallen was writing a book about her findings, but the manuscript disappeared from her bedroom, together with all files, before her body could be removed by police. The death scene itself had been transparently staged. Just days before, she confided to several friends that her life was being threatened, stemming from her research into the president's assassination.

Crimes & Cover-Ups in American Politics 1776-1963

Foreword by Dr. Ron Paul. For far too long, American history has been left in the unreliable hands of those who author Donald Jeffries refers to as the court historians. *Crimes and Cover-ups in American Politics 1776-1963* fights back by scrutinizing the accepted history of everything from the American War of Independence to the establishment defamation of Thomas Jefferson and the other Founding Fathers, the Civil War, the Lincoln assassination, both World Wars, U.S. government experimentation on prisoners, mental patients, innocent children and whole populated areas, the Lindbergh baby kidnapping and much, much more. Secular saints like Abraham Lincoln, Theodore Roosevelt, and Franklin D. Roosevelt are examined in a critical way they seldom have been. Jeffries spares no one and nothing in this explosive new book. The atrocities of Union troops during the Civil War, and Allied troops during World War II, are documented in great detail. The Nuremberg Trials are presented as the antithesis of justice. In the follow-up to his previous, bestselling book *Hidden History*, Jeffries demonstrates that crimes, corruption, and conspiracies didn't start with the assassination of President John F. Kennedy. Hardback, 406 pages, **$25**. Order these books from American Free Press, 117 La Grange Avenue, La Plata, MD 20646. Call 1-888-699-6397 toll free to charge, Mon.-Thu. 8-4 ET. Also visit www.AmericanFreePress.net.

deal of fear inside Jack Ruby that Sunday in June [when he testified]. He feared for his own life, he feared for the lives of his brothers and sisters. It seemed to me after reading the testimony three times that the chief justice and the general counsel were acutely aware of the talk both here and in Europe that President Kennedy was the victim of a conspiracy. They took pains to prove to themselves and the world that no conspiracy existed.

Mark Lane, perhaps the most well-known critic of the Warren Commission report, and author of the best-selling book *Rush to Judgment*, whom this author considered a hero and mentor while volunteering for his group Citizens Committee of Inquiry as a teenager in the mid-1970s, was invited by Kilgallen to her Manhattan townhouse. As Lane recounted in his 1968 book *A Citizen's Dissent*:

> She was the one reporter of my acquaintance who told me that she did not believe that Oswald was the sole murderer and who said that she was going to persevere until she discovered who was involved [in assassinating President John F. Kennedy]. …
>
> Miss Kilgallen said that she was seriously committed to the case and that the government was seriously committed to preventing the truth from being known.

Controversial author Lee Israel, who wrote a 1979 biography of Kilgallen, declared, "[I]f [Dorothy Kilgallen] was murdered, the crime was done to silence her, by a … representative of whatever faction it is that did not want the facts about the JFK assassination to emerge."

Kilgallen scoffed at the official claim that Jack Ruby decided on the spur of the moment to kill Oswald to spare Jackie Kennedy the ordeal of testifying at his trial. Only a week after the assassination, Kilgallen wrote:

> I'd like to know how, in a big, smart town like Dallas, a man like Jack Ruby … can stroll in and out of police headquarters as if it was a health club at a time when a small army of law enforcers is keeping a "tight security guard" on Oswald. Security! What a word for it!

When the Warren Commission report was released in September 1964, Kilgallen quickly labeled it as "laughable." She told her many friends that she was certain the assassination had been the result of a conspiracy, and informed Lane that she was going to "break the case wide open." She was planning on writing a book about the case, based on her own extensive first-hand research.

LEAD UP TO 'SUICIDE'

Not only was Kilgallen put under FBI surveillance, but her phones were also tapped. Additionally, the CIA possessed classified files on the bold reporter. In the weeks leading up to her untimely death, Kilgallen became fearful over the threats on her life that she was receiving. Kilgallen was known to carry around a huge folder of documents relating to her assassination research. While she wouldn't share these documents with others, she told friends, "If the wrong people knew what I know, it would cost me my life." The mysterious folder would never be found after her death.

On November 8, 1965, the 52-year-old Kilgallen was found dead in a bedroom of her townhouse in New York City. The people closest to her, including the friend who discovered her body, felt that she had been moved from somewhere else and noted signs of staging. The bedroom she was found in was a place she was never known to sleep. In fact, friends claimed that the bed hadn't been used since Kilgallen caught her husband with another woman there. The bed was described as "spotless," and Kilgallen was still wearing her hairpiece, makeup and false eyelashes. Those who knew her best insisted that she would never have gone to sleep without removing them all, even in her own bed.

She was clad in a nightgown her friends had never seen before. She had seemingly been reading a book

when she died, but the eyeglasses she required weren't found anywhere in the room. The medical examiner would conclude that Kilgallen died from "Acute ethanol [alcohol] and [prescription] barbiturate intoxication. Circumstances undetermined." Meanwhile, friends insisted Kilgallen never abused alcohol or prescription drugs. One of the substances found in her system was linked to a drug she had never been prescribed. There was far too much Seconal, which Kilgallen was known to take to help her sleep, in her blood to suggest an accidental overdose.

The mysterious and unexplained death of the only high-profile reporter in America known to be working on a book about the assassination of President Kennedy remains at the top of the list of the extensive "body count" related to the case. Her important documentation was rumored to include the minute-by-minute logs of the Dallas police from November 22, 1963, obtained by a source she had within the department. Ironically, Kilgallen was the first to publish articles about witnesses who reported they'd been threatened by Dallas police or the FBI. One of these witnesses, Acquilla Clemons (an eyewitness to the murder of Officer J.D. Tippit, whose murder less than an hour after JFK was shot would be dubiously blamed on Oswald), told Kilgallen, "I'm not supposed to be talking to anybody; might get killed on the way to work."

Kilgallen supposedly gave a draft of a chapter she'd written on the assassination to her close friend Florence Smith, as well as her notes from her personal interview with Jack Ruby. The former Florence Pritchett had been a model and later a fashion editor for a Hearst newspaper. She was one of many women allegedly tied romantically to a young John F. Kennedy. Smith had even appeared as a guest panelist on *What's My Line?* Incredibly, the 45-year-old Florence Smith died two days after Kilgallen, supposedly of a cerebral hemorrhage. It goes without saying that none of the assassination-related material Kilgallen had entrusted with her was ever found.

OTHER RUBY INVESTIGATORS DIE

Two other journalists who were curious about the JFK assassination died just as strangely. Three people met with Jack Ruby's roommate George Senator in his apartment on November 24, 1963. Reporters Bill Hunter and Jim Koethe were given free rein to search Ruby's residence. Attorney Tom Howard was the third man in attendance.

On April 23, 1964, Hunter was shot and killed in a truly bizarre "accident" in a Long Beach police station, when an officer dropped his gun and it went off and struck the reporter. The other journalist, Jim Koethe, was writing a book about the assassination like Kilgallen. On September 21, 1964 an intruder killed him with a karate chop to the throat, believe it or not, as he exited his shower. Koethe's parents pointed out that any notes or material pertaining to his book on the assassination were nowhere to be found. To complete the trifecta of premature deaths, attorney Howard died of a heart attack at just 48, in March 1965.

What are the odds of all three relatively young men dying in such a fashion in slightly over a year after the meeting in Ruby's apartment?

DEATH TOLL MOUNTS

In the first three years following the assassination of JFK, an astounding 18 material witnesses died. Six of these were shooting victims, three died in motor vehicle accidents, two allegedly committed suicide, one purportedly died due to a cut throat (when he jumped or was pushed through a plate glass window), the aforementioned karate chop-to-the-neck murder, three succumbed due to heart attacks, and two deaths were attributed to "natural causes." The reader can decide how plausible all of these mysterious deaths of such important witnesses are.

An actuary hired by the *London Sunday Times* initially estimated that the odds of 18 witnesses connected

HIT LIST

An In-Depth Investigation Into the Mysterious Deaths of Witnesses to the JFK Assassination

Richard Belzer and David Wayne set the record straight about the many witness deaths tied to the JFK assassination. For decades, government pundits have dismissed these "coincidental" deaths, even regarding them as "urban legends." Were they? Some of the deaths seemed purely coincidental—heart attacks, hunting accidents, suicides, etc. Others clearly seemed noteworthy: witnesses who knew something and actually did die in inexplicable ways. *Hit List* is a fair and balanced examination of the evidence of each case, leading to different conclusions. The findings were absolutely staggering. The authors conclude that some cases were clearly linked to a clean-up operation designed to suppress the truth after the murder of President John F. Kennedy, while others were the result of other forces. Softcover, 368 pages, **$25** plus $5 S&H inside the U.S. from AFP, 117 La Grange Avenue, La Plata, MD 20646. Call 1-888-699-6397 toll free to charge, Mon.-Thu. 8-4 ET. Also visit AmericanFreePress.net. For international S&H email Bookstore@AmericanFreePress.net.

Left to right, some of the people who may have been killed to keep them quiet: Warren Commission critic Rep. Hale Boggs, Dallas Policeman Roger Craig, and Warren Reynolds, who was shot but survived—and then changed his story.

to the same event being dead by February 1967 were an unfathomable one hundred thousand trillion to one. The House Select Committee on Assassinations attempted to debunk this claim, similarly to how it worked to validate every untenable aspect of the official story of the assassination.

A legal spokesman for the *London Sunday Times*, clearly pressured to discredit these numbers, released the following public statement:

> Our piece about the odds against the deaths of the Kennedy witnesses was, I regret to say, based on a careless journalistic mistake and should not have been published. This was realized by *The Sunday Times* editorial staff after the first edition—the one which goes to the United States—had gone out, and later editions were amended.
>
> There was no question of our actuary having got his answer wrong, it was simply that we asked him the wrong question. He was asked what were the odds against 15 named people out of the population of the United States dying within a short period of time, to which he replied—correctly—that they were very high. However, if one asks what are the odds against 15 of those included in the Warren Commission Index dying within a given period, the answer is, of course, that they are much lower. Our mistake was to treat the reply to the former question as if it dealt with the latter—hence the fundamental error in our first edition report, for which we apologize.

This explanation was absurd. To any reasonable observer, the odds against 18 (not the 15 figure named in the press release) persons directly associated with one particular event being dead in such a short period of time would obviously be much higher than 15 random people from the population, not lower.

In their infamous 1967 memo on "Countering Criticism of the Warren Report," the CIA touched upon this subject by arguing:

> Such vague accusations as that "more than 10 people have died mysteriously" can always be explained in some rational way, e.g., the individuals concerned have for the most part died of natural causes. The [Warren] Commission staff questioned 418 witnesses—the FBI interviewed far more people, conducting 25,000 interviews and reinterviews—and in such a large group, a certain number of deaths are to be expected.

Anyone who has followed the mainstream media's reporting on the assassination understands how religiously they have obeyed this directive.

MORE SUSPICIOUS DEATHS

The list of unexplained deaths connected to the JFK assassination is far too lengthy to list here, but a few more examples are highlighted below.

- Shortly before the assassination, Albert Bogard, a used-car salesman, had a memorable encounter with an "Oswald" who was almost certainly not the real alleged assassin. There were several other examples of witnesses who reported interacting with someone claiming to be Lee Harvey Oswald in what certainly seemed to be an overt attempt to frame him. Bogard claimed to have gone on a wild, high-speed test drive with "Oswald," who announced he would soon be coming into some money and also talked about going back to Russia "where they treat workers like men."

After Oswald's name was reported in connection with the assassination, Bogard would seemingly become interested in the case. On February 15, 1966, however, Bogard was found dead in his car in a Louisiana cemetery. In the trunk of his car, there was

Left to right—Two more people who may have been killed to keep them quiet: girlfriend of accused killer of Warren Reynolds, and one of Jack Ruby's favorite strippers, Nancy Jane Mooney. **Far right**—author Mark Lane.

a stack of newspapers with stories relating to the JFK assassination.

• Roger Craig, a former Dallas "Deputy of the Year," was the only local law enforcement officer to do his job on November 22, 1963. He described seeing a man resembling Oswald racing down a slope and entering a Rambler station wagon, something several other unconnected witnesses reported as well. He was at the scene of the discovery of the alleged murder weapon, officially described as a 6.5 Italian Mannlicher Carcano, and claimed that it was actually a German Mauser, something two other Dallas officers, Eugene Boone and Seymour Weitzman, swore to in separate sworn affidavits.

Craig's life unraveled after the assassination and, when he became friends with Warren Commission report critics like Mark Lane, Penn Jones and Gary Shaw, he was eventually fired. He experienced more than one attempt on his life and, on May 15, 1975, he was found shot to death.

His death was ludicrously ruled a suicide, a finding which contradicted every bit of the evidence found at the scene. Craig's son Roger Craig Jr. strongly believes his father was murdered. The full story of Craig's heroism, subsequent troubles, and eventual murder can be found in the book *The Deputy Interviews: The True Story of JFK Assassination Witness and Former Dallas Deputy Sheriff Roger Dean Craig* by author Steve Cameron.

• Hale Boggs was the closest thing the Warren Commission had to a dissenting member. The airplane he was flying in disappeared over Alaska in 1972 and was never found. In a fantastic conspiratorial twist, the person who drove Boggs to the airport for his flight to oblivion was a young, aspiring politician named Bill Clinton.

• Another important witness, Warren Reynolds, originally said he could not identify the man fleeing the scene as Oswald. Two days after the FBI interviewed him, Reynolds was shot in the head. He survived and changed his testimony accordingly.

• Nancy Jane Mooney, aka Betty McDonald—the girlfriend of Darrell Wayne Garner, the man arrested for the shooting of Reynolds—was one of Jack Ruby's strippers. She was found dead in her cell shortly after providing him with an alibi.

• Jada Conforto, supposedly Jack Ruby's favorite stripper, died in a motorcycle accident before she could be questioned by the House Select Committee on Assassinations.

There are many other strange, inexplicable deaths connected to the assassination of John F. Kennedy. It isn't a "conspiracy theory" to relate and discuss them. They are what they are: more damning corroborating evidence of conspiracy. ❖

Donald Jeffries is a longtime researcher of the JFK assassination and the author of five groundbreaking history books: *Hidden History: An Expose of Modern Crimes, Conspiracies and Cover-ups in American Politics*, *Survival of the Richest: How the Corruption of the Marketplace and the Disparity of Wealth Created the Greatest Conspiracy of All*, *Crimes and Cover-Ups in American Politics, 1776-1963*, *Masking the Truth: How Covid-19 Destroyed Civil Liberties and Shut Down the World*, and *Bullyocracy: How the Social Hierarchy Enables Bullies to Rule Schools, Work Places and Society at Large*. On November 20, 1963, Rose Cherami was struck by a car on Highway 190 near Eunice, Louisiana. Taken to Jackson East Louisiana State Hospital, she told several nurses, moments before JFK was killed, that the murder was about to happen.

Rose Cherami

The Mystery Woman Who Tried to Save JFK

What did Rose Cherami know in the lead up to the assassination of JFK, and what did law enforcement ignore—and why?

By Dr. Michael Marcades
(Son of Rose Cherami)

On September 4, 1965, under cover of early morning darkness along a secluded stretch of FM155 in East Texas, Rose Cherami (aka Melba Christine Youngblood Marcades) fell victim to the destructive seas that had been rising relentlessly throughout her dangerously convoluted life. Like the 1991 "perfect storm" that buried the *Andrea Gail* in the raging North Atlantic waters off the coast of Gloucester, Massachusetts, Rose—at the hands of an assassin's bullet, not the erratic driving of an inebriated Jerry Don Moore—was engulfed by a cataclysmic tempest that she would not survive; one designed to silence her forever.

As her son, I wondered how Rose (my mother)—described by many as an intelligent young woman of movie star beauty—ended up in a surreptitious storm that eventually swallowed her life.

By mid-life, wonder evolved into a relentless determination to discover and confront whatever truth emerged. For over 30 years, I devoted thousands of hours to researching and writing about the destructive, covered-up, perfect-storm elements that robbed me of my birth mother when I was only 12.

Early in the research process, with the assistance of heralded JFK researcher J. Gary Shaw, I learned that my mother was "known" by the worldwide JFK assassination community as the raving, heroin-addicted prostitute who knew in advance and tried to warn authorities about the plot designed to murder the 35th president of the United States in Dallas, November 1963.

Decades later, film director Oliver Stone included Rose Cherami in several unsettling, revelatory scenes of

OLIVER STONE
Famed Hollywood director Oliver's Stone's *JFK* is hailed as one of the best films on the Kennedy assassination. Stone thought the story of Rose Cherami was worth including in the film, though few others ever took notice of her story.

his landmark film *JFK*. Incorrectly, many assumed that Stone had taken artistic license in creating a composite character called Rose Cherami, a powerless woman who embodied the nature of many who are controlled and abused in the bowels of crime.

Assumption wrong—she was real.

ANALYZING THE STORM

During Rose's formative years, she contracted an illness that adversely impacted her emotional, physical and psychological development. As confirmed by her parents, Rose, at 12, took ill and experienced an alarming, prolonged high fever, confusion and agitation. Immediately, she was taken to a Dallas-based physician and hospitalized for diagnosis and treatment.

Doctors confirmed that Rose contracted a viral infection that escalated into an acute case of encephalitis. In the 1930s, encephalitis—an infection that causes inflammation of the brain—was quite serious and, in some cases, life-threatening. After 23 days of treatment, Rose was released from the hospital with a set of disturbing warnings from attending physicians. Her parents were warned that their daughter may experience a difficult transition into puberty and beyond. Furthermore, physicians urged them to keep Rose away from drugs and alcohol.

Months later, the physicians' ominous predictions proved accurate. At 16, Rose ran away from home and embraced a destructive life of excessive alcohol consumption, drug experimentation and trafficking, sexual promiscuity, vagrancy and car theft. Conviction of the latter at age 19 resulted in Rose being sentenced to two years in Angola, Louisiana's notoriously corrupt, horrid state penitentiary. Rose's state police and FBI arrest records confirm that Angola was the first of many storms to follow.

CLOUDS OF DARKNESS

Exacerbated by the protracted impacts of encephalitis, Rose's "troubled girl" behaviors often resulted in court-ordered mental hospital commitments. Over the course of 20 years, Rose was hospitalized at least eight times. Each commitment had its own story, several of which were not easily explained.

In the late 1950s, Rose was committed to and later released from now-shuttered St. Elizabeth's Psychiatric Hospital—originally called the Government Hospital for the Insane. Why she was admitted to an elite military hospital is a mystery, says her son Michael.

1956—John Sealy Medical System (Galveston Psychiatric Hospital or GPH): Police found Rose alone on the street and beating her head repeatedly against the sidewalk. GPH determined that she was intoxicated and suffering from drug withdrawal, which explained her hostile behavior during admission. After 13 days of treatment, Rose was released and instructed to take the prescribed drugs and stop consuming alcohol and drugs.

1956—Austin State Hospital (ASH) shortly after being released from GPH: Rose was arrested in Houston for public intoxication, cursing and disturbing the peace. Within days, the state of Texas court system committed her to the ASH for psychiatric evaluation. Diagnosis: sociopathic personality disturbance/alcoholism. Six weeks later, Rose was discharged.

1957-1959—St. Elizabeth's Hospital, Washington, D.C.: In 1855, Congress built a hospital specifically for U.S. Army and Navy personnel who were struggling with brain issues. Oddly, in 1957, Rose—who by that time was described as a violently disturbed alcoholic, drug addict and prostitute—was committed by the New Mexico court system to St. Elizabeth's, the nation's elite mental hospital for the military

With the assistance of physicians, the U.S. District Court in New Mexico declared that Rose was suffering from psychoneurotic reaction/dissociative reaction, therefore mentally incompetent to stand trial for car theft. After two years of diverse treatment, Rose was dismissed from St. Elizabeth's under a revised diagnosis: sociopathic personality disturbance and antisocial reaction (alcoholism).

1961 and 1963—East Louisiana State Hospital (ELSH): Medical documents confirm that Rose was committed to ELSH on two separate occasions. In 1961, after having been arrested for aggravated arson in New Orleans, the Louisiana State Criminal District Court declared Rose criminally insane and ordered that ELSH detain and treat her until she was restored to her sound mind. Several months later, she was discharged from the hospital and, mysteriously, all arson charges disappeared.

On November 21, 1963, Rose was in route from Florida to Dallas with two "Eye-talian" men who allegedly were going to Dallas to kill President John F. Kennedy. During the trip, the trio stopped at the infamous Silver Slipper near Eunice, Louisiana. This establishment was known as a center for prostitution and drug trafficking.

Inside, an argument erupted between Rose and her companions. She was roughed up and tossed into the parking lot. Hurt and disoriented, Rose stumbled to the highway and started hitchhiking to Dallas. As she staggered up the road, a vehicle—

driven by Frank Odom—accidentally bumped against Rose. After a heated exchange between the two, Odom drove Rose to the Moosa Memorial Hospital.

By the time they arrived, Rose displayed signs of withdrawal and pleaded for a "hit" of drugs. At this point, Rose was transported to the Eunice City Jail under the care of Lt. Francis Frugé, an officer with the Louisiana State Police, narcotics division. Later that evening, Rose's withdrawal symptoms escalated.

Frugé and medical assistant Dr. DeRouin reported that Rose stripped off all her clothes, clawed at her own skin in agony, and cut her ankles with a razorblade. Officials decided to transfer Rose to ELSH via ambulance. Frugé, accompanied by Elza Fontenot, rode with her. The conversation that ensued in the ambulance has been documented and scrutinized by worldwide assassination researchers for decades.

Rose spoke of having been on a drug run to Dallas with two men who purportedly were going to kill the president. She was to be paid $8,000 for her courier work, secure a large sum of money from Tony Vincent Vallone (alleged associate of Jack Ruby, for whom Rose worked) for a drug deal on the Texas coast, pick up her son and get out of town. Because of Rose's ill repute, her assassination foreknowledge was ignored by multiple law enforcement officials until it was too late.

1963—Central State Hospital (CSH), Norman, Oklahoma: In April, while on an assigned "long drug run," Rose was stopped by the Oklahoma Highway Patrol and subsequently arrested for driving under the influence. Investigators discovered Rose's past exploits and the multiple heroin packets hidden in her stolen vehicle. Authorities wasted little time in processing her through the court system.

She was soon committed to Central State Hospital for psychiatric evaluation/treatment. Probably unknown to Rose, CSH was one of Oklahoma's most deplorable mental care facilities. Not until 1975 was associated damning evidence exposed to the public by a congressional committee. Perhaps the most explosive revelation was the fact that CSH was one of the primary centers for MK-Ultra, a top-secret mind control program run by the CIA.

As might be expected, all official CSH medical treatment records from that time have been destroyed. Fortuitously, Rose's admission/discharge records survived. Most likely, Rose was exposed to MK-Ultra's clandestine treatments, including experimental administrations of LSD, MDMA (now known as ecstasy), mescaline, heroin, barbiturates, psilocybin ("magic mushrooms") and associated shock therapies.

CRASHING WAVES—NO ESCAPE

Rose then found herself in Houston, Texas. Unknown to many, she had been straddling the fence between the FBI and police and mobster drug traffickers. By the mid-1950s, she was recruited as an informant for Detective William Billnitzer of the Houston Police Department (HPD). Regarded as a credible officer in an otherwise deeply corrupt department, Billnitzer took great interest in Rose's mob associations.

Their arrangement was clear: Rose provided inside street information to Billnitzer and he helped her avoid jail for trafficking and prostitution. This protective arrangement came to a halt the day Billnitzer realized that he was part of an ongoing government-based HPD investigation. That day, for unknown reasons, Billnitzer "committed suicide" in his office by shooting himself … twice in the heart—a miraculous feat.

Understandably, fear consumed Rose. Frightened for her life, she departed immediately for Houston.

In May 1964, Rose found herself in Cape Canaveral, Florida, where her final letter home was postmarked. The lifestyle described therein was a far cry from what dominated her past. She claimed to be married to J. E. Crawford and that both were

Rose Cherami: Gathering Fallen Petals

BY DR. MICHAEL MARCADES

On Nov. 21, 1963, just hours from Dallas, Texas, Rose Cherami was going through severe heroin withdrawal when she was admitted to a treatment facility. Once admitted, she proceeded to warn doctors, nurses, and fellow patients of President Kennedy's impending death. She claimed to have been traveling on a drug run from Miami with two "mean" guys, who were planning an attack on the president. An assassin killed JFK the very next day. In *Rose Cherami: Gathering Fallen Petals*, Rose's only son, Dr. Michael Marcades, pieces together the fragments of Rose's troubled life—involving substance abuse, prostitution, and violence—to reveal startling truths about the events leading up to the assassination and what Rose may or may not have known. Based on true events, *Gathering Fallen Petals* is an incredible and historically accurate account of one woman's struggle to overcome her demons and reveal what she knew about the crime of the 20th century. Softcover, 412 pages, ***$22*** plus $4 S&H inside the U.S. from AFP, 117 La Grange Avenue, La Plata, MD 20646. Call 1-888-699-6397 toll free to charge, Mon.-Thu. 8-4 ET or visit AFP online at AmericanFreePress.net.

receiving sizeable monthly checks from the government for the rest of their lives. (Some researchers suggest that Rose may have been in some form of witness protection. See Shaw's "Introduction.")

Furthermore, Rose made it clear that, though she loved and missed her son Michael, he should not expect her to come home any time soon. In her letter, she pleaded that someone tell Michael to "always be the fine boy that I know he is" and that, "no matter what comes or goes to always know that somewhere in this world is his mother that will always love him."

By August 1964, Rose wound up in Montgomery, Alabama. Whatever "Camelot" Rose experienced in Florida quickly vanished. She was arrested five times under assumed names for public intoxication, resisting arrest and general investigative detentions.

Shortly thereafter, Rose retreated to New Orleans and resumed her "normal" activities: heroin addiction, mob-run trafficking and prostitution tours. By mid-fall, Rose (alias Roselle Clinkscales) was dispatched back to Montgomery with a bevy of elite girls and over $30,000 worth of heroin. The routine was familiar: deliver, collect, turn expensive tricks and stay alive. In Rose's mind, the latter was getting dicey.

ROSE CHERAMI
October 21, 1964 mug shot.

THE FINAL WAVE: SEPT. 4, 1965

Ready to break free from those who controlled her every move, Rose notified her sister Mozelle that she was headed home. Rose was exhausted. She had tried it all, done it all, had it all and lost it all.

The route to Dallas was monotonously familiar. Then, the driver made an abrupt, unexpected turn onto FM155, a desolate road near Gladewater. Instinctively, Rose realized her life was threatened. Minutes later, her body lay limp on the ground as gun powder aroma lingered in the night air. As if already planned, the assailant positioned the body on the highway shoulder and carefully staged Rose's three suitcases in the middle of the road.

The events that followed culminated with Rose hanging onto life by a thread at the Gladewater Municipal Hospital. Although the death certificate says that Rose was "DOA," 8.5 hours of documented, detailed medical care proves otherwise. Sadly, Jerry Don Moore was blamed for running over Rose with his car. Oddly, no one in Rose's family was ever informed about disturbing terminology within the medical report, namely, the fact that Rose suffered from a "punctate stellate wound to the right forehead."

One final mysterious wave: A letter from home was found by the authorities in one of Rose's suitcases. Consequently, her family was called to identify the body. When family members arrived in Gladewater, hospital officials advised that a "redheaded" cousin had already identified the body. To this day, that person is a complete mystery. ❖

Dr. Michael Marcades completed his Ph.D. in Fine Arts (Choral Conducting) at Texas Tech University in May 1999. His dissertation, "Benjamin Britten's *Ad majorem Dei gloriam*: A Musico-poetic Analysis and Performance Guide for the Choral Conductor," was nominated for the 1999 Julius Herford Prize and is housed in the Britten-Pears Library, Aldeburgh, England. Throughout his career, he has served on the School of Music faculties at Texas Tech University, Columbus State University Schwob School of Music and Southern Union State Community College. Additionally, he has devoted extensive time to in-depth research and writing about the tragically, mysterious life and death of his mother, Melba Christine Youngblood Marcades. Melba, alias Rose Cherami, is known as the woman who knew in advance and tried to warn authorities about the pending assassination plot. Her character, depicted in Oliver Stone's landmark film *JFK*, reveals her struggle with heroin addiction, involvement with nationwide prostitution rings and drug trafficking, her association with assassination figures such as Jack Ruby, as well as her work as an official FBI informant.

Experts: No Climate Emergency

Despite repeated assurances from politicians and climatologists promoting a far-left political agenda, the so-called scientific consensus on man-made "climate change" is far from settled. Over 1,600 scientists from around the world—including Nobel laureate John Clauser and 320 more from the U.S.—have signed the World Climate Declaration publicly stating that there is no climate emergency.

"A global network of over 1,609 scientists and professionals has prepared this urgent message," the document reads. "Climate science should be less political, while climate policies should be more scientific. Scientists should openly address uncertainties and exaggerations in their predictions of global warming, while politicians should dispassionately count the real costs as well as the imagined benefits of their policy measures."

The document notes that the Earth's climate "has varied as long as the planet has existed" and that carbon dioxide, the "global warming" alarmists primary boogeyman, is not a pollutant but is in fact "essential to all life on Earth." The document concludes that there should be no cause of panic and alarm about the Earth's climate and that "net-zero" carbon dioxide emissions standards being championed by leading Western governments and global institutions are "harmful and unrealistic."

Book Distributor Arrested

In mid-September, federal police in Argentina raided and arrested a man accused of running a small independent publishing company. Police acted after the South American nation's top Jewish organization accused him of being "the largest Nazi and ant-Semitic book distributor in Argentina," according to the Jewish Telegraphic Agency.

JOHN CLAUSER
Signed climate declaration.

Pablo Giorgetti, who as a university student over 10 years ago was also investigated for distributing "Nazi propaganda" in apparent violation of Argentinian law, had his publishing house raided and shut down by agents of the General Directorate of State Security of the Superintendence of Federal Investigations. The move by federal authorities was instigated by the Delegación de Asociaciones Israelitas Argentinas (DAIA, Delegation of Argentine Israelite Associations), the leading pro-Israel Jewish grievance group in Argentina, which participated in a press conference with law enforcement officials when announcing the arrest.

"It is astonishing that there are people producing this type of material and worrying that there are people who consume it," said DAIA Vice President Marcos Cohen during the press briefing. "We are shocked by how profuse the material is. We have to work on punishment, but we also have a lot to do in education because … we have to eradicate the readers of this material."

French Activists Targeted

Members of Argos, a French nationalist youth organization, are facing criminal charges pertaining to organizing an "unauthorized gathering" and "promoting self-defense" during a protest against a criminal migrant accused of brutally raping a 29-year-old French woman.

According to French media, those arrested are facing a potential prison term of five years behind bars. Argos is the direct successor of the nationalist group known as Génération Identitaire, which was banned by the French state in 2021 following successful campaigns by the activist organization raising public awareness of the migrant crisis, the demographic transformation of France, and the French government's inability to combat illegal immigration and protect the French people. Argos members held a demonstration near the hospital where Mégane, the traumatized French victim, had recently awoken from a coma following the horrific attack, and made a generous donation to her family.

Members of the group held up signs that read: "The state doesn't defend us, get ready," a seemingly rational call for self-defense, but apparently a crime by French authorities determined to punish dissidents rather than protect the native French people.

✠ ✠ ✠

Extradited to Amsterdam

As TBR goes to press, a member of an activist organization called the Goyim Defense League has been extradited to the Netherlands where he has been accused of projecting an "anti-Semitic" message onto the Anne

Frank House in Amsterdam.

Robert Wilson, originally from Canada, used a laser to project a message onto the popular tourist attraction that read in part "inventor of the ball point pen," an allusion to Revisionist claims that the iconic Anne Frank diary was written at least in part by a third party to generate sympathy for the Jewish narrative of the "Holocaust."

The Anne Frank House draws visitors from around the world and serves as a propaganda hub for broadcasting exaggerated tales of Jewish suffering and mass murder during WWII.

Wilson was a vocal activist based in the San Diego area from 2016-2021 before fleeing the country and settling in Europe.

He was arrested and held in Germany in July before being transferred to Amsterdam in late August. The charges against Wilson will be a "test case" for prosecutors in the Netherlands, which has outlawed "Holocaust denial."

Roman Swords Discovered

Archaeologists associated with the Judean Desert Survey project organized by Israel's Antiquities Authority have discovered four 1,900-year-old Roman swords long hidden in a cave in the desert, it was recently reported.

The swords, which were found shoved into a small crevice in a cave in Ein Gedi National Park overlooking the Dead Sea, are believed to have been captured by rebels of the Bar Kochba revolt against Roman rule which lasted from A.D. 132-135. "We're talking about an extremely rare find, the likes of which have never been found in Israel," Dr. Eitan Klein, a director of the Judean Desert Survey project, said following the discovery. "Four swords amazingly preserved, including the fine condition of the metal, the handles, and the scabbards." Boas Langford of Hebrew University noted that the blades of the swords have been so well-preserved "they look like they could be picked up and used right now, even 2,000 years after they were forged."

Above, members of the 14th Grenadier Division of the Waffen SS "Galizien" (Galician) are sworn in, 1943. Jewish groups are hysterical that members of the anti-Communist division were honored with a commemorative memorial in Pennsylvania and demand it be removed.

Jewish Group Demands 'Offensive' Monument Be Removed

The American Jewish Committee (AJC) is calling for the removal of a historic monument in a Ukrainian cemetery near Philadelphia commemorating the 14th Waffen Grenadier Division of the SS, a division made up primarily of ethnic Ukrainian volunteers. The 30-year-old memorial monument came to the attention of *The Forward*, a historically Communist-inspired Jewish newspaper and online publication that maintains an international database of monuments to "Nazis" and "Nazi collaborators," such as the Ukrainians that served in the Waffen SS. Since the report, professional Jewish activists and Jewish organizations, led by the AJC, have demanded the monument be removed. "More than 30 years have passed since the fall of Communism and the establishment of democratic governments in Central and Eastern Europe," the AJC said in a statement designed to pressure the Ukrainian Federation of America and the local Ukrainian community to remove the monument. "They had never been forced to openly confront their own Holocaust-era past and the role of local collaborators and perpetrators. We trust our Ukrainian friends and colleagues recognize that [the memorial] cannot remain."

✠ ✠ ✠

Jews Flee Ukraine

A leading rabbi in Kiev has claimed that roughly half of the country's 300,000 Jews have fled the country since the Russian invasion began in February 2022. Very few appear to be interested in volunteering for the Ukrainian armed forces, preferring instead to flee abroad. In an interview with *The Washington Post* in late August, Rabbi Moshe Reuven Azman of the Brodsky Synagogue in Kiev noted that while there is "anti-Semitism" in Ukraine, the Ukrainian people "voted for a Jewish guy to be president," referring to Ukrainian President Volodymyr Zelensky. Azman was a bit reluctant following Zelensky's election victory, however, because he feared Zelensky would become an easy scapegoat for any of the country's economic or political problems. Despite having a Jewish president and numerous Jewish oligarchs with immense political and economic influence, the Russian government continues to insist a key goal of its special military operation is to "de-Nazify" Ukraine.

Secret Service Agent Finally Breaks Silence About 'Magic Bullet'

JFK assassination experts insist revelation kills "ludicrous" theory

By Donald Jeffries

Retired Secret Service agent Paul Landis shocked the JFK assassination research community with a sudden, very belated disclosure recently. Landis, now 88-years-old, claimed to have found an intact bullet, which was nearly pristine, that was lying on the top of the back seat of the presidential limousine, just after the shooting.

Landis's claim could provide support for those who maintain that the bullet that entered JFK's back was a tangential wound which fell out without exiting. However, to wind up on the top of the back seat would be quite a feat, considering it entered some six inches down on Kennedy's back.

Many are arguing that this destroys the so-called "magic bullet" theory, which ludicrously held that one bullet caused seven wounds in Kennedy and Texas Gov. John Connally, without almost any visible damage to the bullet. Even for defenders of the Warren Report, it would be ridiculous to suggest that the "magic bullet," which according to the official story ended its fanciful journey in Connally's thigh, could have transported itself from the middle row jumper seat where Connally was seated in front of JFK, to the top of the back seat.

PAUL LANDIS
Admission killed "magic bullet."

Robert F. Kennedy Jr. was among those who declared Landis's revelation meant that "the single bullet theory is now dead." The single bullet theory, in fact, was always impossible.

Few, however, are scrutinizing the actions of Landis. If his testimony, some 60 years after the fact, is true, then it makes Landis look pretty bad because, after discovering this crucial evidence in the limo, Landis didn't mark the bullet and initiate the evidentiary chain of possession, which is what he would have been trained to do. Instead, he carried the bullet into Parkland Hospital, and put it on JFK's stretcher.

In effect, Landis exposed himself as the person who planted the "magic bullet" at Parkland. Because of the condition of the bullet, most researchers have long believed that it had to have been planted. It certainly didn't look like it had struck anything, let alone caused seven wounds, including shattering Connally's wrist, one of the thickest bones in the human body. Jack Ruby had been a favorite candidate for planting the bullet, having been seen by many persons that day at Parkland.

Landis's testimony raises a number of troubling questions about him. Why would someone wait so long to disclose something so important? He could have come forward during the initial stage of public doubt, which resulted in books like Mark Lane's *Rush to Judgment* that demolished

the lone assassin theory and explored the questions surrounding the discovery of the "magic bullet."

Two different people testified to discovering the "magic bullet," after it rolled off of a stretcher (that they insisted could not be positively identified as Connally's, which would have been a prerequisite for the laughable theory). They found it very difficult to get any FBI or Secret Service agents interested in the bullet, and it was, incredibly enough, transported back to Washington, D.C. in the coat pocket of Secret Service agent Richard Johnsen, without being marked properly by all those who handled it.

While Landis could easily be charged with corruption of the crime scene, the Secret Service itself cleaned and washed out the inside of the limousine, which effectively destroyed the reliability of anything found there. They sent the limo back to Washington, D.C., where the windshield, which several witnesses claimed featured a bullet hole, was instantly replaced.

Landis was one of many agents in Kennedy's White House detail who'd been out until the early morning hours getting drunk, in strict violation of Secret Service protocol. None of the agents did their job in Dealey Plaza. Driver William Greer either slowed down or actually stopped the limo, and can be seen turning around to watch the fatal shot hit Kennedy. He was trained to accelerate out of danger at the sound of gunfire. Not a single agent in the backup car, which was very closely following the presidential limousine, or Roy Kellerman, sitting next to Greer in the front seat, followed training and jumped on top of Kennedy to shield him from what turned out to be the fatal head shot.

The "magic bullet."

The other surviving agent from JFK's detail, Clint Hill, has written a series of self- serving and wildly inaccurate books in recent years. These agents should be wracked with guilt, not bursting with pride. At the very least, they were inexcusably incompetent that day. Not a single one of them reacted to gunfire.

It is no wonder that so many researchers have looked suspiciously at the Secret Service. In facing no critical scrutiny over his claim, Landis is just continuing a pattern that began when the FBI and Warren Commission refused to question the inactions of the Secret Service agents that fateful day in Dallas. ★

Donald Jeffries is a staff writer for American Free Press newspaper.

AMERICAN CONSPIRACY THEORIES
From the JFK Assassination to the 9/11 Attacks

Over the last half-century, the phrase "conspiracy theory" has become a regular term of abuse directed against those who challenge the establishment narrative on major world events, with the JFK assassination and the 9/11 attacks being two of the most prominent examples. Declassified government documents eventually revealed that this pejorative accusation may have originated with the CIA. By the mid-1960s, many Americans had grown skeptical of the official story that JFK was killed by a lone gunman and began to suspect that the CIA might have been involved. So the intelligence agency encouraged its media assets to ridicule such notions as "conspiracy theories" and the term soon became widespread. The creation of the internet in the 1990s suddenly allowed the easy distribution of unsanctioned narratives, and a massive new wave of conspiratorial theories blossomed in the aftermath of the 9/11 terrorist attacks in 2001—some true, some false and some government disinformation. This volume contains a collection of the essays of activist, author and philanthropist Ron Unz on such topics, covering the events of those decades in a hard-hitting, honest fashion. Softcover, $15 plus $5 S&H inside the U.S. from AFP, 117 La Grange Avenue, La Plata, MD 20646. Call 1-888-699-6397 toll free to charge, Mon.-Thu. 8-4 ET.

Mossad Link to JFK's Assassination Gets Big Boost

The Story of the Zionist Spy Who Read Lee Harvey Oswald's Mail

What role did Reuben Efron, a mysterious Jewish/Zionist spy, play in the assassination of JFK? While that question is being debated even as key documents continue to be hidden from the American public, the role of Israel and its worldwide network of agents, operatives and sympathizers can no longer be ignored.

By John Friend

While many government files relating to the assassination of President John F. Kennedy remain under wraps, newly released CIA documents do shed some light on the man who, among other clandestine operations, monitored Lee Harvey Oswald on behalf of the U.S. government: a Lithuanian-born Jewish spy and unabashed Israel-lover named Reuben Efron.[1]

Efron's mysterious background, interests and connections, which included deep reverence for his Jewish faith and close connections to the state of Israel, may perhaps lend further credence to the thesis boldly put forth by the late Michael Collins Piper, author of *Final Judgment: The Missing Link in the JFK Assassination Conspiracy*. Piper, a former member of TBR's Board of Contributing Editors and one of America's most prominent independent dissident journalists and writers, long argued that Israel and her worldwide network of supporters and sympathizers played a central role in the conspiracy to eliminate JFK.

JAMES JESUS ANGLETON
Long-overlooked conspirator.

Efron, who died on November 22, 1993—exactly 30 years after the November 22, 1963 assassination of JFK—was born in Simnas, Lithuania on April 12, 1911, according to the Jewish Telegraphic Agency (JTA).[2] He attended a Jewish high school there and later enrolled at Vytautas Magnus University in Kaunas, a central hub of Jewish life in Lithuania. He practiced law in Kaunas for five years and then emigrated to the U.S. in December 1939, arriving in Miami via Cuba before settling in Atlanta, where he enrolled at the Atlanta Law School.

While attending law school, Efron worked at a clothing store in downtown Atlanta, graduating in 1943 and enlisting in the U.S. Air Force during World War II as an interpreter. He spoke Russian, Lithuanian, Hebrew, Yiddish and German and, according to reports, played a role in the postwar peace talks following WWII, including the resettlement of war refugees.

Efron's mysterious background and role in monitoring and tracking Lee Harvey Oswald is, however, perplexing

JFK assassination researchers. According to the JTA, which has published two detailed reports on Efron since the latest document release demonstrating his fascination with Jewish history and obsession with the role Jewish spies have played from the biblical era to more modern times, his family history simply notes that he "worked for the Pentagon."

In an interview with Efron's nephew Barry, JTA's Ron Kampeas reported that Barry noticed that "something seemed amiss" when he visited his uncle at his Washington, D.C. law office in the late 1960s.[3]

"There was a wooden desk and a couple of wooden chairs, [but] there were no bookcases," Barry curiously observed, prompting him to question what exactly his uncle—allegedly a lawyer—did for a living. "He had traveled a lot, yet he had no visible means of support." Barry also told the JTA that his uncle encouraged him to "intensify his Jewish observance."

"He talked mostly about Judaism, about being religious and being righteous, being prayerful," Barry recalled.

According to reports, Efron also became a lieutenant colonel in the U.S. Army during his expansive career with the U.S. government. After retiring, Efron lived part time in Israel, where he continued his study of Jewish history and espionage, including "contributing five articles in the 1970s to the *Jewish Bible Quarterly*, a World Zionist Organization-affiliated publication based in Jerusalem that channeled his expertise in espionage," the JTA reported.

According to Barry, Efron was also published in other scholarly foreign policy and military affairs journals including *Foreign Affairs Quarterly*.

"He didn't have much of a law practice, he knew a lot of languages and he was very, very, very erudite, he traveled a lot and he had a Ph.D. in international affairs, and he wrote dense scholarly articles," Barry told

Michael Collins Piper (1960-2015) was one-of-a-kind. He began working with Willis Carto as a teenager at Liberty Lobby, then housed on Capitol Hill in Washington, D.C. There, he became a local fixture and the "notorious" author who talked truth to power in his books and his weekly columns for *The Spotlight* newspaper, published by Liberty Lobby. Piper was responsible for groundbreaking research into the Oklahoma City bombing and the 9/11 attacks. He also authored multiple books dealing with Zionist power. These included *The New Babylon*, *The New Jerusalem*, *Confessions of an Anti-Semite* and *The Caiaphas Complex*.

the JTA. "We thought Reuben was in the CIA."

Barry's assumption appears to have been proven correct according to CIA documents released this past summer.[4]

While a judge upheld a request by the Biden administration to keep thousands of documents related to the assassination of JFK hidden from the public, one released document names Efron as a new person of interest to the JFK assassination research community. According to *The New York Times* and longtime researchers, well over 4,000 files still remain either partially or fully withheld from the public, files that could reveal more details about the assassination and the individuals and groups involved.

One of the declassified documents is a memo Efron submitted on June 22, 1962 titled, "Correspondence of a U.S. Defector Who Recently Left the USSR Homebound," which includes an intercepted letter Oswald's mother sent to "Mr. and Mrs. Lee H. Oswald" when they lived in Minsk, the capital city of the modern nation of Belarus. Efron concludes the memo, which was directed to the deputy chief of counterintelligence, saying that the letter and subsequent revelation that Oswald and his family were heading back to the United States would be "of interest to Mrs. Egerter, CI/SIG, and also to the FBI."

According to the JFK Assassination Archives and Research Center (AARC Library.org), which was founded in 1984 "in order to provide a permanent organization which would acquire, preserve and disseminate information on political assassinations," Ann Egerter was a CIA officer and analyst at the Counterintelligence Special Investigations Group, referred to as "CI/SIG" in Efron's memo. Egerter described the CI/SIG as "the office that spied on spies," lending credence to long-running speculation that Oswald was himself some sort of operative, asset or future patsy of the FBI or federal intelligence, which is exactly what Jim Fetzer, a leading investigator of the JFK assassination, told TBR.

However, Fetzer contends that the latest revelations regarding Efron's connection to Oswald may be more of a distraction than anything.

"The claim that Reuben Efron, a Jewish Army officer, was Oswald's CIA handler appears to be a distraction from the fact that Oswald was an informant for the FBI and complained directly to James Hosty, an FBI special agent, not to harass his wife or his landlord, Ruth Paine, who was working for the CIA," Fetzer explained.

The media and JFK assassination research community's central focus on Oswald is missing the mark, according to Fetzer. Oswald, after all, could not have fired the fatal (or likely any) shot that killed the president, and even told reporters after being arrested that he was "just a patsy."

"Focus on Oswald has been the key to misleading the public about the assassination of JFK," Fetzer continued. "Oswald was standing in the doorway when the JFK motorcade passed by, which means that he not only cannot have been 'the lone gunman' but also cannot have been one of the eight shooters in Dealey Plaza." [See related story starting on page 30.—Ed.]

Even if the latest revelations regarding Efron's role in monitoring Oswald are more of a distraction, as Fetzer contends, the fact remains that Israel and its agents did indeed play a crucial role in the hit on JFK.

Although Efron could possibly have been a secret operative for Israel, especially given his ethnic background and reverence for the Jewish state and people, "a far more important operative for Israel was James Jesus Angleton, an official with the Office of Strategic Services, which would become the CIA," Fetzer pointed out, a key theme of Piper's thesis laid out in *Final Judgement*. Angleton was later chief of counterintelligence for the CIA from 1954 to 1975.

"Angleton, in my view, may well have had a crucial role by handling higher-level players in the assassination of John F. Kennedy," Fetzer concluded.

Egerter, who Efron noted would find developments with Oswald "of interest" in the recently released memo, worked directly under longtime spook Angleton.

Don Jeffries, another longtime JFK assassination researcher and independent author, told TBR that, while Efron could have been one of Oswald's handlers, many in the research community believe others were involved as well, including the previously mentioned Ruth Paine, Oswald's landlord, or George de Mohrenschildt, who befriended Oswald in the summer of 1962 and had connections to the CIA.

Jeffries also believes that Israel likely played a critical role in the assassination, especially given JFK's hesitancy about Israel's nuclear weapons program and his more objective view of the Middle East.

"I think that JFK was pretty evenhanded in the Middle East," Jeffries told TBR. "Also, the powers that be knew very well that his father had been very vocal about Jewish influence in Hollywood and that he was good friends with both Sen. Joe McCarthy and Secretary of Defense James Forrestal, a harsh early critic of Israel."

Jefferson Morley, another longtime JFK assassination researcher who helped publicize the latest document release, pointed out the unique role Efron has had in the history of espionage.

"I don't know of any spy who had his distinction: reading the personal correspondence of an accused presidential assassin who was silenced before he could tell his side of the story," Morley pointed out on his Substack page "JFK Facts."

Whatever conclusions can be drawn about the mysterious Reuben Efron based on the recently released memo, there's little doubt much more remains concealed by the federal government on this and other matters relating to the assassination.

Since the publication of Piper's groundbreaking book, other independent researchers have come to similar conclusions, including most prominently Laurent Guyenot, a French

intellectual and author who has published extensively on JFK and 9/11.

Guyenot has argued that, in the United States, as in other countries around the world, there are "hidden centers of power, totally immune from democratic accountability, capable of steering the country's foreign and military policy by various means such as corruption, propaganda, blackmail, and other more criminal means."[5]

"But the most influential of these power centers are not 'American' in any real sense: the true American Deep State, if you will, is Israel," Guyenot contends. "Israel has lodged itself like a parasite in all of America's power structures. And it is precisely Israel that is behind the serial assassinations of the Kennedy brothers."

Regarding his research and writing on the JFK assassination, Guyenot is quick to point out that he is walking "in the footsteps of the late Michael Collins Piper, who was the first to blame Israeli networks for the assassination of John Kennedy."

The role of the mysterious Zionist spy who monitored and tracked Lee Harvey Oswald will continue to be debated in the coming years. What cannot be debated, however, is the central and long suppressed role that Israel and its international network of Zionist supporters played in murdering our president 60 years ago. ❖

FINAL JUDGMENT

The Missing Link in the JFK Assassination Conspiracy

Two-Volume Anniversary Edition

Final Judgment: The Missing Link in the JFK Assassination Conspiracy is considered to be the definitive book on the assassination of President John F. Kennedy and Israeli involvement.

Through meticulous research, Piper pieced together multiple disparate theories on who was behind the murder. Ultimately, he placed the blame for facilitating the murder on the Israeli government, its notorious secret service—the Mossad—and CIA official and Israel-firster James Jesus Angleton.

According to Piper, JFK was in the crosshairs of Israel because of his unwavering opposition to Israel acquiring the atomic bomb. Israel was desperate to get its hands on nuclear weapons in its bid to make Israeli power preeminent in the Mideast.

To this day, Piper's book still stands the test of time and has even just gained a major boost from recent revelations. (See related story.)

Volume I contains the full text of the *Final Judgment* book plus Mike's amazing photo section which is worth the price of the set all by itself. Softcover, 425 pages. Volume 2 comprises the 10 extremely detailed appendices referenced in the main body of the book. Prof. Ray Goodwin of Texas wrote the foreword to this 2017 commemorative two-volume edition. Softcover, 372 pages. Total: 797 pages.

Get the two-volume complete *Final Judgment 2017 Anniversary Edition* for $40 plus $8 S&H from AMERICAN FREE PRESS, 117 La Grange Avenue, La Plata, MD 20646. Call AFP toll free at 1-888-699-6397 to charge, Mon.-Thu. 8-4 ET. See more at www.AmericanFreePress.net.

Why George Patton Was Prevented from Conquering Europe

GEN. GEORGE PATTON, the legendary American military figure, was a fierce critic of Allied policy toward Germany during and after the war. For this, he was routinely smeared as "insane" and "unstable" due to his willingness to denounce U.S. war policy.

By John Wear

American historian Rick Atkinson writes that George S. Patton Jr. (1885-1945) is widely regarded as the best field commander in the American Army during World War II. Patton was certainly the one most feared by the Germans, who complimented him before the Normandy invasion by massing defenses against a nonexistent Army Group Patton. By V-E (Victory in Europe) Day in 1945, Patton commanded 18 divisions and 540,000 soldiers, a force comparable in size to the entire American military at its peak in Vietnam.[1]

This article discusses whether Patton was held back by Allied military leaders from conquering Europe, his activities in Europe after the war, and whether he was murdered by Allied forces after the war.

Patton was one of the top swordsmen at West Point. He revamped the saber combat doctrine for the cavalry and designed the Model 1913 Cavalry Saber, a new straight-blade weapon known as the "Patton sword." Above, Patton (right) competes in the Olympics.

PATTON STOPPED

On July 28, 1944, Patton was given control of the troops of the Third Army in Europe. The Third Army made rapid advances in Western Europe under Patton's leadership.[2]

The Allied military leaders, however, intentionally prevented Patton from quickly defeating Germany in Western Europe. In August 1944, Patton's Third Army was presented with an opportunity to encircle the Germans at Falaise, France. However, Gen. Omar Bradley and Gen. Dwight Eisenhower ordered Patton to stop at Argentan and not complete the encirclement of the Germans, which most historians agree Patton could have done. As a result, probably 100,000 or more German soldiers escaped to later fight U.S. troops in

December 1944 in Germany's last-ditch counterattack known as the Battle of the Bulge.[3]

Patton wrote in his diary concerning the halt that prevented the encirclement of Germans at Falaise: "This halt [was] a great mistake. [Bradley's] motto seems to be, 'In case of doubt, halt.' I wish I were supreme commander."[4]

By August 31, 1944, Patton had put Falaise behind him and quickly advanced his tanks to the Meuse River, only 63 miles from the German border, and 140 miles from the Rhine River. The German army Patton was chasing was disorganized and in disarray. Nothing could stop Patton from roaring into Germany. However, on August 31, the Third Army's gasoline allotment was suddenly cut by 140,000 gallons per day. This was a huge chunk of the 350,000 to 400,000 gallons per day the Third Army had been consuming. Patton's advance was halted even though the way ahead was open and largely undefended by the German army in retreat.[5]

Germany took advantage of the overall Allied slowdown and reorganized her troops into a major fighting force. Germany's counterattack in the Battle of the Bulge took Allied forces completely by surprise. The Germans created a "bulge" in the lax American line, and the Allies ran the risk of being cut off and possibly annihilated or thrown back into the sea. Patton had to pull back his Third Army in the east and begin another full-scale attack on the southern flank of the German forces. Patton's troops arrived in a matter of days and were the crucial factor in pushing the German bulge back into Germany.[6]

Patton was enthused after the Battle of the Bulge and wanted to quickly take his Third Army into the heart of Germany. The German army had no more reserves and was on its last legs. However, once again Patton was held back by Eisenhower and the Joint Chiefs of Staff led by Gen. George Marshall. Patton was dumbfounded. Patton wrote: "I'll be damned if I see why we have divisions if not to use them. One would think people would like to win a war. … We will be criticized by history, and rightly so, for having sat still so long."[7]

The Western Allies were still in a position to easily capture Berlin.

A Courageous Warrior

While personally leading an attack on German machine gun positions as part of the Meuse-Argonne Offensive on September 26, 1918, Patton was struck by a round that tore into his left thigh. Badly wounded, he continued to command the battle for the next hour from a shell hole and insisted on filing his report at division headquarters before being taken to the evacuation hospital. When the Purple Heart was reinstituted in 1932, Patton was awarded the honor for his combat wounds. Above, Patton in WWII.

However, Eisenhower ordered a halt of American troop advances on the Elbe River, in effect presenting a gift to the Soviet Union of central Germany and much of Europe. One American staff officer bitterly commented: "No German force could have stopped us. The only thing that stood between [the] Ninth Army and Berlin was Eisenhower."[8]

On May 8, 1945, the day the war in Europe officially ended, Patton spoke his mind in an "off the record" press briefing. With tears in his eyes, Patton recalled those "who gave their lives in what they believed was the final fight in the cause of freedom."

Patton continued:

> I wonder how [they] will speak today when they know that, for the first time in centuries, we have opened Central and Western Europe to the forces of Genghis Khan. I wonder how they feel now that they know there will be no peace in our times and that Americans, some not yet born, will have to fight the Russians tomorrow, or 10, 15 or 20 years from tomorrow.
>
> We have spent the last months since the Battle of the Bulge and the crossing of the Rhine stalling; waiting for Montgomery to get ready to attack in the north; occupying useless real estate and killing a few lousy Huns when we should have been in Berlin and Prague. And this Third Army could have been.
>
> Today we should be telling the Russians to go to hell instead of hearing them tell us to pull back. We should be telling them if they didn't like it to go to hell and invite them to fight. We've defeated one aggressor against mankind and established a second far worse, more evil, and more dedicated than the first.[9]

A few days later, Patton shocked everyone at a Paris hotel gathering by saying basically the same things. At a later gathering in Berlin, when asked to drink a toast with a Soviet general, Patton told his translator to "tell that Russian son of a b**** that from the way they're acting here, I regard them as enemies, and I'd rather cut my throat than have a drink with one of my enemies!"[10]

FIGHTING ALLIED POLICIES

Patton returned in June 1945 to the United State to participate in ticker-tape parades in Boston and Los Angeles, but he had a strong premonition of his imminent death. Before returning to Europe, Patton told his two daughters, "I'm never going to see you again. I know this. I am going to be buried in foreign soil."[11]

The threat of a Communist takeover in Europe had long been recognized by Allied leaders. French Marshal Alphonse Juin stated to Patton at a dinner in Paris in August 1945:

> I wonder how they feel now that they know there will be no peace in our times.

"It is indeed unfortunate that the English and Americans have destroyed the only sound country in Europe—and I do not mean France—therefore the road is now open for the advent of Russian Communism."[12]

Patton himself had warned of the danger of Russian Communism resulting from the destruction of Germany. Patton stated, "What we are doing is to utterly destroy the only semi-modern state in Europe so that Russia can swallow the whole."[13]

The many problems that arose as a result of the de-Nazification process caused Patton, at that point the military governor of Bavaria, to call for a less rigorous approach. He claimed that trained German staff were being removed from their administrative posts and replaced with less experienced and less capable personnel. Patton asserted:

> It is no more possible for a man to be a civil servant in Germany and not to have paid lip service to Nazism than it is for a man to be a postmaster in America and not have paid at least lip service to the Democratic Party or Republican Party when it is in power.[14]

Patton was transferred after his views surfaced in *The New York Times*. Eisenhower stuck to a tough de-Nazification program.[15]

Patton was also opposed to the Allied war crimes trials. Patton wrote in a letter to his wife:

> I am frankly opposed to this war criminal stuff. It is not cricket and it is Semitic. I am also opposed to sending POWs to work as slaves in foreign lands, where many will be starved to death.[16]

Patton also opposed the Allied occupation policy of giving government-confiscated German homes exclusively to Jewish victims of the camps. Additionally, Patton vehemently opposed the unjust and lethal Morgenthau Plan, which further angered American political leaders and his military bosses.

Finally, Patton opposed the repatriation of Soviet POWs and ex-patriots back to the Soviet Union. This repatriation program, known as Operation Keelhaul, ignored every tradition of asylum, and resulted in the unnecessary death and torture of large numbers of Soviets who wanted to remain in the West.[17]

Patton, as military governor of Bavaria, had done his best to help the vanquished Germans get up off their knees and meet basic needs such as food, shelter and security. However, Patton became known among U.S. and Soviet leaders as a bona fide menace and a threat to their version of world peace. In addition, Patton was viewed as insubordinate, uncontrollable and, in the eyes of some, treasonous. Eisenhower, Marshall and other Allied leaders came to believe that Patton was mad, for Patton could not offer any rational explanation to them for what he was doing and saying.[18]

As a 26-year-old Army cavalry officer, Patton was selected to compete in the first-ever modern Olympic pentathlon at the 1912 Summer Games in Stockholm. Of the 42 competitors, he finished in fifth place, although he might have medaled if not for a controversy in the pistol-shooting event. While the judges believed Patton missed the target with one of his shots, he argued that he was so fine a marksman that one of his bullets actually traveled through a bullet hole he had already made. Patton was also selected to the 1916 Olympic team, but the games were cancelled due to World War I.

SOURCE: HISTORY.COM

Patton was now obviously a marked man. Everything that Patton did and said privately was closely monitored and promptly reported to American and Soviet leadership.[19]

LOYAL AMERICAN

Despite the perception of many American military leaders, Patton was a loyal American who was dedicated to defending the reputation of the U.S. Army. This is illustrated by Patton's cover-up of crimes committed by American troops upon the liberation of Dachau.

Dachau was liberated on April 29, 1945 by Company I of the Third Battalion, 157th Infantry Regiment, 45th (Thunderbird) Division, which was part of the Seventh Army of the United States.[20] Soldiers who liberated Dachau saw a trainload of dead bodies, horrific scenes of sick and dying prisoners, piles of dead bodies strewn around the camp, and smelled a stench in the air from the rotting dead corpses.

A soldier writing home about what he had seen at Dachau wrote:

> No matter how terrible, revolting or horrible any newspaper reports are about Dachau; no matter how unreal or fantastic any pictures of it may seem, believe me, they can never halfway tell the truth about this place. It is something I will never forget.[21]

It was in this environment that American troops committed the mass murder of the German guards at Dachau. The German roll call morning report of April 29, 1945 stated that 560 German guards were stationed at Dachau on the day it was liberated by American troops. This figure of 560 was reported by Lt. Heinrich Skodzensky and a Swiss Red Cross official when they attempted to surrender the camp to American forces. Almost all of the 560 German guards at Dachau were murdered by the end of the day by American troops or inmates with assistance from American troops.[22]

Accusations were drawn up

against at least four officers and five enlisted men for the murder of the German guards at Dachau. Lt. Jack Bushyhead was accused of violating the rules of the Geneva Convention, which protect prisoners of war regardless of atrocities they may have committed. The following is a report of how Patton handled the illegal execution of the Dachau guards:

> After a brief interchange, Patton ordered every officer who had participated in the Dachau investigation to report to his office. He also demanded that they bring every document and photograph which they had collected. He then asked if they had placed every scrap of evidence in his hands. When assured that nothing had been withheld, he dumped all the papers into a metal wastebasket, asked for a cigarette lighter and personally applied the flame to the documents.
>
> The charges against American Lt. Jack Bushyhead had been dismissed. But, of greater importance, with this act, the written records of the executions at Dachau were stricken forever from the annals of military history. The incident would remain alive only in the minds of men, and here it was buried for more than 40 years. Officially, the "hour of the Avenger" had never occurred.[23]

The court martial charges were dropped and all records of the mass murder of the German guards at Dachau destroyed. Patton had decided that to pursue the matter further would have led to adverse publicity. One of the tragedies of this episode is that most of the German guards who were killed were a hastily assembled group of replacements for guards who had fled Dachau. These replacement guards at Dachau were innocent of wrongdoing and did not deserve to have been murdered.[24]

MUST BE SILENCED

Patton told members of his staff in Germany that he was going to resign. He did not want to retire, as was normal for military officers in order to retain pensions and benefits, but resign so that he would have no Army restraints. Patton was independently wealthy and did not need retirement benefits. After resigning, he would be free to give his version of the war and speak the truth as he saw it. Patton knew secrets and had revelations that would be sure to make big headlines. His version of events would be a blockbuster.[25]

Patton was prevented from returning to the U.S. by an automobile accident that occurred around 11:45 a.m. on December 9, 1945. He was taken to an army hospital in Heidelberg, Germany following the accident with head lacerations and a broken neck. Although Patton was allegedly paralyzed from the shoulders down and had been in very serious condition for days, he had made a substantial recovery for someone with such serious injuries.

> George Patton knew secrets and had revelations that would be sure to make big headlines.

However, approximately 24 hours before he was scheduled to fly home to the United States for Christmas, he had an unexpected downturn. Patton started having trouble breathing, moving blood clots called embolisms interfered with his lungs, and he became unconscious. Patton died in the hospital on December 21, 1945.[26]

No autopsy was performed on Patton. His doctor requested an autopsy, but Mrs. Patton declined, reportedly because she did not think there was a qualified pathologist available and, under the circumstances, she preferred not to have one performed.[27]

The evidence indicates that Patton was murdered. The auto wreck was caused when a 2.5-ton GMC Army truck, advancing in Patton's direction from the opposite lane, inexplicably turned abruptly in front of Patton's car. Patton's driver had only enough time to stomp on the brake while turning the car to the left. The driver was largely unsuccessful, and Patton's car hit the truck nearly head-on. Despite the fact that the truck driver was at fault, he disappeared after the accident, along with two unidentified passengers in the truck.[28]

There is no good reason why the Army truck driver abruptly turned in front of Patton's car. Douglas Bazata, a former OSS agent, said in an October 1979 interview with the *Spotlight* that Patton's car wreck was staged by an acquaintance whom he would not name. Since Patton had not died in the accident as was intended, Bazata was told a "refined form of cyanide that caused embolisms, heart failure and things like that" had been used to kill Patton in the hospital. Bazata passed a lie-detector test on all he had told the *Spotlight*, according to its staff.[29]

American historian Robert Wilcox later interviewed Bazata about Patton's death. Bazata admitted in these interviews that he and another agent had worked together to cause Patton's auto wreck. After the wreck, Bazata said he shot Patton from close range in the face with a projectile designed to produce damage that would not appear to come from a bullet. The force with which the projectile hit Patton was the equivalent of whiplash suffered at a speed of 80 to 100 miles per hour. This projectile caused Patton's total paralysis.[30]

In his interview with Wilcox, Bazata said that he and his coconspirator went to the hospital after their botched assassination attempt of Patton with a poison concoction. However, they could not get to Patton in the hospital. Bazata said he had not been involved in Patton's subsequent poisoning—therefore he could always truthfully say that he had not killed Patton.[31]

CONCLUSION

Rick Atkinson correctly writes that Patton was a very complex individual. A mystic who believed in reincarnation and in his own power of prescience, Patton was also a devout Episcopalian. His fundamental prescription for waging war involved "violent attacks everywhere with everything." Yet he considered the carpet bombing of German cities to be "barbaric, useless and sadistic." Patton was well read, fluent in French, and at home in society's most fashionable salons. Yet he could also be crude, rude and socially unacceptable.[32]

Eisenhower had said to Marshall, "Patton is a problem child, but he is a great fighting leader in pursuit and exploitation." Eisenhower also referred to Patton as "this mentally unbalanced officer."[33] The trend to characterize Patton as unbalanced, unstable and mentally ill has continued to this day.

For example, biographer Ladislas Farago considered Patton "if not actually mad, at least highly neurotic," while military historian Edward Lengel called Patton "brilliantly insane." A recent book titled *Patton's Madness* even psychoanalyzes Patton using the psychiatrist's manual.[34]

It is this author's opinion, however, that George Patton was totally sane. Similar to chess genius Bobby Fischer, Patton was considered insane because he contested and attempted to publicly expose the corrupt policies of the U.S. government. Patton was a loyal American who did his best to prevent the ill-treatment of Germans after the war and the takeover of Eastern Europe by Soviet Communism. Unfortunately, this earned him powerful enemies and he paid a high price for his quite sane beliefs. ❖

George Patton's pearl handled, custom engraved Colt .45. Patton first strapped on his new Colt during his time as Gen. John "Blackjack" Pershing's aide-de-camp in the operation to bring Pancho Villa to justice. After one deadly shootout, Patton opted to add a second ivory-handled pistol to his repertoire for more firepower. The fancy pistols contained his hand-carved initials and became his trademark sidearm throughout World War II, as well.

John Wear was born in 1953 in Houston. He graduated with a degree in accounting from Southern Methodist University in 1974 and passed the CPA exam later that year. He graduated from the University of Texas Law School in 1977 and passed the Texas bar in 1978. Wear, who is currently retired, worked most of his career as a CPA. His most recent employment was from 1994 to 2008 with Lacerte Software, a tax division of Intuit. With the help of friends, John's website is up and running again at www.WearsWar.com.

Arminius: The Liberator

29 copies left of this hard-to-find book!

Dear TBR: I saw your advertisement for "Operation Book Rescue" in the July/August 2023 TBR issue. Though I am no longer able to contribute a donation of any significance to your project, I do appreciate what you are trying to do.

Many years ago, when I had money, I donated quite a large sum of it to Ingrid Zündel when she was putting a book together called *Arminius: The Liberator*. It was really quite an impressive book—well over 300 pages, large format, great illustrations on almost every page—about the life of "Hermann the German," as we called him, the great Teutonic leader who kicked the Roman Empire's [butt] in the Battle of Teutoburg Forest some 2,000 years ago.

Anyway, for my donation she sent me 50 copies of *Arminius: The Liberator*.

Well, Ingrid is dead now and [Soaring Eagles] is out of business and that book is just sitting here in my spare bedroom in the same boxes she sent them to me and I thought, "Here is a book TBR can rescue—and it's already printed!"

Please accept this as my donation to your Operation Book Rescue and keep up the great work. You are doing a great service to our people.

—JIM ADAMS

Dear Mr. Adams: Thank you for your generosity. I am quite familiar with *Arminius: The Liberator* as I designed it myself and worked with Ingrid on the book. In fact, she traveled from Tennessee to Virginia many years ago to sit beside me at my home office as I put the finishing touches on the book. It was one of the great honors of my career and it is one of the nicest looking B&W books I have designed. So, your gift has very special meaning personally as it always pained me that, upon her death, her entire operation went down the tubes, including this book.

Rest assured, TBR will make sure those 50 copies find a good home!

—PAUL ANGEL

ARMINIUS: THE LIBERATOR

TBR has 29 copies in stock and then it is gone forever!

Two thousand years ago, the mighty Roman Empire—just like many Western democracies of today—was marked by decline and corruption. The once noble and altruistic attitude of the *civis romanus* had given way to the coarsest and most selfish morés. The middle class had almost totally vanished. An oligarchy, making a show of ostentatious wealth, brutality and perversion, had seized control.

ARMINIUS: THE LIBERATOR is the story of a young Germanic prince, trained to serve the Roman Empire, who united the tribes of Germania in 9 A.D. to crush three Roman legions, thereby changing the course of history. Its later cultural and social emanations would radiate to North America, Australia and other regions and have lasted more than 2,000 years so far.

ARMINIUS: THE LIBERATOR is the true story of one man's incredible quest to defy an oppressive, all-powerful empire and lead his people to freedom. It is also one of the most amazing love stories of all time. Arminius met and eloped with the proud and beautiful Thusnelda against her father's wishes. Her father would later betray them to the Romans—a traitor to his family and his *volk*.

In the end, Arminius was pitted against his own brother, Flavus, who ignobly remained subservient to his Roman masters. In a dramatic confrontation across the German River Weser, Arminius pleaded for unity of all Germanic tribes. Many agreed with his entreaty.

This epic illustrates amazing parallels. Arminius's victory is a lesson to be learned by our people for our times—that unity and clear-headed focus are crucial to understanding, confronting and somehow overcoming political tyranny and rampant corruption.

Softcover (8.5 x 11), high-quality stock, hundreds of original illustrations, 324 pages. **$55** minus 10% for TBR subscribers plus $5 S&H inside the U.S. from THE BARNES REVIEW, P.O. Box 550, White Plains, MD 20695. Call **1-877-773-9077** toll free to charge, Mon.Thu. 8-4 ET. Book will not be listed on our website due to the limited number that have been donated to us.

REVISIONISTS IN THE NEWS

A brief sampling of recent news relating to Revisionism along with the ongoing targeted persecution of prominent Revisionists around the world.

✠ ✠ ✠

Alfred Schaefer Arrested, Jailed—Again

On August 23, 2023, Alfred Schaefer, a courageous Canadian activist and Revisionist with German ethnic roots, was once again arrested by German authorities. Alfred had previously spent four years in a German prison for violating that nation's tyrannical "Holocaust denial" laws, serving a significant portion of the prison sentence in solitary confinement.

His "crime"? Publishing videos and publicly expressing his well-researched views about WWII and other controversial topics.

Throughout the years of persecution by German legal and law enforcement authorities, Alfred has remained defiant, using each public opportunity to express his God-ordained right of freedom of expression and intellectual inquiry.

The latest arrest relates directly to an incident that occurred in a nearly empty courtyard during Alfred's previous prison term. While speaking to another prisoner, Alfred raised his arm in a manner resembling the Roman salute popularized by German leader Adolf Hitler and other top National Socialist figures as a sign of respect and honor. A guard at the prison noticed Alfred making the forbidden gesture, and initiated legal charges against him shortly before he was released from his first prison term.

After refusing to turn himself in at the jail on August 3 for his "crime" of making an arm gesture, German police arrested him at his residence shortly before noon on August 23. He has been handed down a six-month prison term which will be served at Bernau Prison.

Monika and Alfred Schaefer, January 1, 2018, with a portrait of their great-grandfather peeking from behind. Both Monika and Alfred have been harassed, threatened, arrested and jailed, but refuse to kow tow to the German government, which demands they believe dubious historical narratives.

"Who is the victim of this alleged crime?" Monika Schaefer, Alfred's sister, who has also served jail time for publicly expressing her forbidden historical and political views, recently commented to TBR. "Alfred is literally doing a six-month jail term now because of lifting his straight right arm to a certain angle in a manner which likens the old Roman salute."

Readers interested in writing a letter or sending a postcard to Alfred are encouraged to do so. Please consider German censors will surely be combing through any mail directed to Alfred, so please keep your comments appropriate. Write to:

Alfred Schaefer

Monika Schaefer Visited by "Hate Crime" Police

Shortly after her brother was incarcerated in Germany, Monika Schaefer, author of *Sorry Mom, I Was Wrong About the Holocaust—The Trials & Tribulations of the Schaefer Siblings* (softcover, 304 pages, #955, $25 minus 10% for TBR subscribers plus $5 S&H inside the U.S.), received a surprise visit from officers with the Royal Canadian Mounted Police's "hate crimes" unit. The officers explained that they had received an anonymous complaint about the written content on the website of the Truth and Justice for Germans Society (www.TruthAndJusticeForGermans.com), where Monika serves as president.

The officers explained to Monika that they were concerned about

potential efforts to "incite hate" through the website, a vague and dubious legal concept that the officers apparently could not elaborate much upon, according to Monika.

"I asked them to tell me exactly where on the website was the incitement to 'hate'," Monika told TBR. "They could not and would not answer that question."

Monika proceeded to talk with the officers for over two hours, providing them a thorough background and understanding of her entirely legitimate and rational political and historical views. The officers spent two full travel days to visit Monika at her house, all based on an apparently anonymous complaint about words published on a website.

"I was trying to give these men a true education on the nature of what is going on in the world, where everything is inverted," Monika told TBR. "I gave them examples of how the justice systems, not just in our country, but across the Western world, are completely corrupted, to the point that they forbid evidence in court. I connected some dots for them, including to the present-day assault on children, and how they are being propagandized at school with LGBTQ and other subversive ideas."

During the conversation, the officers insisted that Monika was not under arrest and had committed no crime at the time. They did, however, warn her that "Holocaust denial" had been added to the criminal code of Canada, which was implemented in an extremely underhanded manner by adjusting the code during passage of the 2022 federal budget.

The updated code criminalizes the "willful promotion of anti-Semitism" to include those who communicate statements "other than in private conversations" that "willfully promotes anti-Semitism by condoning, denying or downplaying the Holocaust."

In a follow-up email to the officers, Monika noted that "the truth is indestructible."

CARLOS WHITLOCK PORTER
Prolific translator, historian.

"No amount of toner on paper will change the facts about what actually happened or did not happen during WWII," Monika explained to the officers. "You can jail the entire population of Canada over this if you want, and that would still not change the facts about what happened in the past. The truth is the truth is the truth and, ultimately, the truth always wins. I am happy to be on the winning side."

✠ ✠ ✠

RIP Carlos Porter

Carlos W. Porter, a leading American-born Revisionist, sadly passed away at home surrounded by his loving family on July 28, 2023 at age 76. Carlos leaves behind his beloved wife Sheila along with four children—Anna, Louise, Sarah, and David—and many grandchildren. Much beloved by all, Carlos leaves a huge legacy characterized by hard work, determination and unwavering devotion to truth and justice.

Carlos was a man of many interests, languages, literature and history, of which his knowledge was extensive. He always sought to find the truth and spent much of his time studying World War I and World War II, with special focus on the Nuremburg Trials, the Tokyo War Crimes Tribunal and Revisionism more generally. A justifiable fear of Communism remained with him throughout his career and served as a motivation for his intellectual efforts.

Carlos was very hard working and a rather discrete, shy man. He accepted people for who they were and admired abilities in others that he did not possess. He was truly a family man and enjoyed home life and the local countryside.

Throughout his life and especially throughout his illness and losing his mobility, he never complained, and had the strength of character and self-control to remain a kindhearted, generous and gentle man.

Carlos was most well-known for his important contributions to the Revisionist cause, namely the concise pamphlet *Not Guilty at Nuremburg: The German Defense Case*, which presented a powerful yet extremely censored defense of the German government before and during WWII. The booklet also exposed just how corrupt the "Nuremberg War Crimes Trials" truly were, violating virtually every legal precedent and procedure of evidence in traditional Western jurisprudence.

Carlos also authored *Made in Russia: The Holocaust*, which focused primarily on the truly absurd claims made by Allied prosecutors during the Nuremberg Trials against German political and military leaders, especially the more outlandish claims relating to the homicidal gassing of 6 million Jews in "death" camps.

Most readers are probably most familiar with Porter as the editor and translator of the works of Hervé Ryssen, available from TBR.

Carlos Porter is gone but will never be forgotten. Rest in peace Carlos and know that your legacy will always be championed in TBR.

Vincent Reynouard Still Facing Extradition Proceedings

As TBR goes to press, French Revisionist Vincent Reynouard is still facing extradition proceedings in England. There, French authorities are insisting he must be sent back to France to stand trial for violating the so-called "Gayssot law," which was passed in 1990 to target Revisionists, especially the late Robert Faurisson.

According to Peter Rushton, assistant editor of *Heritage and Destiny*, a nationalist magazine sympathetic to the Revisionist cause based in England, Vincent is a top target of the French establishment due to his transgression "against the founding myths of the modern French state."

In November 2022, Vincent was arrested in Edinburgh, Scotland, and has been incarcerated ever since while awaiting extradition proceedings.

VINCENT REYNOUARD
Paying heavy price for honesty.

Vincent's scholarly investigations into two controversial topics—the fable of homicidal "gas chambers" and the alleged "war crime" in the village of Oradour in central France in 1944—have long kept him in the crosshairs of French authorities.

"French prosecutors have become obsessed in recent years by spending time, effort, and money on seeking to extradite Vincent from the UK," Rushton told TBR. "Emmanuel Macron is one of the most unpopular presidents in French history. His country has desperate economic and social problems and is deluged by a tidal wave of African immigration. Yet he and politically motivated French prosecutors and police are prioritizing this pursuit of Vincent, simply because Vincent's investigations undermine the moral and ideological foundations of the 21st century French state."

In an exclusive interview with Rushton, Vincent opined that his release or extradition to France "does not matter."

"In either case, I will continue the fight," Vincent stated unwaveringly. "I have dedicated my life to Revisionism, I will never give up."

Readers should visit Rushton's website www.RealHistory.info for updates on Vincent's case.

Witness to History Has Arrived!

IT'S HERE! Witness to History: The Reich Legend Uncensored

RESCUED! By Mike Walsh. *Witness to History* was 25 years in the making with one purpose in mind: a single, comprehensive book that divulges previously censored information while effectively debunking the propaganda of the victors. At the same time, the author puts into perspective the catastrophic 20th century by presenting the big picture surrounding the so-called Russian Revolution of 1917 up to and through the attempted genocide of the people of defeated Germany. In this book, Walsh gives those who made this epoch their chance to tell us their unfiltered, spin-free comments in their own words. *Witness to History* is that book with the actual words of literally hundreds of eyewitnesses to the events of WWII—from high-ranking world leaders and military men to the average citizen on the streets.. Softcover, 416 pages, illustrated, #995, **$35**.

Life in the Reich: Hitler's Germany—1933–1945

By Mike Walsh. The quality of life in the Third Reich was far superior to elsewhere in the developed world. Ordinary German workers enjoyed a lifestyle previously reserved for the upper classes of the West. Germany led the world in fashion, medicine, cinema, lifestyle, manufacturing, transport infrastructure, public facilities, science, healthcare and education. For good reason, the Germans were the cheeriest people on Earth. The claim that this was achieved through investment in militarism is absurd. Despite being war economies, the debt-ridden U.S. and European Union suffered the collapse of their infrastructure whilst their indebted populations even now live hand-to-mouth. Prosperity in the Reich set an example that exposes the failures of the mutually supportive capitalist and Communist systems. A taboo topic for media and palace publishers, *Life in the Reich* was removed by Amazon because it dared to show Hitler's Germany as it was and not as the propagandists would have us believe it was. Mainstream media and court publishers consider this a taboo topic because they don't want you to know—in case you draw the right conclusions. Softcover, 120 pages, #960, **$18**.

Heroes Hang When Traitors Triumph: Martyrs of World War II

By Mike Walsh. Character assassination inevitably follows a defeat in war. Had peace terms with National Socialist Germany been equitable, it is likely that non-German figures since denigrated would be more accurately portrayed by modern media. Had Hitler's Germany defeated the forces of the British, Soviet and American empires, then one can presume London's Whitehall would be Adolf Hitler Esplanade whilst Hyde Park would have been renamed Lawrence of Arabia Park. Norway's monuments would celebrate Vidkun Quisling and the revered writer Knut Hamsun. Romania would pay tribute to Corneliu Codreanu whilst in Ireland, Britain and New York, instead of statues to Lenin, the name of Irish-American William Joyce might be affixed to great shopping edifices. *Heroes Hang When Traitors Triumph* gives a different perspective of these vilified foes. Softcover, 115 pages, #961, **$18**.

Adolf Hitler: My Last Testament

By Mike Walsh. Adolf Hitler said he was dumbfounded as "an enormous human dragon slowly uncoiled itself before me." The young laborer's description of a protest march calling for work and bread perhaps inspired Hitler to join the revolt against the oppression of the working class. Whatever challenges Germany faced, the highly decorated war veteran would not blame the Jews, for he had earlier remarked that anti-Semitism was repugnant. There is much that is enigmatic about this man who became almost a religious figure. No other leader in history has achieved more in uniting social classes and inspiring those of various religions and races. So far, an estimated 750,000 book titles have been published on The Third Reich. Hitler's *Mein Kampf* is more widely read today than ever before. Yet, few books actually record the rise of the Third Reich in Adolf Hitler's own words. Drawn from his speeches and media interviews *My Last Testament* is Hitler's self-assessment, but it also includes personal observations about the Führer from many others as well. As such, it is an invaluable first-hand source of information for scholars of the period. Softcover, 195 pages, #962, **$25**.

LETTERS TO THE EDITOR

MAKE *THEM* ILLEGAL

Regarding the editorial of July/August 2023 titled "Has DeSantis Made TBR Illegal in Florida?," of course, DeSantis's behavior is fully counter to the First Amendment. His suitability as a presidential candidate is nill. That said, as disgusting as his kowtowing to Jewish power is, I do see a silver lining.

Why not use the law to go after every BLM or Antifa fanatic and every university professor or administrator in Florida who threatens, harasses or intimidates Whites? Any White placing a poster saying "It's OK to be White" will be a perfect test case. Any miniscule instance of Critical Race Theory is cause for a lawsuit. The wearing of Christian crosses or T-shirts with quotations from the Bible shall be accepted in public spaces and in every public institution.

I see this as a golden opportunity to force diversity and equity down the throats of the far left, plus, it will be a super morale booster to Whites everywhere.

Michael Mason

WITNESS TO HISTORY

With the 1955 book *The Forced War: When Peaceful Revision Failed*, author David Leslie Hoggan ushered in the postwar appearance of academically solid works on the true causes of WWII.

Simultaneously, there occurred a tsunami of pseudo-historical WWII works that all ultimately failed the test of truth. Shamefully, this avalanche of mainstream books has overwhelmed the good ones.

Mike Walsh's book *Witness to History: The Reich Legend Uncensored* is one of the good ones. It has the stuff to break the black-out on that period because it gives you the opinions of hundreds of people who lived in that era plus Walsh's brutally honest narrative tying it all up.

Few will grasp the herculean task that the author has accomplished.

Having lived through the paradise that Adolf Hitler created out of the hell of the post-WWI Weimar Republic, and having witnessed the infinitely worse suffering of WWII and the destruction of Germany, I found *Witness to History* a very valuable book and I am glad TBR is bringing it back into print.

This book stands as a memorial to people from the Urals to the Atlantic shores of Spain, the hundreds of millions of victims of the Talmudic authors of the horrors of the 20th century. The final destruction of the survivors of the great war of Zionist conquest and demolition is now in progress. May this book serve to awaken recognition of that plan.

COMPREHENSIVE INDEX

I'm a new subscriber and recently received the May/June issue. I have to tell you that this publication is fantastic and I'm digging through past issues to read the unique content and perspective TBR delivers. I noticed the article index included in every November/December issue does not list all the publication years. It would be nice to be able to see a list of all articles ever published so I could target my reading instead of browsing a past issue and picking something interesting from that particular edition. Anyway, keep up the excellent work.

John M. Anderson

JURY OUT ON MUSK

Many think the jury is still out on Elon Musk. Is he a good guy or a bad guy? Is he controlled opposition? With people like him, it is not a straight black and white issue. One needs to take a weighted balance of his actions, look at the totality of his accomplishments and see if it is weighted toward good or bad. He has a lot of Chinese investors behind his various projects so, if you are a person who is critical of CCP activity in America and elsewhere, you most likely will get censored from time to time on Musk's Twitter/X platform.

Also, he got to where he is today with a lot of government subsidies and tax rebates for the consumer and so on, so it leads one to question the real viability of his electric-everything concept. Much like the ethanol substitute-for-gas concept would not have gone anywhere without the government's help—subsidies and tax credits—so to is a lot of this solar power and electric car business not able to stand on its own without subsidies and tax credits.

You'll never power a major industrial economy like America on solar panels on your house or out in the desert somewhere, and the long term environmental impact of disposing of worn-out panels and the composite materials in windmills is way worse than some carbon emissions from gas-powered cars and lawn mowers.

And guess what? Plants need carbon dioxide. We need more coal burning power plants next to huge greenhouses growing our vegetables so we don't have to buy CO2!

So, Musk, on the one hand, appears to be a bit of a Deep Stater. But, at the same time, the political left and the Jews seem to hate his guts, so that is a positive sign. What he has done with his acquisition of Twitter/X is interrupt the complete monopoly that organized Zionist interests had in their ability to create and control the national—now international —news and history narrative on all issues, and for that we should be grateful. Shifting control of the narrative is huge, actually.

As to the statement, "If you wish to know who rules over you, simply find out who you are not allowed to criticize," that is a 100% factually true observation and statement and, yes, it has been falsely attributed to the French philosopher Voltaire.

Alan Knutson

A GREAT CHASTISEMENT

If you wish to know the truth about world happenings, you must understand who your true enemies really are—who is good and who is actually evil. This will put you on the right track of survival. Note that God Himself told the Virgin Mary that if Russia was not properly consecrated to her Immaculate Heart (which has never been done), then God would use Russia to chastise the world. You are seeing it happen every day in Ukraine. That is actually a war between the whole Rothschild owned "West" and the single nation of Russia. It is pure

folly to come into that war on the side of totally satanically corrupted Ukraine. God has made today's Russia an undefeatable force which has largely returned to Him after the demise of its satanic Bolshevik/ Communist captors.

ILLEGALS CASHING IN

It is alarming to learn that, according to a Border Patrol agent, the Biden administration is providing illegal immigrant families with $2,200 per month in taxpayer funds, plus plane tickets, housing, food and free medical services.

This information supports the claims made by the legal immigration group ALIPAC (Americans for Legal Immigration PAC).

William Gheen, president of ALIPAC, has said: "The Biden-Harris administration is giving more money to illegal immigrant invaders than to our own U.S. citizens. … Once a person understands that, then that person will always be on our side of the illegal immigration debate, which is very simple. Keep them all out and send them all home."

The Border Patrol agent stated that illegal immigrants are provided with more than just the monthly checks. They also receive housing, cell phones, food, free medical services and even a ticket to their desired location within the United States.

Furthermore, they mentioned that ankle monitors used to be employed for this purpose but that these were recently replaced with cell phones. Lastly, they uncovered the role of cartels in preparing these people before crossing the border.

"The cartel tells them everything. Word of mouth. These guys know everything that we do. It's just the way it is," the agent revealed.

This evidence suggests that many illegal immigrants possess a high level of knowledge regarding U.S. immigration procedures, such as the required statements for asylum claims.

They often come prepared with relevant documents pre-printed by their home governments, including birth certificates. The border agent further points out that this may eliminate the need for asylum interviews in some cases.

Under the Biden administration, homeless veterans and Americans have been left without adequate support.

Senior citizens have only received $1,400 per month in Social Security payments, while Maui survivors have only received $700. This situation is unacceptable and should be met with outrage by all Americans.

ITALIANS IN THE WILD WEST

Wagon trains brought thousands of Italian immigrants to the Wild West, but few people are aware of this. One of the worst mine explosions in American history claimed the lives of 146 Italians in New Mexico. Significant populations of Italian-Americans still remain in the state.

Early Italian settlers in the New Mexico Territory came primarily from Lucca in northern Italy. In the 18th century, they joined wagon trains bound westward for California, but settled in New Mexico, either by choice or due to their circumstances.

When the railroad arrived in the region in the late 19th century, the Italian population surged. The Italian immigrants were industrious merchants and entrepreneurs who established hotels, grocery stores and theaters. Their relatives in Italy made the same journey to share in the opportunities the territory offered.

Many Italians came to work on the railroad or in the mines, contributing significantly to the economy and growth of New Mexico. An explosion in a mine in Dawson on October 22, 1913, claimed the lives of 263 miners, leaving only 23 survivors. Of the number killed, 146 were Italian immigrants, as mentioned earlier. The catastrophe was the second deadliest of its kind in U.S. history.

One of the top universities of America's West is credited to Italians. Las Vegas College was established by exiled Italian Jesuits in 1877. Ten years later, the school moved to Denver to become Regis College, and then Regis University. The institution remains a private coeducational Jesuit, Roman Catholic university.

Significant Italian communities can be found today in Albuquerque, Farmington, Gallup, Raton, Rio Rancho and Santa Fe, New Mexico. Many new Italian immigrants in New Mexico work in engineering, medicine, research or in the universities. Sen. Pete Domenici (1932–2017) was the son of parents who came from Modena. He served in New Mexico's legislative body for 36 years.

In 2007, Ronaldo Patrizio-Steiner inaugurated a four-day benefit event in Albuquerque celebrating Italian cinema in support of the University of New Mexico Children's Hospital. The fiesta included a dozen movies and a buffet of Italian cuisine. Evolving into an annual fête named the New Mexico Italian Film and Culture Festival, it has become the largest such gala in the state.

Patrizio-Steiner subsequently founded Italian Festivals of New Mexico (IFNM), a nonprofit organization to administer the event. The group's members are volunteers who work in support of children's causes through the promotion of Italian heritage and culture in New Mexico. A yearly *bocce* "bowling" tournament is also hosted by the organization.

AMAZING SERIES

Today I was very happy to get my copy of TBR in the mail. The article "National Socialism in America 1980-2002" was amazing.

Our movement has a very rich and vibrant history and I am so happy to read TBR's account of this. I was also very enthusiastic to see mention of James Mason's *Siege!* newsletter, which is probably one of the most influential publications among the youth of the current movement.

I'm sure in Part 4 you will talk about the notorious and influential Atomwaffen Division, which has revolutionized the modern National Socialist movement.

Brandon Russell
Maryland

TBR SHILLING?

I have now read parts 1, 2 and 3 of Karl Haemers's series on National Socialism and I am concerned that TBR is unwittingly shilling for the FBI's fake "White supremacist" movement. The National Socialist Movement (NSM) and the current National Alliance are, in my opinion, now both FBI front groups, and several of their officers I believe to be longtime FBI informants.

The FBI created the NSM in 1976 to target Matt Koehl of the New Order, who was legit. I believe every subsequent

Continued from page 77

leader of the NSM was also an FBI informant. Today, Jeff Schoep openly works with the FBI and so-called anti-hate groups to "expose" so-called racists and haters, and he has been doing this in plain sight for some time.

How many White nationalists (such as those in the Atomwaffen) are in prison because they didn't listen to me about guys I knew were federal informants? In addition, the FBI also wants to set up satanic cults. One man they recruited to lead one of these cults actually committed several of the crimes for which I was wrongfully convicted.

Also, I think you are wrong about how William Pierce got ahold of the National Alliance from Willis Carto. Willis never forgave Pierce for stealing that organization.

In short, TBR should not shill for most of these groups because they are FBI operations, as I can prove with the literally thousands of pages of FOIA documents I have in my possession.

ALL OUT ON DUGIN

Within the past couple of years since I discovered The Barnes Review, I have become a strong supporter of the publication. I view the work being done as excellent and much needed. There has been little I have found disagreement with, however, I strongly disagree with a podcast that Dr. Michael Raphael Johnson did with *TBR History Hour*.

My perception and interpretation of what Johnson was communicating via the podcast with John Friend titled "Dr. Matthew Raphael Johnson on Dugin, Multipolar World Order" was that he was essentially putting forward a defense and promotion of Aleksandr Dugin.

Allow me to point you toward the publisher of the best geopolitical analyses I know of, Brendon O'Connell. I do not agree with everything he says, however, his geopolitical analyses are superb. He has made many videos on how and why Vladimir Putin and Russia, in bed with Israel, are enemies of the West, specifically America. He has also provided brief arguments against Dugin which are worth watching.

For now, I wish to communicate the serious error I believe that TBR is making in allowing Dr. Johnson to show Dugin in a positive light.

Brendon has published videos showing Dugin to be a satanist. Many others have published content showing how Dugin is expounding a mindset that is geared toward undermining the West, specifically America. The "cabal" that is currently corrupting the world controls Russia as it does America. Hence, any talk that is anti-American and supportive of a foreign power or ideology is of serious concern

As Brendon has shown, this is the plan: "America bad, Russia good." This same cabal has taken over America, as well as Russia (1917). The difference is that America had a fresh, strong sense of freedom. This spirit of freedom was not so easy to push aside, hence why they have operated in the shadows to erode the West from within. The idea of a multi-polar world order is a Talmudic concept, designed to destroy the last stronghold of freedom. America needs to be fixed, not discarded by it's own.

Regarding the podcast, Johnson sounded like a propagandist. Johnson insulted those who speak against Dugin as "ignorant" and other emotional terms. He seems to talk at length without actually saying anything meaningful. If I were a novice listener, I would have had the impression that Dugin is a great guy and that anyone who denounces Dugin should be ignored.

Johnson says Russia and China have arisen as the only sources of opposition to the "American Empire." Is this a good thing or a bad thing, Dr. Johnson?

Do we need to fix America, or support foreign states to destroy America? Just after the 39-minute mark, Johnson says people sound stupid talking about Russian history. He also takes a dig at "amateur historians" and says British machinations are to blame for WWI. As Niall Ferguson's book *Empire: How Britain Made the Modern World* states, every stage of the "British" empire was supported and funded by the Rothschilds.

Johnson says the Soviet revolution was a Western idea. Really? It wasn't a Pharisaic Talmudic idea? Johnson seems to be blaming the Ukrainian war on America, but is it not orchestrated, much like Syria and other wars, by the Pharisaic Talmudic bankers/Rothschilds etc.?

Johnson also says that no one trusts the American elite. Well, who are the American elites? A Pharisaic Talmudist such as Henry Kissinger or Irish Catholics akin to John F. Kennedy or Ron Paul?

Mr. Friend then tells us that Dugin wrote an article about an alien Jewish elite that has taken over America. This is dog whistling intended to gain support of Americans who are aware of the problem with Pharisaic types who have taken over America. The intention is to have these Americans spend their energy supporting a foreign character instead of working on a local solution.

You must realize that characters like Dugin and Putin talk out both sides of their mouth. I've seen Putin saying things that I totally agree with. Then, I have seen Putin speak in support of Black Lives Matter. This is the game. Trick as many people as possible to support their enemy. Russia and Israel are actively working to destroy America. If they can turn Americans away from supporting America, then what opposition will they have in achieving the world government they seek?

Apologies if this comes across as an attack or the like on The Barnes Review. I send you my feedback because I very much enjoy and support The Barnes Review and do not wish to see this great publication steered toward a Communist narrative, or any anti-American/anti-Western narratives.

UKRAINIAN NAZIS

It is quite interesting to research the background of the Ukraine-Russia conflict. Though many say the real conflict only goes back to the expansion of

NATO to Russia's borders, I believe it goes back even further. For instance, why were Gen. Andrei Vlasov and his Russian Liberation Army sent back to Moscow to be tortured and killed? In fact, what he was accused of by the Soviets was not nearly as bad as what the Ukrainian "Nazis" did as far as extrajudicial murders.

Yet these Ukrainian "Nazis" were all recruited and protected by the CIA.

Many came to Canada, the United States and Western Europe to be college professors at elite universities.

Everyone knows about John Demjanjuk, the innocent Ukrainian car mechanic who was unjustly arrested, deported and persecuted by the U.S. government and its allies. Luckily, Rep. Jim Traficant of Ohio took up his case and saved him the first time.

Even if Demjanjuk had been a WWII concentration camp guard, anything he did pales in comparison to what the Ukrainian "Nazis" did. The most famous example would be Mykola Lebed. He was among those tried, convicted, and imprisoned for the murder of Polish official Bronisław Pieracki in 1934. The court sentenced him to death, but the state commuted the sentence. He escaped when the Germans invaded Poland in 1939. As a leader of OUN-B, he was deemed responsible for the massacres of Poles in Volhynia and eastern Galicia. In short, Lebed was not just following orders—he gave the orders.

Yet he was protected by the CIA until the day he died in 1998.

According to John Loftus in *America's Nazi Secret*, Lebed was the highest-ranking Nazi official to enter the United States. His files are still classified.

Demjanjuk, on the other hand, was completely innocent but of no great value to the CIA.

Zionist groups control America like a light switch. If Zionist groups wanted to have Lebed prosecuted, they could simply have snapped their fingers.

The reason that I believe Vlasov and the Russian Liberation Army were extradited and not Ukrainian war criminals like Lebed is because the U.S. really never wanted Russia freed from Communism or Nazism.

The decadent West wants Russia completely dead.

I have read articles by senior European Union (EU) officials saying that even anti-war, draft-dodging Russians should be barred from entering the EU.

In other words, by saving these Ukrainian Nazis like Lebed, Andriy Melnyk, Donstov and others, the U.S. and NATO have been grooming Ukraine to be used against Russia for the past 80 years.

All these elite universities—like the Harvard Ukrainian Research Institute that opened in the 1950s—are all connected to the CIA.

For more, please read Peter Anders Rudling's article "The OUN, the UOA and the Holocaust," published by the Carl Beck Papers in Russian and Eastern European Studies in 2011.

UPRISING

I very much enjoyed the article in the July/August 2023 TBR about the various factions of French people rising up against their corrupt leaders in 1934. It does bear a strong resemblance to the January 6, [2021] events at the Capitol when Americans did the same.

That was not all about [Donald] Trump. That was, in my opinion, more about a huge number of people who feel they've been forgotten by the system and were just plain fed up with the government. Combine the lockdowns, riots, masks and business/school closures and I am surprised there wasn't a real, live "insurrection."

KHAZARS

In your article in the May/June issue of TBR titled "Genetics: The Triumph of Science Over Ideology," authored by renowned scholar Arthur Kemp, in the section "Khazar Theory," it is said that due to the "lack of an ancient or modern Khazar DNA pool with which to make a comparison," it is not possible to prove the Khazar origin of the Ashkenazi Jews. It seems a little strange not to find at least one ancient relic of such a big community who lived in the area of the Caspian Sea, Crimea and what is today called the Donbass.

If it is true that the Ashkenazi group has a much higher similarity to Sephardic and Middle Eastern groups, descendants of the ancient Jewish population living in Judea, there is a question about the period of time the "Ashkenazi" have lived in the Rhineland Valley—until A.D. 1200? What happened after that? Did they remigrate back to the east?

The problem is how to explain the large number of Jewish people living for centuries in Russia and Ukraine. What is their origin? Most of them, in modern times, have emigrated to either Israel or the United States. And what happened with the Khazars—those who adhered to the Jewish religion under their leader King Bulan around the 18th century? All of them have vanished with no traces being left behind?

Geneticist Noah Rosenberg asserts that although recent DNA studies "do not appear to support" the Khazar hypothesis, they do "not entirely eliminate it, either."

I think there is more to thoroughly research before we can clarify these questions

Dinu Fotescu
France

[There is always more research to be done on every topic, that is for sure. The DNA studies cited in that article merely indicate that: 1) There is no specific "Khazar" DNA. 2) If the Khazars were, as claimed, Turko-Mongolic, their remains would have higher amounts of Central Asian DNA in those alleged to be Khazars. In fact, what was found in Khazar remains was a high percentage of Semitic and European DNA and much lower percentages of Central Asian DNA. The closer individual Khazarians moved to Europe and intermixed with Whites, the more European DNA was found in the remains. DNA—mitochondrial etc., goes back millennia, and it appears that the inhabitants of Khazaria were originally Semitic, familiar with Jewish ways and related, as shown by the DNA, to populations from the Holy Land, not Central Asia. The fact that Hebrew was the natural language of the Khazars adds some credence to the conclusion that they are most closely related to and descendants of a displaced Semitic Mideast population.—Ed.]

Hoaxes, Homicides & Hysteria

Pale Horse Rider: William Cooper, the Rise of Conspiracy, and the Fall of Trust in America

A former naval intelligence worker, Milton Cooper published his manifesto *Behold a Pale Horse* in 1991. Since then it has gone on to sell hundreds of thousands of copies. According to the book, JFK was assassinated by his driver, AIDS is a government conspiracy, and the Illuminati is secretly involved to manage relationships with extraterrestrials. Cooper died in a shootout with Apache County sheriffs deputies in 2001, two months after Sept. 11, the year in which he had predicted catastrophe. By Mark Jacobson. Hardback, 384 pages, **$27**.

Secret Empires: How the American Political Class Hides Corruption and Enriches Family and Friends

Journalist Peter Schweizer explains how a new corruption has taken hold, involving larger sums of money than ever before. Stuffing money into a freezer has morphed into multibillion-dollar equity deals done in the dark corners of the world. An American bank opening in China would be prohibited by U.S. law from hiring family members of top Chinese politicians. A Chinese bank opening in America can hire anyone it wants. It can even invite the friends and families of U.S. politicians to invest in can't-lose deals. Donald Trump's children have made front page-news for their dicey transactions. The media has ignored the questionable deals made by those close to Obama, Biden, Kerry, and others who have been in the game much longer. Hardback, 318 pages, **$29**.

Strange Company: Military Encounters with UFOs in WWII

By Keith Chester. *Strange Company* is the first in-depth account of unconventional aircraft observed and reported by the military during World War II. It includes the reactions by military commands, their viewpoints, and theories as they struggled to make sense of the observations. *Strange Company* presents one of the greatest wartime mysteries, one that has been shrouded in ignorance for more than 60 years. And it suggests that while an immense 20th-century war was raging on Earth, there appeared to be something, from somewhere else watching us. Softcover, 320 pages, **$18**.

Filthy Rich: The Billionaire's Sex Scandal —The Shocking True Story of Jeff Epstein

By James Patterson. Jeff Epstein rose from humble origins to the rarefied heights of New York City's financial elite. A college dropout with an instinct for numbers—and for people—Epstein amassed his wealth through a combination of access and skill—and possibly even blackmail. But even after he had it all, Epstein wanted more. And that unceasing desire—especially a perverse taste for young girls—resulted in his stunning fall from grace. From Epstein himself, to the girls he employed as masseuses at his home, to the cops investigating the appalling charges against him, Patterson examines all sides of a case that scandalized one of America's richest communities. Epstein's "little black book" contained contact numbers for Hollywood stars and powerful people like Bill Clinton, Tony Blair, Prince Andrew, Kevin Spacey, Dustin Hoffman, Michael Bloomberg and many more. Currently, Epstein's "madam" is in jail. Softcover, 304 pages, **$28**.

The Trayvon Hoax: Unmasking the Witness Fraud That Divided America

By examining Trayvon Martin's 750-page cell phone records, Joel Gilbert discovers that the key witness for the prosecution of George Zimmerman was a fraud. It was a different girl who was on the phone with Martin just before he was shot. Her recorded conversation with attorney Ben Crump ignited the public, and provoked the media to demand Zimmerman's arrest. Gilbert's research takes him through the streets of Miami, where he finds Trayvon's real girlfriend, the real phone witness. Gilbert confirms his revelations with forensic handwriting analysis and DNA testing. Gilbert then reconstructs the true story of Trayvon Martin's troubled teenage life and tragic death. Softcover, 272 pages, **$17**.

Chaos: Charles Manson, the CIA and the Secret History of the Sixties

By Tom O'Neill and Dan Piepenbring. Twenty years ago, when journalist Tom O'Neill was reporting a magazine piece about the Manson murders, he worried there was nothing new to say. Then he unearthed shocking evidence of a cover-up behind the "official" story, including police carelessness, legal misconduct, and potential surveillance by intelligence agents. Every discovery brought more questions: Who were Charles Manson's real friends in Hollywood? How far would they go to hide their ties to drugs and prostitution? Why didn't law enforcement act on the many chances it had to stop him? And how did Manson—an illiterate ex-con—turn a group of peaceful hippies into remorseless killers? Softcover, 528 pages, **$19**.

The True Story of the Bilderberg Group

Delving into a world shrouded in mystery and impenetrable security, this book from Daniel Estulin provides a factual account of the annual meetings of the world's most powerful people—the Bilderberg Group. Since its inception in 1954, the Bilderberg Group has been comprised of European ministers, U.S. presidents, and the wealthiest CEOs from across the world, all coming together to discuss the economic and political future of humanity—and how they can profit. No information on the discussions they have—which have ramifications for the citizens of the world—have ever been released. In several instances, Estulin put his own life on the line to do what no one else besides AFP's Jim Tucker has ever done: He learned what was being said behind the closed doors of the opulent hotels and made it available to the public. Softcover, 416 pages, photo and insider document section, indexed. **$25**.

New World Order Assassins

By Victor Thorn. Here are the uncensored facts about the highest-profile murders in world history. *New World Order Assassins* delves into the facts that have been suppressed by official sources and the mainstream media for decades. The strange truth about Charles Manson and the Son of Sam, the role of the cultish and influential Process Church, political activist John Lennon and the many enemies he made during his musical and political activism career, the death of Princess Diana, the Port Arthur massacre, "suicided' Marilyn Monroe, Mary Pinchot Meyer—JFK's acid-loving and murdered mistress, Kent State, MLK and Malcolm X, Squeaky Fromme and the Rockefellers, John Hinckley's high-level connections, Sirhan Sirhan and RFK, more. Softcover, 280 pages, **$25**.

Conspireality

By Victor Thorn. In these pages you'll learn how the Patty Hearst kidnapping and the Symbionese Liberation Army, a CIA-financed remote viewing project, the Zodiac serial killings, a barbaric prison experiment and widespread cybernetic mind-control programs can all be tied to one geographic locale in California. By book's end, as readers climb back out of the maze, they realize that, akin to the ongoing myth of "lone nut assassins," all of these events—and many more in history—are interconnected. Softcover, 237 pages, **$25**.

Hate Crime Hoax: How the Left Is Selling a Fake Race War

If you believe the news, today's America is plagued by an epidemic of violent hate crimes. But is that really true? In *Hate Crime Hoax*, Professor Wilfred Reilly examines over 100 widely publicized incidents of so-called hate crimes that never actually happened. With a critical eye and attention to detail, Reilly debunks these fabricated incidents—many of them alleged to have happened on college campuses—and explores why so many Americans are driven to fake hate crimes. We're not experiencing an epidemic of hate crimes, Reilly concludes, but we might be experiencing an unprecedented epidemic of hate crime hoaxes. Hardback, 256 pages, **$29**.

(For international S&H rates, please email Bookstore@AmericanFreePress.net.)

Limited Quantity Hard-to-Find Books from TBR Book Club

Once they are gone, they are gone! Call to Reserve.

Darwinism and Race Progress—By John Berry Haycraft. A superb treatise in evolution and eugenics from one of Britain's leading professors of physiology and discoverer of the anti-coagulant hirudin. Professor Haycraft discusses race, Darwin's Law of Selection, Galton's work, and the hereditary nature of diseases, insanity, alcoholism, crime and racial degeneration. Softcover, 192 pages, $19. **7 in stock!**

Der Untermensch / The Underman in English—By Jupp Daehler. A quality digital copy taken from the original. Contains all original illustrations and the first completely accurate English translation. First issued in 1942 by the SS head office under the direct orders of Himmler, *The Underman* has ever since been portrayed as "anti-Slavic," "anti-Russian," and "anti-Jewish." Only the third allegation has any truth to it. The others were postwar propaganda. Softcover, 8.5 x 11, 52 pages, $14. **10 in stock!**

Essays in Eugenics—By Francis Galton. Sir Francis Galton was instrumental in the formulation of "eugenics," which seeks to improve the human stock and prevent the degeneration of genetic potential. Galton invented the phrase "nature versus nurture."This book consists of a number of lectures delivered by the author during the early part of the 20th century, all dealing with important topics related to the betterment of human existence through eugenics. Softcover, 116 pages, $15. **7 in stock!**

Commissary to the Gentiles: A Jew Answers Anti-Semitism—By Marcus Eli Ravage. A book which will shock Christians, Jews and atheists alike. The Jewish author, angered by the "tide of rising anti-Semitism" in the early 20th century, pointed out that if people were looking for a "Jewish conspiracy" then they should not talk about Communism or Capitalism, but admit that Christianity—and post-Roman Western civilization—has a Jewish spiritual, historical, intellectual and moral basis. The afterword by Prof. H.E. James investigates the author's claims. Softcover, 78 pages, $13. **8 in stock!**

Free America: Six Speeches by the Leaders of the German American Bund, Madison Square Garden, February 20, 1938—By Fritz Kuhn, J. Wheeler-Hill, Rudolf Markmann, George Froboese, Hermann Schwinn and William Kunze. Includes "A Short Illustrated History of the German-American Bund" by Arthur Kemp. Softcover, 104 pages, $14. **9 in stock!**

Great Britain, the Jews and Palestine: How America Was Dragged into World War One by the Zionist Lobby—By Samuel Landman. This book reveals how the Zionists struck a deal with the British: In return for Britain handing Palestine to the Jews at the end of the war, the Zionists would use their power in America to bring that nation into the war against Germany. The deal, based on the fact that Palestine was under Ottoman Empire control—an ally of Germany during WWI—was that the Turks would be defeated and that its territories would pass into British control. Softcover, 33 pages. **No more left!**

SOLD OUT

On Martial Arts, Zen, and the Blue-Eyed, Red-Bearded Barbarian—By Ali Aliabadi. Who was the founder of Shaolin kung fu? Was Zen Buddhism created by a Japanese sage? What role did Nordics play in the formation of Far Eastern civilization? This remarkable essay draws together considerable evidence that the founder of Buddhism, martial arts and the Zen philosophy was an Indo-European wanderer into the Far East. Drawing on original descriptions and writings from Asia, the author shows that Buddha was first described with Nordic features. Softcover, 37 pages, $10. **9 in stock!**

Original European Religions Volume X: Valhalla and European Traditions—DNA, history and archeology have shown that the European people have existed for around 40,000 years, of which Christianity has only been the dominant religion for less than 1,000 years. Read the most famous stories from the Norse Gods and of how they directly influenced the legend of Holy Roman Emperor King Barbarossa, Vitellus, Roman Prefect of the Lower Rhine, the Cheru sword,

the slaying of Attila the Hun, the legend of the Lorelei of the Rhine, the Rhine Gold, the origin of Yule, and more. Softcover, 204 pages, $20. **9 in stock!**

Racial Realities in Europe—By T. Lothrop Stoddard. A sweeping survey of the physical characteristics and geographical placement of the main European sub-races at the beginning of the 20th century. Now updated with a 32-page appendix and a fully updated DNA map of Europe, compiled by Arthur Kemp from more than 70 scientific papers and studies into an easy-to-read format with charts and tables. This appendix reveals the exact proportions of European and non-European DNA in each European nation. Also includes a section on what DNA reveals about the longstanding "Khazar" theory. Softcover, 236 pages, $25. **8 in stock!**

Religion for Infidels—A tour de force from Anthony Ludovici which addresses one of his favorite subjects: the issue of what he sees as the negative role of Christianity in the development of Western philosophy and morals, and how the opposite position—outright atheism—is equally unacceptable. Instead, as he details in this work, a mean must be sought which encompasses reality, a lack of superstition, and a spiritual worldview which encourages personal health and well-being. Softcover, 265 pages, $24. **8 in stock!**

The Epic of Gilgamesh. The Home of the Indo-Europeans: An Investigation Based on Language and History—Translated by R. C. Thompson. *The Epic of Gilgamesh* is among the earliest surviving works of literature, with the earliest versions dating from around the Third Dynasty of Ur in early Sumeria (2150-2000 BC). Preserved in Cuneiform, the epic was retold over the centuries, and the most complete version was discovered in the ruins of the library palace of the 7th-century B.C. Assyrian King Ashurbanipal. Taken up into Judaism, and then into Christianity, the book of Genesis copies almost every detail of the flood from this earlier Sumerian work. The epic tells the story of the king of Uruk, Gilgamesh, and his adventures with his erstwhile foe and then friend Enkidu. Together they journey to the Cedar Mountain to defeat Humbaba, its monstrous guardian, then they kill the ferocious Bull of Heaven, which the goddess Ishtar sends to punish Gilgamesh for spurning her advances. Softcover, 82 pages, $11. **9 in stock!**

The Lays of Ancient Rome—Lord Thomas Babington Macaulay's classic collection of four lays (epic poems) describe heroic episodes from ancient Roman history. They are a delightful literary adventure which allow the reader to enjoy a high point in European culture while learning some incredible details of Roman history. These masterpieces of literary writing were so highly regarded that they were required reading in British schools for more than 100 years—until they were deliberately eradicated. Softcover, 107 pages, $11. **9 in stock!**

The Nibelungenlied: Translated Into Rhymed English Verse—The original was written as a poem in 2,400 stanzas, divided up into 39 Aventiuren ("adventures"). The *Nibelungenlied* ("The Song of the Nibelungs") is an epic poem originally written in Middle High German around the year 1180. It tells the story of the dragon-slayer Siegfried at the court of the Burgundians, how he was murdered, and of his wife Kriemhild's revenge. This edition has been translated into poem format with the exact meter of the German original. It includes a complete background introductory essay by the translator in which much fascinating detail of the epic is revealed. Softcover, 324 pages, $22. **10 in stock!**

The Origin and Deeds of the Goths—Translated by Charles C. Mierow. *De origine actibusque Getarum*, or the *Getica*, is a summary of the now lost account by Cassiodorus of the origin and history of the Gothic people. It tells of the great battles between the Goths and Romans, of the First Great Race War against Europe waged by the Huns under Attila, the Gothic involvement in the great sacking of Rome—and much, much more. Softcover, 132 pages, $15. **9 in stock!**

More Politically Incorrect Books from TBR

Mein Kampf: The Stalag Edition

BANNED! By Adolf Hitler. This is the only complete, unabridged, and officially authorized English translation ever issued by the Nazi Party, and is not to be confused with any other version. Translated by a now-unknown English-speaking Nazi party member, it was printed by the Franz Eher Verlag in Berlin for the Central Press of the NSDAP in limited numbers during the years 1937 to 1944. Most copies were distributed to the camp libraries of English-speaking POW camps, and became known as the "Stalag" editions (Stalag being a contraction of the German word Stammlager, POW camp) because they all carried a camp library rubber stamp on the title page. Only a handful of copies survived the war, and the text contained in this edition has been taken directly, without amendment, from one of these extremely rare editions. This official translation is not to be confused with any other heavily edited, abridged and ultimately unauthorized editions. The Murphy and Mannheim editions both left out major sections of text, and contained badly translated and almost unintelligibly long sentences. In sharp contrast, the only authorized "Stalag" edition contains none of these complicated and unnecessarily confused constructions, and is extremely easy to read, as anyone familiar with the other versions will immediately notice. Most importantly, this only authorized edition contains the full text of the original German—and none of the deliberately-inserted racial pejoratives used in the Murphy and Mannheim versions (words which Hitler never actually used in the original). Softcover, 606 pages, #675, **$40**.

Alfred Rosenberg: Memoirs

BANNED! Here are the sensational memoirs of Alfred Rosenberg, the Third Reich's leading ideologue, minister of the Occupied Eastern Territories, and author of the *Myth of the Twentieth Century.* Written while in prison at Nuremberg, these memoirs contain a no-holds barred overview of his political life, from the time of his earliest involvement in the NSDAP, right up to the Nuremberg Trials. Here the reader will find astonishing revelations on the Jewish Communist Revolution in Munich; the spirit behind National Socialism; how the Storm Troopers were organized in response to Communist violence; Christianity and National Socialism; the reason for Rosenberg's exclusion from Hitler's first cabinet; racial respect; a prediction of the racial dissolution of America; the euthanasia program; Oswald Mosley's mistake; the Strasser brothers; Himmler's Ahnenerbe; Röhm; Axmann and the Alpine Redoubt; the artistic side of Hitler; art and architecture; why the author believed Hitler had rejected Christianity; Hitler's Russia mistake; Rosenberg's attempts to stem anti-Slavic attitudes; and Rosenberg's political testament, in which he outlined how a future democratic, National Socialist state should be constructed. This new edition contains over 200 explanatory footnotes and is fully indexed. Softcover, 244 pages, #707, **$25**.

Might is Right

NEW! By Ragnar Redbeard. Here is the full unedited version. This book, once described as "surely one of the most incendiary works ever to be published anywhere" is a no-holds-barred philosophical venture into the meaning of the Jewish origins of Christianity, of nature over nurture, might over morals, of power over weakness, the right of the strongest to rule, the survival of the fittest and the belief that the world is governed by force, not by religious or moral creeds. It is a book which, even a century after its first publication, still stirs huge debate. The reader is likely to be staggered, shake his or her head in agreement, be dumfounded or laugh out loud—even in anguish—from page to page. It is a call to man's primeval instinct of survival, of struggle and of the power of life over death. Even the great epics of antiquity are glorifications of inequality: inequality of mind; inequality of birth, of courage, of condition. Annotated, with a new introduction. Softcover, 199 pages, #971, **$20**.

The Myth of the Twentieth Century

BANNED! Regarded as the second most important book to come out of Nazi Germany, Alfred Rosenberg's *Der Mythus des zwanzigsten Jahrhunderts* ("The Myth of the Twentieth Century") is a philosophical and political map outlining the ideological background to the Nazi Party and maps out how that party viewed society, other races, religion, art, aesthetics and the structure of the state. The "Mythus" to which Rosenberg refers is to the concept of blood, which "unchains the racial world-revolution." Rosenberg's depiction of the world racial situation and the demand for racially homogenous states as the only method to preserve individual world cultures is fascinating. It is likely that he was hanged at Nuremberg because of this book. Softcover, 6 x 9, 463 pages, #417, **$35**.

The Nameless War

NEW! By Archibald Maule Ramsay. A dramatic historical work that exposes the behind-the-scenes Jewish lobby in Britain which forced that country into war in 1939 against Nazi Germany, written by a leading Member of Parliament for the British Conservative Party and confidant of then Prime Minister Neville Chamberlain. The author—imprisoned without trial by the Churchill government for opposing the war—starts with an overview of the Jewish lobby's involvement in revolutionary activity in Britain, France and Germany, and then moves on to discuss the Jewish declaration of war against Germany in 1933. Ramsay also reveals many behind-the-scenes details about how the build-up to the war was engineered, the Churchill government's use of the systematic mass bombing of civilians as a means of spreading terror, and of the backdoor machinations to bring the United States into the war. Ramsay then discusses his own detention under the infamous "Regulation 18B" and its aftereffects. There has long been an unofficial ban on books dealing with what Ramsay called "The Nameless War," the conflict which has been waged from behind the political scenes for centuries, which is still being waged and of which very few are aware. This book is the result of the personal experiences of this public figure who, in the course of duty, discovered firsthand the existence of a centuries old conspiracy against Britain, Europe—and, fact, the whole of Christendom. *The Nameless War* reveals an unsuspected link between the major revolutions in Europe—from King Charles I to the abortive attempt against Spain in 1936. One source of inspiration, design and funding is shown to be common in all of them. These revolutions and the world war of 1939 are seen to be integral parts of one and the same master plan. Softcover, 196 pages, #972, **$20**.

The Place of Prejudice in Modern Civilization and Other Selected Writings

NEW! Scottish born Sir Arthur Keith was Britain's most famous anthropologist. A president of the Royal Society and president of the Royal Anthropological Institute, Sir Arthur was knighted for his services to the academic world in 1921. Collected here are six of his most important works which summarize his studies and conclusions on the evolutionary pressures which shaped the origin of races, the differentiation between racial types, and the unique position of Jews within the world's racial framework. The six writings contained in this collection are: "The Place of Prejudice in Modern Civilization"; "On Certain Factors Concerned in the Evolution of Human Races"; "Nationality and Race from an Anthropologist's Point of View"; "The Peoples and Races of Europe"; "The Jews as a Nation and as a Race"; and "Anti-Semitism and Zionism." The section on Zionism, written in 1947, predicts that the Zionist colonization of Palestine would result in a "long and bloody war" between Arabs and Jews. Softcover, 171 pages, #973, **$17**.

Victory or Violence: The Story of the AWB of South Africa

BANNED! The Afrikaner Weerstandbeweging (AWB) and its leader Eugene Terre'Blanche have become famous worldwide as the face of militant Afrikaner nationalism. This is the true story of the origins of that movement, its ideology, activity, membership—and, finally, its dramatic activities, which included the most violent and far-reaching terrorism and sabotage campaign in South African history. So serious was the AWB's campaign of violent resistance against impending African National Congress (ANC) rule, that the then-government was forced to declare a state of emergency in many parts of the country as AWB sabotage squads targeted power networks, railway lines, ANC and National Party offices—and more—in a wave of attacks that made all of the ANC's previous efforts at "armed resistance" pale into insignificance. In this book, historian Arthur Kemp details the early founding of the AWB, the backgrounds of its leading characters, the increasing militancy that accompanied the then-government's political reform program, the development of the movement's ideological basis, and, finally, the turn to violent resistance as the program to hand over control of the country to the ANC accelerated. No understanding of South Africa's history is complete without this largely eyewitness account of hard-line Afrikaner resistance to the end of White rule. This 2021 edition contains three new chapters and 153 rare and exclusive illustrations and photographs. Softcover, 376 pages, #612, **$34**.

Ordering

Three Radio Shows You Just Can't Miss!

TBR History Hour

Listen to provocative interviews at www.BarnesReview.com 24 hours a day.

TBR Radio Network is back on track with **TBR History Hour** hosted by Assistant Editor John Friend! John has taken over as host of **TBR History Hour** since the untimely death of Revisionist Pastor Dr. Edward DeVries. **TBR History Hour** is a podcast program featuring special guests as well as some of the great contributors to **THE BARNES REVIEW** history magazine. Politically incorrect guests have included TBR's longtime Executive Editor Paul Angel, writer and TBR contributor Karl Haemers, TBR Board of Contributing Editors member Harry Cooper, TBR's regular French-Canadian contributor Rémi Tremblay, free speech advocate Henry Herskovitz, "thought criminals" Alfred and Monika Schaefer, and nationalist historian Dr. Matthew Raphael Johnson, also a member of TBR's Board of Contributing Editors and the former editor of TBR, and many more.

All podcast programs may be accessed at our official website: **www.BarnesReview.com.** Check out the archives and stay tuned for more unique podcast programs from your favorite TBR writers!

The AFP Report

Listen to provocative breaking news interviews 24 hours a day at www.AmericanFreePress.net.

The AFP Radio Network is going strong once again with **The AFP Report** hosted by longtime AFP contributor John Friend, who is also the host of **TBR History Hour**.

The AFP Report is a podcast program featuring special guests as well as regular contributors to AMERICAN FREE PRESS—America's last real newspaper. Some of our many provocative guests include AFP contributors Dr. Kevin Barrett, bestselling author Donald Jeffries, former CIA analyst Philip Giraldi, longtime Bilderberg sleuth and on-the-scene reporter Mark Anderson, and award-winning historian and newsman Mike Walsh. Special guests appearing on the podcast include attorney Glen Allen of the Free Expression Foundation, Christelle Néant of "The Donbass Insider," Tony Gosling, an independent journalist based in the United Kingdom, and Phil Tourney, a U.S. Navy veteran and survivor of the Israeli assault on the USS *Liberty*, among many others.

All podcast programs may be accessed at AFP's official website: **www.AmericanFreePress.net**. Check out the archives and stay tuned for more unique podcast programs featuring your favorite AFP contributors!

The Political Cesspool

Tune into THE POLITICAL CESSPOOL every Saturday from 6-9 p.m. Central!

The Political Cesspool is an award-winning LIVE radio broadcast that can be heard on its flagship station AM 1600 WMQM in Memphis, Tennessee, and via the Liberty News Radio Network's internet stream. Hosted by James Edwards, one of the leading pro-White advocates and Southern nationalists in America. His **Political Cesspool radio program** offers hard-hitting news, history and analysis every weekend not found anywhere else. Featuring regular guests and outspoken contributors, the insights and perspectives presented on **The Political Cesspool** are thought-provoking and refreshingly politically incorrect. Co-host Keith Alexander, with his encyclopedic knowledge and expansive historical recall, adds much to the discussion every week, and has become a fan-favorite and indispensable contributor.

Visit www.ThePoliticalCesspool.org for more details and program archives! **We also encourage you to support the efforts of Edwards and Alexander with a financial donation.** You have rarely seen TBR urge you to donate to other organizations. So many other groups end up using the money in unproductive and sometimes selfish ways. We 100% endorse the efforts of Edwards and Alexander and can assure you that any contributions will go to spreading the word and increasing their outreach, not their bank accounts.

Inspire future generations in a few short minutes

Please remember TBR in your estate planning decisions

REMEMBERING TBR IN YOUR WILL

During your life you have made many decisions that have helped people, causes, crusades and organizations that reflect your most important values. You've been good about using your resources wisely to help further the goals of your favorite organizations. One of those organizations is The Barnes Review.

Here's your chance to make sure that your generous commitment is transformed into an everlasting inspiration for others. And the good thing is, you can choose what people will remember about you by how you structure your legacy.

To ensure TBR survives long into the future—further into the future than any of us will—we suggest you consider remembering The Barnes Review in your will or trust.

It's not as complicated as many people believe. In fact, it can be done in a few minutes. TBR's Legacy Department specialists are ready to assist if you need help. Call us at 202-547-5586 and tell the operator you'd like to talk to someone about remembering TBR in your will or trust. TBR has plans for tax-deductible charitable giving as well. For a simple, free brochure, write TBR Legacy Department, P.O. Box 550, White Plains, MD 20695.

MONTHLY CREDIT CARD DONATIONS

And, if you'd like an easy way to support the efforts of TBR before your passing, we have a great idea. Every month TBR is set up to automatically deduct whatever amount you choose from the credit card of your choice—and your subscription will never expire! Donate $5, $10, $20 or more every month—no hassle. All you need to do is call 1-877-773-9077 toll free to get the ball rolling. Our operators can take care of the rest.

Bringing History Into Accord With the Facts in the Tradition of Dr. Harry Elmer Barnes

THE BARNES REVIEW

A JOURNAL OF POLITICALLY INCORRECT HISTORY

VOLUME XXIX NUMBER 5 • SEPTEMBER / OCTOBER 2023 • WWW.BARNESREVIEW.COM

A Revisionist Analysis of Third Reich Book Burnings

Ready for Some Real History?

THE BARNES REVIEW magazine is dedicated to bringing history into accord with the facts—facts most Americans are not getting …

REAL history is under attack. As you read this, fake history is being written by the minions of the "woke" elite in the same way they create fake news. Our once great heroes are now oppressors. The creators of Western civilization are genocidal colonizers. Our own Founding Fathers are reduced to no more than cruel and bigoted slavemasters. Worse, certain topics remain beyond the pale of discussion at all. This "new history" is a compulsory narrative, the very bedrock of politically correct Marxist propaganda. He who controls the present dictates the past—and the future. But there is a cure for this sickness.

In THE BARNES REVIEW (TBR) magazine, you get uncensored facts, free from the poison of political correctness. You'll see vignettes of man's history from the Paleolithic era to the present, explore ancient enigmas, learn about forgotten civilizations, get a view from "the other side" about our most costly wars and read insightful analyses of the momentous events that have shaped our world.

No cause is more important to the survival of civilization than the presentation of REAL history. Our purpose—to bring history into accord with the facts—was enunciated by our namesake, Dr. Harry Elmer Barnes. It was Barnes who began the crusade to accomplish this goal. And today, we need truth more than ever. Your subscription to TBR supports this vital work so we can help prevent the day when the purposeful distortion of history produces its certain result—the nightmarish mental tyranny dreamt of by George Orwell, a scenario now approaching fruition.

Subscribe to TBR today. One year inside the U.S. (six print issues) is $56; two years (12 print issues) are $88. Canada and Mexico are $75 per year. All other nations are $90 per year. We also have a PDF option. A one-year PDF subscription—*TBR Online*—is just $36 per year. Download the PDF on your electronic device anywhere in the world—a great option for foreign subscribers. You can also print the PDF issue at home if you prefer a hard copy. (Need email address for *TBR Online*.) To subscribe, write TBR, P.O. Box 550, White Plains, MD 20695 or call 1-877-773-9077 toll free, M.-Th. 8-4 ET, to charge. See also BarnesReview.com.

Race and Racial Differences: A Handbook for the 21st Century

How DNA Shapes Mankind Into Seven Major Races

The first honest, updated DNA/geneological study done on the human race in 50 years. With 64 photographs, 16 illustrations, seven maps, six tables, and 11 explanatory charts.

By Arthur Kemp B.A.

Race is real, it is biological in nature, and it is shaped and determined by genetics alone. This book is the first to conclusively show exactly how races are physically and psychologically shaped by individual genes.

Using data and references from dozens of highly reputable scientists and journals, this fully referenced work starts with an overview of the development of the study of race, from the earliest times up to the very latest advancements in DNA analysis.

From there, it provides a comprehensive yet easily understandable overview of how human DNA works, which is vital to any understanding of how genes, at a Single Nucleotide Polymorphism (SNP) level, are responsible for shaping individuals.

When large numbers of people share similar SNPs, they form distinct groups which manifest themselves as "races."

Human DNA is made up of three major components: Y-chromosomes, mtDNA (which is inherited unchanged through the male and female lines),

and autosomal DNA. When these three components are plotted according to their geographic locations, they dramatically divide into seven distinct regions. Each region clusters according to genetic similarity—the classic definition of race.

This science of genetic clustering is used by all the "home DNA testing kit" companies to provide "ancestry and origin" results. It provides unequivocal proof of the biological existence of race, and definitively destroys any claims that race is a "social construct."

This work builds on the seven regions reality by probing deeper and revealing the exact genes and SNPs—by name and location in the chromosomes—which determine the physical differences we see before us as racial types.

Then the process whereby these genes are unequally distributed among the seven major regions is discussed—and how this differentiated genetic distribution has created different races.

In this way, the genes responsible for eye color, hair color, hair texture, skull shape, facial features, skeletal structure and, finally, psychology and intelligence are all individually named, leaving no doubt as to the genetic basis of race.

The seven different races are then named. Then, in a first for this century, these seven major races—and all their subgroups—are reviewed in an illustrated racial typology section which lays bare the vast genetic diversity of mankind.

Finally, the book ends with a definitive, fact-based refutation of the five major race-denial claims.

There is literally no other book on the topic of race like this in the world. It is a handbook on race, DNA, and racial typology for the 21st Century.

Softcover, 194 pages, #959, $22 minus 10% for TBR subscribers plus $5 S&H inside the United States from The Barnes Review, P.O. Box 550, White Plains, MD 20695. Call toll free at 1-877-773-9077 to charge, Mon.-Thu. 8-4 ET or purchase online at www.BarnesReview.com.

New book from TBR BOOK CLUB explains disturbing modern trend …

The Transgender-Industrial Complex

Author Scott Howard exposes the actors financing the institutionalization of transgenderism. Behind the medical research into dangerous sex-change operations for children, pride parades and drag queen story hours is a mountain of money. Sex education, the homosexual and feminist precursor projects, and the global propaganda are all pushed and paid for by very wealthy and well-connected people with motive, will, a lust for money and a complete disregard for the people whose lives they are destroying. Howard demonstrates that the transgender phenomenon is not the grassroots movement its advocates want you to believe. The push for gender madness is in fact a racket.

Impeccably sourced and researched, *The Transgender-Industrial Complex* pulls the mask off the complex network of influential groups responsible. Howard takes a deep dive into the murky depths of the big money behind "Big Gay," exposing how the concept gained such recognition, why almost every corporation is embracing it, why the vast majority of media outlets refuse to expose the truth as well as the goals of the people behind it. Wide-ranging, specific, advanced and accessible, *The Transgender Industrial Complex* is essential reading for anyone who wants to understand why every institution with power, and many without, are uniform in their inversion of reality on this "faddish" subject. Softcover, 447 pages, #992, **$30** minus 10% for TBR subscribers plus $5 S&H inside the U.S. from The Barnes Review, P.O. Box 550, White Plains, MD 20695. Call toll free at 1-877-773-9077 to charge, Mon.-Thu. 8-4 ET. Purchase also at www.BarnesReview.com.

Ritual Murder Was Real?

Outlandish accusations or outlandish crimes?
The court trials, evidence and witness accounts . . .

Jewish Ritual Murder: An Anthology —Volume 1

Volume One of the two-volume **Jewish Ritual Murder Anthology Series** begins with Julius Streicher's *Der Stürmer Special Ritual Murder* issue and continues with *Cardinal Lorenzo Ganganelli's Report*, Walsh's *Isabella of Spain*, Neophytos's *A Testimony of Ritual Murder* and I.I. Lyutostansky's *On the Use of Christian Blood by the Jews*, with a few smaller items of interest. **Volume One:** Softcover, 467 pages, #933, indexed, **$30.**

Jewish Ritual Murder: An Anthology—Volume 2

Volume Two of the two-volume **Jewish Ritual Murder Anthology Series** contains: *My Irrelevant Defence* by Arnold Spencer Leese, *A Short Demurrer* by William Prynne (1600-1669), two articles from *La Civiltà Cattolica*, a fragment from *The Brothers Karamazov* by Dostoyevsky, *Murdered by Jews* by Desportes—an account of the murder of a Christian boy in Damascus—and two articles by Harold Covington. The volume concludes with a translation of *Jewish Ritual Crime* by Albert Monniot. **Volume Two:** Softcover, 424 pages, #934, **$30.**

Both JRM Anthology Volumes as a Set: $50—#935.

A Memorandum on Ritual Murders

One of the most famous ritual murder trials occurred in the Russian town of Velizh in the early 19th century after the mutilated and exsanguinated corpse of a little Christian boy had been found in the forest. Although the Jewish culprits would be eventually acquitted, the ritual nature of the murder would still be firmly established. That trial is described in detail, along with many other cases of ritual murder. Written in 1844 by V.I. Dal, famed for his mammoth explanatory dictionary of the Russian language. Dal told the truth here because no one could censor him. In czarist Russia, one could speak freely on this subject, which is no longer the case in the present-day "democratic" Russian Federation. Softcover, 141 pages, indexed, #937, **$20**.

The Murder of Andrei Yushchinsky

By G.G. Zamyslovsky. Shortly before World War I, the Russian Empire was shaken by the brutal murder of Andrei Yushchinsky, a 13-year-old boy whose exsanguinated body, bearing all the traces of ritual murder, was found in March 1911 on the outskirts of Kiev. The ensuing trial, held in the autumn of 1913, attracted wide attention not only in Russia but also in Europe—and even the United States. Mendel Beilis was the ony defendant. Although he was acquitted by the jury, the same verdict also insisted it was a ritual murder, one committed in a Jewish brick factory. Also included in the book is the expert opinion of Roman Catholic priest I.B. Pranaitis. Softcover, 486 pages, #940, **$35**.

The Life & Miracles of St. William of Norwich

Was an innocent boy in 12th-century England brutally murdered by bloodthirsty fanatics? This book is the full manuscript of Benedictine monk Thomas of Monmouth who, in A.D. 1173, chronicled the murder of William of Norwich. Thomas claimed William, a 12-year-old tanner's apprentice, had been ritually murdered by Jews in contempt of the Christian faith. It's the first such account, specifically that of Jewish ritual murder of a child, in the historical record. This edition is complete and unabridged as translated by Cambridge academicians Jessopp & James in 1896. Softcover, 170 pages, indexed, #939, **$20**.

One of the Most Popular Holocaust Books Ever Composed Is Back in Stock in a New Sixth Edition!

The Six Million: Fact or Fiction?

Revised, edited, updated, and expanded, this work is without a doubt the single most important Revisionist examination of the legend of the "Six Million" Holocaust as yet published. Just a few of the amazing revelations contained in this sixth edition include:

• Zionists and Nazis cooperated before the war on writing Germany's racial laws—and in the setting up of Jewish settlements in Palestine;

• Zionists offered to fight for Germany against Britain in WWII;

• Nazi policy was first aimed at encouraging Jews to emigrate, and then, after the war broke out, to evacuating them east of the Urals;

• Official German records show that there were 4.5 million Jews under Nazi control, and, of that number, 4.3 million lodged claims as "Holocaust victims" after the war;

• The Soviet Union used torture to produce the lion's share of "confessions" extracted from Germans to support the "extermination" allegations;

• The shocking lies and distortions contained in the two Demjanjuk trials;

• The Jewish lead prosecutor in the "Einsatzgruppen" trials publicly admitted to having witnessed torture and personally used death threats to extract confessions from German prisoners;

• Exactly what Adolf Eichmann confessed to;

• The Auschwitz Camp Museum has formally admitted that the "gas chamber" it has shown to millions of tourists is actually fake;

• Original German plans of Auschwitz show no "gas chambers";

• Forensic chemical examination of Auschwitz has disproved the use of Zyklon-B in the so-called "ruined gas chambers";

• Offical Polish university archeological digs at Belzec and Sobibor have failed to find any evidence of "gas chambers," and how a similar dig at Chelmno contradicted "eyewitness" testimony;

• The "gas chambers" at Majdanek have glass windows, baths, and real showers for the "victims";

• The "carbon monoxide" gas bottles on display at Majdanek, still connected to a "gas chamber," are engraved and marked as "carbon dioxide";

• Details of the "Star of David gas chamber tile" hoax at the 2013 Treblinka archaeological dig;

• A delousing chamber at Dachau is called a homicidal gas chamber;

• German POWs were forced to alter a shower room at Sachsenhausen to support a Soviet show trial. The forgery was so crude that the Communists knocked down the building in 1952.

• The Bergen-Belsen camp is reviewed, with an explanation of the typhus epidemic that swept the camp in the last months of the war and created the horror images of emaciated dead bodies now associated with "the Holocaust."

• This new edition also deals with the "eyewitness survivor" memoirs and their outright lies and forgery, starting with a superbly illustrated exposé of the faked memoirs of "Nazi hunter" Simon Wiesenthal and many others.

• Finally, the last section discusses the all-important question of how and why the Holocaust storytellers have gone through so much trouble to make up the incredible story of "the Six Million."

Softcover, 8.5 x 11 format, 180 illustrations, 125 information-packed pages, #604, $25 minus 10% for TBR subscribers plus $5 S&H inside the U.S. from The Barnes Review, P.O. Box 550, White Plains, MD 20695. Call 1-877-773-9077 toll free to charge, Mon.-Thu. 8-4 or visit us online at www.BarnesReview.com.

New!

Léon Degrelle In Exile: 1945-1994

By José Luís Jerez Riesco

Crash landing in San Sebastián, Spain, in 1945, Waffen SS officer Léon Degrelle narrowly escaped death from his native Belgium and the Allied forces. Stripped of his Belgian citizenship and sentenced to death in absentia for fighting on the German side against Bolshevism on the Eastern Front during WWII, Degrelle lived the rest of his life in exile in Spain, harbored unofficially by Francisco Franco's government.

During these 49 years in exile, Degrelle never expressed any regret for his place in the war, nor did he remain silent as fantastical narratives were woven about the events of the war and the supposed atrocities of the Germans and their allies in the decades following. Despite attacks on his family, vilification by the whole world and many conflicts with the Church, he never wavered in either his Catholic faith or his conviction in National Socialism.

Léon Degrelle in Exile: 1945–1994 presents the story of these 49 years, complete with extensive letters between Degrelle and his friends and family, interviews, speeches and anecdotes from those who knew and loved him. Degrelle was one of the few remaining from the Axis side to share his account of the war and his commentary on the world as it changed drastically after the Axis defeat in 1945.

Softcover, 518 pages, #993, **$30** minus 10% for TBR subscribers plus $5 S&H inside the U.S. from TBR, P.O. Box 550, White Plains, MD 20695. Call 1-877-773-9077 toll free to charge. Mon.-Thu. 8-4 ET or purchase online at www.BarnesReview.com.

NEW FROM THE BARNES REVIEW BOOK CLUB . . .

THE AMERICAN REGIME

After being targeted and locked up by the federal government in the wake of the events of Jan. 6, 2021, the author of *The American Regime* delves into the study of history, philosophy and politics to answer the singular question of our time: "What precisely is the nature of the evil that now openly rules over America and, through the American Empire, the broader world?" More Americans than ever understand they live under an oppressive regime, but do not really know who is calling the shots.

Once one steps past the acknowledgment that the United States is no longer the land of the free, disagreement abounds. The author confronts the prominent theories of political power, searching for a single, coherent understanding of the nature of this oppressive Leviathan. In an era of lies and tyranny, the truth will indeed set us free—but only if we can identify that what passes for truth is often little more than blinding government propaganda. This fascinating analysis of power in modern America is a worthy contribution to Western thought. Softcover, 290 pages, #991, **$25** minus 10% for TBR subscribers plus $5 S&H inside the U.S. from THE BARNES REVIEW, P.O. Box 550, White Plains, MD 20695. Call 1-877-773-9077 toll free to charge, Mon.-Thu. 8-4 ET or visit www.BarnesReview.com.

Politically Incorrect Books on Southern Culture, History

The Honorable Cause: A Free South
Twelve Southern Essays

The Honorable Cause: A Free South is a collection of 12 essays written by pro-Southern and pro-secession activists. It places into context what it means to be "Southern" and why Southern identity is so important. It explores secession and how to achieve political and social liberation for the South. This book is intended to inspire emotion and thought. The authors want the reader to internalize the content and see a free and independent Dixie as the most honorable outcome for a unique people. *The Honorable Cause: A Free South* answers questions on our own terms and in our own way. Finally, it details how the South can achieve status as a nation-state, with a right of self-determination. Softcover, 301 pages, #988, *$25* minus 10% for TBR subscribers.

The Sequel to Appomattox:
A Chronicle of the Reunion of the States

By Walter Lynwood Fleming (1919)

When the armies of the Union and of the Confederacy were disbanded in 1865, there were still many problems that pressed for solution. The surviving Confederate soldiers came straggling back to their devastated homes. Everywhere they saw widows and orphans. They found property destroyed, the labor system disorganized, and the inhabitants suffering from want. They found the White people demoralized and the Blacks free, bewildered and disorderly. Organized government had lapsed with the surrender of the Confederate armies. Beneath a disorganized society lay a devastated land. The accumulated capital of the South had disappeared in worthless Confederate stocks, bonds and currency. The banks had failed. Two billion dollars invested in slaves was wiped out. Factories had been destroyed by Federal raiders or seized, sold or dismantled because they had furnished supplies to the Confederacy. Mining industries were paralyzed. It was months before courthouses, state capitols, and school buildings were again made available for normal use. How could all of this devastation be undone? Reprint. Softcover, 322 pages, #989, *$21* minus 10% for TBR subscribers.

Ousting the Carpetbaggers from South Carolina

By Henry Tazewell Thompson (1926)

South Carolina had been stigmatized as "the nest wherein was hatched the snake of Secession," and it was the purpose of Reconstruction to mete out retribution upon her people and to ensure victory for the radical portion of the Republican Party. Thus, at the point of the bayonet, a condition developed without parallel in history—the best and noblest citizens of the state were subjugated to a position of inferiority to their former slaves. This book is a history of the political revolution of 1876 in which South Carolinians, led by Gen. Wade Hampton and his Redshirts, united to throw off the oppressive yoke of "Carpetbagger" government and halt unquenchable Black revenge. Reprint. Softcover, 182 pages, #990, *$21* minus 10% for TBR subscribers.

Limited Edition Now in Stock!

Hitler's Table Talk

COMPILED BY MARTIN BORMANN

Compiled by one of the Führer's closest confidants, *Hitler's Table Talk* consists of notes of the German leader's casual lunch and dinnertime conversations with his close friends and colleagues. Copied down by adjutants and edited for accuracy by his private secretary Martin Bormann, these discussions reveal Adolf Hitler's wartime thoughts on his enemies, friends and a variety of topics including art, science, history, religion, nature, Europeans, non-Europeans and a vast number of other topics which reveal his astonishingly wide general knowledge. The topics under discussion varied greatly, as the reader will discover. Adolf Hitler's remarkable general knowledge serves as a testament to his self-education and his ability to talk with authority on almost any topic. This skill was remarked upon by many observers who interacted conversationally with Hitler.

The main recurring themes of the manuscript can, however, be pinpointed: Hitler's caustic comments on his prime enemies—the Soviet Russians, foolish Americans, the stubborn Brits and, of course, the Jews; his plans for Germany and the occupied territories after a German victory in the conflict; and his pronounced views on Christianity and that religion's influence in Germany and elsewhere.

This is an indispensable aid for anybody wishing to gain a full, uncensored insight into one of the most traumatic episodes of European history. This completely reformatted edition contains a brand new introduction that provides a history of the manuscript and an important discussion of its main themes and the controversies outlined above—including how Hitler ultimately changed his views on Russians in particular. It is fully indexed by subject discussed.

Softcover, 8.5 x 11, 298 pages, #624, **$35** minus 10% for TBR subscribers plus $5 S&H inside the U.S. from The Barnes Review, P.O. Box 550, White Plains, MD 20695. Call 1-877-773-9077 toll free to charge, Mon.-Thu. 8-4 ET or visit www.BarnesReview.com.

MARTIN BORMANN

Sorry Mom, I was wrong about the Holocaust

The Trials & Tribulations of the Schaefer Siblings

By Monika Schaefer

In the early 1950s, Otto Schaefer and Editha Schmilinsky emigrated from Germany to Canada. They met, fell in love, married and soon had children. I am one of those children. My mother and father were proud of their heritage, though they were told again and again they should not be. Germans were brutes, warmongers and responsible for "the Holocaust." We children were also taught this in school. It was reiterated in every movie or TV program we saw. I wholeheartedly believed that our people were responsible for the greatest crimes in history. I said to my mother, "Why didn't you, your friends, your folk, your family, why didn't you do something to stop these bad things from happening? Stop Hitler and stop these death camps? You should have done something! You must have known!" My mother told me she didn't know. She added that nobody knew. They only learned about it afterwards. By the time I understood the nature of the post-war "re-education" program, my parents had passed away. I wrote a cathartic posthumous letter and made a short video entitled *Sorry Mom, I Was Wrong About the Holocaus*t, as my research had definitively proven to my satisfaction that the real story about World War II, Adolf Hitler and the events we now know as "the Holocaust" did not match what we were taught in school. That video went viral and triggered a surreal odyssey that ended up with my brother Alfred and I spending years in German prisons for our thoughts and words. This book recounts that saga.

Softcover, 304 pages, #955, $25 minus 10% for TBR subscribers plus $5 S&H inside the U.S. from The Barnes Review, P.O. Box, 550, White Plains, MD 20695. Call 1-877-773-9077 toll free to charge, Mon.-Thu. 8-4 ET or order online at www.BarnesReview.com.

Inspire future generations in just a few short minutes.

Remembering TBR in your estate planning decisions . . .

REMEMBERING TBR IN YOUR WILL

During your life you have made many decisions that have helped people, causes, crusades and organizations that reflect your most important values. You've been good about using your resources wisely to help further the goals of your favorite organizations. One of those organizations is The Barnes Review.

Here's your chance to make sure that your generous commitment is transformed into an everlasting inspiration for others. And the good thing is, you can choose what people will remember about you by how you structure your legacy.

To ensure TBR survives long into the future—further into the future than any of us will—we suggest you consider remembering The Barnes Review in your will or trust.

It's not as complicated as many people believe. In fact, it can be done in a few minutes. TBR's Legacy Department specialists will assist you. Call 202-547-5586 and tell the operator you'd like to talk to someone about remembering TBR in your will or trust. For a simple, informative free brochure, write TBR Legacy Department, P.O. Box 550, White Plains, MD 20695 or call 202-547-5586.

AUTOMATED MONTHLY DONATIONS

And, if you'd like an easy way to support the efforts of TBR before your passing, we have a great idea. TBR is set up to automatically deduct whatever monthly amount you choose from your bank account—just like *National Geographic* or *Smithsonian* magazines do! Donate $5, $10, $20 or more every month—no hassle. Just call us at 202-547-5586, Mon.-Thu. 8-4 ET to get the ball rolling. TBR can take care of the rest—safe and secure.

Bringing History Into Accord With the Facts in the Tradition of Dr. Harry Elmer Barnes

THE BARNES REVIEW

A JOURNAL OF POLITICALLY INCORRECT HISTORY

September / October 2023 ❖ Volume XXIX ❖ Number 5

Table of Contents

A Revisionist Analysis of Third Reich Book Burnings

By John Wear, J.D.

4 Shortly after Adolf Hitler rose to power, student supporters and other activists sympathetic to the National Socialist movement organized massive book-burning ceremonies in various German and Austrian cities. Even today, 90 years later, these symbolic demonstrations continue to be referenced for political purposes. In this timely article, John Wear explains what books were burned, who wrote them and why they were tossed into the fire.

Did Hitler Seize Power or Was He Elected Democratically?

By Karl Haemers

14 Adolf Hitler's dramatic rise to power is often falsely characterized as a brazen and illegal seizure of authority by a megalomaniacal dictator. That fictional tale suits the aims of those who must maintain the myth that Hitler was the worst villain in history to prop up their own fake narratives. So, how did Hitler really come to power? Karl Haemers explains.

Inside WWII Imperial Japan's Nuclear Weapons Program

By Marc Roland

20 Rumors swirled around Imperial Japan's suspected nuclear weapons program during the WWII era. Just how advanced was the Japanese program and what role did its ally, National Socialist Germany, play? Longtime TBR contributor Marc Roland offers readers an insightful overview of the history of Japan's nuclear program—and how close they actually came to making "the bomb."

Exposing the Deceptions of WWII

By Ronald L. Ray

38 TBR presents an overview of *Crimes Discreetly Veiled*, the important Revisionist tome by eminent British historian F.J.P. Veale. Once you read this article, you will understand why the book has been suppressed for 65 years—and why you need to read it.

The Vatican, the Rothschilds & Usury: A Paradox—Part 3

By Antonius J. Patrick

46 TBR's Antonius Patrick concludes his three-part series exploring the relationship between the Vatican, the Rothschild banking dynasty, and the practice of usury and fractional reserve banking. What did traditional Catholic scholars have to say about the concept of usury and fractional reserve banking? This article provides some valuable insights.

Frank Chodorov's Solution to the 'Debt-Ceiling' Debacle

By Antonius J. Patrick

54 Partisan Democrats and Republicans alike invariably squabble over the "debt-ceiling" every year. Depending on which party is in power, dishonest politicians demand the "debt-ceiling" be raised, reduced or maintained. Is there an alternative solution to the endless factional, politically driven bickering and debate they conduct over the debt ceiling?

The Tragic Fate of the Pieds-Noirs in Algeria

By Rémi Tremblay

58 Following decades of peaceful European settlement in Algeria, almost exclusively by native French speakers known as Pieds-Noirs, a Marxist-inspired uprising by radical Algerians against French rule began in the 1960s. Despite promises to protect the Pieds-Noirs in her longtime colony, France shamefully abandoned them. Here is their tragic saga.

TBR's Operation Book Rescue Teams Up With Castle Hill

Interview With Michael Santomauro

68 Revisionist publishers continue to face massive censorship and deplatforming in a truly Orwellian fashion. In this issue, TBR's John Friend interviews Michael Santomauro, CEO of the iconic Castle Hill Publishers (CHP). He recounts the efforts of well-funded agitators to destroy CHP and its founder Germar Rudolf, a world-renowned Revisionist scholar.

PERSONAL FROM THE EDITOR

Thwarting the Book Burners

I want to offer a hearty thanks to each of you who donated to our Operation Book Rescue (OBR) program, an insert for which was included with the July/August 2023 edition of The Barnes Review (TBR). With your generosity, we were able to raise a decent amount to place in our OBR coffers for this vital endeavor.

There are two aspects to the OBR program. The first is to help authors and publishers who have been chased out of every venue there is—print and electronic—where they once produced and sold their books. This is a modern-day "bibliocaust." The second is to get good Revisionist books back in print for those who do not have the resources or desktop publishing skills to take their amazing manuscripts and then pay proofreaders, editors and graphic designers to turn their words into physical books. One of these is longtime award-winning historian Michael Walsh—a member of TBR's Board of Contributing Editors. Several years ago, ALL of his books were removed from every bookselling platform you could name. This included Revisionist works but also collections of his poetry. TBR has been able, already, to bring three of his best-known works back into print. (See page 74.) But there are more to be rescued from this one author alone.

Currently we are working on bringing his bestselling masterpiece *Witness to History: The Third Reich Legend Uncensored* back from the grave. The funds you have donated will make this possible—and more. Look for updates in an upcoming issue of TBR.

Now that we are on the topic of "book burners," our lead story is about the book burnings of National Socialist Germany. Why did German authorities want some books burned? What was in those books? Were they a threat to the rejuvenation of Germany? Who wrote them, who burned them and should we ever support book burning? For the answers to these questions, I direct you to our lead story by John Wear, J.D., beginning on page 4.

Also of interest to those concerned about modern-day book bans is our editorial on the facing page in which we discuss efforts of concerned parents to remove subversive and inappropriate material from the shelves of school and public libraries so that children are not exposed to what appears to us to be neo-Marxist filth. These parents don't want these books "burned" or banned. They just don't want their kids to be exposed to them at an inappropriate age.

Also, please check out Assistant Editor John Friend's interview with Michael Santomauro, the CEO of Castle Hill Publishers (CHP), a professional publisher founded by perhaps the most prolific Revisionist historian of our generation, Germar Rudolf. CHP is the preeminent source for impeccably researched and scholarly books on the "Holocaust." CHP has been targeted for destruction by modern-day book burners who are fine with porno in elementary school libraries but go to extreme lengths to crush any and all books containing honest information on the experiences of Jews and others in WWII work camps.

I thank you all once again for supporting our efforts and also for your patience when waiting for delivery of books. As TBR is now printing its own books, we are not quite as fast as Amazon and Ingram just yet, and delivery times could extend to 30 days on some books. Your understanding is much appreciated. ❖

—Paul Angel, Executive Editor

On the cover: A National Socialist book burning in Germany, 1933.

Where's the Outrage for These Burned Books?

There's a lot of talk these days about "book banning," with the assumption by liberals and far-left activists that censoring any book that supports their political and social agenda amounts to modern-day "Nazi" book burning. The controversy has gained steam in recent years, largely due to outraged parents across the political spectrum demanding certain books they deem "inappropriate" be removed from school libraries (not banned or burned) due to their promotion of "woke" narratives, overt anti-White racism, and/or sexualized material geared toward young students.

For instance, late last year, Ivie Szalai, a mom in South Carolina affiliated with Moms for Liberty, a conservative non-profit organization that has been hysterically demonized, very publicly demanded that her local school district remove nearly 100 books from its shelves.

Included in the list was a novel titled *The Fixer*, authored by Bernard Malamud. Originally published in 1966, the book previously received the U.S. National Book Award for Fiction and the Pulitzer Prize for Fiction and has long been considered an important piece of literature in the effort to combat "anti-Semitism" and prejudice in society. But is it appropriate for little kids?

During a school board meeting last year, Szalai acknowledged that "many of the books in question may have extremely helpful material for many students. … But that does not negate the fact that many of those 100 books contain explicit sexuality, even some pornographic, X-rated scenes," that are unsuitable for children.

Szalai's complaints echoed many critiques offered by other concerned parents and educators across the country who insist that many of the books offered to children in schools and local libraries are not only promoting an anti-American agenda, but are profane, hypersexual and downright inappropriate for that age group. Particular concern has been raised about the increasing number of books geared toward children that are normalizing and glorifying sexual promiscuity and homosexual lifestyles, as well as promoting transgenderism and other cultural Bolshevik propaganda. Some even act as sex manuals, with diagrams and blow-by-blow instructions on sexual acts, some of which are still against the law in multiple U.S. states.

The situation is not without precedent in American history. In 1975, Island Trees School District on Long Island removed *The Fixer* and an additional six other books from its libraries, describing the books as "anti-American, anti-Christian, and just plain filthy."

In January 2022, a Tennessee school board caused an uproar after its members unanimously voted to remove *Maus*, a graphic memoir written by Art Spiegelman depicting his father's experiences during the "Holocaust." The book contains curse words, nude drawings and other "not wise or healthy" content, the board determined.

The book "shows people hanging," school board member Tony Allman said during debate about the book. "It shows them killing kids." In this fiction-masquerading-as-history book, Spiegelman uses violent imagery to depict the experiences of concentration camp inmates, most of which Revisionist scholars have fully debunked.

Critics of book bans argue that preventing kids from reading inappropriate books is the equivalent to a modern-day form of "Nazi" book burning. To try to prove their point, they invoke the campaign by students aligned with the National Socialist German Workers' Party to destroy books they deemed subversive, pornographic and Marxist. In public demonstrations in the 1930s, German citizens burned books that promoted homosexuality, pornography, Marxist ideals and other subversive Bolshevik-inspired concepts, as outlined in our lead article.

Regardless of one's views on the efforts of concerned parents to remove inappropriate material from local and school libraries, one thing left out of the discussion is the modern-day "burning" of books written by Revisionist authors whose works are being systematically eradicated. Companies like Amazon have banned countless Revisionist titles from being sold, while massive publishers such as Ingram Content Group are refusing to print and distribute books by Revisionists and dissident authors.

Where is the outrage on that front? Liberals and so-called free speech advocates are up in arms about parents demanding inappropriate material be kept from their children, yet none raises a peep about the blatant persecution and censorship of courageous, professional, responsible and meticulous Revisionist scholars and researchers.

The hypocrisy is all too obvious. While leftists become apoplectic when conservatives seek to ban Marxist trash from public school libraries, the real modern-day book burning has been taking place for decades. All this underscores the importance of TBR's Operation Book Rescue, which seeks to assist dissident authors and publishers whose books have been banned. (See page 68 for more.) TBR is always willing to come to the aid of those censored by the cultural Bolsheviks who seem to think only their narratives and perspectives deserve the light of day.

But even we must admit that, in retrospect, not every book burned by National Socialist activists deserved it. This includes books by notable authors Ernest Hemingway and H.G. Wells. We believe, however, that if Hemingway or Wells could have seen some of the perverse books being pushed on our kids these days, they would have been the first to chuck them into the fire. ❖

—John Friend, Assistant Editor

A REVISIONIST ANALYSIS OF

Third Reich Book Burnings

Critics of the Third Reich invariably mention the book burnings carried out by Germany in the Adolf Hitler era. What follows is an objective assessment of the censorship policies pursued by the National Socialist government, what was burned and why. This article is particularly timely as the neo-Bolshevik Thought Police in America make sure thousands of history books are banned from the internet and bookstores every year while at the same time pressuring printing houses to refuse to print books for customers whose wares are considered too politically incorrect.

Party members and concerned citizens are given degenerate books to destroy. Most active in the burning of books was the *Deutsche Studentenschaft* or "German Student Union." High on the list of books to be burned were ones by Karl Marx and Karl Johann Kautsky, both Communist theoreticians. Kautsky's books included *The Class Struggle* and *The Dictatorship of the Proletariat*.

By John Wear

Numerous books and articles have been written about National Socialist Germany's book burning and censorship. Some people even think that Germany's book burning was the precursor to the "Holocaust." For example, Fernando Baez writes:

> The Holocaust describes the systematic annihilation of millions of Jews by the Nazis during World War II. But that event was preceded by the Bibliocaust, in which millions of books were destroyed by Hitler's party. The destruction of books in 1933 was the prologue to the slaughter that followed. The bonfires of books inspired the crematory ovens.[1]

This article provides the details surrounding the book-burning campaigns under the National Socialist regime, and how this German censorship compares to that imposed by the Allies against Germany after WWII.

PORNOGRAPHIC PUBLICATIONS

Berlin during the Weimar Republic became a center for pornography and

Books at odds with the goals of the NSDAP are tossed into a blazing bonfire in 1933 Berlin.

various forms of sexual perversion. Berlin gained an international reputation for decadence, debauchery and pornography as depicted in the Broadway musical and later movie, *Cabaret*.[2]

Serious attempts were made in 1932 by Berlin's reigning Social Democrats to ban most pornographic publications. These attempts were implemented in 1933 when National Socialist private militias proceeded to cleanse Germany of pornography originating from Jewish and Marxist elements.[3]

The National Socialist private militias started with Magnus Hirschfeld's Institute of Sexology. On May 6, 1933, National Socialists ransacked Hirschfeld's Sexual Science Library and vandalized the main buildings. They proceeded to confiscate approximately 100,000 books and manuscripts to fuel an evening bonfire at the Opernplatz in Berlin several days later.[4]

The targeting of Hirschfeld's institute by the National Socialists was hardly surprising. As a Jew, homosexual and sexologist, Hirschfeld was a powerful symbol of all that National Socialists detested. Hirschfeld's institute also contained the works of many authors who had been placed on the National Socialists' "blacklist," which included Sigmund Freud, Havelock Ellis, Oscar Wilde, Edward Carpenter, Richard von Krafft-Ebing, and many others.[5]

Hirschfeld wrote the following concerning the burning of books in his institute:

> I do not devote much space to the public *auto-da-fé* of tons of books. I rather enjoyed the per-

Murdering History

Amazon is the world's biggest book retailer. They rake in some 50% of all consumer spending on books in the U.S. and dominate foreign markets as well. Pursuant to the 1998 declaration of Amazon's founder Jeff Bezos to offer "the good, the bad and the ugly," customers once could buy almost every book that was in print

That changed on March 6, 2017, when Amazon banned more than 100 books with dissenting viewpoints on the Holocaust, after having been pressured by Jewish lobby groups for years to do so. While Amazon ignored those lobby groups in years gone by, things were different in early 2017. At that time, a series of anonymous bomb threats was made against synagogues and Jewish community centers in the U.S., and three Jewish cemeteries were vandalized, we were told. Although there is no link between iconoclastic historical research and anti-Jewish acts, Israel's Yad Vashem Holocaust Center took these events as a pretext to demand Amazon take down history books they don't approve of. The mass media were quick to join in, and Amazon promptly caved, wiping its sites clean of any Revisionist research on the Holocaust.

It turned out that those cemeteries had not been vandalized at all and, a few weeks later, the mass media even revealed that those bomb threats originated not from neo-Nazis but from an Israeli Jew. Yet, still, ever since this Yad Vashem initiative, Amazon has insisted on deleting any history book from its stores that is allegedly "anti-Semitic." Amazon next culled any literature critical of Jews or Judaism. They then enforced these bans at all other booksellers. Finally, they bullied Ingram, who has a book-distribution monopoly in the U.S., to enforce the same rules by banning from the entire worldwide book market any books Jewish pressure groups deemed "undesirable." —Germar Rudolf

See pages 68-73 for more.

formance. It showed the mentality of the Nazis and made them ridiculous in the eyes of the whole world.

And it didn't really hurt anybody—except some annoyance and expense to the owners. And the books which had the honor of being burned by the Nazi executioners will be in greater demand because of it.

No, if the Nazis were only imbeciles I would not mind much. But they are brutes, and that I do mind. Yes, the burning of the books was a decidedly good thing. Let them commit a few more of such infantilities and they will be laughed off the map.[6]

Homosexual publications were also banned by the National Socialist regime. The elimination of most censorship during the Weimar Republic had led to the publication of numerous books and periodicals dealing with homosexual themes. One such homosexual publication was the *Die Freundschaft* ("Friendship"), the world's first homosexual newspaper openly sold at kiosks. This newspaper had a broad popular appeal and helped to establish Berlin's expansive homosexual press, which produced nearly 30 periodical titles during the Weimar Republic.[7]

In addition to banning all homosexual publications, in 1935 Heinrich Himmler championed a new anti-sodomy statute which criminalized all erotic contact between men. One year later, the Reich Office to Combat Homosexuality and Abortion was established, resulting in the arrest and imprisonment of large numbers of homosexual men. These arrests reflected the National Socialist view that male homosexuality was a contagious perversion and that, like diseases, homosexual conduct might be cured.[8]

All nudist organizations were also dissolved in Germany in 1933, with all books advocating nudism banned at the same time. Himmler and several other National Socialist leaders reversed this policy in 1936 but, in 1941, nudist publications once again were denied the right to publish.[9]

UN-GERMAN BOOKS

The book burnings of May 10, 1933, were a publicity stunt devised by *Deutsche Studentenschaft*, a National Socialist student organization, to upstage another student organization and curry favor with the government. Joseph Goebbels's newly founded Ministry of Public Enlightenment and Propaganda welcomed the student initiative without contributing to the preparations.

No German government ministry officially approved the "blacklist" of books to be burned. Instead, a committee of professional German librarians that included Wolfgang Herrmann sent a list of banned books to the students.[10]

Historian Leonidas E. Hill summarizes the books deemed to be "un-German" literature:

> Book owners knew that possession of the classics of left-wing literature, from Marx through Rosa Luxemburg and Karl Kautsky to Lenin, Leon Trotsky and Stalin, was dangerous. The Nazis even labeled this "high treason."
>
> Before, at, and after the book burnings, Nazis typically classified the "un-German" books in a number of categories:
>
> • Antimilitarist authors such as Theodor Plievier, Erich Maria Remarque and Arnold Zweig;
>
> • Pacifists Bertha von Suttner, Alfred Hermann Fried and Friedrich Wilhelm Foerster;
>
> • Left-oriented novelist-critics of bourgeoisie society Lion Feuchtwanger, Heinrich Mann, Ernst Gläser, and Erich Kästner;
>
> • "Communists" Bertolt Brecht, Gustav Regler and Anna Seghers.
>
> • Satirists of the bourgeoisie, religion and the army like George Grosz, photomontagist John Heartfield, essayist Kurt Tucholsky and dramatists Ernst Toller and Georg Kaiser;
>
> • The entire "Weltbühne" circle, with Carl von Ossietzky at its center, as well as literary historian Franz Mehring and critic Alfred Kerr;
>
> • Anti-Nazi journalists Theodor Wolff and Georg Bernhard;

The library of the Institute for Sexual Research, headed by Dr. Magnus Hirschfeld, is plundered. Today, many parents, concerned about what they consider pornographic books in public school libraries, are fighting a similar battle, but in a much more restrained fashion. The left calls them "domestic terrorists."

- Historians whose views about the origins (Walter Fabian, Hermann Kantorowicz, Emil Ludwig), the course (Wilhelm Dittmann, Karl Tschuppik) and end (Martin Hobohm, Gustave Noske, Arthur Rosenberg, Carl Severing) of World War I and the history of the Weimar Republic (Emil Julius Gumbel, Hugo Preuss, Walter Rathenau) were incompatible with Nazi dogma;
- The founder of psychoanalysis Sigmund Freud;
- And scientists propounding an incomprehensible worldview epitomized by the outspokenly anti-Nazi physicist Albert Einstein, soon under attack for his "Jewish physics."[11]

Many of the books burned on May 10, 1933 had not actually been banned. The National Socialist regime did not have a master plan to ban books when they took office and did not soon design one. For some years, the National Socialist seizure and banning of books in the 15 German states were uncoordinated and carried out by many agencies at many different levels of government.[12]

Two Jewish-founded libraries were established to counteract National Socialist Germany's censorship. On May 10, 1934, the *Deutsche Freiheitsbibliothek* (German Freedom Library, also known as the German Library of Burnt Books) was opened in Paris. This library quickly collected over 20,000 volumes and became a focus for organized readings, lectures and exhibitions. The Brooklyn Jewish Center in New York also established an American Library of Nazi-Banned Books in December 1934, with noted intellectuals such as Einstein and Upton Sinclair on its advisory board.[13]

OTHER BANNED AUTHORS

Many Jewish authors were targeted for book burning. Jewish anthropologist Franz Boas, for example, had argued that social environment rather than race or genetics determined a person's intellectual capacities. Boas had condemned National Socialist theories of Aryan superiority and wrote that "German civilization" was the product of "innumerable cultures influencing it."

Boas's books were burned on the night of May 10, 1933 by German students as part of the massive public book burnings at universities across Germany.[14]

Other authors whose books were burned in the Opernplatz in Berlin included Heinrich Mann, Stefan Zweig, Erich Maria Remarque, Helen Keller, H.G. Wells, Thomas Mann, Ilya Ehrenburg, Marx, Jack London, Rosa Luxemburg, Friedrich Engels, Upton Sinclair and Vladimir Lenin. On the same day, other book burnings were orchestrated across Germany, notably in the Römerberg in Frankfurt, the Königsplatz in Munich, the Schlossplatz in Breslau and in front of the Bismarck statue in Dresden. By the time World War II started, 565 authors and 4,175 titles had been banned in Germany.[15]

Germany's War

The Origins, Aftermath and Atrocities of World War II

By John Wear. *Germany's War* documents that the Allied leaders were primarily responsible for starting and prolonging WWII—costing millions of lives. FDR's numerous provocations forced Germany to declare war on the U.S.A. despite Hitler's desire for peace. Also covers Stalin's plan for European conquest, America's second crusade, how WWII was planned and instigated, the Allied conspiracy to prolong the war, the Allied POW camps that killed a million Germans, the appalling plight of expelled Germans, history's most terrible peace, crimes committed in German camps, the alleged genocide of 6 million Jews, and more. Softcover, 514 pages, #717, *$25* minus 10% for TBR subscribers plus $5 S&H inside the U.S. from TBR, P.O. Box 550, White Plains, MD 20695. In the 21st century, virtual book burning is alive and well, with powerful groups making sure real history books are wiped from the shelves.

Many of these banned authors created a publication in July 1933 titled the *Brown Book of the Hitler Terror and the Burning of the Reichstag*. Usually known simply as the *Brown Book*, it was the first major study to issue from any of the exile presses concerning the new Germany.

The *Brown Book* condemned the National Socialist book burning by arguing in part:

> The pyres of advanced literature in German city squares blazon far into the distance the message that the Brown barbarians intend not only to extirpate physically the most courageous and self-sacrificing anti-Fascists, but also to destroy everything of any vitality and worth and even anything that was at all progressive even from a bourgeois standpoint. …
>
> German Fascist reactionaries are determined in actual fact, and quite unsymbolically, to burn anything printed which does not suit them, just as they are determined physically to exterminate all writers and distributors of anti-Fascist literature.[16]

Despite public condemnation of National Socialist book burnings, authors advertised the burning of their books to promote sales. Matthew Fishburn writes:

> The memory of the book burnings was still a potent force throughout the decade, and many exiles continued to appropriate them as an index of authenticity and relevance. Inclusion on a blacklist became an imprimatur and something to be advertised.
>
> Romain Rolland was clearly delighted that his *Jean-Christophe* was displayed in a glass case at the Oranienburg concentration camp "along with works of Marx, Engels and German or Russian Communists in the 'museum' of books burned, or about to be burned."
>
> Similarly, the insider account of *Germany's Air Force* (1935) by Otto Lehmann-Russbueldt proudly stated that all of his works "were publicly burned in Germany."
>
> Ernst Toller's introduction to his *I Was a German* (1935), an account of his philosophical rejection of the "barren pageantry" of the new regime, introduced it with a simple manifesto on the need to resist the "yoke of barbarism." He signed it on the "day my books were burnt in Germany." It constituted a sort of merit badge in anti-Fascism or a hard-won campaign medal.
>
> When Erika Mann published her *School for Barbarians* (1938) in the United States, she scarcely referred to the event, but her publishers knew better, issuing the paperback edition with flaming books on the cover.[17]

OTHER BANNED BOOKS

National Socialist Germany banned books that ran counter to its idea of a woman's societal role. Guenter Lewy writes:

> In the eyes of the Nazis, a woman's highest values were marriage and motherhood, and a "healthy sexuality" was acceptable only for the purpose of procreation. Hence books that ran counter to this view of women's role in society were banned.
>
> A book published in 1930 that defended birth control, abortion and support for women who had experienced a miscarriage was forbidden in 1940. Also banned was a book that described the method of natural birth control based on the woman's cycles of fecundity.
>
> A calendar of conception was forbidden because it violated "healthy moral sensitivity" and was also undesirable on account of its

Books written by Communist, socialist, anarchist, homosexual and pornographic authors were gathered and destroyed in Austria and Germany in the 1930s. According to the National Socialist government, much of what was burned was undermining the morals of the German people. For instance, today, psychologists are debating the effects of habitual viewing of pornography on young men. One of the results is that young men see women as mere sex objects as opposed to equal partners in a relationship. Books by Karl Marx were also burned, as Communism was at odds with the aims of a healthy, productive state.

demographic point of view, that is, it sought to limit population increase. And a book with the title *The Rise of Women* was banned because it "represented the typical product of an intellectual woman" who neutralized her womanhood by taking refuge in creative literary activity. Moreover, the bibliography of the work included "more than a dozen sexual Bolsheviks (*Sexualbolschewisten*)."[18]

The books of certain religious writers were also banned. Lewy says:

> It goes without saying that the works of Karl Kautsky and Otto Bauer, dealing with the relationship of socialism and Christianity, were forbidden. The same fate met the writings of the religious socialists Paul Tillich, Günther Dehn and Paul Piechowski, as well as the works of the Christian pacifists Otto Dibelius and Leonhard Ragaz.
>
> As was to be expected, all the books of the Jesuit Friedrich Muckermann, who had left Germany in 1934 and who carried on an active campaign of denunciation of the Nazi regime, were indexed.
>
> Equally unacceptable were the writings of Protestant theologians such as Emil Brunner and Karl Bath, who had voiced criticism of the Nazi regime.[19]

Books written by Jehovah's Witnesses, the Swiss Watch Tower Bible and Tract Society, and the Anthroposophical Society founded by Rudolf Steiner were also banned.[20]

AUSTRIAN BOOK BURNING

National Socialist Germany also engaged in book burning after its Anschluss, or reuniting to form a Greater Germany, with Austria. Jewish libraries and left-wing collections were seized, and some people simply purged their own libraries out of fear.[21] On April 24, 1939, Martin Bormann signed Order 84-39 which sought to unify the work of confiscation by having all material brought intact to established centers for evaluation.[22]

U.S. reporter Ralph McGill wrote:

> One day I went to watch them burn books. A great pile blazed in the center of a square. It was a foolish thing and that was how it seemed. … Suddenly I knew that the disappearance of books and newspapers was not just foolishness by a lot of boy bullies.[23]

On May 1, 1938, *The New York Times* reported on a public book burning in Salzburg:

> The ceremony began at 8 o'clock [in the evening] when a schoolboy threw Dr. Schuschnigg's

Many Germans were more than happy to participate in cleaning out degenerate and dangerous books that contained messages that were considered anathema to European and Teutonic culture.

> book, *Three Times Austria*, on a gasoline-soaked pyre at gaily illuminated Residenz Square. Next came books on Chancellor Engelbert Dollfuss and his regime, then propaganda books and works by Jewish authors. …
>
> The burning was largely symbolic, however, for only one copy each of 2,000 different books was consigned to the flames. The rest, said to consist of more than 30,000 volumes collected from the university and other libraries, are to be burned later.[24]

Many books by Catholic authors were also banned. For example, a book of verse that had been used in Austrian schools before the Anschluss was banned because "many verses represented obvious propaganda for Catholic ideas."

The Austrian conservative Othmar Spann had hoped he could influence the National Socialist movement. Instead, he was imprisoned for a few months after the Anschluss and, in 1940, it was announced that no more of his writings could be published.[25]

After Germany's Anschluss with Austria, major American newspapers reported that German officials had sent the Austrian National Library's chief librarian a list of books they wanted removed for burning. Several American universities became involved in a campaign to save the Austrian National Library's Jewish books. Probably as a result of this campaign, the Austrian National Library announced it would not destroy these Jewish books, but instead remove them from public access and lock them in special rooms.[26]

CONCLUSION

Richard Ovenden writes about National Socialist book burning: "The May 10, 1933 book burning was merely the forerunner of arguably the most concerted and well-resourced eradication of books in history."[27] In this author's opinion, however, the Allied destruction of books and literature in Germany after World War II was more extensive than what occurred in National Socialist Germany.

Few people realize that the Allies removed and then destroyed no fewer than 34,635 titles of books and brochures from German libraries and bookstores after they conquered Germany. This is many times more books destroyed by the Allies than were destroyed by National Socialist Germany. Even today, books doubting the "Holocaust" can lead to a house search and confiscation of the incriminating literature, with fines and jail time meted out to the owner of the books.[28]

The destruction of large sections of German literature was part of the Allied reeducation program for Germany. Hans Schmidt described his experience of the Allied treatment of Germans after World War II:

> As far as the German people were concerned, the victors wanted only a malleable mass of dispirited, destitute, hungry, cowering and defenseless Teutons who knew the way to physical survival was to placate every whim of the victors. A still proud German was (always!) immediately branded a Nazi; worse than a criminal. …
>
> I still vividly remember that soon after our defeat, the victors set about to destroy all traditions and institutions that represented Germany. They did this under the

spurious concept encased into even more spurious laws "to free the German people from militarism and National Socialism."

Absolutely no organization except the Roman Catholic Church was allowed to continue functioning, not even the Red Cross, nor any other charitable organization, no public or private administration, no bank, no newspaper or magazine, no radio station—the list went on.

To me, personally, it was also disturbing to see that all well-known traditional publications [newspapers and magazines] had been forced out of existence, and new firms with new names appeared on the horizon. In addition, all that which we consider part of a nation's historic tradition was purposely destroyed, eradicated, or forbidden in Germany, usually under the guise of an alleged de-militarization.

Memorials to our fallen soldiers of long-ago wars disappeared, the monuments to kaisers and kings were removed from their pedestals and melted down, and time-honored memorial days could not be found on the new calendars. Instead, many of the current memorial days in the Bundesrepublik are days where the Germans have to pay obeisance to the victors.[29]

Some banned authors said that all National Socialist books should be eliminated. Thomas Mann, for example, insisted in 1945 that all books published in Germany during the National Socialist regime should be pulped because they were "less than worthless" and "smelled of blood."[30] He thus advocated for greater censorship of books after the war in Germany than what existed during the National Socialist regime. Mann's desired extreme censorship of books is exactly what the Allies imposed on Germany after World War II. ❖

A Real Modern-Day Book Burning

In 1984, Willis Carto's Institute for Historical Review—an early incarnation of The Barnes Review—was set ablaze by arsonists from the Jewish Defense League (JDL) using techniques and materials described by the FBI as bearing a "Mossad signature." Over $1 million in Revisionist books were destroyed as well as a portion of the business offices. During that period, the JDL was quite active, setting the homes and offices of multiple Revisionists ablaze. The FBI described the JDL as "the second most active domestic terrorist group" of the era. Though support for the JDL itself seems to have waned, its modern-day proxies have no problem using even more effective and less ostentatious means of making sure books they disapprove of never reach the eyes of the public.

One of the earliest book burnings ever mentioned was contained in the Old Testament in the book of the Prophet Jeremiah who is said to have lived during the reign of Jehoiakim, king of Judah (609 to 598 B.C.). In the Book of Jeremiah, the prophet had a scribe take down the exact words of God as dictated from God to Jeremiah. Part of this message was a warning that the Hebrews must return to the ways of the Lord or face divine retribution. King Jehoiakim rejected this message and burned pages from the divinely inspired document. Soon thereafter, Jerusalem was caught in a power struggle between the Babylonians and Egyptians. Jehoiakim was eventually deposed, bound in chains, paraded as a prisoner and cast into the desert without a proper burial by order of King Nebuchadnezzar.

Two New Shocking Books from TBR Book Club

The Transgender-Industrial Complex

Author Scott Howard exposes the actors financing the institutionalization of transgenderism. Behind the medical research into gender transitioning of children, pride parades and drag queen story hours is a lot of money. Sex education, the homosexual and feminist precursor projects, and the global propaganda are all pushed and paid for by very wealthy and well-connected people with motive and will. Howard demonstrates that the transgender phenomenon is not the grassroots movement its advocates want the public to believe.

Impeccably sourced and researched, *The Transgender-Industrial Complex* pulls the mask off the complex network of influential groups responsible. Howard takes a deep dive into the murky depths of the big money behind "Big Gay," exposing how the concept gained such recognition as well as the goals of the people behind it. Wide-ranging, specific, advanced and accessible, *The Transgender Industrial Complex* is essential reading for anyone who wants to understand why every institution with power, and many without, are uniform in their inversion of reality.

Softcover, 447 pages, #992, **$28** minus 10% for TBR subscribers plus $5 S&H inside the U.S. from The Barnes Review, P.O. Box 550, White Plains, MD 20695. Call toll free at 1-877-773-9077 to charge, Mon.-Thu. 8-4 ET. Purchase also at www.BarnesReview.com.

The American Regime

After being targeted and locked up by the federal government in the wake of the events of Jan. 6, 2021, the author of *The American Regime* delves into the study of history, philosophy and politics to answer the singular question of our time: "What precisely is the nature of the evil that now openly rules over America and, through the American Empire, the broader world?" The great irony of our time is that, while more Americans than ever understand that they live under an oppressive regime, the number of theories about the nature of that oppression, and who is really calling the shots, has only multiplied.

Once one steps past the acknowledgment that the United States is no longer the land of the free, disagreement abounds. The author confronts the prominent theories of political power, searching for a single, coherent understanding of the nature of this oppressive Leviathan. In an era of lies and tyranny, the truth will indeed set us free—but only if we can identify that what passes for truth is often little more than blinding government propaganda.

This fascinating analysis of power in modern America is a worthy contribution to Western thought. Softcover, 290 pages, #991, **$22** plus $5 S&H inside the U.S. from The Barnes Review, P.O. Box 550, White Plains, MD 20695. Call 1-877-773-9077 toll free to charge, Mon.-Thu. 8-4 ET or visit www.BarnesReview.com.

Did Hitler 'Seize' Power or Was He Elected Democratically?

Court historians often claim Hitler "seized" power, conjuring up images of repressive violence and revolution. How, exactly, did Hitler acquire political power? The answer may surprise you.

By Karl Haemers

We often hear it said from many directions, including the mainstream media, government, academia and Hollywood, that Adolf Hitler "seized" power in Germany. This implies a violent coup d'état and subsequent tyrannical dictatorship.

Others say Hitler was elected to the chancellor's position.

Which is correct? What follows is an examination of these mainstream narratives, which are contested by Revisionists.

ADOLF HITLER
Elected or appointed?

A FAILED PUTSCH

It is true that Hitler and members of his National Socialist German Workers' Party (NSDAP), including the *Sturm Abteilung* (SA) led by Ernst Röhm, and their supporters attempted a putsch in 1923 to "seize" control of the Bavarian government in Munich. Their primary motivation was to protect Bavaria and eventually the rest of Germany from the traitorous "November criminals." Hitler saw Gustav Stresemann, the German chancellor representing the German National People's Party, who had the support of the Social Democratic Party, and Germany's treacherous and cowardly political leadership more broadly as an acute crisis facing the nation. It also did not help Stresemann's reputation with Hitler that he had married the daughter of a wealthy Jewish businessman from Berlin.[1]

By September 1923, Stresemann had withdrawn the policy of passive resistance to French occupation of the Ruhr region and resumed reparations payments under the Treaty of Versailles. To Hitler and his coalition, these were more acts of treason against Germany. Hitler advocated an active resistance to the Ruhr occupation and refused to align with the other parties' passive approach.[2]

As R.H.S. Stolfi persuasively argues, "Hitler's first nationally significant political action—the Munich Beer Hall Putsch of early November 1923—would be forced on him by the disastrous conditions created by German resistance throughout 1923 to the French military seizure of the Ruhr."[3]

Additionally, Hitler felt he must secure Bavaria from another revolution attempt by Bolshevik Communists, as had succeeded for a brief time in 1919. Communists were numerous and organized in Germany at the time and the threat of a Bolshevik-style revolution in Germany was always imminent. "November criminals" referred to Communists and liberals who betrayed Germany with a "stab in the back," including a major strike of munitions manufacturing workers near the end of World War I, and to whom the monarchist government of the Kaiser had abdicated power in 1918.

Finally, another putsch attempt was fomenting in Bavaria, at the time under ex-Minister Gustav von Kahr. They were pushing a separation of

Bavaria from the national government in Berlin, but Hitler was attempting to unify Germany. He had to supersede the separatists.[4]

On November 9, 1923, as nearly 3,000 members of Hitler's coalition marched through the street toward the War Ministry which Röhm had occupied the previous day, a gun battle with the Munich police ensued. Sixteen of the marchers were killed, Herman Goering was wounded in the leg, and Hitler broke his upper arm. Four policemen died in the incident.[5]

Hitler and other leaders were tried for treason, and he was sentenced to five years in prison.

Hitler stated in court:

> I alone bear the responsibility, but I am not a criminal because of that. If today I stand here as a revolutionary, it is as a revolutionary against the revolution. There is no such thing as high treason against the traitors of 1918.[6]

On November 8, the day before the fateful gun battle on the streets of Munich, Hitler gave an inspirational speech. Reflecting his noble intentions, he said in part:

> I want now to fulfill the vow which I made to myself five years ago when I was a blind cripple in the military hospital: to know neither rest nor peace until the November criminals had been overthrown, until, on the ruins of the wretched Germany of today, there should have arisen once more a Germany of power and greatness, of freedom and splendor.[7]

Leon Degrelle, a Belgian National Socialist who joined the German war effort and was close to Hitler, writes in great detail of the putsch attempt, when Hitler indeed attempted to "seize" power, but qualifies it:

> Hitler could perfectly well have succeeded in his coup d'état, as he had anticipated, without resort to violence. The fact that [Hitler] did

When Adolf Hitler ran for office in 1932, his propaganda department was already very sophisticated. They knew that defeating popular Paul von Hindenburg would be difficult, and that Hitler's supporters would have to come up with a variety of messages for the disparate segments of German society. The NSDAP thus did quite a lot of "*kleinarbeit*," as they called it, which translates in English to "legwork." This was no haphazard campaign. Members of the election campaign traveled across Germany and talked with civil servants, farmers, mothers, soldiers, tradesmen, industrialists, soldiers and more, trying out different slogans, color combinations and a variety of different poster designs. They then reported back to the campaign office in Munich about what techniques were working and where. Interestingly, one of the most effective was this very simple disembodied head of Hitler floating in an all-black background (above). Despite their best efforts, Hitler lost the 1932 election.

An Illustrated Guide to Adolf Hitler and the Third Reich

By Stephen Goodson

This lavishly illustrated 40-page, 8.5 x 11 booklet was written and assembled by South African scholar Stephen Goodson and designbed by The Barnes Review. This striking B&W pictorial guide with accompanying text (minus the political correctness, of course) gives readers insight into the real Adolf Hitler, without the obligatory establishment propaganda. This book is great for young and old alike, and it's a perfect introduction to the tragic—yet inspiring—life of Hitler. Perfect for high school and college students. Chapters cover: Hitler's childhood; the trials of his youth; his exemplary service record in World War One; his formation of the National Socialist German Workers Party; the social and cultural achievements of Hitler's Reich; his astounding economic advancements; Hitler's political achievements; Hitler and WWI and more. Softcover, 40 pages, #528, *$15* plus $5 S&H inside the U.S. from TBR, P.O. Box 550, White Plains, MD 20695.

> not give the order to occupy the central telegraph offices and the ministries and did not make certain he had control of the railroad stations and barracks was in the logic of things. He did not seek in any way to seize power in Munich by revolution but relying on the solid foundation given him by the power of the Bavarian capital, he proposed to march on Berlin.[8]

Hitler opposed the separatist ambitions of the Bavarian government and aspired to unify all of Germany. He maintained this aspiration throughout his entire political leadership in Germany. The putsch attempt of course failed, but Hitler learned valuable lessons for the renewal of his movement upon his release from prison in 1924, as author Louis Snyder recounts:

> [D]irect action was not the way to political power. It was necessary that he seek political victory by winning the masses to his side and also by attracting the support of wealthy industrialists. Then he could ease his way to political supremacy by legal means.[9]

Leon Degrelle expresses the same sentiment:

> He had renounced forever coup d'etat by force. … Henceforth, he would stick rigorously to the democratic reality, basing all power on the consent of the people. That consent could just as readily be granted by the voters to an authoritarian democracy, which was his choice, as to a parliamentary democracy: He had seen the latter's harmful effects and meant to relieve the German people of that form of government.[10]

CHANCELLOR HITLER

These quotes by two wildly divergent analysts of Hitler—one a mainstream historian devoted to demonizing Hitler and the other a sanctifier of the German leader—indicate that Hitler's ascendancy to the chancellor role was no "seizure" of power, but a hard-fought political and legal process. Henry Ashby Turner, who firmly established the NSDAP funding sources as primarily from membership dues and from a few German industrialists in his book *German Big Business and the Rise of Hitler*, affirms in his *Hitler's Thirty Days to Power* that the German leader's aspirations to political office were entirely peaceful and democratic:

> In the election of 1930, held just as the effects of the economic crisis were becoming acute, their [NDSAP] vote increased eightfold, giving them 107 of 577 Reichstag seats. In the spring of 1932, Hitler challenged Hindenburg for the presidency.
>
> Although he lost, he made a sufficiently strong showing to force a second round of balloting in which he tallied an impressive 36.1%. By the summer of 1932. Hitler was Germany's most successful politician.[11]

An analysis of NSDAP voting demographics shows that middle-class Protestants voted in a majority, but working-class votes also poured in.

> [B]y July 1932, larger numbers of workers were voting for the NSDAP than were supporting the SPD [socialists] or the KPD [Communists]. ... Given the [National Socialists'] *volkisch* credentials, it is telling that class per se evidently exercised a relatively modest influence on the NSDAP's electoral profile.[12]

Turner, who is by no means an admirer of Hitler and falls more among his mainstream critics, explains the structural political system in Germany at the time:

> Only the president could appoint the head of government, the chancellor, and the other ministers who made up the cabinet. As in other European democracies, the chancellor was required to retain the support of a majority of the national parliament, the Reichstag, and had to resign in the event of a majority vote of no confidence. The president could, however, at any time, dismiss the chancellor and cabinet; he could also dissolve the Reichstag prior to expiration of its normal four-year term and schedule a new election.[13]

The true story of how Hitler ar-

Representatives for various political candidates display posters for their favorite politicians, July 1932.

ranged through purely diplomatic, political and legal means to gain von Hindenburg's appointment to the chancellor role is detailed in *Hitler's Thirty Days to Power*, but with more context and background than in other works such as Leon Degrelle's *Hitler Democrat*. While Degrelle recounts much of Hitler's history, he offers few details on how Hitler acquired the chancellor role. Degrelle does say of the NSDAP in 1932:

> The National Socialist Party had become by far the most important party in the Reich—larger than the Socialist and Communist parties combined—and four times as strong as the Centrum that had formerly been so powerful.[14]

It was this popularity of the NSDAP and Hitler personally, combined with the advocacy of former Chancellor Franz von Papen, that influenced von Hindenburg to appoint Hitler chancellor. Therefore, the question asked in the title of this essay is a trick. Hitler neither seized power nor was he elected. In fact, he was appointed chancellor.

R.H.S. Stolfi's 2011 biography *Hitler: Beyond Evil and Tyranny* may be called a pro-Hitler rebuttal of earlier anti-Hitler biographies such as *Hitler: A Study in Tyranny* by Alan Bullock and so many others. Indeed, Stolfi says of Bullock:

> Biographer Alan Bullock's impressive title, *Hitler: A Study in Tyranny* should probably have been *Hitler: A Study in Popular Tyranny* or, given Hitler's mass popularity and almost unique sense of a great and final message, *Hitler: A Study in Messianic Tyranny*. The reader thus would have been alerted to the fact that he was not being treated to an ordinary, pejoratively cast tyrant who exercised power with a rigor not authorized by law or justice, but to a different phenomenon.[15]

Of Hitler's ascendancy to the chancellor role, Stolfi uses the word "seize":

> Hitler could have achieved power legally, most directly by obtaining over 50% of the votes in the Reichstag election and thereby necessarily being appointed chancellor by the president. …
>
> No single party would receive 50% of the Reichstag vote in the entire period from 1919 through March 1933, and Hitler would be forced to

seize the chancellorship with a near or full plurality of the votes.[16]

… Hitler's single-minded drive for chancellorship through the legal means of voting campaigns under proportional representation began with the special Reichstag election of September. The results have been described accurately as a "landslide" for the Nazis, yet they netted only 18.3% of the German vote. But with 18%, however, in a deepening super-depression internally and intransigent, near-hysterical French imposition of the Versailles treaty externally, Hitler now faced the near-term opportunity to seize the chancellorship.[17]

To achieve power over Germany in the aftermath of the presidential elections, Hitler faced the original and now only remaining legal possibility, which was the Reichstag elections and the "seizure" of the chancellorship.

As we have seen, Hitler's campaign for president and the NSDAP generally won 37% of the vote. Stolfi writes:

With so overwhelming a plurality, Hitler could have expected reasonably to have been appointed as a presidential chancellor. …

The overwhelming probability is, however, that he would have demanded a new election and, with the prestige of the backing of the president and the enormous possibilities to influence the election through the authority of the chancellorship, have gone for an outright majority in the Reichstag. We can make this generalization with confidence because six months later, when he was appointed chancellor, he acted thus.[18]

Thus, Stolfi indicates that Hitler both "seized" the chancellor role and was appointed. Legally and politically, the proper term is "appointed." "Seizure" here refers to Hitler's legal and political strategy to ensure the appointment.

One more example from Stolfi will clarify the conflation: "Since, however, Hitler had determined by 1925 to seize power legally, he would be forced in the actual event of 1933 to seize it with the permission of the president."[19]

Crown Prince Wilhelm speaks with Hitler during the 1932 Reichstag elections.

CONCLUSION

To the question on whether Adolf Hitler seized power or was elected, we must answer: neither. Hitler attempted a seizure of power in Bavaria in 1923 but failed. Thereafter, he devoted himself to the legal and political process of acquiring power in the form of leadership approved by the people. This necessitated winning the popular vote of the German people for his NSDAP [not himself as president], cultivating key political alliances with other parties and people such as President von Hindenburg and ex-Chancellor von Papen and, finally, having the chancellorship bestowed upon him by President von Hindenburg through legal appointment.

AFTERWORD

In a real sense, Hitler's appointment to the chancellorship was the beginning of his life's work: the creation of the great German Reich. Degrelle writes:

"We have the power. Now our gigantic work begins." Those were Hitler's words on the night of January 30, 1933, as cheering crowds surged past beneath the windows of the Chancellery for five solid hours.[20]

At the time of Hitler's appointment, only two of the 11 ministers in the cabinet were National Socialists, and the NSDAP did not have even a majority coalition in the Reichstag. The history of how Hitler and his party employed fully diplomatic, political and legal means to gain full leadership of Germany without "seizing" it will be explained in a future essay. ❖

Honest History Books on Adolf Hitler

The Program of the Party of Hitler

By Gottfried Feder. Translated by E.T.C. Dugdale. Written by one of the founding members of the NSDAP, this booklet was the primary political document that underpinned the ideology of the future Nazi Party. Deals with foreign policy, internal policy, property, usury, economics, race, religion, culture, agriculture, citizenship, the military, and much more—this far-reaching document provides a sweeping and comprehensive look into the dramatic worldview of National Socialism. Softcover, 78 pages, #797, *$13.*

Hitler's Revolution: Ideology, Social Programs, Foreign Affairs

By Richard Tedor. Defying liberal democracy, Adolf Hitler transformed Germany into an authoritarian state advocating sovereignty of nations, advancement of labor, preservation of the Germanic race, and commerce based on exchange of wares to replace the international gold standard. This study draws on nearly 200 published German sources, many from the National Socialist era, plus documents from British, U.S. and Soviet archives. Softcover, 293 pages, #646, *$20.*

Hitler's Second Book: German Foreign Policy

Often called Hitler's "Secret Book," this is the only full-length, completely unedited and correctly translated text of Hitler's second book, written to explain National Socialist foreign policy, dictated in 1928 to Max Annan. Within these pages the reader will find the philosophical principles that underwrote German domestic and foreign policy, and predictions by Hitler. Softcover, 200 pages, indexed, #732, *$21.*

Germany's Hitler: The Only Authorized Biography

By Heinz A. Heinz. Here is the 1938 authorized biography of Adolf Hitler. Included are vivid and unique descriptions of Hitler at school, his WWI battlefield experiences, early politics, the November 9 Putsch, Hitler in prison, and the struggle to power from 1926 to 1933. It ends just after the Austrian Anschluss and the end of the Czech/Sudeten crisis. Softcover, 234 pages, #747, *$22.*

With Hitler on the Road to Power: Personal Experiences With my Leader

By Otto Dietrich. This work, written by Adolf Hitler's chief of press in 1934, details the three tumultuous election campaign years from 1930 through to the coming to power of the National Socialist German Workers' Party in January 1933. The author formed part of Hitler's inner circle and campaign staff during this period—which included six elections in 2.5 years—and later went on to become the chancellor's press officer. Softcover, 106 pages, #799, *$15.*

Germany Speaks: Nazi Germany Explains Itself to the English Speaking World: The Full Original Text from 1938

In the year immediately preceding the outbreak of WWII, the German foreign office launched a campaign in Britain to explain the inner workings of Nazi Germany. The highpoint of this campaign was this book, a four-part set of 21 essays by leading party and state officials, each explaining in detail the implementation and rationale of their policies. Contributors included Joachim von Ribbentrop, Otto Dietrich, Fritz Todt, Robert Ley, R. Walther Darré, Wilhelm Frick, Ritter Von Epp, and 14 others. Softcover, 253 pages, #724, *$25.*

Hitler Speaks on the Jews: Selected Speeches and Writings of Adolf Hitler, 1919–1945

Compiled and translated by Frank Diepp. What did Hitler really say about the Jews? This book cuts through the lies and propaganda about National Socialist anti-Semitism by going directly to the source: Adolf Hitler himself. To achieve this task, the compiler combed through hundreds of Hitler's speeches and his major writing, dating from 1919 to April 1945. Softcover, 145 pages, #969, *$15.*

Hitler Democrat

Belgian Waffen SS Gen. Leon Degrelle discusses the tragedy of the Versailles Treaty, the enigma of Adolf Hitler and his rise to power, Hitler's impressive WWI experiences, his popularity with the people, the inside story of the Beer Hall Putsch, the unification of the German state, Anschluss, the feud with Ernst Röhm, the political challenges of the 1930s, the 1932 Geneva Conferences, Mussolini, Blum, Tukhachevsky, Nuremberg and more. Softcover, photos, 546 pages, #622, *$30.*

What the World Rejected: Hitler's Peace Offers 1933–1940

By Friedrich Stieve. Including: *A Final Appeal for Peace and Sanity* by Hitler; *Hitler's Political Testament*; *Hermann Göring's Last Letter to Churchill* , and Neville Chamberlain's *"The World Jews Have Forced England Into the War."* Written by Germany's foremost diplomatic historian of the early 20th century, this work maps out all the numerous times that Hitler made unconditional offers of peace to all the nations of Europe. Softcover, 93 pages, #693, *$10.*

Mein Kampf: The Stalag Edition

By Adolf Hitler. This is the only complete, unabridged and officially authorized English translation of *Mein Kampf* ever issued (1944) by the Nazi Party and is not to be confused with any other version. Most copies were distributed to the camp libraries of English-speaking POW camps and became known as the "Stalag" edition. Only a handful of copies survived the war. Softcover, 584 pages, 6 x 9, #675, $40.

Inside WWII Imperial Japan's Nuclear Weapons Program

Japanese scientists and technicians had the expertise to develop an atomic bomb—but exactly how close were they?

By Marc Roland

"Japan is a small country, so it is limited. We cannot make as many airplanes as America. So, we cannot win a war by doing the same things as she does. To win a war, we need something special, like an atomic bomb."—Lt. Gen. Takeo Yasuda, April 1940[1]

Historians in the West generally concur that Imperial Japan lacked the technological skill and natural resources to build a nuclear weapon. Their conclusion was stated early, if secretly, in a March 1945 report from the Intelligence and Security Division attached to the Manhattan Project, America's development program for an atomic bomb: "The Japanese scientists are capable of creating something similar to it, but they probably do not have the resources."[2]

Three years prior to this official assumption, a German communication quoting Japanese newspaper accounts, which was intercepted by U.S. cryptographers, cited the construction of "a cyclotron equal in size to the one in the United States, which is the world's largest," slated for completion by Tokyo's Ishikawajima Dockyards before the close of 1942.[3] A cyclotron is a particle accelerator used in nuclear physics experiments.

TAKEO YASUDA
Had his superior officers only heeded Lt. Gen. Takeo Yasuda's urging, the Japanese Empire could have possessed an operational nuclear bomb by autumn 1944, in time for the decisive Battle of Leyte Gulf.

The Japanese built it two years behind schedule, but mere mention of such a device should have at the very least aroused American suspicions. Not until after Japan's surrender, however, did the Western Allies discover just how close they had come to finding themselves on the receiving end of an atomic warhead.

BOMBSHELL REVELATION

Some of what they learned became public knowledge for the first time on October 1, 1946, when Georgia's largest newspaper, *The Atlanta Constitution*, headlined, "Japan Developed Atom Bomb," in a front-page article by David Snell. He had been recently discharged from the U.S. Army, serving as an agent during the last months of the war with the 24th Criminal Investigation Detachment in Korea.

It was here that Imperial Japanese navy technicians allegedly detonated a nuclear bomb shortly before their surrender. Snell reported that they transported a just completed *genzai bakudan* (an atomic weapon) via armed convoy from its mountain cave shortly after midnight, in mid-summer 1945.

Arriving at "Konan"—as they referred to the city of Hungnam—the device was loaded aboard a freighter, where engineers began making final preparations and adjustments. Forty-eight hours later, they withdrew to an outpost 20 miles away after mounting the *genzai bakudan* onto a remotely controlled launch that beached itself at a tiny, unidentified islet north of Wonsan, in the Gulf of Yonghung-Man, in the Sea of Japan.

The observers donned thick-glass welder's goggles before a ball of fire about 3,000 feet across and brighter than the Sun rising in the east suddenly punctuated the early morning of August 12.

"A multi-colored cloud of vapors boiled toward the heavens," wrote Snell, "then mushroomed in the stratosphere. The churn of water and vapor obscured the vessels directly under the burst. Ships and junks on the fringe burned fiercely at anchor. When the atmosphere cleared slightly, the observers could detect several vessels had vanished."

They estimated the area of destruction at one square mile. Just six days after the Americans dropped their first nuclear device and 72 hours before Japan surrendered, she "had perfected and successfully tested an atomic bomb, as cataclysmic as those that withered Hiroshima and Nagasaki."

Immediately following the publication of Snell's article, Maj. Gen. Leslie Groves, chief of the Manhattan Project, reacted by stating, "I would be very much interested if the story were true. It's all news to me."[4]

He deferred to statements made by Dr. Carl T. Compton, president of the Massachusetts Institute of Technology, who told a Senate committee the previous year that Japanese physicists failed to develop an atomic bomb because they reached mistaken conclusions and due to B-29 attacks that demolished the laboratory where such experiments were being conducted. Snell's informant, Tsetusuo Wakabayashi, a former Japanese Imperial Army captain, partially agreed with Dr. Compton, but added that "the B-29 caused our project to be moved to Korea. We lost three months in the transfer. We would have had *genzai bakudan* three months earlier if it had not been for the B-29."[5]

Dr. Yoshio Nishina, father of Imperial Japan's atomic bomb.

U.S. MONITORS DEVELOPMENTS

While Maj. Gen. Groves publicly professed ignorance and doubt about such possibilities, five months before *The Atlanta Constitution* went to print with Snell's account, Col. Cecil W. Nist released a summary of information "intended for top-level eyes in Washington only" that his G-2 intelligence units had been collecting regarding an atomic blast in Korea. Nist's top secret report from the U.S. Army's Chief of Staff Office in Korea for May 21, 1946 told how "actual [wartime] experiments on atomic energy were conducted in Japan, and the Hungnam plant was opened for the development of the practical application of atomic energy to a bomb or other military use. These reports received separately are surprisingly uniform as to content. It is felt that a great deal of credence should be attached to these reports."[6]

They were subsequently verified by many other on-site witnesses, such as the wing commander of the U.S. Air Force's 95th Squadron B-26 unit operating Douglas *Invader* medium bombers stationed on the west coast of South Korea, as they flew over Konan. In February 1953, he told his flight surgeon Dr. William B. Engeberg "that Japanese atomic research had occurred there, and that the Japanese had made some kind of device there and fired it off."[7]

In his thorough and profusely documented investigation of the subject, Robert K. Wilcox uncovered "a series of formerly top-secret intelligence documents that said U.S. forces throughout South Korea had gotten the same reports that Snell had."[8]

David Snell was himself a credible source, having been a staff member on the city desk of *The Atlanta Constitution*, then rising to head its news bureau at Marietta, immediately prior to entering the U.S. Army. *Who's Who*

Completion of this cyclotron in 1943 demonstrated that Japanese physicists were well on their way to finishing an operational nuclear weapon. Its completion would have changed the course of the war.

in the South and Southwest described him as *Life* magazine's correspondent in Africa, the Middle East, and Europe, where he was its Paris bureau chief. He was also a writer for Time-Life Books, *The Smithsonian*, and *The New Yorker*, served as president of International Writers, Ltd., and was the recipient of the prestigious George Polk Memorial Award—not the kind of "yellow journalist" who engages in unfounded sensationalism.[9] When Wilcox contacted him before his death in 1987, "Snell stuck by his story," which went back further than even he [Snell] imagined.[10]

JAPAN'S PROPHETIC WARRIOR

It originated perhaps with the most realistic man in Japan. As early as April 1940, Lt. Gen. Takeo Yasuda was convinced that war with the West was not only inevitable, but virtually unwinnable. His country, he knew, produced less than 4% of the world's industrial output, as compared to 35% produced by the United States. Yasuda believed that the otherwise overwhelming manufacturing edge America possessed could be trumped only by superior technology, particularly by an ultimate weapon of some kind.

Accordingly, he summoned Tatsusaburo Suzuki to the Imperial Army Air Force Technical Research Institute, because the young staff officer was a top graduate in physics at Tokyo University. Yasuda ordered him to investigate the feasibility of constructing a *genzai bakudan* for deployment as quickly as possible. After preliminary research and extensive interviews with the country's leading physicists, Suzuki submitted his findings in a highly confidential October paper: Japan had sufficient technical skill and natural resources to build a uranium bomb, although the process could take several years.

Copies of the report, including appendices with Yasuda's concerns regarding U.S.-Japanese industrial disparities, were presented to senior military officers in September. They responded by pointing out that atomic development would be costly, time-consuming and uncertain, while siphoning off limited procurement for more easily and quickly mass-produced and more reliable weapons. Moreover, in 1940, a majority of Japan's leaders in government and the armed forces believed that war with America was unlikely. When relations between both countries began to seriously deteriorate the following year,

however, Yasuda's recommendations assumed urgent importance.

In July 1941, army funds were finally allocated to Tokyo's Institute of Physical and Chemical Research, opened 10 years earlier by Dr. Yoshio Nishina, the founding father of modern physics research in Japan, now in charge of an atomic bomb project known as "NI" for "Nuclear Isotopes." He assembled an enthusiastic team of colleagues, among the most brilliant scientific minds in Japan, and they made steady progress solving basic problems never before addressed by their academic community.

But Dr. Nishina was alarmed to discover that Tatsusaburo Suzuki's original feasibility study had made a fundamental error, upon which the fate of the entire project depended: namely, Japan did not, after all, possess enough uranium for a *genzai bakudan*. Uranium oxide, or "raw" uranium, was purified and enriched into the isotope U-235 for weapons-grade material. Fortunately, Imperial forces had just taken Malaya from the British, who left behind large reserves of tin-ore residue containing uranium-bearing monazite (a phosphate mineral of rare earth metals usually found in small, isolated crystals) and zircon (a silicate mineral).

By early 1943, some 5,000 tons of tin-ore residue had been shipped to the Tokyo physicists, who were only able to extract about 25 pounds of low-quality uranium oxide, barely sufficient to enable continuous experimentation. Throughout the year, U.S. Navy interdiction of enemy convoys steadily escalated until the number of freighters arriving from Malaya fell off to almost nothing, virtually shutting down the NI project.

"The atomic bomb projects of the United States and Germany are progressing," stated no less a person than Hideki Tojo, the prime minister of Japan. "If we are behind, we will lose the war."

"I want you," Prime Minister Tojo told Imperial Army Air Force Gen. Toranosuke Kawashima, "to step up our program to make it."[11]

GERMANY SUPPLIES ASIAN ALLY

Gen. Kawashima learned from Dr. Nishina that relatively abundant supplies of raw uranium were available in Johannistal, Germany, which, as Japan's ally, should come to their assistance. Gen. Kawashima urgently instructed the Japanese ambassador in Berlin to obtain this uranium as soon as possible.

But the German authorities, sensitive and secretive about their own atomic bomb project, politely parried his request. Undeterred, Lt. Gen. Hiroshi Oshima, Japan's ambassador in the Reich, appealed personally to Adolf Hitler, who immediately ordered the shipment of two tons of high-grade uranium oxide to the Japanese scientists.

Meanwhile, Dr. Nishina and his colleagues "were waiting the arrival of a German submarine that was carrying a better triggering plutonium, because the uranium they had was a much lower grade, and not as good," as learned two years after the war by Leon Thompson, serving with the 237th Medical Dispensary in Tokyo, from an OSS officer.[12]

The Führer's contribution was sufficient for Japanese physicists to complete their work. They were on the verge of doing so by August 12, 1944, when Tokyo suffered a devastating firebombing raid carried out by B-29 *Superfortresses*. The Institute of Physical and Chemical Research, with all its research equipment, was lost and, with it, the only source for uranium. The NI project was wiped out.

Parallel with the army project, the ordinance branch of the navy's fleet command began funding its own atomic research by May 1943. Known as F-go ("Operation 'F' for "fusion"), it was concentrated in occupied Korea, beyond the reach of U.S. Air Force heavy bombers, at the city of Konan, where large, modern testing facilities and laboratories were located. The Japanese enterprise here eventually grew to impressive proportions. Snell reported that "the Korean project was staffed by about 40,000

World War Two Turning Points

The Secret Decisions, Forgotten Blunders, and Cover-Ups That Really Determined the Outcome

What really determined the course of World War II? Highlighting 21 major events, decisions, and strategic failures, *World War Two Turning Points* reveals the much deeper factors that lie behind the well-known course of events as portrayed by the victors. Topics covered include little-known strategic failures, such as the German navy's decision to build capital ships instead of submarines, the Finnish army's refusal to defeat the Soviets at Leningrad, Japan's failure to invade the USSR when that state was at its weakest point, Hitler's competence as a military leader (he was no bungling fool) and a full discussion of the German "wonder weapons" and how, but for lower-ranking mistakes, they could have changed the course of the conflict. Softcover, 354 pages, #708, indexed, new second edition, completely revised and updated. Lavishly illustrated with 167 rare photographs, *$25* minus 10% for TBR subscribers plus $5 S&H inside the U.S. from TBR, P.O. Box 550, White Plains, MD 20695. Call 1-877-773-9077 toll free to charge, Mon.-Thu. 8-4 ET.

Japanese workers, of whom approximately 25,000 were trained engineers and scientists."[13]

By comparison, America's Manhattan Project reached its maximum staff levels when 130,000 persons were involved throughout most of 1945. During that same year, Japan's Imperial Navy development program alone received the yen equivalent of $25 million, against $30 billion spent by its U.S. opponent. The Japanese would have to compensate for their relative lack of wealth, resources, and numbers with more advanced, if not sophisticated, technological ingenuity. No less importantly, NI and F-go physicists pooled their research together, resulting in accelerated overall progress.

Their superior officers in the armed forces understood that neither the army nor navy possessed delivery systems capable of attacking an enemy city with atomic bombs. In any case, Japan's disadvantageous and declining military situation demanded fundamental strategic changes aimed at nullifying American air- and seapower by operating nuclear-equipped *kamikaze* interceptors and motorboats against B-29 squadrons and U.S. Navy fleets. Japanese versions of German jet and rocket planes were already entering mass-production. The superior speed of these aircraft was deemed sufficient to escape interdiction and reach their targets.

For all that, there would be no Japanese atomic bomb without sufficient uranium.

Yet again, Adolf Hitler came to the aid of his Asian ally by dispatching an additional 1,235 pounds of uranium to Japan. The enigmatic cargo was loaded into a submarine, which departed Kiel, Germany, on March 25, 1945. Also included were literally tons of blueprints for many of the Wehrmacht's secret weapons.

A FATEFUL VOYAGE

U-234 was a long-range cargo boat capacious enough to stow this large collection of documents and uranium, plus component parts for a V-2 ballistic missile and a complete Henschel Hs 293 anti-shipping guided missile, together with an entire Me 262 jet fighter in the care of August Bringewalde, a Messerschmitt Company production director. He was ordered to facilitate factory manufacture of the twin-engine aircraft once in Japan. His colleague, Ulrich Kessler, a Luftwaffe general and specialist in air defense, conferred aboard with Shoji Genzo, a lieutenant commander in the Imperial Army Air Force.

They were joined by Imperial Navy Lt. Cmdr. Hideo Tomonaga, a naval architect and submarine designer entrusted by the Germans with the designs for their own nuclear research. Clearly, the presence of these men, their equipment, plans, and personal expertise show that they were bringing the means for and application of atomic warfare to Japan. Kessler would liaison with Genzo to develop nuclear-armed suicide aircraft against growing waves of B-29s devastating Japan. The partial inclusion of a V-2 ballistic missile signified even more ambitious plans: namely, using ballistic missiles with atomic warheads.

"Japan's biggest problem in 1945 was delivery systems," Simon Gunson, a researcher specializing in WWII-era nuclear technology, argues. "Twelve V-2 rockets had been imported via U-boat before the collapse of Nazi Germany. The correct beach in Kyushu had been identified for the intended Allied invasion in 1946. It seems conceivable that underground launch silos would have been prepared to fire these V-2 rockets at the Allied beachhead and the fleet offshore. Had these been nuclear tipped, an invasion of Japan could have resulted in carnage."[14]

A more accessible delivery system already at hand was the Imperial Navy Air Force's Kawanishi H6K Type 97. "Mavis," as it was code-named by the Allies, was a huge seaplane, standing over 20 feet tall, its hull more than 84

The Imperial Japanese Navy Air Force's Kawanishi H6K Type 97 "Mavis" flying boat possessed the carrying capacity and range for successfully delivering a nuclear bomb to California targets, such as Los Angeles or San Francisco.

When Tokyo's Ambassador to Germany Hiroshi Oshima told Adolf Hitler that progress on the development of an atomic bomb had stalled for lack of high-grade uranium oxide, the Führer immediately dispatched two tons of the dense, gray radioactive metal to Japan.

feet long, suspended by a network of struts beneath its 131-foot parasol wing. With a maximum take-off weight of almost 24 tons, the "Large Flying Boat" was powered by four Mitsubishi Kinsei 46, powerful 14-cylinder air-cooled radial engines rated at 1,000 horsepower each. From December 1941, the H6K's superb flight endurance enabled its 217 manufactured examples to range far over the vast Pacific Ocean and most of Australia on effective reconnaissance and bombing missions, until growing numbers of American interceptors began to take their toll of the insufficiently defended aircraft in early 1943.

Enough were still operating late the following year to have undertaken nuclear strikes against coastal California targets. Japan's 1,800-pound atomic bomb was well within the weight parameters of the 2,205-pound payload of the *Mavis*. Although the flying boat's 4,112-mile maximum range was 700 miles short of the 4,800 miles from Japanese bases in the Kuril Islands to San Francisco or Los Angeles, removing its four machine guns, single cannon, all ammunition, and seven of its nine crewmembers would provide onboard capacity for an additional 1,650 pounds of fuel, more than enough for what would have been, in any case, a long-distance, one-way suicide mission. By then, Kamikaze operations had just begun as Japan's standard and most effective means of offensive warfare.

The H6K's chances of success during October or November 1944 were good, with the Americans distracted by the Battle of Leyte Gulf, their absence of sufficient patrols in the North Pacific, and California's own complacent civil defense after too many years of inactivity. The atomic bombing of one or more major West Coast cities in the U.S., beyond any resulting industrial damage, would have engendered political and military consequences difficult to imagine.

Shortly after breaking out into the North Atlantic, U-234 was subjected to a prolonged depth-charge assault, which Kapitänleutnant Johann Heinrich Fehler outmaneuvered by taking his boat down below 900 feet, nearly twice the depth-pressures the hull had been designed to withstand. The

attacking British destroyer captains, assuming German submarines could not dive below 300 feet, set their depth-charges accordingly, resulting in all devices launched by the British detonating harmlessly far above U-234. Fehler eventually surfaced in the midst of a powerful storm that shook off his pursuers, and he resumed course for Japan.

On May 10, he received a radio transmission addressed to all U-boat personnel still at sea, supposedly from Grand Adm. Karl Dönitz, who ordered them to surface, hoist black flags of surrender, and make for the nearest Allied port, where they would be interned, because the new German government had just capitulated. Suspecting enemy deception, Fehler refrained from obeying the transmitted instructions until Friedrich Steinhoff, the captain of U-873, informed him that Dönitz's order was indeed authentic, and the European war had ended.

Learning this bad news, and before U-234 could be taken in charge by the Americans, Lt. Cmdrs. Genzo and Tomonaga took their own lives by swallowing luminal, a barbiturate sleeping pill. Spilling their blood by committing the usual *Seppuku* or the *hara-kiri* ritual of "slitting the belly" inside the vessel of their hosts would have wrongly suggested that Capt. Fehler and his crew were responsible somehow for the deaths. The Germans buried both men at sea with full military honors.

The Third Reich's last attempt to supply its ally had failed, but, by then, F-go physicists were strictly husbanding enough uranium oxide of their own from Ishikawa prefecture, on the west coast of Honshu, and much more in Korea for a single nuclear test. In fact, production was going better than expected, and laboratory procedure had become so efficient that they were already working on additional bombs for deployment against the enemy. But their hopes were dashed as much by the sudden and surprising Soviet invasion of Korea as by the emperor's no less unexpected, if inscrutable, "peace" broadcast. Or were they?

SOVIETS INVADE MANCHURIA

Just three days before the first *genzai bakudan* exploded outside Konan, Stalin, without cause, unleashed his mighty army against pitifully under-strength Japanese divisions in Manchuria. His 1,701,500 troops confronted 1,427,000 defenders equipped with 5,360 primarily light field guns, 1,155 armored cars and light tanks, plus 1,800 aircraft (in the main, trainers and obsolete types, leaving only about 50 modern bombers or fighters). These were opposed by 5,368 warplanes, 5,556 heavy and medium tanks, and 27,989 artillery pieces marshaled by the Soviets. The Kwantung Army was additionally hamstrung by critical shortages in fuel and ammunition of all types.

> The Japanese were close to deploying their own jet aircraft and A-bombs.

Despite their utterly hopeless situation, the Japanese and their Manchurian and Mongolian allies offered fanatic resistance, exemplified by the fighting around the town of Hailar, where the Soviets suffered many of their 34,150 casualties in just a few days. But the Red floodtide was irrepressible and, after a week of fighting, Emperor Hirohito's pre-recorded *Gyokuon-hos* was transmitted over radio to the Japanese nation. But the poor broadcast quality of his "Jewel Voice Broadcast," combined with the unfamiliarly archaic and courtly language he used to make it, never mentioning the word "surrender," only confused his listeners. Contributing to their bewilderment, a radio announcer informed them in an explanatory afterword that the emperor did not imply Japan would ever surrender—nor had Hirohito mentioned the Soviet invasion, the real cause for his indefinite proclamation.

The combined 163,844 fatalities resulting from the atomic bombings of Hiroshima and Nagasaki (tens of thousands more were to subsequently die of radiation poisoning) almost paled before the more than 1 million charred corpses left behind the previous March by the U.S. Air Force firebombing of Tokyo. As such, Japanese leaders, inured to the mass-killing of their people, were relatively undaunted by these nuclear attacks, and quite prepared for continued resistance, particularly with the imminent deployment of jet aircraft and their own atomic bombs.

Hirohito's decision to end the war was caused not by Hiroshima and Nagasaki, but by the Soviet juggernaut rolling across Manchuria and Korea, and nothing but an armistice could stop it from taking the whole of Japan. Until a peace agreement was reached, the fighting in Manchuria would continue. Only on August 18, Gen. Otoz Yamada, the Kwantung Army commander, was finally ordered by Imperial Army headquarters in Tokyo to cease firing. By then, Soviet forces were about to seize F-go facilities.

The Japanese, according to David Snell's article, "destroyed unfinished atomic bombs, secret papers and … atomic bomb plans only hours before the advance units of the Russian Army moved into Konan, Korea, site of the project." Snell continued:

> Before Russian columns reached Konan, dynamite sealed the secrets of the cave [where the atomic laboratory was located]. But the Russians had come too quickly for most of the scientists to make good their escape. Japanese scientists who developed the bomb are now in Moscow, prisoners of the Russians. They were tortured by their captors, seeking atomic "know-how."[15]

How much F-go physicists may have contributed, if anything, to the development of the Soviet nuclear program is unknown. Snell suspected

Japan Developed Atom Bomb; Russians Grabbed Scientists

Baruch Hits Wallace On Atom Views

Japanese testing of an atomic bomb was publicized in the United States as early as 1946.

that "the story may throw light on Stalin's recent statement that America will not long have a monopoly on atomic weapons."[16]

According to Wakabayashi, "The Russians thrust burning splinters under the fingertips of these men. They poured water into their nasal passages. Our Japanese scientists will suffer death before they disclose their secrets to the Russians."[17]

Wakabayashi's information had been obtained in part from Otogoro Natsume, a chemical engineer who fled from Konan during October 1946. Some weeks after his capture, along with many of his colleagues the previous August, Natsume escaped and made his way into the south, where he was detained and interrogated by U.S. military authorities. From him they learned not only of the Communist atrocities he personally witnessed, but also about F-go's nuclear test in the Gulf of Yonghung-Man shortly before Red air force paratroopers seized the North Korean atomic laboratories.

Natsume's account of Red barbarism was not unfounded, according to Wilcox:

> U.S. and British reports indicate that the Soviet troops that occupied Manchuria [about 700,000] looted and terrorized the people of Mukden, and were not discouraged by Soviet authorities from "three days of rape and pillage." In Harbin, Chinese residents posted slogans such as "Down with Red Imperialism!"[18]

Even "protests from Chinese Communist Party leaders on the mass rape and looting" were ignored. "Many Japanese settlers committed mass suicide, as the Soviet army approached."[19]

Nor were Gen. Yamada's 83,737 fatalities entirely the result of combat. Marshal Aleksandr Mikhaylovich Vasilevsky, commander-in-chief of Red armed forces in the Far East, already overburdened with more than 640,000 prisoners of war, executed whole regiments of surrendering enemy troops to prevent further overcrowding. None of this was new, given equivalent Communist conduct in Eastern and Central Europe.

What was surprising, however, was the abrupt full-stop Soviet forces

made short of the Yalu River. They halted at the 38th parallel "in accordance with arrangements made earlier with the American government to divide the Korean peninsula," without, incidentally, consulting the Koreans.[20]

But Stalin never abided by preliminary accords with anyone—least of all, his ostensible Western allies—particularly where the acquisition of new territories or peoples was at issue, and nothing could prevent him from seizing all of Southeast Asia. In fact, the optimum moment for doing so had clearly arrived.

"Unbeknownst to the Americans, the Soviets were preparing to follow up their invasions of Sakhalin and the Kuril Islands with an invasion of the weakly defended island of Hokkaido by the end of August," author Joseph Gonsalves points out.[21]

SOVIETS DETERRED?

Since then, historians have been puzzled by the inaction of Marshal Vasilevsky's victorious Russians, who voluntarily left the badly beaten Japanese still in control of the entire southern peninsula, when Japan herself was wide open to easy conquest. The question continues to linger and surfaced again during *Nexus* magazine's mid-summer 2012 interview with Douglas Dietrich.

While a U.S. Department of Defense military librarian at the Presidio military base in San Francisco, Dietrich was given English-language summaries of original Japanese documents earmarked for shredding. One of them revealed that Marshal Vasilevsky's troops "were going into South Korea, and they were ready to invade Japan … but they were stopped because of the deployment of atomic weapons on August 12, 1945."[22]

Interestingly, this is the same date cited in David Snell's October article of that year for the supposed "test firing" of a *genzai bakudan* in northern Korea. Throughout his three-part *Nexus* interview, Dietrich did not mention nor seem to have known about Snell's report in *The Atlanta Constitution*.

Perhaps the incident alleged to

U-Boat Nemesis Here

Warship Captured General

The USS Sutton, destroyer escort here for Navy Day, was the ship which intercepted the German submarine U-234, which was running for Japan with a German general, uranium for use in atomic bomb experiments and members of a military mission after VE-Day.

The Sutton already had intercepted two other U-boats when ordered to bring in the U-234, according to her skipper, Lt. Com. Thomas W. Nazro, USNR, of Concord, N. H. "It sounded like just another sub to us," he said.

"We made contact with her and asked her size. We were pretty staggered when she signaled back 2000 tons. That's a bit bigger than we are."

GENERAL ON BOARD

ficer and now executive officer, led a boarding party aboard the U-boat. He found the military mission, including Gen. Der Flieger Ulrich Kessler of the Luftwaffe complete with monocle. There had been two Japs aboard, but the Germans declared at the word surrender, they had committed hara kiri. The bodies, they said, had been heaved over the side.

The general was taken aboard the Sutton. With him was a paper-

sion expert and plans for V-2 rocket bombs and jet propelled planes.

Gen. Kessler, stepping into the boat that was to transfer him to the destroyer escort, faced aft and saluted Judson W. Catlett, coxswain, of Kewanee, Miss. Catlett was too busy to return the salute, but said:

"That's okay, general, just carry on." Catlett has just left the ship for his Navy discharge.

LONG BUSY IN ATLANTIC

Five days later the Sutton brought the U-boat into Portsmouth, N. H., and turned her over to the Coast Guard.

On May 14, 1945, five days after the German surrender, U-234 was taken in charge by the destroyer USS S*utton* before the submarine's cargo of high-grade uranium oxide, Hitler's second batch, could reach scientists in Imperial Japan. Here is a period newspaper article about the sub's capture. It indicates that two Japanese officers were passengers but committed suicide as soon they were informed the captain intended to surrender. Also aboard was Luftwaffe Gen. Der Flieger Ulrich Kessler who was in possession of plans for V-2 rocket bombs and jet-propelled planes.

have occurred outside Konan was not an experimental blast, but actually deployed by the Japanese in combat as the only method to effectively block the Soviet invasion of their country, which was, after all, the dire threat responsible for Emperor Hirohito's "Jewel Voice Broadcast." Just as likely, the test took place as Snell's article described, but was followed very soon after by another blast aimed at the invaders. The Japanese were said to have had several nuclear bombs stored in caves outside Konan.

Amazingly, their work on an atomic bomb was still in progress two weeks after the surrender. Apparently, yet more nuclear weapons were being readied for further use against the Soviets, should they attempt to cross the Yalu River.

While investigators only have Dietrich's word for the veracity of his statements (because his duties as Presidio librarian required him to destroy the original documents he claims to have read and paraphrased), Wilcox writes how Roger Anders, a historian for the U.S. Department of Energy's Office of Human Radiation Experiments, told him "that key intelligence files—those for the old AEC [Atomic Energy Commission], which kept our atomic records from 1947 through 1974, and those of ERDA [Energy Research and Development Administration, which took over briefly for the AEC]—have been destroyed."

Wilcox explains:

> This was a period that any Konan records would have been put in those intelligence files. "Somebody just chucked 'em," he [Roger Anders] said, "probably in the late 1970s and early 1980s." [Dietrich stated he began destroying documents for the Department of Defense in 1982.] …
>
> The regulations governing such destruction were broad enough then. The rules to retain were such that when someone wanted to destroy documents, they could. "That's the way it was. They're gone."[23]

Anders' experience parallels Dietrich's testimony, lending it some measure of credibility. But who stands to gain anything from such historical censorship, and why have they stifled public knowledge about Japan's nuclear development?

Wilcox believes "that the United States and Japan purposely covered up the story in order to protect what were perceived then [during the postwar era] as national interests."

OFFICIAL COVERUP OF NUKES

"The United States wanted an ally that could help against Russia and was, perhaps, embarrassed that it [the U.S.] had not been more fully informed of the Japanese project," Wilcox argues. "Japanese officials did not tell the full story for fear of being prosecuted as war criminals and being scorned by their own people, who had suffered two atomic bomb attacks."[24]

More certain was the role played by the last submarine that attempted to supply Japan, Germany's Asian ally, with high-grade uranium in this strange saga of Japan's atomic bomb. After the surrendered U-234 was taken to Portsmouth, New Hampshire on May 19, 1945, she was found to be carrying 50 nine-inch lead, cube-like canisters lined in gold foil. Within 72 hours, their contents were examined by none other than J. Robert Oppenheimer, the so-called father of the atomic bomb, for his role in the Manhattan Project, as head of its secret weapons laboratory.

He identified the cargo, and had Maj. John Lansdale, the Project's Chief Security Officer, remove it via truck convoy to Washington, D.C. for immediate inspection and evaluation. One day after their arrival, the canisters were sent to Oakridge, Tennessee, where raw uranium was transformed into weapons grade material through a prolonged process of purification and enrichment.

GERMAN CARGO REPURPOSED

Less than two months after Oppenheimer first laid eyes on the German uranium, it arrived in July at Los Alamos, New Mexico. There, on July 16, his atomic device he called

Summer, 1945

Germany, Japan and the Harvest of Hate

By Thomas Goodrich

Don't expect a sanitized, feel-good account of the last days of WWII. Here is the the uncensored truth about the last fateful months of WWII in graphic detail. What is contained in this book is a shocker to most Americans, who think we were saintly liberators. Unfortunately, this is not the kind of war "we" fought. U.S. soldiers shot Axis prisoners in cold blood, wiped out hospitals, strafed lifeboats, killed enemy civilians, executed enemy wounded, tossed the dying into holes with the dead, boiled the flesh off enemy skulls to make table ornaments or carved their bones into letter openers and committed mass rape. We mutilated the bodies of the enemy. We kicked out their gold teeth for souvenirs. We topped off our saturation bombing of enemy civilians by dropping A-bombs on two defenseless cities. Softcover, 342 pages, #818, *$26* plus $5 S&H inside the U.S. from TBR, P.O. Box 550, White Plains, MD 20695. Call 1-877-773-9077 toll free to charge, Mon.-Thu.8-4 ET. Order online at www.BarnesReview.com.

"Trinity" was detonated 250 miles to the south, near the town of Alamogordo. The Germans' confiscated shipment appears to have contributed significantly—perhaps decisively—to the bomb's success.

From its inception on December 6, 1941, the Manhattan Project was impotent for its inadequate supplies of high-grade uranium, the same scarcity that also bedeviled Dr. Nishina and his colleagues in Tokyo. Months before the Third Reich was destroyed, Maj. Lansdale accompanied Allied forces fighting their way across Germany in a desperate search for any fissionable material.

"Lansdale," *The New York Times* reported, "had been chosen by the project's director, Gen. Groves [Lt. Gen. Leslie Richard Groves Jr.], to lead a strike on a factory in Stassfurt, in northern Germany, where Gen. Groves suspected the Germans had a cache of bomb materials." On April 17, "Lansdale and his team raided the plant and found about 1,100 tons of ore, some in the form of uranium oxide, a basic material of atomic bombs."[25]

The ore yielded a small quantity of raw uranium, all of it low-grade. In short, Lansdale could not provide Oppenheimer with amounts necessary to generate a single chain-reaction explosion. Only after the enemy submarine yielded her supplies the following month were the Americans awash in sufficient quantities to complete their atomic weapons production.

The gold-lined canisters supposedly held 560 kilograms of uranium oxide, which could be processed into somewhat more than one-half a kilogram of isotope U-235, around 20% required to arm a contemporary fission weapon.

In itself, this amount was not enough for a bomb, but it would have contributed enough to Manhattan Project stockpiles, permitting its physicists to set off their Alamogordo blast. Until then, during the previous three years, they had been starving for high-grade uranium. Now, following the U-boat's arrival in Portsmouth, they were suddenly rich in the stuff, which enabled them to not only ignite "Trinity," but the bombs that shortly after destroyed Hiroshima and Nagasaki.

Just prior to sailing, as the 50 lead canisters were being stowed aboard the German submarine at the Kiel dockside, wooden crates containing them had already been hand-painted by Shoji Genzo and Hideo Tomonaga with the designation, "U-235." This caused some merriment among the *Kriegsmarine* crewmembers, because they imagined the foreign passengers had misidentified their own vessel, the U-234, with the mistake of a single last digit, a "5" rather than a "4" for U-234. But the Japanese lieutenant commanders were all too aware of the difference between their fissionable cargo and the submarine transporting them to Japan.

> It was the Soviet invasion of China that convinced the Japanese to surrender.

Germany, it seems, possessed relatively abundant supplies of uranium oxide. In 1943, Hitler, as mentioned earlier, unhesitatingly dispatched two tons of it to Japan at Ambassador Oshima's request.

"Japan's Atomic Bomb," a documentary telecast by The History Channel in 2008, stated that the uranium aboard U-234 was "enough, after processing, for two atomic bombs."[26]

Coincidentally or not, this amount, combined with U.S. stockpiles of the required isotope, would have been just sufficient for the bombs detonated at Alamogordo, Hiroshima, and Nagasaki.

But the Germans must have been bringing quite a good deal more. Oppenheimer's Manhattan Project went virtually overnight from suffering from years of uranium impoverishment that he lacked high-grade material for a single nuclear test, to the incredible mass-production of 16 atomic bombs in four months. While the surrendered submarine's 560 kilograms of raw uranium could not have been responsible for their creation, the same amount in refined uranium—U-235—would have been enough to build such a nuclear arsenal.

The fate of that lethal cargo had been in the hands of Johann-Heinrich Fehler. But the Kapitänleutnant was faced with something of a dilemma. After learning the war was over, he was duty-bound to obey the orders of Grand Adm. Dönitz, who was not only Oberbefehlshaber der Kriegsmarine (commander-in-chief of the German navy), but now Reichspräsident. The prospect of surrendering his undefeated vessel under a shameful black flag at the earliest opportunity was galling to him and every man aboard, and some urged Fehler to make for a friendly, neutral port in Argentina.

As a National Socialist, he could have obeyed a "higher command" by fulfilling his important mission and enabling Germany's loyal Japanese ally to survive, if not win the war. But Japan was still half a world away, and he imagined that every Anglo-American warship would be chasing him through three oceans long before he got there.

In truth, he had fallen off the map, as far as the Allies knew. U-234's escape from Royal Navy destroyers through a storm had been so complete she had been forgotten in the international euphoria then celebrating the end of the European war. As such, Fehler actually stood a good chance of sailing freely to South America, although a single Axis submarine entering the still-active Pacific theater was potentially suicidal.

He could have at least prevented his former enemy from obtaining the top-secret weaponry his boat was carrying by using the few days allowed him to toss these materials overboard

before meeting up with elements of the U.S. Navy. He did dispose of his Tunis radar detector, the new Kurier radio communication system, all code-related documents, and other classified Kriegsmarine papers. But by not dumping the stowed uranium, he consigned it to Oppenheimer who, thanks to such an unexpected fissionable windfall, was able to build atomic bombs for incinerating Japan's population centers that would have otherwise escaped destruction.

Shortly before Maj. Lansdale's death in 2003 at 91 years of age, the former Manhattan Project's chief security officer observed publicly, "It's ironic that the German uranium intended for the Japanese was ultimately delivered by the Americans."[27]

JAPAN'S MISSED OPPORTUNITY

An earlier event horizon in the *genzai bakudan* story was Takeo Yasuda's plea to Imperial army and navy general staff officers for building a nuclear weapon. Their rejection of his proposal until July 1941 meant that the Nuclear Isotopes project lost a crucial 10 months.

Had they instead possessed his foresight and adopted the lieutenant general's urgent recommendation when he first made it in September 1940, Japan's atomic bomb should have become available not a few days before she surrendered but by October 1944, in time for the Imperial Navy's last, major engagement.

How the deployment of such a device would have affected the outcome of the Battle of Leyte Gulf, if not the outcome of the Pacific War itself, historians may continue to speculate. ❖

Marc Roland is a self-educated expert on WWII and ancient European cultures but is equally at home writing on American history and prehistory. He is also a freelance book and music reviewer. Roland has written dozens of articles for TBR. To review them, access the yearly author/subject index found in the back of each year's November/December issue of TBR.

Fateful decision: Instead of surrendering to the U.S. Navy, if Capt. Johann Heinrich Fehler had pushed on to successfully deliver his fissionable consignment, Professor Nishina and his colleagues in the Imperial Japanese Navy might have completed an operational atomic weapon before war's end. More certainly, Hiroshima and Nagasaki would have been spared atomic attacks as U-234's uranium oxide would never have made it to the Americans.

Political Correctness Sank the *Titan*

By Marc Roland

Fascist Italy and National Socialist Germany recovered from economic misery during the 1930s, while Democrat-run America and Communist Russia sank deeper into the economic misery of the Depression era. Benito Mussolini and Adolf Hitler succeeded where Franklin D. Roosevelt and Josef Stalin failed because they replaced obsolete plutocratic and Marxist systems with meritocracy. Advancement came only through ability and talent—individual merit—not because of undue or unrelated influence, social standing, or politics. Instead, emphasis was laid on performance and achievement.

Consequently, the value of the Italian lire and German mark instantly rebounded because both were subsequently based on the skills and productivity of either country's Aryan workers, farmers, managers, teachers, artists and scientists.

Today, the precise opposite has taken root in America and Western Europe, where "woke" culture advocates receive preferential treatment and popular acclaim simply for being sexually depraved, anti-male, anti-White or non-White, irrespective of any real capabilities or lack thereof. That such madness inevitably results in the continuous decline of a nation's goods and services and the decay of its overall quality of production is self-evident.

That the corruption of civilization's formerly high standards in the name of political correctness must no less certainly lead to fatalities was dramatized on July 18 by the destruction of a small submersible with the loss of all five men aboard. *Titan* was conducting a tourist expedition to view the wreckage of the *Titanic*, when the 11.5-ton vehicle suffered a catastrophic implosion some 400 nautical miles from the coast of Newfoundland, Canada.

The *Titan* submersible.

Among the victims was the CEO of OceanGate, the firm that designed and built *Titan*. In an interview prior to his death at its controls, Stockton Rush told Teledyne Marine, a conglomerate of various undersea technology companies, that he would no longer hire "50-year-old White guys, because I wanted our team to be younger, inspirational."[1] He replaced them entirely with new employees, whose sole qualifications were their identity as "persons of color" and/or women of various racial compositions, all of them in their 20s.

The deadly consequences of such "woke" decisionmaking quickly materialized.

Among the last of the "50-year-old White guys" still working for Rush was OceanGate's own director of marine operations David Lockridge, who repeatedly warned of numerous design flaws, lack of real craftsmanship, inadequate materials, and general ignorance compromising *Titan*'s safety. He was rewarded for his caution by being fired, then sued by Rush.[2]

As some indication of the operational efficiency OceanGate enjoyed at the hands of its politically correct personnel, they did not get around to reporting the disappearance of their boss and the "mission specialists" (as he flattered his multi-millionaire tourists) until a full eight hours after *Titan* went missing. Yet, the hundreds of rescue operators who spent more than three days looking for him in the hope of saving his life, risking their own lives in the search, were all "White guys" of the kind he disparaged as uninspirational and had removed from his employ.

His attitude was typical of the "woke" mind-set prevailing among growing numbers of brainwashed numbskulls. It will be the death of the West, just as *Titan* was the death of its quarter-million-dollar-per-ticket passengers on their one-way voyage to the *Titanic*. As the 1912 ocean liner's dark fate foreshadowed World War I and its fatal consequences for Europe, so 2023's 22-foot-long submersible was a real-life metaphor presaging the implosion of Western Civilization. ❖

Germans Extorted for $1.4 Billion

The alleged "Holocaust" of "6 million Jews" during WWII happened nearly 80 years ago. Since the end of WWII, the German government has handed out over $100 billion to organized Jewish groups, "Holocaust survivors" and the state of Israel. A rational person would think that these reparations would be winding down or ending, but that would be a mistake. Despite rising inflation, endless piles of cash and weaponry for the NATO proxy war against Russia via Ukraine, and other pressing economic needs, the German government agreed to a record $1.4 billion for "Holocaust" reparations earlier this year, a sum that will be paid to the Conference on Jewish Material Claims Against Germany, which has been extorting the Germans since the end of WWII. The shameless racket continues in seeming perpetuity.

Can't Take a Joke?

Roseanne Barr, the iconic actress and comedian most popular for her self-titled sitcom program *Roseanne* that aired on ABC for nearly 10 years, has found herself in hot water once again. During an appearance on the popular YouTube program "This Past Weekend" with host Theo Von, Barr made a sarcastic comment about one of the most taboo events in modern history: the alleged "Holocaust" of 6 millon Jews said to have taken place during WWII. Barr first sarcastically noted that President Joe Biden received 81 million votes during the last presidential election, which she clearly questions. "That's the truth," Barr quipped, sarcastically referring to the 2020 election results. "And don't you dare say anything against [the election results] or you'll be off YouTube, Facebook, Twitter and all the others because there's such a thing as the truth and facts and we have to stick to it." She then continued by sarcastically alleging "nobody died during the Holocaust, either," before arguing that "it should happen, 6 million Jews should die right now because they cause all the problems in the world," a bombastic and ironic comment that she clearly meant as a joke to criticize "cancel" culture and political correctness. Barr, who is Jewish, was immediately attacked for her "reprehensible and irresponsible" statements by the Anti-Defamation League, among other groups and activists.

ROSEANNE BARR
Ostracized again for comments.

✠ ✠ ✠

ADL Launches Global Task Force

In late July, the Anti-Defamation League, one of the most subversive, anti-American activist and lobbying organizations in the U.S., announced a new international task force to combat "anti-Semitism," which essentially amounts to criticism of Israel or an open recognition of the power and influence of organized Jewish groups. The ADL and other leading Jewish organizations previously worked directly with the Biden White House to formulate a first-of-its-kind National Strategy to Combat Anti-Semitism, a "a whole-of-society approach to tackle the scourge of anti-Semitism in America," according to the White House. The new task force, known as "Large Communities Task Force Against Anti-Semitism," or simply "J7" for short, will be led by the ADL and will include prominent Jewish organizations from France, Canada, Germany, Argentina, the UK and Australia.

Rest in Peace Prof. Lynn

Humanity lost a legend on July 17 of this year with the passing of Richard Lynn, a prominent psychologist best known for his expansive and thorough studies of human IQ and intelligence. Lynn passed away at age 93, leaving behind an extraordinary career and body of work not likely to be surpassed by any similar scholar. Born in Hampstead, England and educated at the prestigious University of Cambridge, where he received his bachelor's, master's, and doctorate degrees in psychology, the indefatigable Englishman never shied away from sharing his politically incorrect findings with the world, defending them professionally and respectfully. Lynn "was fascinated by IQ differences, not just between individuals but between groups, regions, nations, races and the sexes," Jared Taylor, who worked closely with Lynn at American Renaissance, wrote in commemoration of the noted psychologist following his passing. "Probably no one since Francis Galton has looked more deeply into the causes and consequences of the unequal distribution of intelligence. Like Galton, Lynn feared for the future

RICHARD LYNN
Politically incorrect professor.

of our species if people of low intelligence and bad character continued to outbreed people of high intelligence and good character." The world could use more honest, principled psychologists like Lynn, rather than the "woke," politically correct Marxists being churned out of modern universities today.

Russian Nationalist Arrested

Igor Girkin, more commonly known as Igor Strelkov, a Russian army veteran, former FSB officer and militia organizer and commander in the Donbas, was arrested by Russian security forces on July 21. Strelkov, a popular figure in Russia's nationalist and military community, faces trial in September as TBR goes to press on charges relating to "extremism," punishable under Article 280 of the Russian criminal code, a dubious, Orwellian law designed to target dissidents. Like many military hardliners and nationalists in Russia, Strelkov was increasingly critical of the Kremlin's prosecution of the "special military operation" in Ukraine. A former defense minister in the Donetsk People's Republic, one of the republics in the Donbas region of Ukraine that declared independence from the central government based in Kiev, Strelkov's arrest will likely have a chilling effect on Russian peaceniks and nationalists critical of the Kremlin and Russian Ministry of Defense.

Soccer Coach Detained

In late June, Nahel Merzouk, a young 17-year-old Maghrebi Arab of French-Algerian descent who was known by police, particularly for resisting arrest, was fatally shot by a French police officer as he was refusing to comply with a traffic stop. In the days that followed, France was rocked by George Floyd-style riots and criminal mayhem, which included looting, arson attacks, violence against police and the destruction of public buildings across the country, all largely carried out by non-White migrants and descendants of migrants in France. Despite the widespread destruction and terrorism being carried out, French authorities still found the time and resources to detain a popular French soccer coach for making "racist" and "Islamophobic" remarks more than a year ago. Paris Saint-Germain coach Christophe Galtier was held for questioning along with his son as part of a probe into alleged discrimination, it was reported on June 30, days following Merzouk's death.

CHRISTOPHE GALTIER
Harassed for "Islamophobia."

Gold Coins Discovered

A shocking discovery of over 800 Civil War-era gold coins was unearthed in a Kentucky cornfield in May of this year, leading to speculation and enthusiasm among numismatic experts and Civil War buffs alike. The details of the discovery, including those who made the surprising find and its precise location, have been kept secret. The U.S. Mint offered the coins for sale, which included U.S. Gold Dollars minted between 1854-1862, $10 Gold Liberty coins minted between 1840-1862, and $20 Gold Liberty coins minted between 1857-1863. According to the U.S. Mint and numismatic experts, the rare coins were extremely high quality and sold out in a matter of hours. The U.S. Gold Dollars fetched a price of $1,995 while the $20 Gold Liberty coins sold for an astonishing $100,000 each, according to a representative from the U.S. Mint office. Louisville Numismatic Exchange President Byrd Saylor noted that this discovery was particularly intriguing, considering there were not many gold coins manufactured during the Civil War. Kentucky declared neutrality during the Civil War, and many families in the Bluegrass State were deeply divided, leading some to bury their valuables.

Suppressed Books Never Offered Before by TBR Book Club

Limited Quantities Available! Call to Reserve!

Darwinism and Race Progress—By John Berry Haycraft. A superb treatise in evolution and eugenics from one of Britain's leading professors of physiology and discoverer of the anti-coagulant hirudin. Professor Haycraft discusses race, Darwin's Law of Selection, Galton's work, and the hereditary nature of diseases, insanity, alcoholism, crime and racial degeneration. Softcover, 192 pages, $19. **9 in stock!**

Der Untermensch / The Underman in English. By Jupp Daehler. A quality digital copy taken from the original. Contains all original illustrations and the first completely accurate English translation. First issued in 1942 by the SS head office under the direct orders of Himmler, *The Underman* has ever since been portrayed as "anti-Slavic," "anti-Russian," and "anti-Jewish." Only the third allegation has any truth to it. The others were postwar propaganda. Softcover, 8.5 x 11, 52 pages, $14. **12 in stock!**

Essays in Eugenics—By Francis Galton. Sir Francis Galton was instrumental in the formulation of "eugenics," which seeks to improve the human stock and prevent the degeneration of genetic potential. Galton invented the phrase "nature versus nurture."This book consists of a number of lectures delivered by the author during the early part of the 20th century, all dealing with important topics related to the betterment of human existence through eugenics. Softcover, 116 pages, $15. **9 in stock!**

Commissary to the Gentiles: A Jew Answers Anti-Semitism—By Marcus Eli Ravage. A book which will shock Christians, Jews and atheists alike. The Jewish author, angered by the "tide of rising anti-Semitism" in the early 20th century, pointed out that if people were looking for a "Jewish conspiracy" then they should not talk about Communism or Capitalism, but admit that Christianity—and post-Roman Western civilization—has a Jewish spiritual, historical, intellectual and moral basis. The afterword by Prof. H.E. James investigates the author's claims. Softcover, 78 pages, $13. **10 in stock!**

Free America: Six Speeches by the Leaders of the German American Bund, Madison Square Garden, February 20, 1938—By Fritz Kuhn, J. Wheeler-Hill, Rudolf Markmann, George Froboese, Hermann Schwinn and William Kunze. Includes "A Short Illustrated History of the German-American Bund" by Arthur Kemp. Softcover, 104 pages, $14. **11 in stock!**

Great Britain, the Jews and Palestine: How America Was Dragged into World War One by the Zionist Lobby—By Samuel Landman. This book reveals how the Zionists struck a deal with the British: In return for Britain handing Palestine to the Jews at the end of the war, the Zionists would use their power in America to bring that nation into the war against Germany. The deal, based on the fact that Palestine was under Ottoman Empire control—an ally of Germany during WWI—was that the Turks would be defeated and that its territories would pass into British control. Softcover, 33 pages, $10. **10 in stock!**

On Martial Arts, Zen, and the Blue-Eyed, Red-Bearded Barbarian—By Ali Aliabadi. Who was the founder of Shaolin kung fu? Was Zen Buddhism created by a Japanese sage? What role did Nordics play in the formation of Far Eastern civilization? This remarkable essay draws together considerable evidence that the founder of Buddhism, martial arts and the Zen philosophy was an Indo-European wanderer into the Far East. Drawing on original descriptions and writings from Asia, the author shows that Buddha was first described with Nordic features. Softcover, 37 pages, $10. **11 in stock!**

Original European Religions Volume X: Valhalla and European Traditions—DNA, history and archeology have shown that the European people have existed for around 40,000 years, of which Christianity has only been the dominant religion for less than 1,000 years. Read the most famous stories from the Norse Gods and of how they directly influenced the legend of Holy Roman Emperor King Barbarossa, Vitellus, Roman Prefect of the Lower Rhine, the Cheru sword,

the slaying of Atilla the Hun, the legend of the Lorelei of the Rhine, the Rhine Gold, the origin of Yule, and more. Softcover, 204 pages, $20. **11 in stock!**

Racial Realities in Europe—By T. Lothrop Stoddard. A sweeping survey of the physical characteristics and geographical placement of the main European sub-races at the beginning of the 20th century. Now updated with a 32-page appendix and a fully updated DNA map of Europe, compiled by Arthur Kemp from more than 70 scientific papers and studies into an easy-to-read format with charts and tables. This appendix reveals the exact proportions of European and non-European DNA in each European nation. Also includes a section on what DNA reveals about the longstanding "Khazar" theory. Softcover, 236 pages, $25. **10 in stock!**

Religion for Infidels—A tour de force from Anthony Ludovici which addresses one of his favorite subjects: the issue of what he sees as the negative role of Christianity in the development of Western philosophy and morals, and how the opposite position—outright atheism—is equally unacceptable. Instead, as he details in this work, a mean must be sought which encompasses reality, a lack of superstition, and a spiritual worldview which encourages personal health and well-being. Softcover, 265 pages, $24. **10 in stock!**

The Epic of Gilgamesh. The Home of the Indo-Europeans: An Investigation Based on Language and History—Translated by R. C. Thompson. *The Epic of Gilgamesh* is among the earliest surviving works of literature, with the earliest versions dating from around the Third Dynasty of Ur in early Sumeria (2150-2000 BC). Preserved in Cuneiform, the epic was retold over the centuries, and the most complete version was discovered in the ruins of the library palace of the 7th-century B.C. Assyrian King Ashurbanipal. Taken up into Judaism, and then into Christianity, the book of Genesis copies almost every detail of the flood from this earlier Sumerian work. The epic tells the story of the king of Uruk, Gilgamesh, and his adventures with his erstwhile foe and then friend Enkidu. Together they journey to the Cedar Mountain to defeat Humbaba, its monstrous guardian, then they kill the ferocious Bull of Heaven, which the goddess Ishtar sends to punish Gilgamesh for spurning her advances. Softcover, 82 pages, $11. **11 in stock!**

The Lays of Ancient Rome—Lord Thomas Babington Macaulay's classic collection of four lays (epic poems) describe heroic episodes from ancient Roman history. They are a delightful literary adventure which allow the reader to enjoy a high point in European culture while learning some incredible details of Roman history. These masterpieces of literary writing were so highly regarded that they were required reading in British schools for more than 100 years—until they were deliberately eradicated. Softcover, 107 pages, $11. **11 in stock!**

The Nibelungenlied: Translated Into Rhymed English Verse—The original was written as a poem in 2,400 stanzas, divided up into 39 Aventiuren ("adventures"). The Nibelungenlied ("The Song of the Nibelungs") is an epic poem originally written in Middle High German around the year 1180. It tells the story of the dragon-slayer Siegfried at the court of the Burgundians, how he was murdered, and of his wife Kriemhild's revenge. This edition has been translated into poem format with the exact metre of the German original. It includes a complete background introductory essay by the translator, in which much fascinating detail of the epic is revealed. Softcover, 324 pages, $22. **12 in stock!**

The Origin and Deeds of the Goths—Translated by Charles C. Mierow. De origine actibusque Getarum, or the Getica, is a summary of the now lost account by Cassiodorus of the origin and history of the Gothic people. It tells of the great battles between the Goths and Romans, of the First Great Race War against Europe waged by the Huns under Attila, the Gothic involvement in the great sacking of Rome—and much, much more. Softcover, 132 pages, $15. **11 in stock!**

The Lies of the Victors: Hidden WWII Truths

INTRODUCTION

In 1958, it was still—just barely—possible to publish an honest history of "victors' justice," which was meted out with inhuman ferocity to the vanquished at the end of World War II. F.J.P. Veale has served posterity well in telling the truth about seven of the biggest lies perpetrated by "the Greatest Generation." He does so with direct simplicity, but also with sharp-edged, sarcastic wit, making his book *Crimes Discreetly Veiled* an important—and at times surprising—introduction to topics that have cost more recent Revisionist historians their livelihoods, and even their freedom. Arthur Kemp and Ostara Publications deserve thanks again for saving true history from oblivion.

By Ronald L. Ray

Adolf Hitler famously wrote in *Mein Kampf* about the Big Lie—a lie so grossly exaggerated and monstrous that the average person cannot even fathom the possibility of its falsehood and consequently falls into the trap of believing the fabrication is "truth." This even happened with Hitler's exposition of the Big Lie itself.

His calumniators and cultural Communists long have claimed that he was explaining his own propaganda practices. But, as one can read for himself, Hitler was in fact describing his first-hand experience with the Jewish (especially Judeo-Communist) methods of deluding the population in order to dominate Gentiles—most of all, the German people.

The Big Lie was employed, too—with deathly effectiveness—by the Allied powers in both world wars and is the Orwellian tactic of choice for both Communist revolutionaries and the ever more imperialistic United States of America. And, as most readers of The Barnes Review are well aware, perhaps the Biggest Lie is that of the "Holocaust," the alleged homicidal gassing of "at least" 6 million Jews by National Socialist Germany during World War II.

British historian F.J.P. Veale was an early Revisionist and the author of several seminal books on the events of WWII.

However, the "Holocaust" is only one exagerrated event of that war. In any military conflict, "the first casualty of war is the truth." It belongs to the honest historian to unravel the threads of the cloak of darkness thrown over uncomfortable facts. This is what F.J.P. Veale has done with seven of the Big Lies told during and after World War II in his seminal book, *Crimes Discreetly Veiled*. In this article, we take a look behind the Allies' "iron curtain" of prevarications.

THE AUTHOR

Frederick John Partington Veale (1897-1976) was born in Ramsgate, England. After his education at St. Lawrence College, he was admitted to practice law as a solicitor in 1926. He was a member of Oswald Mosley's British Union of Fascists and a prolific writer and noted historian. Apart from *Crimes Discreetly Veiled*, he authored the first English-language biography of Vladimir Lenin after visiting the Soviet Union in 1931. He also wrote a biography of Frederick the Great and *Advance to Barbarism* (updated in 1963), one of the first in-depth criticisms of the Allies' inhuman war crimes show-trials at Nuremberg. [See

Seated, from left to right: British Prime Minister Winston Churchill, U.S. President Franklin D. Roosevelt and Soviet General Secretary Josef Stalin in the courtyard of the Livadia Palace in Crimea, February 9, 1945. It was here that the deaths of millions of Eastern Europeans and Russians who fought against Communism were ensured. A terminally ill FDR died but a few months after this tragic meeting.

TBR, March/April 2018.—Ed.]

Veale's remaining book, *Crimes Discreetly Veiled*, came highly recommended from the outset. The Rt. Hon. Maurice Lord Hankey, 1st Baron Hankey, one of the greatest and most important British civil servants of the 20th century, a man described as one who "progressively became secretary of everything that mattered … [who] grew into a repository of secrets," wrote a powerful foreword to the book.[1]

Interestingly, neither the Churchill Archives nor Wikipedia has dared to besmirch Hankey's memory, despite his refusal to accept the "official" narrative of World War II. Hankey, whose own efforts contributed to the release from prison of German Grand Adm. Erich Raeder after WWII, expressed the hope that Veale's revelations would contribute to ending the postwar injustices committed against the Germans.

"THE GREAT STALIN MYTH"

Veale begins his book by laying out what he considered the root cause of all the outrageous anti-German propaganda: the Churchill-Roosevelt war machine's need to convince the population of the greatness of the murderous Communist dictator "Uncle Joe" Stalin in order to achieve the goal of the destruction of Germany and the spread of Communism across all of Europe.[2]

"This could only be done by burying in oblivion until victory was won the history of the preceding quarter of a century," writes Veale.[3]

The way for this "Stalin Myth" was prepared by the universities of the 1920s and 1930s, which indoctrinated the upcoming intelligentsia into liberal, socialist and Communist thinking. During (and even for some time after) World War II, the torture, the millions of murders and the "mass deportations of the inhabitants of the Baltic States, Lithuania, Latvia and Estonia … of East Prussia, Pomerania, and Silesia" were ignored and covered up.[4]

"Uncle Joe" had to be supported at all costs.

One Big Lie, however, necessitates many others for its support. Veale carefully examines six of them. We have insufficient space to give each the thorough treatment it deserves, but let this brief summary convince you that *Crimes Discreetly Veiled*, amply illustrated with photographs, is a book you need to own and read.

THE KATYN MASSACRE

In straightforward but gripping detail, Veale recounts like a true detective for the reader the cruel facts about the massacre of some 4,500 Polish military officers in the Katyn Forest. After the Soviet Union invaded Poland in 1939, over 250,000 Polish soldiers were interned in the USSR. The survivors were released after Germany attacked the Soviet Union, to fight against the former.

Family members, however, reported that the officers did not return. Some 15,000 Poles, of whom 8,000 were officers, met a more gruesome fate, only fully explained after the fall of the Soviet state in 1990. Over half of those officers were executed, not by the usual Soviet machine-gun fire, but brutally one at a time, buried in huge mass graves at Katyn.

The Germans announced discovery of the graves on April 12, 1943, and asked the International Red Cross to investigate. The Soviets refused to consent. When the Germans asked experts from neutral countries to examine the matter, it became clear to all that the USSR was responsible. But that country was an "ally" against the Nazis. The war crime suddenly became a political problem, as the Soviet Union's help was critical to the Allied war effort.

The just pleas of the Polish Government-in-Exile in London fell on deaf ears in Britain and the United States. Truth became a "non-fact." And when, in 1945, the Soviets at the Nuremberg war crimes trials blamed Germany for the massacre, the other Allies were appalled but colluded by their silence. Veale remarks sarcastically, "[T]he Tribunal rose grandly to the occasion … [and] passed without comment to the consideration of other matters."[5] The lie persisted for decades after, and justice was never done. [See a detailed article about the mass murders at Katyn in TBR, May/June 2022 or buy the book below.—Ed.]

MUSSOLINI'S MURDER

"Mussolini was executed," most will say. But, here again, we were lied to. As Veale discusses, "execution" suggests an orderly trial and sentence of death. But the Italian Communist partisans had no interest in justice. A public or military trial might have kept Mussolini alive to disclose uncomfortable truths the Allies wanted buried. It would endanger the Communist revolution in Italy and its many death squads.

Veale recounts the last days of the Italian leader with feeling. Beginning with a succinct history of Mussolini's career, the author is ruthless in his disdain for the pack of opportunistic incompetents and criminals who comprised the political class of Italy in the last days of WWII, for whom Mussolini's true crime was to have joined the losing side.

Nevertheless, Veale succeeds in painting a memorable word portrait of the end of Fascist rule in Italy. Indeed, Mussolini, despite his failing health and obvious faults, appears almost as a tragic hero in the end, seeking vainly to die resisting conquest to the last. But, finally trapped by

MASS MURDER AT KATYN

The only complete English translation of the 1943 "Official Material on the Mass Murder of Katyn," compiled on behalf of the German Foreign Office based on documentary evidence. Edited and published by the German Information Center. Edited and compiled by historian Arthur Kemp.

This report has only ever been partially translated into English before. This first-ever full translation contains the complete original text, and all 83 original photographs. It also includes 18 new footnotes, in addition to the document's original footnotes, explaining events and details to the present-day reader. In addition, it contains a brand-new introduction which provides a complete background to the events at Katyn, including the full extent of the murders which was not available to the Germans in 1943. Softcover, 290 pages, 8.5" x 11" format, #929, **$28** minus 10% for TBR subscribers plus $5 S&H inside the U.S. Send payment with request to TBR, P.O. Box 550, White Plains, MD 20695. Call 1-877-773-9077 toll free to charge, Mon.-Thu. 8-4 ET.

Communist partisans near Lake Como, he is murdered by one who would later be rewarded with a seat in the Italian Senate.

Both the "important" documents and the remaining gold of the Italian Social Republic he carried sealed his fate. And, to ensure that no one learned the truth, a dozen or more others either "disappeared" or died under mysterious circumstances, grimly foreshadowing the tactics allegedly employed decades later by the Clintons.

Among the murdered was Mussolini's mistress Claretta Petacci. He had sent her away previously, but she tracked him down in the last days and insisted on staying and dying with him. There was no reason for her to be killed—except that she "knew too much." Veale rightly notes the similarities to gangland murders, and the reader will perhaps be shocked to learn the extent to which witnesses of the crime and people "asking too many questions" were bumped off. The author recounts the pathos of this grand human drama with a skill you must read for yourself.

FRENCH MASS MURDERER

Perhaps the grimmest and most grotesque tale told by Veale is that of French serial killer Dr. Marcel Petiot. At first glance, it seems bizarrely out of place in a book that focuses on the criminal deceptions of the Allied powers. But the reality, as the author reveals, is that Petiot succeeded in murdering at least 18, and perhaps almost 30, individuals only because of the circumstances of war.

Somehow, still unexplained, Petiot managed to escape the usual penal consequences for periodic petty thefts, drug-dealing, and abortion of women's babies. Rumors in earlier days of foul deeds, arising from the disappearance of patients, were never proven.

When the medical doctor moved to Paris during German occupation, particularly after Germany's invasion of the USSR in 1941, he finally found the environment that would enable his diabolical plans.

MUSSOLINI EXECUTED

5th Enters Milan; 7th In Munich

Brazilians Take Nazi Division

(BULLETIN) WITH THE 15TH ARMY GROUP, April 29 — The 56th London Division of the British 8th Army, headed by the famous 169th Queens Brigade, has entered Venice.

The 2nd New Zealand Division has reached the the Piave River, scene of Italy's greatest victory in World War I.

WITH THE 15TH ARMY GROUP, April 29 — Organized German resistance in Italy was crumbling today under the paralyzing blows of two Allied Armies, gaining momentum for the knockout punch and there were signs that the complete disintegration of the German Armies had begun.

Dramatic developments were disclosed in tonight's communique.

Milan has been entered by 8th Army troops.

Negotiations were in progress for the surrender of the Liguarian Army, formerly commanded by Marshal Rodolfo Graziani, now a prisoner and under Allied military control.

The 148th German Infantry Division surrendered to the Brazilian Expeditionary Force, delivering up

(Continued on Page 8)

Patriots Claim Fall Of Treviso, Turin

ROME, April 29 — Radio Milan from all indications firmly in the hands of Italian Patriots, claimed the liberation of Turin and of the province of Treviso, in northeast Italy today, Reuter's reported.

The radio announcement said that Turin had been liberated by the Partisans, and all its military barracks occupied.

General Mark W. Clark, 15th Army Group Commander, broadcast the following instructions to the Partisans:

"You must by all means prevent the Germans from carrying out the destruction of industrial plants and machinery," General Clark said. "On this task depends the future of Italy!

The signal for a general rising of North Italian Partisans was given by Field Marshal Sir Harold R. L. G. Alexander, Allied Commander in chief in Italy, through the National Liberation Committee, the Milan Radio disclosed.

Himmler Statement Hints Hitler Death

SAN FRANCISCO, April 29 (UP) — The possibility that Heinrich Himmler may have killed Hitler, as cynical evidence to the Allies of his "good faith" in desiring to surrender Germany, was suggested in diplomatic quarters here today.

A high British source revealed first evidence in what was regarded in San Francisco as a desperate attempt by Himmler to save his own skin. These quarters assert that Himmler advised the Allies through Stockholm that Hitler "may not live another 24 hours."

The timing of the message was such that many believe Hitler may already be dead at the hands of his once trusted lieutenant."

Berlin 90 Percent In Russian Hands

MOSCOW, April 29 — The Red Army is now battling for a May Day victory in Berlin — 90 percent of which, according to United Press, is in Russian hands.

With less than 24 hours to go before the eve of the great Soviet holiday, Marshals Gregory Zhukov and Ivan Koniev have launched a crushing all-out assault on the center of the city where the Germans are now hemmed into an area roughly covering the oldest part of the Reich capital.

The Moabit section of Berlin, northwest of the Wilhelmstrasse, fell to the Red Army tonight, according to the Soviet communique.

The German High Command, gambling everything on the possibility of a last-minute "split" developing between the West and East Front Allies, has withdrawn its troops facing U. S. forces on the

(Continued on Page 8)

Yanks Push Into Shrine Of Nazism

SHAEF, April 29 — Munich, fourth largest city of Germany and birthplace of Nazism, was entered by troops of the 6th Army Group tonight. Entry into the great Bavarian city after a 29-mile advance from the west, was made by elements of Lt. Gen. Alexander M. Patch's U. S. 7th Army from the north and southwest.

Initial dispatches did not tell of any fighting within the city which for the past two days had been attacked by Allied air forces.

Earlier, Army Ground Forces had been reported converging on the city in an 60-mile arc extending from the northeast to the southwest, and dispatches tonight told of the liberation by the U. S. 3rd Army of 27,000 Allied prisoners of war from a camp at Moosburg on the Isar River, 27 miles northeast of Munich. A great number of those freed prisoners were reported to be American airmen.

There has been no indication yet that Allied Armies have reached the most notorious of German concentration camps at Dachau, eight miles northwest of Munich.

The situation within Munich remained uncertain following an apparent attempt yesterday by a group identifying itself as the "Free Bavarian Movement" and led by General Ritter von Epp, Hitler's 75-year-old commissioner for Bavaria, to take over the city's government.

Reuter's reported that a radio using the city's wave length had told of revolt within the city, and had called upon the advancing Allies to bomb Field Marshal Albert G. Kesselring's headquarters near Munich.

Later, Reuter's said, the south

(Continued on Page 8)

Patriots Also Kill Aides, Mistress

ROME, April 29—Benito Mussolini has been executed by Italian Patriots, Radio Milan, voice of the Committee of National Liberation of Northern Italy, said today.

The Radio said Mussolini was executed last night along with a number of his henchmen and his mistress.

Two British war correspondents, Christopher Lumby, of the London Times, and Stephen Barber, of the London News Chronicle, who went into Milan in advance of Allied troops, reported today that they had personally seen the bodies of Mussolini and 17 of his henchmen on display in the Piazza Loreto. They said that crowds of Italians swarmed to [illegible] Mussolini and others, after having been captured near Lake Como, were taken to the village of Guiliano di Mezegere nearby. There they were tried and executed at 1630 hours on Saturday, April 28. Their bodies were carried in trucks to Milan for public display on the same spot where just a year ago 15 Patriots were executed.

Rome newspapers, like Il Giornale del Mattino and Libera Stampa, spread the news in bold, black headlines. Over all Rome quickly the report travelled, and crowds gathered around every newstand and great excitement stirred the people. At a rally being held near Piazza Venezia in honor of the northern Patriots, loud cheering greeted the announcement.

Radio Milan did not give details of the executions, nor of the summary trial which must have preceded them. Italians in Rome believed Mussolini and his followers were stood against a wall and shot by a firing squad of Partisans.

Among the others mentioned as executed were Alessandro Pavolini, Carlo Scorza, Fernando Mezzasoma, Goffredo Coppola, Nicola Bombacci and Claretta Petacci, mistress of Mussolini.

Pavolini was probably the chief Fascist among them. He was once Mussolini's propaganda minister. As one of a group of seven in the Fascist Grand Council, he used

BENITO MUSSOLINI
Rested In Death

Truman To Tell When Nazis Fall

WASHINGTON, April 29 — Official confirmation of a German collapse—when and if it comes—will be proclaimed in person by President Harry S. Truman in a message over all radio networks, Stephen T. Early, presidential secretary, announced last night.

Early's announcement was made after the nation had broken out in a pandemonium of joy and exultation over a false report from San Francisco that Germany had surrendered.

Meanwhile, Secretary of State Edward R. Stettinius Jr. and Russian Commissar for Foreign Affairs V. M. Molotov met in a surprise session late yesterday to consider the contents of a note from Marshal Stalin to President Truman and Prime Minister Churchill.

The note, according to Reuter's dispatch, recommended that the offer of Heinrich Himmler, chief of all Nazi defenses, to surrender Germany to the U. S. and Great Britain, be rejected.

That such an offer had been made was "confirmed in responsible Soviet quarters," Tass, the Soviet news agency, said it had been "authorized to state."

Reports from Washington and London that said that Himmler's offer had been turned down because only unconditional surrender to all three major powers would be acceptable.

The Soviet view, according to Reuter's, as expressed in Marshal Stalin's note, was that Himmler might not have sufficient authority to make such an offer and that no surrender talks should be started before Nazi armed might is completely annihilated.

The Russians, Reuter's reported, are said to be determined that the Nazis should not have the slightest justification or the appearance of justification for a repetition of German propaganda after World War I that Germany could have fought on but agreed to give up.

The peace story which originated in San Francisco yesterday touched off celebrations which did not end until long after President Truman announced that rumors about the end of the war in Europe were groundless.

Radio networks throughout the

(Continued on Page 8)

Nazi Civilians Get Diet One-Third of GIs

SHAEF, April 29—German civilians will be allowed a diet about one-third that of American soldiers and slightly more than half the standard for liberated Europe, it was announced here today, according to Reuter's.

The majority of Germans will be allowed 1,150 calories daily as compared with the 4,000 daily of American soldiers and with the consumption of between 2,500 and 3,000 in the U. S., and the 2,000 which is the standard of the liberated countries.

The capture and murder of Italian leader Benito Mussolini was a joyous day for the American media, which portrayed it as an "execution," implying The Duce had been given a trial. In truth, he, his aides and his mistress Clara "Claretta" Petacci were captured by Italian Communist partisans near the Swiss border. A day after their capture, as the story goes, they were shot and the bodies taken to Milan and dumped. The corpses were then abused and strung up in the town square. Some historians dispute some of these details, insisting instead that Mussolini was killed by an Allied special forces team bent on recovering wartime correspondence between Mussolini and Churchill. (See TBR, May/June 2012.) Historian F.J.P. Veale says Mussolini was killed so that the Communists could grab the remaining gold of the Italian Social Republic which was then used to fund the Communist revolution in Italy.

Psychopathic mass murderer Dr. Marcel Petiot appears in court.

Petiot would lure those seeking to leave France to his home, offering a secret "escape route." When they never returned, family and friends assumed they were safely in South America—which sometimes generated additional "referrals." Wealthy refugees, including a number of Jews, criminal underworld types and even children lost their lives. When the Gestapo became suspicious, the man they sent as a paid agent also disappeared. The Gestapo not unreasonably assumed they had been double-crossed.

The alleged manner in which the death-dealing doctor committed so many murders, and the way in which he disposed of the bodies, you must learn from Veale, as well as how Petiot met his just end. Petiot's methods, however, easily could have served as the model for fraudulent Jewish claims about the "Holocaust." But the real reason the "Monster of the Rue Lesueur" escaped justice for so long—and even escaped interest from the press—was the desire of the Allies to create an illusion about the Resistance during the war as well as the supposedly "peaceful" France after the expulsion of the Germans, as Veale accurately details:

> [A]fter the Liberation, more Frenchmen were done to death by their own countrymen than perished throughout the entire French Revolution: More than four times as many Frenchmen were judicially murdered or lynched in the years 1944-45 as had been put to death by the Germans during the occupation. …
>
> [D]roves of Frenchwomen [were] paraded through the streets stark naked by their chivalrous countrymen before having their heads shaved in public before exultant crowds. …
>
> Paris at the time Dr. Petiot carried on his dreadful profession so long and so successfully was not a city likely to give rise to Wordsworthian reactions in anyone. Human life was of no more account there than it was in Borneo in the days of the headhunters. Operating against the occupying forces were many gangs of [mostly Communist] terrorists who directed their attacks not only against isolated German soldiers but against any Frenchman whom the leaders of these gangs might be pleased to consider a collaborator. No one was safe from denunciation, arbitrary arrest, lawless violence and blackmail. In such conditions, the disappearance of a human body awakened no surprise.
>
> … And so the career of this lone wholesale killer has by tacit consent been discreetly withdrawn from investigation in order that the myth of a "democratic re-birth, of unity and brotherly love" might not be contradicted by facts.[6]

THE MARZABOTTO AFFAIR

One of the most edifying chapters is that of the "Marzabotto Affair" in Italy in 1944. Edifying not because of Allied vindictiveness and pusillanimity—which Veale recounts with no little irony—but because of the honorable actions of the unjustly accused Maj. Walter Reder of the German Waffen-SS 16th Panzer Division.

Reder, recipient of the Knight's Cross of the Iron Cross, and his hard-fighting unit were ordered away from the German "Gothic Line" defensive front along the Apennine mountains—where they were sorely needed to halt the Allied advance from the south—to stop the increasing depredations of the terroristic "Red Star Brigade" of Italian Communist partisans operating from a mountain hideout behind German lines to the north, south of Bologna in the small town of Marzabotto.

The difficulty was one rare at the time but common in later wars: bands of partisans who would attack and then slip away to hide among the civilian population. Surrounded by these "human shields," it was nearly impossible to separate combatants from the innocent. The Communists would execute as "traitors" any civilians who would not fight for them, adding to the difficulty.

Veale recounts with admirable objectivity and detail the actions of both sides in the hard-fought military operation to stop the vicious partisans,

numbering about 2,000. Using an encirclement tactic to prevent escapes, Reder's unit suffered only a few dozen casualties. Nearly all of the Communist terrorists were killed, admirably preferring to defend their mountain stronghold to flight, perhaps because their leader would have been unwilling to lose the large cache of war materiel air-dropped to the Communists by the Americans. After this quick success on September 28-29, 1944, Reder's unit returned to the front line and helped prevent the Allied drive from reaching the Po River before winter.

The problem arose when a French SS volunteer, Julien Legoli, later deserted and made false claims about Reder. Marked down by the Italians as a "war criminal," Reder, whose heroism on multiple fronts had cost him his left arm and damaged his knees, was living in "open arrest" in Salzburg, Austria, when the Americans detained him in September 1945 at the demand of the Italians. Finally finding no cause, they did not release him but turned him over to the British. The Brits likewise found insufficient evidence and should have restored his freedom. However, the "legal" climate of the war crimes tribunals demanded convictions at all costs.

The English handed Reder back over to the Italians, who finally tried him in 1951. In a farcical show, the honorable German military leader was falsely accused of multiple "massacres" of civilians. During previous interrogations, he had steadfastly maintained his innocence, to the point of welcoming a trial to defend himself.

During trial, he patiently endured numerous insults until the Communist prosecutor accused him of "stolen valor." Reder protested and vindicated his Knight's Cross.

If Reder had been guilty, a death sentence would have been certain. He should have been set free. But the political atmosphere—howling Communists outside the court building and a teetering center-right national government—made release a deadly proposition for the judges. So, they halved the baby and sentenced Reder to life imprisonment.

Former Maj. Walter Reder of the German Waffen-SS 16th Panzer Division enters an Italian court to defend himself against war crimes charges. It was alleged that he and his men had massacred innocent civilians while rooting out Communist partisans renowned for their brutality. Though he was not convicted in the Allied war crimes trials, the Italians demanded his extradition to Italy, where a guilty verdict was all but guaranteed. He received a life sentence in 1948 but was finally paroled in 1985.

Then, after this injustice, the Italians inexplicably accused him of a Marzabotto "massacre" so neatly patterned on the "massacre" in Oradour, France, that the claim was clearly false. Nevertheless, even today, Reder is held to be the "criminal" who somehow committed both "atrocities," neither of which occurred.[7] While most imprisoned "war criminals" were released within several years, Maj. Reder received his freedom only 40 years later, in 1985.

"THE FATE OF A HERO"

Sometimes, even an enemy must give honor where honor is due. When highly decorated Gen. Hermann-Bernhard Ramcke of the German paratroopers surrendered with his remaining men in September 1944 after the bitter fighting during the American siege of Brest, France, they had been cut off for more than six weeks. But they had succeeded in depriving Gen. Dwight Eisenhower of any use of the port. Besides his and his men's exemplary bravery and upright conduct, Ramcke successfully negotiated the safe passage of 40,000 French inhabitants through enemy lines to safety. U.S. Gen. Troy Middleton, his opponent, did not cease to praise Gen. Ramcke—which served well in the years to follow.

Initially well-treated, things changed quickly after the war's end. Conditions in the POW camp in America became so bad that Ramcke escaped just to mail a letter to Washington, D.C., to help the internees—and then sneaked back into the camp. He was eventually returned to Europe, expecting release but ending up in the feared Cherche-Midi prison in France. Ramcke spoke out often against inflicted injustices, earning even more torture for his efforts.

Veale explains:

> Throughout his experience of prison camps and prisons lasting six years, Gen. Ramcke never seems to have grasped the new conception of what was the only fit and proper attitude to his captors of a prisoner of war belonging to the defeated side. Quite genuinely, the victors in the Second World War were oppressed by a consciousness of their own righteousness and by the fundamental wickedness of the vanquished.[8]

Finally, the French brought the general and two of his officers to trial in 1951. Accused of being the "Butcher of Brest," based not on evidence but on a French political need to demonize the German "hereditary enemy" even more, the judges were determined to convict Ramcke. However, when his friend Gen. Middleton got the chance to testify, the case against Ramcke and his men collapsed.

GRAND ADM. ERICH RAEDER
Locked up for nine years in Spandau Prison, also home to Rudolf Hess and other elderly alleged German "war criminals."

Not to be dissuaded, however, the court found him guilty. But fearing the wrath of the Americans, the French tribunal sentenced the general to five years' imprisonment. With time served counting toward the sentence in France, Ramcke was freed a few months later, returning home to write his amazing autobiography, *Fallschirmjager*.[9]

The lie of the "Butcher of Brest" was just barely defeated, but at great personal cost to Gen. Ramcke.

VICTORS' INJUSTICE

Veale entitles the last chapter of his book "The Super-Ersatz Crime." This "crime" was invented at the Nuremberg trials of the "major war criminals" by the International Military Tribunal: "The initiation of a war of aggression is … the supreme international crime, differing only from other war crimes in that it contains within itself the accumulated evil of the whole."[10]

Veale concerns himself with the outlandish trial and imprisonment of Grand Adm. Erich Raeder, a totally unpolitical career naval officer chosen only as a counterpart to the trial of Gen. Field Marshal Keitel. The crime? Launching a "war of aggression" against Norway. This, despite the fact that Raeder only executed the orders of the government, and that Churchill truly launched a war of aggression against Norway one day before! The Soviets, with Churchill's secret collusion, also launched a war of aggression by their invasion of Finland in 1939.[11]

In his concluding indictment against the Allies' diabolical "victors' justice," Veale is at his most savage. After a blistering account of the trial, he writes:

> The strange Alice-in-Wonderland atmosphere of Nürnberg was transferred to Spandau [Prison], buffoonery and brutality remaining mixed in about the same proportions. It is less unpleasant to concentrate on the details of the buffoonery. The treatment of the seven elderly prisoners in Spandau was based on the assumption that they were desperate criminals of superhuman ferocity, audacity and strength: that if vigilance was relaxed for a single instance, they would overcome their unfortunate guards, tear their way through the stone walls which surrounded them and join the hordes of sympathizers that were ever waiting outside the prison for their appearance.[12]

Although sentenced to life in prison in solitary confinement as "Number 4," Raeder eventually was released after some public outcry. Veale says:

> The ending of this unique episode of modern history was thus in keeping with the whole shameful story. To the very last, no one was sure what it was all about and what had been decided, if anything. The only fact upon which everyone was agreed was that a distinguished naval officer who had been on the

losing side was kept by the victors in rigorous captivity for nine years.[13]

Veale's caustic, sarcastic wit and engaging expository skills lay bare the delusory and criminal actions of the World War II Allies. *Crimes Discreetly Veiled* is a book you will want to read—and own. ❖

FROM TBR & OSTARA PUBLICATIONS—A CLASSIC BOOK RESCUED!

Crimes Discreetly Veiled

Seven of the Biggest Lies of World War II Exposed

By F.J.P. Veale • Foreword by Lord Hankey

This brand-new edition of the classic work deals comprehensively with seven of the most enduring and appalling lies created by the Allies during and after World War II. The first lie is that of the image of "Uncle Joe" Stalin—who was transformed from an "evil Communist dictator" into "a fighter for freedom" when the Soviet Union was invaded by Germany.

The second lie deals with the massacre at Katyn—where the Communist secret police murdered over 21,000 Polish officers and intelligentsia in cold blood.

The third lie deals with what the controlled media and establishment historians still maintain was Benito Mussolini's "execution." In fact, this was no execution, but a blatant murder carried out to cover up the theft of millions in state gold and reserves by Red partisans.

The fourth lie deals with the largely suppressed activities of one of France's greatest mass murderers—Dr. Marcel Petiot. His killing spree—more than 60 people—went undiscovered for years.

The fifth lie deals with what is known as the "Marzabotto Massacre" in Italy. It is claimed that this incident was a mass murder carried out by a German unit in 1944 against a village of Italian civilians.

The sixth lie deals with the arrest and false imprisonment of Gen. Hermann-Bernhard Ramcke.

The seventh lie deals with the case of Adm. Eric Raeder and his imprisonment in Spandau Prison on the charge of "waging aggressive war" for arranging the invasion of Norway.

This amazing work of historical revelations has been suppressed ever since it first appeared in 1958. This edition has been completely reset and updated with numerous footnotes to make the reader familiar with the personalities mentioned. The new edition also contains all four original maps and 36 unusual illustrations. Softcover, 304 pages, #965, **$27.50** minus 10% for TBR subscribers plus $5 S&H inside the U.S. from TBR, P.O. Box 550, White Plains, MD 20695 or call 1-877-773-9077 toll free to charge, Mon.-Thu. 8-4 ET. Order online at www.BarnesReview.com.

The Vatican, the Rothschilds & Usury: A Paradox Part 3—Conclusion

By Antonius J. Patrick

Here is the final installment on the banking relationship between the Rothschilds and the Vatican. To avoid reliance on Rothschild financing, the Vatican established its own institutions. Some of these operations, however, practiced usury, which had once been considered a sin by the Church. While the Vatican eventually relaxed its penalties on the practice of usury, it never condemned the immorality of fractional-reserve banking.

LEO XIII
Usury no longer condemned.

CONDEMNATIONS OF USURY

By the time of Pope Leo XIII (1878-1903), there were no longer any official condemnations of usury. During the pope's reign, the Vatican invested heavily in the Italian real estate boom of the 1880s along with the establishment of a string of banks. These banks were not originally engaged in the financing of industry or large-scale commercial endeavors, but were mostly involved in agricultural concerns and as a place for small-time deposits and would-be homebuyers.

John Pollard discusses these institutions:

> The small Catholic banks were based on mutualistic principles not dissimilar from those underlying the organization of British building societies. They gathered the savings of mainly peasant farmers, but also the Catholic lower middle class of the small towns and joined them together with capital contributed by wealthier Catholics and provided loans and mortgages for chiefly agricultural purposes.[1]

These banks, in a sense, were not seen as "usurious," since they provided safety for poorer people to park their money. Later, as Italy began to industrialize, however, the banks merged with bigger business enterprises "under the aegis of the *Opera dei Congressi*," the "umbrella organization of the Italian Catholic movement."[2]

With the Vatican intertwined in the financial life of Italy and holding accounts in banks around the world, criticism of usury shifted to the lower clergy and elements of the Catholic lay intelligentsia. One of the harshest opponents of the practice who blames it for the supposed pauperization of the masses was the historian Hilaire Belloc. In his book, *Essays of a Catholic*, Belloc wrote:

> The modern world is organized on the principle that money of its nature breeds money. A sum of money lent has, according to our present scheme, a natural right to interest. That principle is false in economics as in morals. It ruined Rome, and it is bringing us to our end.[3]

HILAIRE BELLOC
Usury ruined Rome.

G.K. CHESTERTON
Faulty economic logic?

FR. CHARLES COUGHLIN
No interest on fictitious money.

Belloc's usual perceptive historical analysis is clearly missing in his discussion of loan banking which may have stemmed from his misuse of words such as "breeds" and "natural right" in describing monetary economics. Like a number of Catholic intellectuals, such as G.K. Chesterton, and even some up to the present day, the misunderstanding of sound economic theory not only hampers their interpretation of past events but shows an unfamiliarity with areas of earlier economic thought. Furthermore, while Belloc, Chesterton and others railed against capitalism for its usurious ways, they rarely included the Church's explicit and implicit practice of the supposed sin in their denunciations.

Moreover, Belloc ignores the undeniable empirical data of the era that, from roughly the end of the Napoleonic wars to World War I, Europe witnessed tremendous economic growth from industrial capitalism which created the middle classes of Western countries and the highest standard of living, not just for the *uber* rich but for all—the likes of which had never been seen before in human history. It was only after the creation of central banking and the elimination of the gold standard that living standards began to stagnate and eventually decline.[4]

While differing schools of thought on the decline of the Roman Empire cite several factors for its collapse (with some scholars contending that it never fell but was "transformed"[5]), the charging of interest, as Belloc maintains, is not high on the list as a cause. Instead, the continual monetary debasement to maintain a world empire that was constantly at war and becoming increasingly domestically bureaucratized is seen as a primary cause for Rome's eventual fall. The destruction of money gradually impoverished the middle and lower sectors of society (as all inflations do), redistributing wealth to the political class.[6]

This led to economic stagnation and regression which lasted long after Rome's fall, and contributed to what became known as the "Dark Ages."

A prominent contemporary of Belloc who held similar views on usury was "Radio Priest" Fr. Charles E. Coughlin (1891-1979). In his book *Money! Questions and Answers*, the priest severely condemns the practice, equating it with stealing. "Usury is a breach against the commandment 'Thou shalt not steal'," Coughlin argued. All aspects of lending are "immoral" and opposed to Christian teaching:

- Charging an unreasonable and abnormal rate of interest;
- Charging interest on any recognized non-productive or destructive loan; and
- Charging interest on a loan of fictious money which the lender created, thereby demanding from the borrower an unjust return. In the latter case, the lender reaps where he did not sow.[7]

Like Belloc, Fr. Coughlin mostly misses the mark about usury, although his third point has validity. When Fr. Coughlin mentions "fictious money," he is referring to notes created beyond the amount of silver or gold residing in banks. Charging interest on fictious notes compounds the problem and is another immoral and criminal act through which the lender receives an "unjust return" and "reaps what he

did not sow."

The charging of interest on fictious money, while certainly wrong, would not be possible if the "new money" was not created in the first place. In fact, under a metallic monetary system, any notes created beyond what has been deposited in a bank is fraud, and in no way can be defended on ethical grounds.

Moreover, such a practice does not increase economic growth, but is, like all counterfeiting schemes, a benefit solely to its practitioners at the expense of everyone else.

Of course, by Fr. Coughlin's day, the United States was practically off a commodity standard, meaning there was no longer any redeemability of dollars for gold or silver, at least domestically. The dollar, originally a "money substitute" and warehouse receipt for silver and gold, became the reserve of the U.S. banking system and eventually the world's reserve currency. In 1971, with Richard Nixon's "closing of the gold window," there was no longer redeemability of dollars for gold, internationally placing the world on a purely fiat, irredeemable paper-money standard.

EARLY DEFENDERS OF USURY

Before the Church no longer considered "lending for profit" a sin, some clerics began to contest the teaching on usury, which included the revered Scholasticism of St. Thomas Aquinas. The challenge to orthodox Scholasticism on interest-rate theory began in the early 16th century and continued with the rise of the Spanish School of Salamanca and later with some members of the newly formed Jesuit order.

The foremost Scholastic theologian of his time was Thomas De Vio, Cardinal Cajetan (1469-1534). Cajetan is best known for his debates with Martin Luther, but he was also a confessor of the Emperor Charles V and became general of the Dominican Order in 1508.

In his commentaries on St. Thomas's *Summa*, Cajetan held to much of the

Cardinal Cajetan (far left with hands on book) is perhaps best known as the man who questioned reformer Martin Luther at the Diet of Augsburg in 1518, grilling Luther on his teachings. Cajetan is also remembered as one of the cardinals who refused to grant Henry VIII an annulment of marriage from Spanish Catholic Queen Catherine of Aragon. He also approved of charging interest on business loans.

great Dominican's teaching; however, it was in his treatise on foreign exchange, *De Cambiis*, where he differed with Aquinas. In his discussion of how the foreign exchange market worked, Cajetan moved beyond the standard Thomist position on usury.[8]

Murray Rothbard describes Cajetan's breakthrough on interest-rate theory:

> Cajetan offered a point-by-point critique of his master's [Aquinas] rejection … to the usury ban. He … vindicates … any loan to businessmen. Thus, a lender may charge interest on any loan as payment for profit foregone on other investments, provided that loan be to a businessman. This untenable split between loans to businessmen and to consumers was made for the first time—as a means of justifying all business loans.[9]

Cajetan's insight, therefore, corrected what had been a defect in the otherwise well-grounded Scholastic view on economics as Rothbard enthusiastically exclaims:

> [F]or the very first time in the Christian era, Cardinal Cajetan justified the business of money lending, provided they were loans to business. Before him, all writers, even the most liberal, even Conrad Summenhart, had justified interest charges … only for ad hoc charitable loans; now the great Cajetan was justifying the business for money-lending at interest.[10]

Cajetan's position on interest-rate theory was taken up by the later thinkers of the Spanish School of Salamanca. The founder of the school, whose disciples were not limited only to Spain, was the Dominican Francisco de Vitoria (1485-1546). While Vitoria did not publish any written work, his lectures were transcribed by his students. Much of the Dominican's focus was on moral theology, and his commentaries on economics echoed Scholastic tradition. Admirably, he was opposed to the rising statist trends of Absolutism emanating from Italy and France: "Vitoria and his followers revived the idea that natural law is morally superior to the mere might of the state."[11]

Unfortunately, Vitoria's student and fellow Dominican Domingo de Soto (1494-1560) retarded the development of the early Salamancans, especially on usury. Among many accomplishments, de Soto was appointed by Emperor Charles V to the Council of Trent and became, for a time, the emperor's confessor.

His most important work was *De Justitia et Jure*, which was based on lectures he gave at Salamanca between 1540 and 1541. The treatise was widely popular—it was reprinted some 27 times—and influenced theologians for several centuries.[12]

While de Soto was a solid Thomist on theology, his work on economics was "reactionary," especially after the improvement in thought among the Scholastics up to that point. As Rothbard states:

> De Soto backslid on usury to such an extent that he advocated banning the foreign exchange market as usurious. In fact, de Soto managed to influence the court in 1552 to outlaw all internal currency exchange at anything other than the legal par.[13]

Fortunately for the development of economic thought and the continued flourishing of the School of Salamanca, another of Francisco de Vitoria's students, the Dominican Martin de Azpilcueta Navarrus (1493-1586), countered some of de Soto's erroneous thinking. A close advisor to three popes, Azpilcueta was a renowned canonist lawyer who in his lectures innovatively combined the teaching of civil and canon law and, during his tenure at Portugal's University of Coimbra, he expounded upon international law.

Contrary to some of de Soto's statist positions and going beyond the Scholastics, Azpilcueta, for example, contended that the government had no right to regulate prices, arguing it was "imprudent and unwise" reasoning, as Rothbard explains: "When goods are abundant … there is no need for maximum price control, and when goods are scarce, controls would do the community more harm than good."[14]

In addition to refuting de Soto, Azpilcueta made a significant contribution to economic thought with probably the first exposition of the "quantity theory of money." Building on Cajetan, the Dominican disregarded the old idea that money or its purchasing power (PP) can be fixed, but since money is a commodity like all others (although the most marketable), its value (PP) can fluctuate. A "good money," however, where its PP remains relatively constant, is one of the aspects that makes gold and silver superior monies—the lack of volatility.[15]

If the supply of goods and services goes up, and the supply of money remains the same, money's value—PP—would increase. The inverse would apply if the supply of money increased, while the amount of goods and services remained the same or declined.

> Modern critics of usury ignore the historical significance of the usury question.

In other words, money's value—PP—would fall and less goods and services could be bought.

Of course, the School of Salamanca would have practical knowledge of this since, at the time, Spain was in the midst of its overseas explorations and the discovery of vast sums of gold and silver in the New World, resulting in a huge influx of precious metals into the Iberian Peninsula, causing prices to increase dramatically. The Salamancans, therefore, had their theories confirmed by real empirical evidence.

While Azpilcueta's take on economics was quite sound, he nevertheless reverted to much of de Soto's thought on interest. Unfortunately, his position at the Vatican influenced Pope St. Pius V in 1569 to issue the bull *Cum onus* which allowed for interest only on a "fruitful and immobile good" which, of course, did not apply to money.[16]

Besides Azpilcueta, St. Pius V had been strongly encouraged by St. Charles Borromeo, the archbishop of Milan, who was appalled at the amount of usury that was being practiced throughout the city to issue the decree. Despite the prestige of Borromeo and Azpilcueta, most of Europe's theologians rejected the bull citing, in part, that the "pope's arguments were matters of positive rather than natural law … [and it] had to be accepted by the government or be the common practice of a particular country for it to carry the force of law in that country."

Not one European country accepted *Cum onus*, and even in Rome it fell on deaf ears.[17]

The last great Salamancan thinker who further weakened the Church's prohibition on usury was Flemish Jesuit Leonard Lessius (1554-1623). Lessius was a philosophy professor at the English college in Douai, France, and, while studying at Rome, was a student of the Salamancan Francisco Suarez.

Lessius and his fellow Jesuits opposed the growing pro-determinist faction of Catholic theology in his native Flanders which had been infecting the Dominican Order. Also, from his studies under Suarez, Lessius attacked the "divine-right of kings" theory showing that the Jesuits had taken up natural-law theory, which was being increasing abandoned by the Dominicans and other orders.[18]

While nominally holding to the long-standing view on usury's prohibition, Lessius "was actually a highly influential force in its ongoing destruction," as Rothbard shows:

> Lessius provided the most sweeping defense so far of the guaranteed investment contract, and he treated benignly even high rates of return on capital. …
>
> [He] justified not only businessmen or investors planning to invest their money, but also *any* people with liquid funds, including professional moneylenders. For the first time among scholastics, all loans by moneylenders were now justified.

> With Leonard Lessius, then, the last of the barriers to interest or usury were smashed, and only the hollow shell of the formal prohibition remained.[19]

Like Rothbard, Professor John T. Noonan saw Lessius in a similar light when he wrote "the theologian [Lessius] whose views on usury most decidedly mark the arrival of a new era. More than any predecessor he would probably have felt completely at ease in the modern financial world."[20]

Despite the cogent arguments that the Salamancans and Jesuits made, and its widespread use among the public including the Vatican itself (although through Jewish intermediaries), the Church continued its official ban on usury. The prohibition, with the rising tide of secularism and other factors, played a role in the downfall of Scholasticism within the Church. In trying to keep the prohibition in effect, despite a number of its leading lights justifying it, the policy ultimately discredited the Church and opened it up to its enemies and believers to charges of hypocrisy. This led, in part, to the downfall of Scholasticism, which was the mighty theological system of thought upon which the late Medieval Church rested.

The modern critics of usury have missed the historical significance of the usury question that led them astray in not seeing the real culprit for the economic and social chaos of the age—central banking. Central banking has institutionalized monetary debasement which has financially wrecked untold lives, created economic chaos in every land, and has been directly responsible for massive destruction and the slaughter of millions of people through the financing of countless wars.

Critics of usury also do not understand an inconsistency in the interest prohibition, that, if applied universally, would mean that "profit" gained from other activities would have to be called into question as can be seen in the following example:

New from TBR Book Club!

Léon Degrelle In Exile: 1945-1994

By José Luís Jerez Riesco

Crash landing in San Sebastián, Spain, in 1945, Waffen SS officer Léon Degrelle narrowly escaped death from his native Belgium and the Allied forces. Stripped of his Belgian citizenship and sentenced to death in absentia for fighting on the German side against Bolshevism on the Eastern Front during WWII, Degrelle lived the rest of his life in exile in Spain, harbored unofficially by Francisco Franco's government.

During these 49 years in exile, Degrelle never expressed any regret for his place in the war, nor did he remain silent as fantastical narratives were woven about the events of the war and the supposed atrocities of the Germans and their allies in the decades following. Despite attacks on his family, vilification by the whole world and many conflicts with the Church, he never wavered in either his Catholic faith or his conviction in National Socialism.

Léon Degrelle in Exile: 1945–1994 presents the story of these 49 years, complete with extensive letters between Degrelle and his friends and family, interviews, speeches and anecdotes from those who knew and loved him. Degrelle was one of the few remaining from the Axis side to share his account of the war and his commentary on the world as it changed drastically after the Axis defeat in 1945.

> If a landlord built an apartment complex and rents it out, can he charge more than the cost of materials and labor or should he only receive repayment for the funds spent on construction? Is the landlord risking his own savings/capital (as does the "money lender") which he could lose if the venture would go belly up?

Certainly, no theory of justice would deny the landlord a right to make a profit for taking a risk and delaying present consumption in undertaking such a project. Yet, it is the same dynamics that a saver/money lender undergoes when he loans out his funds to be paid back with a premium in an uncertain future.

USURY, BANKING, & THE CHURCH

The dominance of central banking came with the emergence of the nation-state after the French Revolution. Central banks were instrumental in the elimination of commodity money, as they placed a check on government from going into debt and banks from printing money. With gold and silver out of the way (notes no longer redeemable), central banks could inflate with impunity, which gave bankers and the political class an almost unlimited source of income. This was used to cement the political elites in power, allowed them to engage in all sorts of social engineering schemes and contributed mightily to making warfare decidedly more destructive and widespread.

Yet, few Catholic intellectuals or churchmen understood the problem but continued to blame "usurious" free enterprise for the ills of society. They were oblivious to the immoral and criminal aspect of central banking which rested on the fraudulent practice of fractional-reserve banking.

Fractional-reserve banking allows banks to keep only a portion of their deposits on hand while the rest is surreptitiously lent out for "profit." One of the few churchmen who understood fractional-reserve banking was Fr. Denis Fahey.

"The bankers observed," the priest explained, "that about 90% of their total stock of gold remained in their vaults entirely undisturbed, and that only about 10% of the precious metal was required for the normal transaction of business. The banks then began to circulate far more promises to pay gold than they had gold to meet, and to collect interest on the fictitious money."[21]

Fr. Fahey then quotes Sir Reginald Rowe from his book *The Root of All Evil*. Rowe continues the analysis:

> That is to say, that they could issue far more promises to pay in gold than they could meet with all the gold of their coffers. This was because it was found in practice that the promised payments were never simultaneously demanded. In fact, except in crisis, never more than one-tenth of these at any time.[22]

The dominance of central banking came with the emergence of the nation-state.

Banks, therefore, can make "additional income," by not only charging customers for safekeeping of their deposits, but they can lend out, at interest, the deposited funds which are supposed to remain in the banks for safe keeping. This of course is illegitimate and, if any other firm or organization did such a thing, it would be considered fraud punishable by either fines or significant jail time.

As Fr. Fahey and others have incisively pointed out, eventually bankers realized that not all depositors demand their money at once. If all depositors, or if a significant amount demanded their funds simultaneously, the fraud would be exposed. If such a thing happened today, the entire monetary system would collapse overnight.

Over the years, banks would continually fail, largely due to fractional-reserve banking, and thus sought to create a financial institution that would bail them out in times of "crisis." Thus, central banking came into existence as a "lender of last resort" when banks got into trouble. Since their inception, central banks have always been granted privileges by governments, including most importantly to establish legal tender laws, create a monopoly of note issuance, and the ability to set interest rates.

Furthermore, with the power to create money, government debt would begin to balloon, as the central bank would become a ready buyer of government debt no matter how risky the debt might become. The ability to create almost limitless debt led to the expansion of state power in all sectors of society.

One of the first goals, once central banks were established, was to get rid of gold and silver, which had always kept a check on money printing. Once gold and silver were severed from the monetary order, central banks could (and did) inflate their currencies without fear. Central banking thus became a mighty engine of monetary inflation, which led to the usual consequences: redistribution of wealth, booms and busts, hyperinflation, economic stagnation and collapse. Looking back at the financial history of the past two centuries, it would be difficult to deny the veracity of such an analysis.

Not only is fractional-reserve banking a sin against the 7th Commandment—"Thou Shall Not Steal"—it also violates one of the four sins that cry to heaven for vengeance: "Defrauding of wages to the laborer."[23] Since money printing is willful currency debasement, wages paid in depreciated money surreptitiously defrauds laborers of income.

In contrast, unlike fractional-reserve banking, there is no fraud in the practice of usury. Usury involves

two parties who agree (typically contractually) to exchange a present good (usually money) for a future good (money) including a premium, which is accrued in the form of interest. No one is forced to get a loan or go into debt—it is a voluntary agreement. Many times, in fact, it is the lender who is taking the risk since he may only get part of his funds back, or none at all, or if he does get paid back, the funds may be worthless due to inflation.

More broadly, payment for saving is socially beneficial, since it encourages individuals to save—putting off present consumption—which develops responsibility, farsightedness and maturity. Savings are transformed into capital and invested in production, creating jobs and goods. Advanced civilizations are those that have an intricate and highly developed capital stock, not only allowing for production and increased living standards, but for the undertaking of all sorts of culturally enhancing activities. Of course, in the present epoch, saving is discouraged through the suppression of interest rates by central banks and by the encouragement of spending. Consumer spending indices are given much attention by the financial press.

One possible reason for the Church's lack of condemnation of central banking, despite its obvious criminal nature, is its eventual acceptance by the modern nation-state which, as we have said, came into being after the French Revolution. At first, the popes condemned most of the philosophical planks on which the modern state was grounded. Over time, however, there was a relaxation to the new political realities. Since central banking became a fixture of all the regimes, they escaped criticism from the hierarchy.

By the time of Vatican II, and especially in its aftermath, the Church had become outwardly statist. Popes praised democratic governance and looked to leadership in international organizations like the UN. It also gave up many of its former duties and activities, such as the management of hospitals, schools and charities, to the burgeoning welfare state.

CONCLUSION

While the Church looked hypocritical in its involvement with the Rothschilds and eventually practiced usury itself, it demonstrates that it has been run by fallible men.

While the legitimacy of usury is now rarely discussed, central banking continues its dominance. With a potential financial catastrophe on the horizon, hopefully central banks will be exposed for their nefarious role in the chaos. In the past, while the Vatican often stood up to the outrageous actions of kings and opposed sovereigns' attempts to interfere in Church matters, its failure to see central banking as an unjust and criminal institution—which has been used to undermine Christianity—has hindered the efforts of the devout.

> The legitimacy of usury is now rarely discussed. Today, central banking rules.

Worse, since Vatican II, the Church has lost almost all of its "independence" and now has become part of the New World Order, taking similar stances as the globalists on mass migration, global warning and various social welfare measures. The Conciliar Church has gone beyond popular leftist causes and is now both condoning the practice of sodomy and is becoming more tolerant of abortion—failing to ex-communicate politicians who support infanticide. ❖

"Old Right" Thinker Had Solution to "Debt-Ceiling" Debacle: "Don't Buy Government Bonds"

Every few years, Democrats and Republicans, in coordination with their talking heads in the mass media, engage in a faux debate about America's debt, insisting on or opposing the raising of the "debt-ceiling." Here's an overview of one libertarian-leaning thinker's solution to this reoccurring problem.

FRANK CHODOROV
Against debt financing.

By Antonius J. Patrick

A farcical debate surrounding "raising the debt-ceiling" unfolds periodically, a debate conducted by the two nearly indistinguishable political parties hell-bent on driving America into economic ruin. In anticipation of the inevitable debate surrounding America's spiraling debt, it will be instructive to look at how some earlier conservative and libertarian thinkers viewed public debt. Unlike the present generation—with the notable exception of Dr. Ron Paul—these intellectuals asked fundamental questions about such matters as debt, taxation, central banking and foreign policy.

One of the leading lights of what was known as the "Old Right" of the 1950s, which opposed the Cold War globalism of the likes of William Buckley and sought to overturn the New Deal domestically, was Frank Chodorov (1887-1966). In his books and essays, Chodorov challenged the pillars upon which social democracy rested and sought to return America to small government, low taxation and "isolationism."

In one of his provocative essays, Chodorov pervasively argued that those who purchase public debt are complicit in the enhancement of state power. Unlike many present-day economists who only see the baneful economic effects of profligate government borrowing, he makes a moral case against debt financing.[1]

He points out that public borrowing burdens future generations for the benefit of the present. Despite reasons often given for the necessity of borrowing—war, natural disaster, infrastructure, social welfare, etc.—Chodorov contends that the practice of shifting the cost to later generations, whatever the reason, is unjust:

> This is exactly what you do when you cooperate with the state's borrowing program. You are loading on your children and your children's children an obligation to pay for something they had no voice in, and for which they may not care at all. Your "investment for posterity" may earn you nothing but the curses of posterity.

Chodorov understood, as most commentators do not today, that a gold-backed currency restrained the largesse of the state:

> When money was redeemable in gold, the inherent profligacy of government was somewhat restrained; for, if the citizen lost faith in his money, or his bond, he could demand gold in exchange, and since

> the government did not have enough gold on hand to meet the demand, it had to curtail its spending proclivity accordingly.

It was Franklin Delano Roosevelt's despicable and criminal act of taking the U.S. off the gold standard domestically that led to the expansion of the public debt as Chodorov describes:

> Mr. Roosevelt removed this shackle and thus opened the flood gates. The only limit to the inclination of every politician to spend money, in order to acquire power, is the refusal of the public to lend its money to the government. …
>
> The government can then resort to printing of money, to make money out of nothing.

Not realized at the time, but the ability of the American government to expand its revenue base fit nicely into FDR's later nefarious foreign policy objectives.

Chodorov's viewpoint on public debt can also easily be applied to FDR's decision to eradicate the gold standard through which the U.S. currency could be redeemed for precious metals. FDR's act, however, was a "violation of contract" with American citizens, since the U.S. government defaulted on its obligations.

In Orwellian fashion, the verbiage used with most government operations is often misused to legitimize state functions. "Investment" is one such term that has been corrupted in relations to spending and debt.

In promoting their spending schemes, politicians will often use the term investment, i.e., "investment in education" or "investment in infrastructure." This is deliberate, since it tries to equate government spending with a vital component of the market process.

In a market economy, investment means the lending of savings, which is used to expand or start an enterprise. In return, the lender receives a stock or a bond. If the business is successful, the lender's investment will receive a return—dividends from a stock or interest from a bond. Business investment is, therefore, a necessary aspect of capitalism which results in economic growth and increased living standards.

As Chodorov incisively points out, however, government investment is the antithesis of what takes place in the marketplace:

> The state, however, does not put your money into production. The state spends it—that is all the state is capable of doing—and your savings disappear. The interest you get comes out of the tax fund, to which you contribute your share, and your share is increased by the cost of servicing your bond.

Chodorov's solution to deficit financing was not to buy government bonds. While this would certainly be a step in the right direction, a more radical approach is needed since the problem has now become so immense.

Put simply, there should be a prohibition on government borrowing of any kind. State revenues should only come through tax receipts and fees paid by those in the present. This would completely eliminate the "moral hazard" of debt financing and drastically reduce the size and scope of government over society.

For those who seek to put an end to the debt-ceiling charade and rectify the immoral practice of burdening future generations by the irresponsibility of the present, the works of Frank Chodorov are essential. ❖

Five Men of Frankfort: The Story of the Rothschilds

By Marcus Eli Ravage. This biography, written by a leading Jewish historian, pulls no punches in telling the true story of the banking dynasty, once known as the "financiers of nations." Cutting through all the myths, *Five Men of Frankfort* reveals how the four Rothschild sons spread throughout Europe—to London, Paris, Vienna and Naples—to set up a banking network that inaugurated the system of moving money internationally through simultaneous deposits and withdrawals. This study reveals in detail the double-cross of Napoleon's France—which saw the Rothschilds finance the British army in Spain by literally smuggling the cash across France into Iberia using their secret network. British indebtedness to the Rothschilds for their help in defeating Napoleon was then exploited by getting the British government to persuade the other nations of Europe—including the Austrian, Prussian and Russian governments—to start using the Rothschilds as bankers and as the providers of their national loans and debt. The Rothschilds effectively blackmailed their way into being granted nobility status by the Austrian and British heads of state. This new edition has three appendices added that reveal the full extent of the Rothschild business empire to the present day. Softcover, 340 pages, #920, *$30* minus 10% for TBR subscribers plus $5 S&H inside the U.S. from TBR, P.O. Box 550, White Plains, MD 20695. Call toll free 1-877-773-9077 to charge.

HIDDEN ALBUM OF MANKIND

In 1902, Hutchinson & Co. published one of the most valuable books on the various and disappearing peoples of the world. Much has changed in little more than a century. Titled *The Living Races of Mankind* (two volumes), the photographs contained within document scores of various peoples, many of them quite primative and possibly now extinct or amalgamated with more technologically advanced peoples today. Here are just a few of those photographs.

1) A group of hairy natives from Mandalay, Burma (now Myanmar). The figure at far left is a female. **2)** Jews in Palestine afflicted with leprosy. **3)** A woman of the Gilbert River region, northern Queensland, Australia. **4)** A Swazi warrior of southern Africa sports an elaborate feather headdress. **5)** A Vedda man in leaf "girdle."

6) A Turkoman rides a sturdy donkey. The Turkoman inhabit the region of Turkmenistan, Afghanistan and Iran. **7)** A family of Lapplanders. The mother (left) holds a baby in a portable cradle. **8)** A group of Tuareg men from North Africa. **9)** This warrior of the Congo and his bride both display ornamental scarification on their foreheads.

The Tragic Fate of the *Pieds-Noirs* in French Algeria

INTRODUCTION

After abandoning its former colony and the ethnic French population that lived there for generations, France opened its borders for any and all immigrants, paving the way for the chaos and ethnic tension on such vivid display today in "the Land of Human Rights." Here is an overview of the French abandonment of Algeria and its subsequent independence.

By Rémi Tremblay

On February 16, 2017, French President Emmanuel Macron publicly apologized for the "sins" of colonization, which he described as "a crime against humanity." His speech, delivered in Algiers, the capital of Algeria, France's former colony, went mostly unchallenged but defies historical truths. The only crime against humanity in the Algerian adventure was the way it ended, in brutality and torture, with France betraying her promises to her blood brothers.

It is time to take a closer look at the Algerian War (1954-1962) and assess the balance sheet of French rule. Regarding the war itself, many myths still prevail, namely that most Algerians were opposed to French rule, and that the Algerians won the war. It is also time to debunk the idea that the French exploited Algeria. Facts prove quite the opposite.

Renowned historian Dominique Venner explained the significance of this conflict, arguing convincingly that it was the first modern war lost by Europe against Africa. With this defeat, Europe's invincibility cracked and shattered while the former colonies of Europe in Africa and elsewhere gained confidence. The way the entire ethnic French population was repatriated to France at the end of the war also offers valuable lessons for proponents of remigration.

Péroncel Hugoz, a former journalist for the popular French daily *Le Monde*, noted that the Algerian War was probably the first instance of modern jihad. Many Islamic reforms were implemented after independence, and the main newspaper linked to the Algerian nationalists was called *Moudjahid*.[1]

THE CONFLICT'S BEGINNINGS

What was finally recognized in 1999 as a war—not merely "events," as it had been described—started on November 1, 1954. On that day, a group of Algerian nationalists in exile in Tunis, the capital of Tunisia, declared independence on the radio. On the same day, coordinated terrorist attacks were launched by the *Comité Révolutionnaire d'Unité et d'Action* (Revolutionary Committee for Unity and Action) that later became the *Front de Libération Nationale* (National Liberation Front or FLN).

PIERRE MENDES FRANCE
Broke promises to Pieds-Noirs.

Their bloodiest deed that day was the hijacking of a bus and the murder of its passengers, including Europeans and Muslims alike, after the rape of a young European teacher. Other violent actions that day caused a total of eight casualties. However, it is the murder and rape of the young teacher, along with her husband, that caused an uproar among the European population, approaching 1 million inhabitants at that time, which then comprised roughly 10% of Algeria's total population.

The leaders of the revolutionaries were Hocine Aït Ahmed, Krim Bel-

Above and right: *Pieds-Noirs* fled Algeria in droves after a coalition of various Islamic-inspired terrorist groups attacked *Pied-Noir* neighborhoods and businesses of the large and quite successful community. The *Pieds-Noirs* were mostly offspring of French settlers in Algeria, who had lived there for generations, but also included Spanish Catholics and other Europeans. The *Pieds-Noirs* comprised roughly 10% of the population in Algeria. The European-derived settler community lived in peaceful coexistence with the Islamic native population, and brought businesses, agriculture, architecture, advanced infrastructure, schooling and other benefits to the territory. Despite reassurances from the French government, the *Pieds-Noirs* were sold out to appease the terrorists of the FLN.

kacem, Ahmed Ben Bella, Mohamed Boudiaf, Mustapha Ben Boulaïd, Larbi Ben M'Hidi, Mohamed Khider and Didouche Mourad. Their objective was independence and, of course, Islamic rule. It should be noted that, before the French took over in 1830, there was no such thing as an Algerian nation. It was an unstable territory that had been dependent on the Ottoman Empire for centuries and had been governed locally by pirates.

Terrorist acts increased in frequency and intensity in the months after, but the FLN was only made up of a few hundred members. Given this perceived minor threat, France sent airborne soldiers on a limited scale, largely to restore law and order, treating the matter as a small-scale uprising rather than an emerging war. The situation quickly evolved into a major conflict as violence spread. Nevertheless, then-Prime Minister Pierre Mendes France and his minister of interior Francois Mitterrand, who would later become president of France from 1981-1995, crossed the ocean to reassure the *Pieds-Noirs* of the fact that Algeria would remain French, no matter what transpired.[2]

On August 20, 1955, things escalated to a new level when a local FLN leader named Zighout Youssef openly called upon Muslims to kill Europeans. In Philippeville and El Halia, Muslims stormed European neighborhoods until the airborne forces intervened and pushed them back. Still, 71 French women and children were killed on that day by their neighbors, their customers, their coworkers and, sometimes, their former friends. On that day, the FLN had managed to create a lasting divide between the ethnic French and Islamic Algerians, two communities that had coexisted peacefully for more than a century.

Following this bloodbath, France increased repression. It is in this context that a young nationalist member of parliament, Jean-Marie Le Pen, asked to leave the French Assembly to go fight. He fought in Algeria for 27 months, earning several medals for his courage.

Faced with stronger opposition, the FLN quickly increased terrorist attacks and atrocities. On May 18, 1956, three young French soldiers were butchered, castrated and killed by rebels, which became a turning point in the conflict.

It is worth noting that the FLN did not represent the majority in Algeria. In fact, at that time, there were four times more *harkis*, Algerian Muslims enrolled in the French army, than FLN militants. There were more than 60,000 mobile *harkis*, plus the Muslims who were involved in other

types of units, like the self-defense units in charge of protecting villages from FLN executions and crimes.[3]

RESTORING LAW AND ORDER

French Army Gen. Raoul Salan was sent to Algeria to restore order. This shy and not-so-well-liked military veteran acted quickly and, soon, the army began operating as the main administrator of the colony. Nevertheless, the FLN continued its terrorist attacks in Algiers, with several deadly bombings, including one at the crowded Milk Bar ice cream shop.

French Gen. Jacques Massu, who commanded the airborne troops, then received the mandate to rid the capital of the 1,200 or so militants active in Algiers. Gen. Massu's forces arrested many of the leaders and terrorists associated with FLN, but still the deadly attacks continued. It was only in the fall of 1957 that the battle finally ended, after the airborne troops eliminated most of the terrorists. From then on, the airborne soldiers, or the "paras" as they became known, would become the heroes of the Europeans and the boogeymen of their enemies. Exaggerated tales of atrocities would be published in left-wing newspapers to demonize them.

Just as the Algerians were not a monolithic bloc, likewise in France the population was divided on the question. Many left-wingers opposed the French presence in Algeria, and it was Communists who helped the FLN with its early terrorist attacks. Several "humanist" intellectuals, including authors Jean-Sartre and Simone de Beauvoir, and also priests and politicians actively collaborated with FLN terrorists by delivering money raised in the Algerian community in France. They also assisted and harbored fugitives. They were called the "suitcase carriers" and operated in a web called the "Jeanson Network."[4,5] They became the foundation of France's "New Left."

The events in Algeria were receiving so much publicity, the government of President René Coty was on the verge of losing control. On May 13, 1958, a putsch was organized in Algiers and Gen. Salan and other officers and civilians attempted to take power. They demanded that Charles de Gaulle, a resistance leader during WWII, replace Coty in Paris.[6] They stopped their coup when their main request was granted. On June 1, de Gaulle, who had lost the elections two years ago, became the president. He now had the power to reform the state and save Algeria from terrorists.

His first concern was seemingly to address the conflict in Algeria, which was rapidly spiraling out of control. On June 4, in Algiers, he powerfully declared, "I have understood you," referring to the concerns of the ethnic French in Algeria and their interests. He then declared:

> I take note of all this in the name of France! And I declare that, as of today, France considers that in all of Algeria, there is only one category of inhabitants: fully-fledged French.

Two days later, he thundered, "Long live French Algeria!"

Gen. Salan, who left for exile in Spain, was replaced by Gen. Maurice Challe, who used his airborne troops to sweep the whole country. In less than a year, his troops had killed 26,000 rebels, taken 10,800 captives and seized 20,800 weapons. He also launched reforms to give more power to pro-French Muslims in the country. He envisioned a semi-autonomous territory.

But, in September 1959, while the battle was being won on the battlefield by the French army, President de Gaulle suddenly opened the door to independence and negotiation. The man who had been chosen to govern as a friend of French Algeria was betraying his promises and his people.

SAVING FRENCH ALGERIA

On January 24, 1960, the French population of Algiers demonstrated but was met with gunfire from the local police. Faced with such violence, the French civilians built barricades and shot back. The leader of the rebellion, Pierre Lagaillarde, surrendered and was sent to France to face trial.[7] His lawyer was Jean-Louis Tixier-Vignancour, who later became a

Above, the damaged interior of the Milk Bar, an ice cream shop in Algiers, after a bomb attack by a female Muslim extremist, September 30, 1956. The shop was a favorite hang out for children returning from the beach. Eight were killed and scores injured, with multiple civilians, including innocent children, having to have limbs amputated.

major player in nationalist politics.[8] Then, despite his undeniable victory on the battlefield, Gen. Challe was replaced by Gen. Jean Crépin, considered more loyal to de Gaulle.

In 1961, a referendum was organized on the question of self-determination. In Algeria, 75% voted in favor of independence. The *Pieds-Noirs* were shocked. They knew the end was coming and there would be no place for them in an independent Algeria. The prospect of "returning" to France, a country most had never visited, was less than appealing.

On April 22, 1961, the radio broadcasted a surprising message:

> This is Radio France. The army has taken control of Algeria and the Sahara. … French Algeria is not dead. … There is not and there will never be an independent Algeria. Long live French Algeria so that France may live.

A few moments later, a proclamation was read by Gen. Challe to the French army in Algeria. The former commander-in-chief announced that he was in Algeria with Gen. Andre Zeller and Gen. Edmond Jouhaud, in liaison with Gen. Salan, to keep the oath made that the army would keep Algeria French "so that our dead will not have perished for nothing." He condemned de Gaulle and his "government of capitulation."

During the night, airborne troops led by Hélie Denoix de Saint-Marc captured many strategic buildings in Algiers. In the days prior, the three generals, Challe, Jouhaud and Zeller, had gathered in Algiers to prepare their putsch. Gen. Salan arrived the following day. In France, de Gaulle reacted by arresting several officers he suspected of also being part of this coup d'état.

On April 23, Salan, Challe, Jouhaud and Zeller assumed power in Algeria. Two days after that, however, Challe surrendered, and the others were arrested. They had the support of the *Pieds-Noirs* and many Muslims, but the opposition in France was so strong that their putsch was bound to fail.

A recruitment poster for the *Organisation Armée Secrète* (Secret Armed Organization or OAS) calls "Citizens to Arms," to help Algeria remain under French control and stop attacks on Pieds-Noirs.

In the aftermath, 220 officers were relieved of command, 114 were tried in court, and 83 were convicted. They were not the only losses the French army would suffer, as thousands of soldiers resigned in disgust, refusing to betray the oath they had taken when joining the army.[9]

THE RISE OF THE OAS

Many *Pieds-Noirs* felt betrayed by de Gaulle and became disillusioned after the failed putsch. Algeria was on the road to independence and, sooner or later, they would lose everything they had worked for.

But those dedicated to keeping Algeria in French hands were not giving up. In Madrid, February 1961, the *Organisation Armée Secrète* (Secret Armed Organization or OAS) was founded. In Algeria, it was Lt. Roger Degueldre who organized this underground resistance movement. Degueldre did not believe the April putsch attempt would succeed, and he took the lead by gathering and organizing the French patriots who

A Muslim Massacre of Christians

Shown above are but a few of the massacred *Pieds-Noirs* and other European expatriates living in Algeria during a three-day bloodbath carried out by radical members of the Algerian National Liberation Front (FLN) from July 5-7, 1962, in Oran, Algeria. The total death toll is disputed, but official estimates range from 95 to over 2,000 total deaths, mostly Europeans but also local Algerians sympathetic to French rule. Known as the Oran Massacre, the horrific event took place following official Algerian independence as tensions between the FLN and *Pieds-Noirs* and their militarist groups, such as the OAS, increased. Regular French army troops failed to prevent the massacre..

refused to surrender. Since the military had failed, pro-French partisans would use the same strategies as the FLN.

The OAS soon became a popular organization in the *Pied-Noir* community, who viewed these Robin Hood-type figures as heroes risking their lives for the protection of the ethnic French in Algeria, many of whom had lived there for generations. In France, the network benefited from the sympathy of nationalist organizations, such as the *Jeune Nation*.

The funding of the OAS mostly came from bank robberies as well as *Pied-Noir* contributions, as many French Algerians eagerly gave to the only organization ready and willing to defend them. The middle class was also ready to shelter OAS militants, despite the risks.[10]

The OAS was not a centralized or monolithic organization. As former member Jean-Pierre Brun explained, there were several networks, with different hierarchies, as well as other surrounding networks loosely affiliated with the OAS.[11] To add to the confusion, many people totally unrelated to the OAS, and sometimes even opposed to it, carried out false-flag operations, including murders and robberies.

An example of the semi-autonomous organizations within the OAS structure is the case of the Nationalist Front (NF, not to be confused with the political party National Front). After the failed putsch in April, young French Algerians founded the NF in May 1961, with members of *Jeune Nation*, *France-Résurrection*, and other student associations. They soon counted a thousand members under the leadership of Michel Leroy. They attacked a police station, which allowed them to seize weapons for their "Z commandos." They worked with the OAS, but their two main leaders were killed by OAS members in an internal purge. The remaining members either left or joined the OAS.

OAS fighting in Algeria became triangular: the army against the FLN and the OAS fighting both the FLN and the army. The city of Oran is a good example of the dual and sometimes unclear role of de Gaulle's army. Oran was an OAS-controlled city. The regular army troops, led by Gen. Joseph Katz, opened fire on OAS snipers ensconced on apartment balconies. However, when the "victorious" FLN stormed Oran on July 5, 1962, the 18,000 soldiers Katz commanded did not intervene to stop the massacres of European civilians killed in broad daylight. In the European population, Katz became known as the Butcher of Oran.

Torture was used on some FLN and OAS militants by the army. In the early 1960s, at the Tagarins' barracks, OAS militants were routinely tortured, as authorities wanted to know the names of other fighters involved in the French resistance.

THE END

Despite *Pied-Noir* community support of the OAS, and the French military victory over the FLN, the end was coming for French Algeria. Gen. Challe had defeated the FLN on the battlefield, but its influence was growing within the Islamic population and was gaining international recognition in Washington, D.C. and Moscow, both being sympathetic to the aims of the FLN and the concept of Algerian independence. As for the French population in France, it was growing tired of that restless and violent colony that was costing so much money and so much French blood.

On March 16, 1962, Louis Joxe, Robert Buron and Jean de Broglie, representing de Gaulle—who had sworn to never negotiate with the terrorists—finally signed the Evian Agreements, ending French rule and calling for an immediate ceasefire and the transfer of power. French soldiers were thus ordered to remain in their barracks until their evacuation, a measure that would be costly for European civilians and Muslim collaborators alike.

Later, in the spring of 1962, the remaining leaders of the OAS, including Gen. Salan, Gen. Jouhaud and Lt. Delguedre, were finally arrested. Their last act of defiance was an attack on French military troops on March 23 to try to get them to break the ceasefire. In retaliation, the army shot civilians and occupied the European neighborhood. A few days after, on March 26, a peaceful European demonstration on the streets of Isly was intercepted by young, radical Muslims—ready for blood—who killed 63 Europeans and wounded 200. In retaliation, on May 2, a bomb rocked the port of Algiers, killing 63 dockers. This attack was the last bombing attributed to the OAS.

Two months later, on July 2, Algeria was officially declared an independent country, free from French rule.[12]

A DISPUTED DEATH TOLL

When independence was enacted, the French population had to choose between "the suitcase or death"—fleeing the country or dying.

To demoralize the Europeans, on April 17, 1962, the FLN started a campaign of kidnappings, with thousands of *Pieds-Noirs* abducted in the months after the ceasefire. Three days after independence was declared, a massacre was orchestrated in Oran. The death toll is disputed, some alleging as many as 2,000 died in the bloodbath.[13] In this region, nearly 200,000 ethnic Frenchmen fled the country in the aftermath of this massacre.

In fact, after Algeria became independent in 1962, somewhere around 800,000 *Pieds-Noirs* of French nationality were evacuated to mainland France, while about 200,000 remained in Algeria. Of the latter, there were still about 100,000 in 1965, about 50,000 by the end of the 1960s, and 30,000 in 1993. The French had been largely ethnically cleansed from the country, without anyone raising an eyebrow.

At the same time, the Muslims who had fought for France were massacred by the victors, with France remaining indifferent to their plight. Between 60,000 and 150,000 were butchered, very often after enduring

Jean-Marie Le Pen (third from left) withdrew from the French Assembly to help protect his fellow Frenchmen in Algeria. He fought there for more than two years, earning multiple medals for bravery. Above he is shown as he and fellow Poujadist deputies begin their journey to Algeria in 1956. The Poujadists were followers of Pierre Poujade, the founder of a political party that started as a tax protest movement and later morphed into a nationalist party. Today Le Pen's daughter, Marine, is vying for power in France, even as riotous Algerians and other African immigrants attempt to reduce France itself to a colonial Muslim outpost.

unspeakable torture. The FLN had officially offered the *harkis* and others supportive of the French amnesty, but it was a lie, and they were killed the moment they laid their weapons down.[14] When negotiating with France, the FLN had made a promise that the *harkis* would be safe in Algeria, but it was a lie. And Charles de Gaulle should have known better: The pro-French Muslims had been the first casualties of the war, with more than 4,500 Muslim troops murdered by the FLN between 1954 and 1956.[15]

Only a few thousand *harkis* were sent to France. Upon arrival, many lived in concentration camps with watch towers and barbed wire. Their sacrifice was finally recognized on June 11, 1994, by President Edouard Balladur.

After the declaration of independence, FLN militants were released from jail, but the 11,000 prisoners who had fought for the OAS and/or for French Algeria remained in jail. Four of them were executed.

As for the war itself, it caused the death of 250,000 Muslims and 24,000 French soldiers. Half of those soldiers died in combat operations. The OAS was responsible for 1,600 to 2,200 deaths, according to most historians.[16]

In the years that followed, Algerians ransacked European monuments, graveyards and churches, erasing more than 100 years of French presence on Algerian soil.

THE "CRIME" OF COLONIZATION?

According to Daniel Lefeuvre, France lost much more money in Algeria than it could have earned. Paris willingly paid huge sums to keep Algeria French because of the strategic importance of this North African territory. Approximately 20% of France's overall budgetary expenses were related to Algeria.[17]

Many famous Algerian authors, such as Boualem Sansal, Hohamed Harbi (former FLN member) and Yasmina Khadra, noted that Algeria was a much better place to live while under colonial rule than after. Aït Ahmed, an FLN founder, called Algeria before home rule "a paradise."

Michel Klen offers a frank assessment of French rule in Algeria:

> The discovery and harnessing of energy resources, which today provide the Algerian state with over 90% of its export earnings, the introduction of arable farming, the transformation of the Mitidja into a rich agricultural plain and, above all, the development of medicine and health and research infrastructures (such as the Pasteur Institute in Algiers), have saved hundreds of thousands of human lives and led to an increase in demography. Let's not forget that, between 1830 and 1962, the Algerian population increased tenfold. Who did better and where? Note in passing that the American Indians, the Maoris of New Zealand and the Aborigines of Australia saw their populations collapse after the arrival of the Europeans. No, France has nothing to be ashamed of in Algeria, and nothing to be intimidated by the sirens of repentance and permanent self-flagellation.[18]

More precise, African specialist Bernard Lugan writes:

> When France gave Algeria its independence, it left behind 43,500 miles of roads, 2,672 miles of railroads, four ports equipped to international standards, a dozen major airfields, hundreds of engineering structures (bridges, tunnels, dams,

viaducts etc.), thousands of administrative buildings, barracks and official buildings owned by the French state, 31 hydroelectric and thermal power stations; a hundred or so major industries in the construction, metallurgy, and cement sectors; thousands of schools, training institutes, high schools, universities, hospitals, maternity hospitals, dispensaries, health centers etc.; and much more.[19]

France had suffered more from its colonial adventure in Algeria than Algeria itself.

THE AFTERMATH

For Dominique Venner, a former OAS militant who became a renowned historian, Charles de Gaulle was justified in ending the French Algerian adventure. It was inevitable. However, de Gaulle did so in the worst possible way, by lying to and betraying his own people and by allowing the Algerians to massacre Europeans and *harkis* alike. Even worse, he ordered French troops to shoot and kill French civilians.[20]

De Gaulle had warned that Algeria had to be independent so 20 million Muslims would not become French and that Colombey-les-Deux-Églises would not become Colombey-les-Deux-Mosqués. Still, his opponents warned that: "If you don't want a French Algeria, you'll soon have an Algerian France." That warning was prophetic. Today, France is slowly becoming a Muslim country because of mass migration from Algeria and other North African countries, something de Gaulle was warned about but failed to recognize.

Venner argued that, by giving up Algeria, France did not protect itself and demonstrated its weaknesses, paving the way for a mass Muslim invasion. After surrendering Algeria, France started welcoming hordes of North Africans to its shores, which has led to chaos, violence and a complete reordering of French society.

This has been on vivid display in recent years with rioting and looting committed by non-White migrants across once all-White France. ❖

He is also the author of a marvelous book on the plight of the Acadians: *Les Acadiens: du Grand Dérangement au Grand Remplacement*. In addition, Tremblay is a popular freelance journalist for European and North American media.

Degueldre receives the Croix de Guerre for his military service in then-Indochina.

Who Was Degueldre?

Lt. Roger Degueldre, born May 19, 1925, was one of the most passionate French patriots and staunch defenders of French rule in Algeria. As a young man, he joined the French resistance in 1942, and later served in the French Foreign Legion. He saw combat in Vietnam and was eventually sent to Algeria in 1960 to help suppress and corral the budding Algerian independence movement and the FLN. By 1961, he was playing a leading role organizing the *Organisation Armée Secrète* (OAS) in Algeria, eventually forming the elite Delta Commandos unit of the organization.

Lt. Degueldre was finally arrested by French forces on April 7, 1962, and sent back to France to face trial. He was sentenced to death by firing squad later that summer at Fort d'Ivry near Paris. The soldiers responsible for carrying out the execution refused to obey orders, demonstrating the high regard in which Degueldre was held by fellow Frenchmen. According to reports, when they refused to shoot Degueldre, a French officer had to execute Degueldre himself with a pistol. Degueldre was eventually buried in Versailles.

Degueldre continues to be a popular figure among nationalist organizations in France and was even praised by the popular French nationalist leader Jean-Marie Le Pen, the longtime president of the National Front.

Arminius: The Liberator

Is Here in a Limited Quantity!

Dear TBR: I saw your advertisement for "Operation Book Rescue" in the July/August 2023 TBR issue. Though I am no longer able to contribute a donation of any significance to your project, I do appreciate what you are trying to do.

Many years ago, when I had money, I donated quite a large sum of it to Ingrid Zündel when she was putting a book together called *Arminus: The Liberator*. It was really quite an impressive book—well over 300 pages, large format, great illustrations on almost every page—about the life of "Hermann the German," as we called him, the great Teutonic leader who kicked the Roman Empire's [butt] in the Battle of Teutoburg Forest some 2,000 years ago.

Anyway, for my donation she sent me 50 copies of *Arminus: The Liberator*.

Well, Ingrid is dead now and [Soaring Eagles] is out of business and that book is just sitting here in my spare bedroom in the same boxes she sent them to me and I thought, "Here is a book TBR can rescue—and it's already printed!"

Please accept this as my donation to your Operation Book Rescue and keep up the great work. You are doing a great service to our people.

—JIM ADAMS

Dear Mr. Adams: Thank you for your generosity. I am quite familiar with *Arminus: The Liberator* as I designed it myself and worked with Ingrid on the book. In fact, she traveled from Tennessee to Virginia many years ago to sit beside me at my home office as I put the finishing touches on the book. It was one of the great honors of my career and it is one of the nicest looking B&W books I have designed. So, your gift has very special meaning personally as it always pained me that, upon her death, her entire operation went down the tubes, including this book.

Rest assured, TBR will make sure those 50 copies find a good home!

—PAUL ANGEL

ARMINIUS: THE LIBERATOR

TBR has 50 copies in stock and then it is gone forever!

Two thousand years ago, the mighty Roman Empire—just like many Western democracies of today—was marked by decline and corruption. The once noble and altruistic attitude of the *civis romanus* had given way to the coarsest and most selfish morés. The middle class had almost totally vanished. An oligarchy, making a show of ostentatious wealth, brutality and perversion, had seized control.

ARMINIUS: THE LIBERATOR is the story of a young Germanic prince, trained to serve the Roman Empire, who united the tribes of Germania in 9 A.D. to crush three Roman legions, thereby changing the course of history. Its later cultural and social emanations would radiate to North America, Australia and other regions and have lasted more than 2,000 years so far.

ARMINIUS: THE LIBERATOR is the true story of one man's incredible quest to defy an oppressive, all-powerful empire and lead his people to freedom. It is also one of the most amazing love stories of all time. Arminius met and eloped with the proud and beautiful Thusnelda against her father's wishes. Her father would later betray them to the Romans—a traitor to his family and his *volk*.

In the end, Arminius was pitted against his own brother, Flavus, who ignobly remained subservient to his Roman masters. In a dramatic confrontation across the German River Weser, Arminius pleaded for unity of all Germanic tribes. Many agreed with his entreaty.

This epic illustrates amazing parallels. Arminius's victory is a lesson to be learned by our people for our times—that unity and clear-headed focus are crucial to understanding, confronting and somehow overcoming political tyranny and rampant corruption.

Softcover (8.5 x 11), high-quality stock, hundreds of original illustrations, 324 pages. **$55** minus 10% for TBR subscribers plus $5 S&H inside the U.S. from The Barnes Review, P.O. Box 550, White Plains, MD 20695. Call **1-877-773-9077** toll free to charge, Mon.Thu. 8-4 ET. Book will not be listed on our website due to the limited numbere that have been donated to us.

TWO SAMPLE SPREADS FROM **ARMINIUS: THE LIBERATOR**

'Operation Book Rescue' Is Teaming Up With Castle Hill Publishers

INTRODUCTION

After being "canceled" by numerous publishing outfits, Castle Hill Publishers (CHP), a prominent Revisionist publishing house founded by Germar Rudolf, turned to TBR to help get their critical books back in print. Despite the best efforts of Big Tech, anti-free speech organizations such as the Anti-Defamation League, and a host of other subversive, anti-American groups and individuals working overtime to suppress important historical research and perspectives from reaching the masses, TBR's Operation Book Rescue (OBR) continues to assist in saving critical books from disappearing down Orwell's memory hole. And it's all thanks to our dedicated readers, subscribers, and supporters.

TBR Assistant Editor John Friend had the chance to speak with Michael Santomauro, a longtime champion of the Revisionist message and current CEO of Castle Hill Publishers, about the background and purpose of CHP as well as the importance of Historical Revisionism and free speech. We hope you enjoy the following Q&A and please do consider picking up a book or two—or 10—from Castle Hill Publishers to support their important work and, at the same time, donating to TBR's Operation Book Rescue. Note that CHP has the largest inventory of books on the Holocaust.

TBR: Can you briefly explain how you became interested in Revisionism? What sparked your journey into this field?

Santomauro: Although "Holocaust denial" laws have created physical and mental hardship for such scholars as the late Dr. Fredrick Töben, Dr. Robert Faurisson, David Irving, Jürgen Graf, Germar Rudolf, and many others, they have actually created an interest in this historical period for people, myself included, who normally would not be interested or who simply never heard about the topic.

My first encounter with a prominent Revisionist was in 1999, when I phoned Dr. Töben at his Australian residence from my New York office, not realizing I was ringing him at 6:00 a.m. his time. A few days later, I learned from Irving's website that the very same man—the first major Revisionist that I had contacted directly—had been arrested in Germany.

I was perplexed. Why would there be laws to sabotage historical research, including research Dr. Töben was conducting? His arrest had an impact on my own pursuits in historical research. What struck a chord in my new thinking about the event we now know as the "Holocaust" was a point he made during our conversation a few days before his infamous arrest. When I asked him what he believed, he said, "I don't *believe* in anything—I want to *know*." As simple as it sounds, that was my turning point in my immersion into Historical Revisionism.

His words, "I want to know," coupled with his arrest, motivated me to become a web journalist and create "ReportersNotebook," a collection of journalistic truths suppressed by the mainstream media. Its mission statement is the following: "The ramifications of dishonest news reporting divides people. Our purpose is to rectify false concepts in history writing and contemporary news reporting." (See ReportersNotebook.com)

I am indebted to researchers such as the late Dr. Töben (who passed away in 2020) as well as the highly productive and one of the most important free speech advocates in the world, Germar Rudolf. Both men have had major sacrifices forced upon them, including prison terms, and both have shown tremendous courage in speaking out, at the risk of suffering physical and mental hardships.

But the internet has been a huge benefit to the Revisionist movement, given that so much of their work is censored, blocked or otherwise unpublishable by conventional means. I would never have known about Dr. Töben, or his arrest, if it had not been

promoted online.

Today, nearly 80 years after the event, it is mindboggling that it is a taboo to want to know about certain historical events related to the "Holocaust." Clearly, there are powerful actors at work who are greatly concerned about the truth getting out. They make life difficult for all of us, every day.

* * *

TBR: How would you explain the concept of Historical Revisionism to an average person? Why is Revisionism such a worthy endeavor?

Santomauro: There are really two issues here.

Conventional "Historical Revisionism" happens all the time. It helps us develop a better and more accurate understanding of the world. Historical Revisionism helps us understand the world at large, both past and present. Historical Revisionism paints a detailed picture of how society, technology and government worked in the past so that we can better understand how it works now.

Given that there can always be new information that can change our collective understanding of the past, Historical Revisionism in itself is not innately good or bad. It is in fact an essential part of the work of historians. All historians by default are Revisionists. They should always correct or modify views of the past, based on new insights and new information.

The second issue, though, is much more contentious. It is "Holocaust Revisionism." This is literally the one and only area of history that is banned from Revisionist work. The orthodox Holocaust story is set in stone, and no one is allowed to challenge or modify it—on penalty of law in many countries (not yet the U.S., thankfully).

Even in the U.S., though, Holocaust Revisionists are harassed, threatened, "canceled," sometimes sued, and even sometimes physically attacked. There is a powerful Jewish Lobby here that is terrified of Holocaust Revisionism. It seems to be their Achilles' Heel: they sense that their story is largely false or exaggerated, yet they cling to the "gas chambers" and the "6 million" in order to solidify their victimhood status, which translates to big money.

MICHAEL SANTOMAURO
Performing vital task.

If the orthodox account were shown to be radically false, it would not only undermine their victimhood, it would also prove them to be malicious liars and draconian censors of the truth. If that message got out, people might start to ask, "What other Jewish tales have we been misled about?"

Or, "How do they have so much power to stifle open debate?"

And, "Why do so many non-Jews play along with them?"

If people start asking these questions, the whole Jewish/Zionist power structure would start to wobble.

As is becoming increasingly more obvious, even to historical novices, mainstream academia, mass media and what passes for journalism these days is agenda driven, not truth driven. Certain narratives and ideas that advance particular agendas are elevated and promoted, while dissenting or alternative perspectives and viewpoints are hysterically dismissed or censored.

That is why Revisionism is such a worthy endeavor. Revisionists are dedicated to exploring all perspectives and entertaining and considering all facts, regardless of whose agenda it does or does not serve. We care about the truth and bring that mindset to the exploration of history, particularly sacrosanct historical events and narratives that are considered "taboo" to challenge or question.

* * *

TBR: Tell our readers about your role with Castle Hill Publishers. How long have you been involved with this renowned publishing house?

Santomauro: Castle Hill Publishers (CHP) was founded in 1997 in Hastings, England, by Germar Rudolf. A small imprint, "Theses & Dissertations Press," was created as the American outlet of CHP. Multiple Revisionist books have been published under both headings.

In 2000, Rudolf initiated the "Holocaust Handbook" series, to encompass the most important and most authoritative Revisionist books. To date, there are some 50 titles in that series.

I have been the CEO of Castle Hill Publishers on and off since 2005. Beginning in 2005, I administered Castle Hill Publishers for the next five years while Germar was in prison in Germany. After his release, I handed the publishing company back to him, which he ran for several years, until about a year ago. Since early 2022, due to incessant persecution, he has retired from all activities to do with Holocaust Revisionism. I am now at the helm once again to continue his body of work with the help of Dr. Thomas Dalton, a retired professor of humanities and author of numerous Revisionist works.

TBR: Can you tell us the purpose and mission of Castle Hill Publishers?

Santomauro: Our purpose is to continue to counter the claims that the National Socialists mass murdered people in homicidal gas chambers. It does not deny that "something happened" to the Jews, or that many thousands died during WWII. But we do deny that anything like 6 million Jews were systematically killed. Most Revisionists currently estimate that approximately 500,000 Jews died, or about 10% of the official number.

Interestingly, it took a leftist French political prisoner who suffered through two German wartime concentration and forced labor camps to get the ball rolling: Paul Rassinier. He earned a Ph.D. in history and was a university professor by 1933. He was arrested by the Germans in 1943 and sent to Buchenwald and, later, the Dora-Mittelbau camp.

Serious, academic Holocaust Revisionism began with his book *Ulysses's Lie*, which came out in French in 1950. In it, he corrected numerous popular exaggerations of the time, and denied any knowledge of gas chambers, either at Buchenwald or elsewhere—all this, despite the fact that he considered the Germans as enemies. He was neither trying to "rehabilitate" nor defend the Germans; Rassinier simply wanted people to know the truth. In addition to relating his own experiences, he analyzes the books of former fellow prisoners, and shows how they lied and distorted the truth in order to hide their complicity in the deaths of fellow inmates.

The ramifications of dishonest history writing divides people. Our purpose is to rectify false concepts in the Holocaust narrative. The truth will ultimately bring people together and inspire trust in authority.

Today, authorities are almost completely devoid of credibility. We have carried on in the spirit of Rassinier, dedicated to exposing the truth, no matter how inconvenient it may be for those in power.

We are dedicated to offering the kind of books and videos that others don't dare touch—provided these items do not advocate, promote, approve of, condone or justify the violation of the civil rights of others, and they do not serve to exploit a crime financially. We therefore specialize in particular on the publication and dissemination of mainly scholarly history books and documentaries which can no longer be published or distributed in many countries of the world, be it due to government or corporate censorship.

All of this goes to the very concept of freedom of expression or free speech, formerly a bedrock principal of all of Western civilization, but particularly here in America, where we have the First Amendment which specifically protects our God-ordained rights to free speech and freedom of the press, i.e., freedom to publish.

> We are dedicated to offering the kind of books and videos that others don't dare touch.

Anyone paying attention must recognize that free speech is under major assault in America and the wider Western world—and has been for decades. In many countries in Europe, questioning certain historical events or criticizing certain groups of people can end up costing you your freedom.

Here is Castle Hill's take on the crucial topic of freedom of expression:

First, any opinion has the right to be expressed, as long as it does not advocate, promote, approve of, justify or condone the violation of anyone's civil rights or advocate violence. Such opinions may be referred to as "peaceful views." Criticizing an individual or a group of individuals for their behaviors or attitudes is most certainly not a violation of their civil rights.

Second, freedom of expression is worthless if there isn't also the freedom to be heard. Allowing a controversial view to be expressed while denying it any venue to reach any listeners who might be interested to hear what is being said amounts to the same thing as denying freedom of speech itself. What is freedom of speech worth if we have to go into a soundproof room without an audience in order to express it?

Third, the freedom to express one's peaceful view needs protection and defense first and foremost where powerful groups—be they governments, societal pressure groups, NGOs or monopoly-like corporate entities such as Ingram Content Group, Amazon, Google, YouTube, Facebook, Twitter etc.—are trying to suppress it. Non-controversial views need no protection. They are not threatened. It is exactly the kind of controversial yet peaceful views that powerful groups want to suppress that need protection.

Fourth, all media organizations and all their employees depend on freedom of expression to convey their views. They should be the first to rise to the defense of the principle of freedom of expression when peaceful views are being suppressed, whether they agree with these views or not.

Yet what we observe is that, in recent decades, without exception, all mainstream media organizations and the people employed by them have actually turned into the primary enforcers of censorship. Those who should be the primary guardians of free speech have become enemies of free speech.

They promote free speech only for views they consider acceptable.

Fifth, companies that have a defacto monopoly—Google as a search engine, YouTube as a video-sharing platform, Facebook and Twitter as social media outlets, Amazon as a book retailer, Ingram as a book distributor—must be held to different standards than any other company.

In many countries, if a company has a market share such as Google, YouTube, Facebook, Twitter and Amazon have in their primary field of operations, they have two options: 1) being broken up by force into smaller entities which do not have that big of a market share; or 2) being considered a public commodity which has no right to reject any customers (other than in cases of violations of the law).

Right now, Amazon, Google, YouTube, Ingram and Facebook, with their quasi-monopolies, are the biggest threat to freedom of speech. Monopolies are bad news in many regards, not just free speech. Unfortunately, the anti-trust laws in the U.S. have always been weak, primarily because the United States is a plutocracy where big money heavily influences who can finance election campaigns and who appears favorably (if at all) in the media. And big money does not want anti-monopoly laws.

Sixth, if you want to know who has power in a country, figure out whom you cannot criticize without running the risk of being subjected to censorship and persecution.

Finally, while we do not necessarily agree with every view our authors express, we do defend their right to express them, as long as they are peaceful. And that means giving them a podium to express those views and providing them with ways to reach an audience willing to listen. Without it, free speech is meaningless.

* * *

TBR: Germar Rudolf has been highly persecuted for his academic research into certain aspects of the official "Holocaust" narrative. Who is Germar and why is he such a significant figure in Revisionism? Can you give us a brief background on what he has experienced and gone through? What is his current status?

Santomauro: Germar Rudolf is the most important researcher and former publisher on the questioning of the orthodox Holocaust narrative. Though now retired, his work remains hugely important.

Rudolf was born in Limburg an der Lahn, Hesse, Germany, in 1964. In 1983 he took his Abitur in Remscheid, then studied chemistry in Bonn, graduating in 1989 with a Master's degree. After his military service with the German Air Force, he joined the Max Planck Institute for Solid State Research at Stuttgart in 1990, where he prepared for a Ph.D. thesis.

In 1991, Rudolf began work on a paper regarding the formation of cyanide compounds in the Auschwitz "gas chambers." He stated that his findings at Auschwitz and Birkenau "completely shattered his world view." Among other things, his report claims that only insignificant traces of cyanide compounds can be found in the samples taken from Auschwitz chambers; therefore, they could never have been used for mass homicidal gassings.

> If you want to know who has power in a country, figure out whom you cannot criticize.

But such work was forbidden in Germany, and he was banned from the Planck Institute in 1993. In 1994, this dismissal was converted into a termination by mutual agreement. In 1996, the University of Stuttgart asked Rudolf to withdraw his application for a final Ph.D. examination or it would be denied, rendering his Ph.D. thesis worthless. The legal basis for this is a German law that allows universities to deny or withdraw academic degrees where the candidate has used his academic credentials or knowledge "to commit a crime"—here, a thought crime. Rudolf subsequently withdrew his application.

Between 1991 and 1994, Rudolf's Auschwitz report was used to defend several Holocaust skeptics, among them Otto Ernst Remer, a former Wehrmacht officer.

In 1995, Rudolf was sentenced to 14 months in prison by the district court of Stuttgart for "inciting racial hatred" via his "Rudolf Report." But he avoided prison by fleeing to Spain, England and, finally, to the United States.

He got married to an American woman in 2004, settled in Chicago and, later, Pennsylvania. He applied for political asylum, or at least for the right not to be expelled, but this was rejected in November 2004.

On November 14, 2005, Rudolf was extradited to Germany where he was wanted for incitement of racial hatred (*Volksverhetzung*). On arrival there, he was arrested by the police and transferred to a prison in Rothenburg, then to another in Stuttgart in Baden-Württemberg.

In early 2007, the Mannheim District Court sentenced him to two years and six months in prison for inciting hatred, disparaging the dead, and libel. Rudolf accepted the verdict, and copies of his book *Lectures on the Holocaust* were confiscated and destroyed. He was released from prison on July 5, 2009, and returned to the United States with his wife and children.

For years, German government agencies and influential private bodies associated with the Jewish lobby have waged a concerted campaign to silence him. He has had to defend himself in court for his candid and uncompromising writings and statements, being convicted under "Holocaust" denial laws and sent to prison for his non-violent writings and his non-violent books. After many years of hard work and sacrifice, he retired from the business in 2022, and now lives a quiet personal life.

Still, it remains a fact that only a few living people in the Western hemisphere are more courageous regarding free speech advocacy than Germar Rudolf. I would say that Rudolf and Julian Assange are the most important free speech advocates in the Western world today. ❖

Castle Hill Publishing

The Most Authoritative Resource for Holocaust Books Today

ULYSSES'S LIE

Holocaust Revisionism began with this book! Frenchman Paul Rassinier was sent first to Buchenwald camp in 1944, then to Dora-Mittelbau. Here he reports from his own experience how the *prisoners turned one another's imprisonment into hell*. Rassinier also analyzes the books of former fellow prisoners, and shows how they lied and distorted the "facts" in order to hide their complicity. First complete English edition, including Rassinier's prologue, Albert Paraz's preface, and press reviews. Softcover, 270 pages, $37. E-book: $8.

THE RESISTANCE BUNDLE—3 BOOKS

A Special Offer Commemorating the Struggle of Germar Rudolf Against Vicious Persecution

This bundle package includes three books: *Hunting Germar Rudolf* plus *Resistance Is Obligatory*, both authored by Rudolf. The final book in the bundle is *Tell the Truth and Shame the Devil* by Gerard Menuhin, a prominent Jew who boldly claims the "Holocaust" story is a propaganda myth that has turned into an extortion racket. Rudolf is currently forcefully separated from his family via court order and faces extradition to Germany where the corrupt courts want to lock him up for the rest of his life. All three are softcover. The "bundle" of all three books is $100. A total of 1,111 pages.

SONDERKOMMANDO AUSCHWITZ TRILOGY

Sonderkommando Auschwitz I
Nine Eyewitness Testimonies Analyzed

Sonderkommando Auschwitz II
The False Testimonies by Henryk Tauber and Szlama Dragon

Sonderkommando Auschwitz III
They Wept Crocodile Tears—A Critical Analysis of Late Witness Testimonies

This trilogy of profound source criticism is essential to all those who want to understand the propaganda origins of the Auschwitz gas chamber narrative. The witness testimonies thoroughly scrutinized in these three books are the very foundation upon which the myth was erected that homicidal gas chambers existed during World War II at the infamous Auschwitz camp. Without these testimonies, the orthodoxy would have no case at all for their claims. The various testimonies of altogether 25 former Auschwitz inmates who claim to have worked in or next to the purported gas chambers of Auschwitz are critically examined. These three studies juxtapose these accounts with logic, forensic evidence, technical feasibility, documented facts and, last but not least, with their mutual and internal contradictions, thus revealing that they all are bogus on many levels. All the books are softcover, 788 total pages, $69 for the entire trilogy. Ebook: $8.

CURATED LIES—THE AUSCHWITZ MUSEUM'S MISREPRESENTATIONS, DISTORTIONS AND DECEPTIONS

Since the early 1990s, Revisionist historians have published an increasing amount of research about the infamous German facility at Auschwitz in what is now Poland. This research surpasses the work of the Auschwitz Museum's own research department in both quantity and quality while failing to find in the tens of thousands of available wartime documents any trace of plans for gas chambers for executing people at Auschwitz or any of its satellite camps. The lies exposed at the museum are astronomical in scope. Softcover, 250 pages, $37. E-book: $8.

DELIVERIES OF COKE, WOOD & ZYKLON B TO AUSCHWITZ: NEITHER PROOF NOR TRACE FOR THE HOLOCAUST

In order to prove that mass exterminations in gas chambers occurred at the infamous Auschwitz camp, mainstream historians must rely almost exclusively on eyewitness accounts. They also adduce a few documents with ambiguous contents which they take out of their historical and documental context in order to impute a homicidal meaning to them—which they never had.

After Revisionist scholars pointed out this fact, and also established the highly dubious nature of these witness accounts in numerous studies, a researcher from the Polish Auschwitz Museum, Piotr Setkiewicz, tried a different approach to prove the raison d'être of his employer: In a lengthy paper, he points to documents about deliveries of firewood and coke as well as the pesticide Zyklon B to the Auschwitz Camp.

This book thoroughly refutes the allegations of Setkiewicz proving that even lower average amounts of wood for the burning of corpses on outdoor pyres and Zyklon B for "extermintaion" are impossibly low when compared to the numbers of "victims." Much more.

Softcover, 200 pages, $33. E-book: $8.

THE EINSATZGRUPPEN IN THE OCCUPIED EASTERN TERRITORIES (2 VOLUMES)

On June 22, 1941, National Socialist Germany set out to destroy what it saw as a menace to the world: Judeo-Bolshevism in its most threatening manifestation, the Soviet Union. As the German army marched east, certain special units called *Einsatzgruppen* (task forces or operational groups) were deployed behind the front. Mainstream historians maintain that their primary task was to exterminate as many Jews as possible. At war's end, the Einsatzgruppen's death toll and that of associated units is said to have amounted to some 1.5 to 3 million Jewish civilians, depending on which historian you happen to hear.

The present study takes a critical look at the Einsatzgruppen's activities and missions. While many authentic documents exist attesting to mass executions of Jews in the temporarily German-occupied Soviet territories, the accuracy of the data contained in them is highly questionable, as even mainstream scholars admit.

The books try to uncover what really happened to the Jews who lived in, or were deported into, the temporarily German-occupied territories of the Soviet Union. It first shows that the Einsatzgruppen were not simple "killing units," but had a broad variety of responsibilities. It then establishes that there is not a shred of evidence indicating that these units ever received orders to commit wholesale slaughter of Jews.

Next, and unlike all other works published so far on this topic, the author analyzes—with a critical mind and a common-sense approach—the information we have about the Einsatzgruppen's killings as well as the claimed attempts of German units to erase the traces of these crimes in what has been dubbed "Aktion 1005": the exhumation and incineration of the murdered victims in 1943-1944. The results of this study have sent mainstream Holocaust scholars into a tizzy. Both books in the set are softcover, 866 total pages, $60 for the two-volume set.

HEALTHCARE IN AUSCHWITZ: MEDICAL CARE AND SPECIAL TREATMENT OF REGISTERED INMATES

The famous Italian Holocaust survivor Primo Levi informed us in his eyewitness account *Survival in Auschwitz* that a number of sickbays and infirmaries existed in the area of the Auschwitz camp. The present book gives an overview of the camp's organizational and historical development in this regard. For example, there was a change of policy among Himmler and his entourage toward the end of 1942 regarding the main function of Germany's concentration camps. While initially reeducation and punishment were their main focus, exploiting the inmates' productive potential became increasingly important. The main reason for this was the ever-increasing needs of the German armed forces for manpower. Another reason for the installation of sanitary facilities was the control of epidemics that had to be combatted.

In the first part of this book, the author analyzes the inmates' living conditions as well as the various sanitary and medical measures implemented to maintain or restore inmate health. The second part explores what happened in particular to those inmates registered at Auschwitz who were "selected" or subject to "special treatment" while disabled or sick. The last part of this book is dedicated to the remarkable Dr. Wirths, the Auschwitz garrison physician. His compassion refutes the current stereotype of SS officers. Softcover, 402 pages, $44. E-book: $8.

Books from Historian Mike Walsh Rescued from the Memory Hole

Life in the Reich: Hitler's Germany—1933–1945

By Mike Walsh. The standard of living and quality of life in Hitler's Third Reich was far superior to elsewhere in the developed world. Ordinary German workers enjoyed a lifestyle previously reserved for the upper classes of the West. Hitler's Germany led the world in fashion, medicine, cinema, lifestyle, manufacturing, transport infrastructure, public facilities, cutting-edge science, healthcare and education. For good reason, the Germans were the cheeriest people on Earth. The claim that this was achieved through investment in militarism is absurd. Despite being war economies, the debt-ridden U.S. and European Union suffer the collapse of their infrastructure whilst their indebted populations live a hand-to-mouth existence. Prosperity in the Reich set an example that damns the hideous failures of the mutually supportive capitalist and Communist systems. A taboo topic for media and palace publishers, *Life in the Reich* by Mike Walsh was removed by Amazon because it dared to show Hitler's Germany as it was and not as the propagandists would have us believe it was. Mainstream media and court publishers consider this a taboo topic because they don't want you to know in case you draw the right conclusions. Softcover, 120 pages, #960, **$18**.

Heroes Hang When Traitors Triumph: Martyrs of World War II

By Mike Walsh. Character assassination inevitably follows a defeat in war. Had peace terms with National Socialist Germany been equitable, it is likely that non-German figures since denigrated would be more accurately portrayed by modern media. Had Hitler's Germany defeated the forces of the British, Soviet and American empires, then one can presume London's Whitehall would be Adolf Hitler Esplanade whilst Hyde Park would have been renamed Lawrence of Arabia Park. Norway's monuments would celebrate Vidkun Quisling and the revered writer Knut Hamsun. Romania would pay tribute to Corneliu Codreanu whilst in Ireland, Britain and New York, instead of statues to Lenin, the name of Irish-American William Joyce might be affixed to great shopping malls. Few people hate these figures as they simply do not know them. *Hang when Traitors Triumph* gives a different perspective of such vilified foes. Its author reminds us that victors' propaganda turns saints into sinners. Here are the spin-free true stories of men who set examples of great courage and fortitude for the best reasons yet have had their reputations defiled by fake history. Softcover, 115 pages, #961, **$20**.

Adolf Hitler: My Last Testament—Let God Judge Me

By Mike Walsh. Adolf Hitler said he was dumbfounded as "an enormous human dragon slowly uncoiled itself before me." The young laborer's description of a protest march calling for work and bread perhaps inspired Hitler to join the revolt against the oppression of the working class. Whatever challenges Germany faced, the highly decorated war veteran would not blame the Jews, for he had earlier remarked that anti-Semitism was repugnant. There is much that is enigmatic about this individual drawn from the great masses of humanity to become nearly as popular as any religious figure. No other leader in history has achieved more in uniting social classes across frontiers and inspiring those of various religions and races. So far, an estimated 750,000 book titles have been published on The Third Reich. Hitler's *Mein Kampf* is more widely read today than ever before. Yet, few books actually record the rise of the Third Reich in Adolf Hitler's own words. Drawn from his speeches and media interviews *My Last Testament* is Hitler's self-assessment, but it also includes personal observations about the Führer from many others as well. As such, it is an invaluable first-hand source of information for scholars of the period. Softcover, 195 pages, #962, **$25**.

ORDERING: Order these books from THE BARNES REVIEW, P.O. Box 550, White Plains, MD 20695. S&H not included. Inside the U.S. Add $5 S&H for one or two books. Add $10 S&H for all three. Outrageous international S&H forces us to add $32 per book for destinations outside the U.S. Call 1-877-773-9077 toll free to charge, Mon.-Thu. 8-4 ET.

LETTERS TO THE EDITOR

A GREAT ISSUE

I enjoyed many articles in the May/June issue, particularly the article on genetics by Arthur Kemp. The man is a national treasure and his work invaluable.

Also of note was the article on the Grand Bargain by Valerie Protopapas. Her passion for the South was palpable in the text. In it, she states that, beyond tariffs, the real reason for the so-called Civil War was the ideological conflict between the preference for either large or small government, the Thomas Hobbes philosophy versus Aristotle and Locke. Reading that section was the first time I experienced anyone echoing what I have come to believe was the real reason for the war.

When studying history and examining how it correlates with current events, it doesn't take long to realize that the push for a New World Order has been going on longer than we think. In that regard, I have long believed that the "Civil War" was a quasi-Communist takeover. It was a war that was planned with the intention of destroying state sovereignty and limited government so they could be replaced with a monolithic, all-powerful, central government that every socialist/Communist country requires.

It's not a coincidence that Lincoln was indifferent to slavery, but hellbent on preserving a "Union" that never existed. His administration [and some officers in the Union military] was full of Marxists who escaped the failed 1848 Communist revolutions in Europe and slithered their way to America.

Lincoln's biggest admirer was the "Father of Communism" Karl Marx, who wrote to Lincoln and urged his comrades to support the war in whatever way they could. It's hard to ignore the Bolshevik-style "total war" carnage wrought by Gen. William Tecumseh Sherman in the South and its parallels to 1917. Communism has a habit of disposing of its puppets when they've outlived their usefulness, and Lincoln, like Leon Trotsky, and probably even Josef Stalin, was no exception.

The South was put under the right amount of pressure with tariffs to create a problem (secession) that elicited the desired reaction (war) that required the pre-planned solution (centralized government). It's the classic Communist modus operandi.

It's said that "big world events" are planned years or decades in advance by the global elites in their march toward a world government. Imagine how different the 20th century would have been with two American nations and not a monolithic American superpower. To keep the plan on track, the South had to be prevented from seceding by any means necessary. Slavery was the cover story fed to the emotional masses.

Cole Lucas
Via email

[Realizing that many Americans might look more favorably upon secession today than in the many decades since the War Between the States, is it any wonder the radical left has tried so hard to convince people that every "Secessionist" was a "traitor" only interested in maintaining slavery? This also explains the passivity demonstrated by the leftists running America today regarding the Black Lives Matter/neo-Bolshevik rampage to tear down and destroy every respectful monument or physical vestige dedicated to the men who led and fought for the Confederacy. This also explains why their Court Historians and race hustlers are so bent on insisting that poor country boys from Arkansas, for instance—who never profited from slavery—trekked all the way to Maryland and Pennsylvania to fight and die on the battlefields of Sharpsburg and Gettysburg to maintain slavery for wealthy plantation owners. That makes no sense at all. In addition, why is there such a constant drumbeat to portray the events at the Capitol in January 2021 as an "insurrection." Could it be they realize their grip on this nation is weakening and that only lies can sustain it?—Ed.]

WRONG ABOUT KHAZARS

The article in the May/June issue of TBR by Arthur Kemp titled "Genetics: The Triumph of Science Over Ideology" was very good on the issue of different races, and particularly good on the ancient history of the spread of the White race.

However, he is very biased and wrong in his reasoning for rejecting the Khazar origins of the Ashkenazi Jews. According to his reasoning, because there appears to be no DNA available to trace Khazar Jews as being linked to Ashkenazi Jews, then there is no evidence that it is true.

However, the proof about the Khazars becoming the Ashkenazi Jews is well documented in the *Columbia Encyclopedia* and the *Encyclopaedia Britannica*.

The origins of the Ashkenazi (Khazar) Jews were clearly north of the Black Sea and the Caspian Sea in the Khazar Empire. They were a Yiddish-speaking people—not Hebrew speaking—who converted to the Jewish religion in the 8th century. They were not Hebrews and were not Semitic.

Kemp also makes the claim that because the Ashkenazi and Sephardic Jews share some genetic ancestry, that it is impossible for there to have been a Khazar origin to the Ashkenazi Jews. That is like saying that because a German person mixed with a French person that one or the other could not have existed prior to the mixture.

[Kemp's] DNA analysis and criticism of what he calls the "Khazar theory" are deeply flawed.

He is also wrong in understanding who the Jews are. He seems to think that the Jews are ancient Israel, and that they are Semites. The Ashkenazi Jews obviously have a different origin than the Sephardic Jews.

However, even the Sephardic Jews are not related to Israel for the most part because they were predominantly Pharisee Edomites.

Roy T.
Oregon

COMMENT FROM KEMP

Thank you for your comments. I know that it is hard to have one's long-held beliefs challenged, particularly if they are linked to one's religious beliefs. But, if we are dedicated to the truth, we have to face the facts.

So, with all due respect to your beliefs, I must respond to your comments

Continued from page 75

point by point.

Mr. T writes: "According to his reasoning, because there appears to be no DNA available to trace Khazar Jews as being linked to Ashkenazi Jews, then there is no evidence that it is true." This is a self-defeating point. There is indeed no DNA evidence linking the Khazars to Ashkenazi Jews. This is precisely what I wrote, and, thus, I surmise we can agree on this.

Mr. T writes: "However, the proof about the Khazars becoming the Ashkenazi Jews is well documented in the *Columbia Encyclopedia* and the *Encyclopaedia Britannica*."

The Khazar theory has in fact been around since at least 1808. But it has always been a theory, and always without definite proof. To quote the *Encyclopaedia Britannica*, to which you refer:

"Textual witnesses dating from the 9th and 10th centuries claim the Khazars adopted Judaism in the 8th century. These texts are not without problems, however, and lack of archaeological or other physical evidence indicating a mass conversion has called both the extent and historicity of this conversion into doubt." (See "Khazar," in the *Encyclopaedia Britannica*.)

It is precisely to test the veracity of this theory that scientists have resorted to using the completely objective science of genetics. DNA, that ultimate, objective and final truth, has shown that there is no genetic evidence to support the Khazar theory.

This is not the first time that genetics has definitively overturned some previously believed theory.

A good example is the role of Neanderthals in human history. Previously, it was believed—because the skeletal evidence was so overwhelming—that the racially distinct Neanderthals had been wiped out by the arrival of *Homo sapiens* in Europe.

Genetics has however shown that all races—except Africans—display legacy Neanderthal genetics. This means that there had to have been a small amount of mixing with Neanderthals before they were wiped out.

The previous theory—that Neanderthals were exterminated through some event and vanished, like other *Homo erectus* types—has therefore been disproven by the same genetic science which has also now definitely disproven any genetic link between Khazars and Ashkenazi Jews.

Mr. T writes: "The origins of the Ashkenazi (Khazar) Jews were clearly north of the Black Sea and the Caspian Sea in the Khazar Empire. They were a Yiddish-speaking people—not Hebrew speaking—who converted to the Jewish religion in the 8th century. They were not Hebrews and were not Semitic."

Unfortunately, this is incorrect. Firstly, as we agree, there is no genetic evidence linking modern Jews to the Khazars. As I pointed out in the article, there is not even an actual "Khazar race" either, as they were a Turkic people who themselves were of highly mixed racial origins.

Secondly, your assertion that the Khazars spoke "Yiddish" is not true.

The Khazars, as a Turkic people, spoke Turkic, as can be verified by examining the linguistic evidence.

Yiddish is in fact a corrupted mix of German and Hebrew (Yid = *Jüden; Deutsch* = German; Yiddish = Jewish-German), and was developed by Jews living in Central Europe and Germany between the 9th and the 12th centuries.

For this reason, Yiddish contains a huge number of words of German origin. A few well-known examples will demonstrate this:

- The Yiddish word "*mensch*," meaning man, or good man, is taken directly from the German word "*mensch*."
- The Yiddish word "*mazel*," as in "mazel tov," means good luck. It is taken directly from the German word of the same meaning, "*massel*."
- The Yiddish phrase "*oy vey*," ("oh, woe"), is taken directly from the German phrase "*oh weh*."
- The Yiddish word "*schlep*," meaning a tedious effort, or to drag or haul something, is taken directly from the German "*schleppen*."
- The Yiddish phrase "*oy gevalt*" (also spelled "*gevald*"), meaning "oh violence," is taken directly from the German "*gewalt*."

Etymologically, therefore, Yiddish is a combination of German and Hebrew.

Furthermore, Mr. T's assertion that the Khazars were a Yiddish-speaking people, not Hebrew-speaking, needs some clarification.. The Hebrew alphabet is the written language of Yiddish. This is an undeniable fact.

Mr. T writes: "Kemp also makes the claim that because the Ashkenazi and Sephardic Jews share some genetic ancestry, that it is impossible for there to have been a Khazar origin to the Ashkenazi Jews. That is like saying that because a German person mixed with a French person that one or the other could not have existed prior to the mixture."

You have misread my original article.

Nowhere at all do I say, or even suggest, that the Khazar theory is flawed "because the Ashkenazi and Sephardic Jews share some genetic ancestry." I wrote that DNA shows that Ashkenazi and Sephardic Jews share about 60% or 70% genetic commonality, and that Ashkenazi Jews are differentiated from Sephardic Jews by the amount of European ancestry.

That is all, and at no stage did I suggest that this was a reason why the Khazar theory was untrue. It is in fact the total lack of DNA evidence linking all Jews to the "Khazars" which is the reason why the Khazar theory cannot be proven.

Mr. T writes: "His DNA analysis and criticism of what he calls the 'Khazar theory' are deeply flawed."

I have not conducted any "DNA analysis" myself—that is the preserve of the genetic scientists in laboratories, and I have never claimed to be one of them. All I have done is quote the evidence that biological scientists have produced and, as detailed in the article, that genetic evidence shows no support for the Khazar theory.

Mr. T writes: "He is also wrong in understanding who the Jews are. He seems to think that the Jews are ancient Israel, and that they are Semites."

The archaic and modern genetic ev-

idence clearly shows that the DNA of both Ashkenazi and Sephardic Jews clusters precisely along with the other Semites, centered around the Saudi Arabian Peninsula.

Please look once again at the autosomal DNA chart in my article and you will see this clearly. In fact, DNA has shown that the Semites, once thought to be more of a linguistic group, have clearly defined genetic markers that allow them to cluster all by themselves in the genetic/racial tables.

It is this "DNA clustering" effect that produces the physical appearance we see before us as "race," and, therefore, Semites do form a separate race (one of seven major world races, as defined by this genetic clustering).

Jews—Ashkenazi and Sephardic alike—are, most certainly, genetically speaking, Semitic, as the DNA clustering clearly shows.

On this point, it needs to be made clear that Jews are just one tribe of Semites, and, that, genetically, they are part of a much larger racial group, the purest strains of which are to be found centered in present-day Saudi Arabia.

For anyone who knows the history of Islam, this latter fact will come as no surprise, as most of Mohammed's earliest followers in Medina were Jews who he converted to his interpretation of the Semitic religion.

After studying a broad representation of Jewish phenotypes, Ashkenazi and Sephardic, and then comparing them to other Semites (such as those found in Saudi Arabia and many other Semitic nations), one can see this relatedness.

This genetic similarity, and thus physical resemblance, is, for example, one of the reasons why the Israeli secret service is able to operate so effectively in Palestinian areas.

It is also the reason why there have been cases of Jews in Israel attacking other Jews in the mistaken belief that the victims were Arabs. (See "Israeli soldiers kill Jewish man after mistaking him for a Palestinian 'terrorist' in Jerusalem," *National Post*, October 22, 2015.)

Mr. T writes: "The Ashkenazi Jews obviously have a different origin than the Sephardic Jews."

Every modern scientific test proves they do not. As detailed here and in my original article, the genetics show very clearly that they have a similar origin and only differ from each other by the amount of European input into the Ashkenazi gene pool. I cannot change this genetic reality.

Mr. T writes: "However, even the Sephardic Jews are not related to Israel for the most part because they were predominantly Pharisee Edomites."

I have no desire to engage in a theological discussion as all faiths are precisely that—based on "faith" that something is true, rather than absolute proof. This is in fact why religions are called "faiths."

All I would say here is that my "faith" is grounded in biological reality, and nothing else. I hope this response gives you some additional points to consider, and I wish you all the best in your endeavors to find the truth.

Arthur Kemp

POWER OF THE ROTHSCHILDS

The May/June issue presented Part 2 of an essay series by my fellow TBR writer Antonius Patrick, whose writings I greatly admire, titled "The Vatican, the Rothschilds & Usury: A Paradox." I am always interested in the Rothschilds for their immense influence upon our entire world as the wealthiest Jewish banking family dynasty, and their dealings with the Vatican revealed but one more area of influence I had not confirmed.

However, I must disagree with the final section of the essay, "Financial Dominance." It states: "[A]s aristocracies began to wane and democratic-republican nation-states began their ascent, the financial power and influence of the Rothschilds also declined. … As European princes' power began to be usurped by legislative assemblies and their elected chief executives and presidents, the Rothschilds lost their main source of income."

Perhaps … yet they established new sources of income in this New World Order they helped to create. It was the Rothschild agent on Wall Street, Jacob Schiff, who funded the Bolshevik Jews who displaced Tzar Nicholas II and his family in Russia. Later it was a Rothschild agent, Robert Whaley-Cohen, president of British Shell Oil, a Rothschild holding, who offered a destitute Winston Churchill 50,000 pounds and a cottage on a Rothschild estate in 1936, grooming him thereafter to be their warmongering prime minister against Adolf Hitler and National Socialist Germany. Why?

Hitler had instituted an international system of barter exchange that excised Jewish bankers such as the Rothschilds from providing loans for international exchange, threatening the entire Rothschild plan for world domination.

Hitler also imprisoned five Rothschilds starting soon after the Anschluss re-unification of Germany and Austria in the spring of 1938, first arresting Louis Rothschild of the Vienna branch of the Rothschild empire, and confiscating the assets of this bank for the nations and peoples of Germany and Austria, from which they had largely been stolen. The Rothschilds, however, had more of their enormous wealth secure in Britain, France and elsewhere. [See "Hitler Against the Rothschilds," TBR, September/October 2021.—Ed.]

Even before that, the Rothschilds of Britain and France owned one of the seven out of eight Jewish banking family dynasties that established the Federal Reserve in the United States in 1913. At the time, the Rothschilds had intermarried among most of the other banking families. The Federal Reserve system funneled more wealth to the Rothschilds and their extended family members than it is possible to calculate.

This occurred after the period Mr. Patrick claims the Rothschilds' fortune and power were in decline. The Rothschild stake in the Federal Reserve grift was far from their only central bank operation, as they already had the Bank of "England," and they went on to establish more throughout Europe and the world. So, not only did the Rothschilds' wealth and power not decline after the fall of the aristocracies, the Rothschilds themselves participated in the displacement of the aristocracies, the establishment of the "democracies," and the expansion of their profiteering on the new forms of government.

Adolf Hitler and the National Socialist Germans were the glaring exception. This was the main reason the Rothschilds enlisted much of the world against this threat to their plans for national financial debt peonage and, finally, absolute global domination.

It looks today as if the Rothschilds and their inter-married Jewish banking clan is more wealthy and powerful than

Continued on page 78

Continued from page 77

ever. I have yet to mention how Rothschild Inc., led by Wilbur Ross, who is also Jewish, bailed out a bankrupt Donald Trump in the 1990s as a "troubled asset," then, similar to Churchill, groomed him to be their future president on behalf of international Jewish banking, Goldman Sachs and Israel. Streets in Israel are named after Rothschilds. They provided the money for the Jewish Land Fund that bought land from under Palestinians to pre-establish settlements exclusively for Jews in the region.

Mr. Patrick references a book sold by TBR titled *Five Men of Frankfurt* by Jewish author Marcus Eli Ravage as his source for the claim of Rothschild wealth and power decline. I find I cannot trust such a Jewish author on these matters. I believe it is more likely he is more loyal historically to his wealthy kinsmen, not to honest history.

I have a copy of that book published by Ostara Publications—an impeccable source for hard-to-find books—and sold by TBR, but have not had time to read it yet. But, given what else I know about Rothschild wealth and power today, I expect I will find it strategically obscuring and possibly whitewashing the Rothschilds. The same can be said many times about Niall Ferguson's books on the subject.

CONSPIRACY THEORIES

When I was a young man, an "old guy" turned me on to *American Free Press* (AFP) newspaper and The Barnes Review. I used to visit the AFP offices in D.C. every year during the Pro-Life March. The "old guy" gave me many issues and books. Now I am the "old guy"!

Recently, when getting a coffee here in "Marxachusetts," I overheard a young couple speaking about conspiracy theories. I told them that almost all the things I had been told over the years that were alleged to be untrustworthy conspiracies turned out to be true. I suggested they read G. Edward Griffin's *The Creature From Jekyll Island: A Second Look at the Federal Reserve*. I told them there is a connection to our beautiful New England island home. The main bridge is named after A. Piatt Andrew, a former Harvard professor whose favorite student was Franklin Delano Roosevelt.

Tony Puccio
Massachusetts

EYE-OPENING ISSUE

The May/June 2023 edition of The Barnes Review was the best issue I've read since I began subscribing. Every article was top-notch and worth a read—even the letters section and the ads were compelling.

John Wear's article on Julius Streicher was an eye-opener. I never knew the man's history before. I could say the same about Lt. Gen. Anton Dostler in Marc Roland's piece about Operation Ginny. What a sad end for a disciplined and professional officer. The photo of Dostler in uniform while receiving the Last Rites just before his execution is remarkable.

Another priceless photo that caught my eye was the one of George Lincoln Rockwell confronting Martin Luther King Jr. on page 23.

John Friend's article on the "mass graves" hoax that took place in Canada is exceedingly well-written. Talk about fake news. That article needs to be read alongside Rémi Tremblay's "Truth and Reconciliation" and the "True History of Canada's Christian Martyrs." While baseless lies are spread by the media about non-existent mass graves at Catholic schools, Tremblay's article details the truth regarding Canada's Christian history and the enormous sacrifices made by the heroic and honorable men who gave their lives to save the souls of the very people who murdered them.

Finally, I always read the "Letters" section of every issue and thoroughly enjoyed the contributions made by David Lang and David L. Vise. Also, Vise's extraordinary, lengthy follow-up letter, which appears on TBR's website—www.BarnesReview.com—made its point. It's a marvelous recitation of little-known facts concerning the Catholic Church. I urge everyone to read it.

Mike Mains
Via email

[That 3,200-word missive from Mr. Vise was too long to include as a letter, so the editors decided to run it on our website where length in not a concern. However, we must admit, we have completely broken our longstanding rule that letters must not be more than 300 words to be published unedited. Hence the reason our "Letters" section has been expanded to five pages for this September/October issue.—Ed.]

THE FIRST 1,000 YEARS

Anno Domini: A Short History of the First Millennium A.D.: An Experiment in Chronological Revisionism by Laurent Guyenot was released March 2023 and is available on Amazon.com. I just finished reading this 175-page book. It surveys and highlights the work of various archeologists and skeptical historians who question the official chronology of the first 1,000 years of the Christian era. It is an intriguing read that makes the reader think and question: "How do we know what we think we know about the first millennium?" This might be a topic of interest to some TBR readers. I do not know if TBR has ever touched on the issue of first millennium chronology.

Perhaps, someone on the TBR staff might want to take a look at this book and possibly note this work in a future edition?

WILL WE EVER LEARN?

Contrary to popular religious opinion and propaganda, Christianity is—at best—only partially of Jewish offspring. While we often hear of "Judeo-Christianity," the fact of the matter is that there are profound differences between the two religions.

Even today, Jews believe in *Lex Talionis*, or "eye-for-an-eye" justice. With New Testament Christians the moral touchstone is to "turn the other cheek" (Matthew 5:39) and practice forgiveness when it comes to interpersonal justice.

Furthermore, the main text of modern rabbinic Judaism is the Talmud (not the Torah) which instructs Jews that they are a Chosen People, a literal "master race," and that all other races are sub-human and were put on Earth to serve them. They also believe that they have manifest destiny over the land of Palestine.

Finally, modern Jews are taught to believe that Jesus was a contemptible heretic and is boiling in excrement in an unredeemable purgatory for turning away from Judaism. Try telling this to a naive "Judeo-Christian." It should also

be added that the Talmud encourages Jews to lie to Gentiles about what the Talmud really espouses. If Gentiles knew what strict Judaism teaches covertly about Gentiles, non-Jews would be appalled that they are referred to as "Judeo-Christians."

Furthermore, most Jews are not taught to believe in an afterlife, hence their focus on success and achievement in this temporal life.

The bottom line is that the phrase "Judeo-Christian" is, at its root, a self-contradiction so that, going forward, Christians should only speak of the "Christian" moral and religious tradition.

Regarding famous Jewish butchers down through history, this would include, in the Torah, the religious sanctioned genocide against the Amorites (Deuteronomy 2:34) and Midianites (Numbers 31:17) as instructed by Moses as well as Moses's celebration of the murder of the first-born sons of ancient Egyptians now celebrated at Passover.

For the sake of brevity, to skip to the 20th century, this list would include Lavrenty Beria (Stalin's most influential and longest-serving police chief and leader of the NKVD), Lazar Kaganovich (overseer of the Holodomor), Leon Trotsky and Felix Dzerzhinsky (overseers of the Red Terror). Homicidal prime ministers of Israel include Menachem Begin, Ariel Sharon and Benjamin Netanyahu, to name but a few.

Do not forget the Israel-first neocon national security advisors to President George W. Bush. This included Richard Pearle, Paul Wolfowitz and Eliot Abrams. These neocons later publicly admitted that they manipulated the easily malleable Bush to invade Iraq, and convinced President Barack Obama to "intervene" in Libya using the U.S. military as Israel's willing proxy.

This resulted in the innocent deaths of millions of fellow Gentiles.

Currently, the United States is supporting Jewish Ukrainian President Volodymyr Zelensky—the man responsible for violating the Minsk Accords which precipitated the Russo-Ukrainian conflict. This stupid war has led to the needless deaths of hundreds of thousands of Christian soldiers.

Will we ever learn?

FAMILY VALUES

I have been debating for some time now whether to renew my subscription to TBR. One of the reasons is that you preach too much about religion and family values. Family values don't work. In addition, I cannot fathom that you believe Victor Thorn killed himself.

Christian Cureton
Texas

[I do believe family values are important. Just look what happens, for instance, to those children, White and Black, who do not have a father in the home. However, in reviewing past issues of TBR, I do not see where we have concentrated undue attention on family values. Some might say we should talk about the topic even more.

As for the suicide of prolific writer Victor Thorn, whose books *The Holocaust Hoax Exposed* and *The Hillary (and Bill)* trilogy, to name but four, were absolutely groundbreaking and surely made him many enemies, I will reveal here for the first time in print the last phone call I had with Victor.

In very late July 2016, Victor called to tell me how much he had enjoyed working with me at *American Free Press* and The Barnes Review. I jokingly replied that this sounded like some kind of a goodbye. He did not chuckle.

The conversation turned to a discussion of suicide. The husband of a friend of my mother's had recently killed himself by placing a pistol in his mouth and blowing his brains out, literally, in his study. His wife was traumatized by the scene. One can imagine what she found on the walls. Could she ever get that horrible image out of her mind?

I told him that if I were ever to contemplate suicide—which I assure you I won't as I have way too much work to complete, so much so that I doubt I can accomplish it all even if I were to live to be 100—I would take a bottle of pills. Nice and clean. No mess for the wife to clean up or images seared into the brain.

He replied and I quote: "I would blow my head off. That's a man's way out."

Shortly thereafter, that is exactly what happened.

Victor had his own cosmology. He believed that his life revolved around the number eight, and that several other prominent Americans also had lives that revolved around the number eight. One was Elvis Presley. Thorn was born in 1962 (6 + 2 = 8). Presley was born on January 8, 1935 (3 + 5 = 8). Both died on the eighth month of the year. In addition, reports are that Thorn was 54 when he died. He did die on his birthday, but he knew exactly at what time of the day he was going to turn 54. He killed himself when he was still 53 (5 + 3 = 8).

If you were to read some of his more esoteric books dealing with worldwide beliefs about the afterlife, you might gain some insight into Victor's own complicated religious beliefs.

In his mind, there was a "perfect time to die," and he had this planned long before any of us realized just how serious he was about his own unique cosmological theories.

There is a lot more, including assurances from his best friends and family members—those who knew him best—and a suicide note by his own hand.

You can accuse me of covering up a murder if you like or allege that the Clintons had him knocked off or Mossad hitmen assassinated him (he had certainly irritated the Zionist crowd with his books tying the events of 9/11 to the state of Israel), or that he killed himself for some other reason, perhaps to protect loved ones, but that does not jibe with what I know. Could I be wrong? Maybe.

But believe me: AFP and TBR could have made a mint claiming that Victor had been killed for books we had published. But I believe that is untrue.

For more, purchase a trilogy of Victor's writings I assembled myself to honor his life, his work and his legacy titled, simply, *Thorn*. TBR subscribers can purchase this entire 1,000-page three-volume set for $60 plus $8 S&H inside the U.S. at AmericanFreePress.net Purchase *Holocaust Hoax Exposed* from BarnesReview.com for $20 plus $5 S&H inside the U.S. A portion of the proceeds from the Holocaust book go to his son to whom Victor left all his copyright protections.—Paul Angel, Editor.]

Bringing History Into Accord With the Facts in the Tradition of Dr. Harry Elmer Barnes

THE BARNES REVIEW

A JOURNAL OF POLITICALLY INCORRECT HISTORY

VOLUME XXIX NUMBER 4 • JULY / AUGUST 2023 • WWW.BARNESREVIEW.COM

The 1934 French 'Insurrection'

Uncensored American History

Secret History of the Wild, Wild West: Outlaws, Secret Societies & the Hidden Agenda of the Elites

Drawing on his great-great-grandfather's secret diaries, Daniel J. Duke unravels the hidden history of the Wild West to expose the outlaws, politicians and secret societies who were pulling the strings from behind the scenes. He examines Jesse James's close ties with notorious outlaws like Johnny Ringo, Jesse Evans and Billy the Kid. He demonstrates how Jesse faked his own death and lived out his life under an alias, and how Billy the Kid did the same. He also details how both Jesse and Billy continued their work for a nameless organization after their faked deaths. Also explores how Jesse was related, by blood or marriage, to many powerful people including Lyndon Johnson and Harry Truman. Softcover, 208 pages, #944, **$17**.

War on the Border: Villa, Pershing, the Texas Rangers & an American Invasion

Jeff Guinn tells the riveting narrative of Pancho Villa's bloody raid on a U.S. border town that sparked a violent conflict with the United States. The "Punitive Expedition" was launched in retaliation under Gen. John J. Pershing and brought together the Army, National Guard and the Texas Rangers—who were little more than organized vigilantes at the time. Opposing this brigade was Pancho Villa, a guerrilla fighter who commanded a motley force of conscripts in Mexico. Curtiss Jenny airplanes did reconnaissance, another first. But, despite some bloody encounters, the expedition eventually withdrew without capturing Villa. Today, the U.S.-Mexico border remains as vexed and volatile as ever. Hardback, 368 pages, #941, **$28**.

American History Revised: 200 Startling Facts That Never Made It Into the Textbooks

Author Seymour Morris Jr. colorfully illustrates—via the 200 historical vignettes that make up this book—that much of our nation's past is quite different—and far more remarkable—than we thought. Though we do not necessarily agree 100% with every single conclusion contained in the 200 tales presented, it is loaded with enough REAL history to make it a very worthwhile gift for a history professor, student or free-thinking young scholar. Find out about: the biggest mistake the Ford Motor Co. ever made; why Eleanor Roosevelt opposed the Equal Rights Amendment, the No. 1 bestselling American book of all time that was written in one day; the bad investment the Dutch made when they bought Manhattan; how two young girls aimed to become first lady—and did; plus dozens more little-known facts about American history, many of which you may not know. Organized into 10 thematic chapters, the book plumbs American history's least-known and sometimes most shocking twists. Softcover, 432 pages, #950, **$20**.

The Spy Who Changed History: The Untold Story of How the Soviets Stole America's Top Secrets

Svetlana Lokhova takes us on a thrilling journey through Josef Stalin's most audacious intelligence operation. In September 1931, Soviet spy Stanislav Shumovsky walked off the SS *Europa* and into New York, concealed in a group of 65 Soviet students. Stalin had sent him to acquire U.S. secrets to help close the USSR's massive technology gap. The road to victory began in the classrooms and laboratories of MIT. Using information gleaned from this mission, the USSR transformed itself into a military powerhouse able to defeat Hitler's Germany. Later, other MIT-trained Soviet spies would acquire the secrets of the Manhattan Project. Lokhova pieces together every aspect of Shumovsky's life using American and Russian archives—and offers a lesson on how America's secrets get stolen. Hardback, 496 pages, #947, **$30**.

Sorry Mom, I was wrong about the Holocaust

The Trials & Tribulations of the Schaefer Siblings

By Monika Schaefer

In the early 1950s, Otto Schaefer and Editha Schmilinsky emigrated from Germany to Canada. They met, fell in love, married and soon had children. I am one of those children. My mother and father were proud of their heritage, though they were told again and again they should not be. Germans were brutes, warmongers and responsible for "the Holocaust." We children were also taught this in school. It was reiterated in every movie or TV program we saw. I wholeheartedly believed that our people were responsible for the greatest crimes in history. I said to my mother, "Why didn't you, your friends, your folk, your family, why didn't you do something to stop these bad things from happening? Stop Hitler and stop these death camps? You should have done something! You must have known!" My mother told me she didn't know. She added that nobody knew. They only learned about it afterwards. By the time I understood the nature of the post-war "re-education" program, my parents had passed away. I wrote a cathartic posthumous letter and made a short video entitled *Sorry Mom, I Was Wrong About the Holocaust*, as my research had definitively proven to my satisfaction that the real story about World War II, Adolf Hitler and the events we now know as "the Holocaust" did not match what we were taught in school. That video went viral and triggered a surreal odyssey that ended up with my brother Alfred and I spending years in German prisons for our thoughts and words. This book recounts that saga.

Softcover, 304 pages, #955, $25 minus 10% for TBR subscribers plus $5 S&H inside the U.S. from The Barnes Review, P.O. Box, 550, White Plains, MD 20695. Call 1-877-773-9077 toll free to charge, Mon.-Thu. 8-4 ET or order online at www.BarnesReview.com.

Race and Racial Differences: A Handbook for the 21st Century

How DNA Shapes Mankind Into Seven Major Races

The first honest, updated DNA/geneological study done on the human race in 50 years. With 64 photographs, 16 illustrations, seven maps, six tables, and 11 explanatory charts.

By Arthur Kemp B.A.

Race is real, it is biological in nature, and it is shaped and determined by genetics alone. This book is the first to conclusively show exactly how races are physically and psychologically shaped by individual genes.

Using data and references from dozens of highly reputable scientists and journals, this fully referenced work starts with an overview of the development of the study of race, from the earliest times up to the very latest advancements in DNA analysis.

From there, it provides a comprehensive yet easily understandable overview of how human DNA works, which is vital to any understanding of how genes, at a Single Nucleotide Polymorphism (SNP) level, are responsible for shaping individuals.

When large numbers of people share similar SNPs, they form distinct groups which manifest themselves as "races."

Human DNA is made up of three major components: Y-chromosomes, mtDNA (which is inherited unchanged through the male and female lines), and autosomal DNA. When these three components are plotted according to their geographic locations, they dramatically divide into seven distinct regions. Each region clusters according to genetic similarity—the classic definition of race.

This science of genetic clustering is used by all the "home DNA testing kit" companies to provide "ancestry and origin" results. It provides unequivocal proof of the biological existence of race, and definitively destroys any claims that race is a "social construct."

This work builds on the seven regions reality by probing deeper and revealing the exact genes and SNPs—by name and location in the chromosomes—which determine the physical differences we see before us as racial types.

Then the process whereby these genes are unequally distributed among the seven major regions is discussed—and how this differentiated genetic distribution has created different races.

In this way, the genes which are responsible for eye color, hair color, hair texture, skull shape, facial features, skeletal structure and, finally, psychology and intelligence are all individually named, leaving no doubt as to the genetic basis of race.

The seven different races are then named. Then, in a first for this century, these seven major races—and all their subgroups—are reviewed in an illustrated racial typology section which lays bare the vast genetic diversity of mankind.

Finally, the book ends with a definitive, fact-based refutation of the five major race-denial claims.

There is literally no other book on the topic of race like this in the world. It is a handbook on race, DNA, and racial typology for the 21st Century.

Softcover, 194 pages, #959, $22 minus 10% for TBR subscribers plus $5 S&H inside the United States from The Barnes Review, P.O. Box 550, White Plains, MD 20695. Call toll free at 1-877-773-9077 to charge, Mon.-Thu. 8-4 ET or purchase online at www.BarnesReview.com.

Ready for Some Real History?

THE BARNES REVIEW magazine is dedicated to bringing history into accord with the facts—facts most Americans are not getting …

REAL history is under attack. As you read this, fake history is being written by the minions of the "woke" elite in the same way they create fake news. Our once great heroes are now oppressors. The creators of Western civilization are genocidal colonizers. Our own Founding Fathers are reduced to no more than cruel and bigoted slavemasters. Worse, certain topics remain beyond the pale of discussion at all. This "new history" is a compulsory narrative, the very bedrock of politically correct Marxist propaganda. He who controls the present dictates the past—and the future. But there is a cure for this sickness.

In THE BARNES REVIEW (TBR) magazine, you get uncensored facts, free from the poison of political correctness. You'll see vignettes of man's history from the Paleolithic era to the present, explore ancient enigmas, learn about forgotten civilizations, get a view from "the other side" about our most costly wars and read insightful analyses of the momentous events that have shaped our world.

No cause is more important to the survival of civilization than the presentation of REAL history. Our purpose—to bring history into accord with the facts—was enunciated by our namesake, Dr. Harry Elmer Barnes. It was Barnes who began the crusade to accomplish this goal. And today, we need truth more than ever. Your subscription to TBR supports this vital work so we can help prevent the day when the purposeful distortion of history produces its certain result—the nightmarish mental tyranny dreamt of by George Orwell, a scenario now approaching fruition.

Subscribe to TBR today. One year inside the U.S. (six print issues) is $56; two years (12 print issues) are $88. Canada and Mexico are $75 per year. All other nations are $90 per year. We also have a PDF option. A one-year PDF subscription—*TBR Online*—is just $36 per year. Download the PDF on your electronic device anywhere in the world—a great option for foreign subscribers. You can also print the PDF issue at home if you prefer a hard copy. (Need email address for *TBR Online*.) To subscribe, write TBR, P.O. Box 550, White Plains, MD 20695 or call 1-877-773-9077 toll free, M.-Th. 8-4 ET, to charge. See also BarnesReview.com.

New Politically Incorrect Books on Southern Culture, History

The Honorable Cause: A Free South
Twelve Southern Essays

The Honorable Cause: A Free South is a collection of 12 essays written by pro-Southern and pro-secession activists. It places into context what it means to be "Southern" and why Southern identity is so important. It explores secession and how to achieve political and social liberation for the South. This book is intended to inspire emotion and thought. The authors want the reader to internalize the content and see a free and independent Dixie as the most honorable outcome for a unique people. *The Honorable Cause: A Free South* answers questions on our own terms and in our own way. Finally, it details how the South can achieve status as a nation-state, with a right of self-determination. Softcover, 301 pages, #988, *$25* minus 10% for TBR subscribers.

The Sequel to Appomattox:
A Chronicle of the Reunion of the States

By Walter Lynwood Fleming (1919)

When the armies of the Union and of the Confederacy were disbanded in 1865, there were still many problems that pressed for solution. The surviving Confederate soldiers came straggling back to their devastated homes. Everywhere they saw widows and orphans. They found property destroyed, the labor system disorganized, and the inhabitants suffering from want. They found the White people demoralized and the Blacks free, bewildered and disorderly. Organized government had lapsed with the surrender of the Confederate armies. Beneath a disorganized society lay a devastated land. The accumulated capital of the South had disappeared in worthless Confederate stocks, bonds and currency. The banks had failed. Two billion dollars invested in slaves was wiped out. Factories had been destroyed by Federal raiders or seized, sold or dismantled because they had furnished supplies to the Confederacy. Mining industries were paralyzed. It was months before courthouses, state capitols, and school buildings were again made available for normal use. How could all of this devastation be undone? Reprint. Softcover, 322 pages, #989, *$21* minus 10% for TBR subscribers.

Ousting the Carpetbaggers from South Carolina

By Henry Tazewell Thompson (1926)

South Carolina had been stigmatized as "the nest wherein was hatched the snake of Secession," and it was the purpose of Reconstruction to mete out retribution upon her people and to ensure victory for the radical portion of the Republican Party. Thus, at the point of the bayonet, a condition developed without parallel in history—the best and noblest citizens of the state were subjugated to a position of inferiority to their former slaves. This book is a history of the political revolution of 1876 in which South Carolinians, led by Gen. Wade Hampton and his Redshirts, united to throw off the oppressive yoke of "Carpetbagger" government and halt unquenchable Black revenge. Reprint. Softcover, 182 pages, #990, *$21* minus 10% for TBR subscribers.

Ordering from TBR: TBR subscribers may take 10% off prices above. Prices do not include shipping: Inside the U.S. add $5 on orders up to $50. Add $10 on orders from $50.01 to $100. Add $15 on orders from $100.01 to $200. Add $20 on orders from $200.01 to $300. Over $300, email Sales@BarnesReview.org for best S&H rates or for foreign S&H. Order from TBR, P.O. Box 550, White Plains, MD 20695. Call TBR toll free at 1-877-773-9077 to charge, Mon.-Thu., 8-4 ET. You may also purchase at TBR's online bookstore: www.BarnesReview.com.

Books Canceled by Ingram Publishing But Available from TBR Book Club

Communism in Germany! The Truth About the Communist Conspiracy

By Adolf Ehrt. This work shows that the Communist conspiracy to create a 1918-style Bolshevik Revolution in Germany was far advanced. Bombings, assassinations and a planned list of murders and street violence were already under way when the Reichstag arson took place. Shocking statistics. Softcover, 179 pages, #700, *$20.*

Hitler's Second Book: German Foreign Policy

Often called Hitler's "Secret Book," this is the only full-length, completely unedited and correctly translated text of Hitler's second book, written to explain National Socialist foreign policy. Dictated in 1928 to Max Annan. Within these pages the reader will find the philosophical principles that underwrote German domestic and foreign policy, and predictions by Hitler. Softcover, 200 pages, indexed, #732, *$21.*

Behind Communism—1917-2020

By Frank L. Britton. Fully revised, expanded and updated from the original 1952 book, this work clearly shows that Communism grew out of Russian Judaism. Although the Soviet Union has disappeared, the ideology that underpinned that state—state-engineered economic and social egalitarianism—lives on, and is stronger than ever before in the West. Now completely updated to include postwar Communist movements in eastern Europe, Britain, America, South Africa and China, this book is the most detailed record yet of the Jewish role in Communism. Softcover, 237 pages, #632, *$25.*

Jewish Domination of Weimar Germany

By Eckhart Verlag and Francis Dupont. This was the National Socialist government's first English-language attempt to explain the rationale behind their legislative moves to restrict Jewish influence in Germany after 1933. Using official pre-Nazi-era demographics, this work showed that Jews were massively over-represented in all fields of German social and economic life—except farming and creative work. It lists the ownership of mass media, the astonishing financial and political subversion, degenerate theater, sexual psychology, Communist indoctrination etc. Softcover, 96 pages, #670, *$14.*

Germany's Hitler: The Only Authorized Biography

By Heinz A. Heinz. Here is the 1938 biography of Adolf Hitler—one of the most suppressed English-language books ever to emerge from Germany! Included are vivid and unique descriptions of Hitler at school, his World War I battlefield experiences, early politics, the November 9 Putsch, Hitler in prison, and the struggle to power from 1926 to 1933. It ends just after the Austrian Anschluss and the end of the Czech/Sudeten crisis. Softcover, all original illustrations, 234 pages, #747, *$22.*

Perpetual War for Perpetual Peace

Subtitle: *A Critical Examination of the Foreign Policy of Franklin Delano Roosevelt and Its Aftermath.* Edited by Harry Elmer Barnes. Details the methods used to suppress historians who dare to discuss the instigators of world events. Reveals how the betrayal of Wilson's Fourteen Points and the 1918 Armistice laid the basis for World War II. Details FDR's anti-German policy in Europe and his unsuccessful efforts to enter the war through the "front door." Discusses FDR's rejection of all Japanese peace overtures and of how he goaded them into attacking Pearl Harbor. Shows that Gen. Walter Short and Adm. Husband Kimmel were blameless. Softcover, 577 pages, #652, *$35.*

The International Jew: The Full Unexpurgated Version—2 Book Set

This new two-book set contains all four volumes of the original *International Jew* and is the only complete set of all 80 unexpurgated articles published by Henry Ford in *The Dearborn Independent.* The 80 articles were later republished in book form but were severely redacted. At last, the full version of Ford's groundbreaking study is available again and contains all the content and prefaces. Book 1 contains Volume I: The International Jew—The World's Foremost Problem, and Volume II: Jewish Activities in the United States. Book 2 contains Volume III: Jewish Influence in American Life and Volume IV: Aspects of Jewish Power in the United States. Book 1: Softcover, 413 pages, #977, *$35.* Book 2: Softcover, 396 pages, #978, *$35.*

GET THE FULL TWO-BOOK SET for just $60. Item #987.

Unsolved Mysteries of the Past Explained

The Man in the Iron Mask: The True Story of Europe's Most Famous Prisoner

By Josephine Wilkinson. Here's a thrilling adventure story, a glamorous and all-powerful king, ambitious ministers, a cruel and despotic jailor, dark and sinister dungeons—and a secret prisoner who actually existed. It is easy to forget that this story, made famous by Alexandre Dumas, is that of a real person, Eustache Dauger, who spent more than 30 years in the prisons of Louis XIV. This is the true story of this mystery man and his journey through four prisons and decades of time. It details those who shared his imprisonment, his jailers, those who decided his fate—and why they viewed him as a threat. We see what life was like for state prisoners, why this man was arrested and why his story would become one of France's most intriguing legends. Hardback, 352 pages, #945, **$29**.

Patriot or Traitor: The Life and Death of Sir Walter Ralegh

Sir Walter Ralegh—heroic, courageous, gifted, grasping, a poet, politician and spy, an explorer, dreamer and schemer, an iconic Renaissance man—lived an amazing life. He rose to become Queen Elizabeth's favorite, only to be charged with treason by her successor. Less than a year after the death of Elizabeth I, Ralegh was in the Tower of London, watching as the scene was set for his own execution. *Patriot or Traitor* tells the dramatic story of his rise and fall. It is a beautifully written and researched biography. Here is a fresh perspective on one of the most colorful and controversial characters of his age. Historian Anna Beer brings Ralegh to life as never before with colorful detail and astute interpretation as we follow Ralegh's dramatic rise and disastrous fall. Softcover, 336 pages, #946, **$18**.

America Before: The Key to Earth's Lost Civilization

Was an advanced civilization lost to history in the global cataclysm that ended the last Ice Age? Bestselling author Graham Hancock has made it his life's work to find out. Hancock draws on the latest archaeological and DNA evidence to bring his quest to a stunning conclusion—one that could change the timeline of history. We've been taught that North and South America were empty of humans until around 13,000 years ago. New discoveries have radically reshaped this stale narrative. We now know that the Americas were peopled more than 130,000 years ago. Hancock's research takes us on a scientific journey from the Mississippi Valley to the Amazon rainforest and reveals that ancient "New World" cultures share a legacy of advanced knowledge and spiritual beliefs with supposedly unconnected "Old World" cultures. Have archaeologists focused for too long only on the Old World in their search for the origins of civilization? Hancock offers compelling proof from across the Americas that will make you wonder. Softcover, 608 pages, #949, **$20**.

Survivors of Atlantis: Their Impact on World Culture

Ancient Indian tradition speaks of fair-skinned mariners who "dug out the shiny bones" of the Earth Mother. Plato, meanwhile, recorded that "Atlanteans" had an exceptionally high grade of copper no longer available in his time. Author Frank Joseph argues that the real copper miners were survivors of a great cataclysm and that the destruction of an advanced ancient culture by war and natural causes brought about the end of the Bronze Age. Survivors dispersed from their former empire into Europe, the Near East and North and South America. S*urvivors of Atlantis* provides an in-depth study of the four great cosmic catastrophes and how this quartet of natural disasters was followed by mass migrations recorded by the Incas, Kelts, Greeks and Aztecs. Where science meets mythology, a common thread is exposed: the legendary Atlantis. Softcover, 280 pages, #943, **$16**.

Bringing History Into Accord With the Facts in the Tradition of Dr. Harry Elmer Barnes

THE BARNES REVIEW

A JOURNAL OF POLITICALLY INCORRECT HISTORY

July / August 2023 ❖ Volume XXIX ❖ Number 4

Table of Contents

1934: French Patriots Challenge Corrupt Rulers

By Rémi Tremblay

4 In the disillusionment following World War I, numerous patriotic and nationalist leagues arose in France to provide a sense of meaning and purpose for its members. A series of financial scandals and the revelation of brazen public corruption brought them to the streets of Paris in early February 1934, offering eerie parallels to the massive protests on January 6, 2021 at the U.S. Capitol.

The Plutocrats Behind the Subversion of the Early U.S.A.

By John Friend

16 A centralized banking system, culminating in the establishment of the Federal Reserve in 1913, paved the way for the economic and financial subversion of the fledgling United States. Long prior to that, plutocratic and monopolistic economic forces had already placed themselves in a position to dominate the newly created federal government, as outlined by TBR Assistant Editor John Friend.

Reflections on the Founders and the American Spirit

By John Friend

20 America's Founding Fathers risked it all to resist British tyranny and establish a constitutional republic for themselves and their posterity. What would they say about contemporary American society? How would they view modern American politics and political leaders? Would they be proud or embarrassed?

National Socialism in America: From the 1980s to 2000

Part 3 by Karl Haemers

34 Author and researcher Karl Haemers continues his series on National Socialism in America by analyzing the prominent individuals and organizations active in the 1980s up until the early 2000s, culminating with the death of Dr. William Luther Pierce in 2002. This is part three of four on this subject.

American Support for Stalin Before World War II

By John Wear, J.D.

46 Unknown to most Americans, the U.S. government, American corporations and major banking interests played a critical role in supporting and funding Soviet dictator Josef Stalin prior to WWII. Why would the United States, a purported "leader of the free world," support the world's leading Communist regime and such a ruthless dictator?

American Support for Stalin During & After WWII

By John Wear, J.D.

50 The seemingly endless flow of American financial, industrial and military aid to the Soviet Union was a critical factor allowing Josef Stalin's Red Army to defeat Adolf Hitler's National Socialists. U.S. aid, known as the lend-lease program, paved the way for a Communist victory over Germany—and much of Europe and Central Asia.

Tom Quick: Indian Slayer

By James E. Quinlan

58 TBR is proud to introduce a new two-volume book set examining the life and times of Tom Quick, the notorious "Indian Slayer" of American historical lore. This fascinating 830-page anthology is a must-have in any American history buff's library. Here, we excerpt author James E. Quinlan's recounting of the early life of this real-life pioneer.

Great Zimbabwe: Was It a Bantu Citadel or Something Else?

By Frank Joseph

64 Rumors abound—and have for a century or more—as to the origins of Great Zimbabwe, an impressive stone structure in southeast Africa often described as resembling a medieval castle or fort in Europe. Historian Frank Joseph makes a convincing case that the ancient seafaring Picts of Scotland were probably the actual builders of the structure, not the primitive Bantus who are credited with its creation.

PERSONAL FROM THE EDITOR

Pushed to the Brink

It seems the investigation into the January 6, 2021 protests at the U.S. Capitol will never end. Every week we hear news that one or another granny is being hunted down by agents of the FBI for participation in the "insurrection" they allege occurred that day. For the most part, this entire investigation is nothing more than an attempt to hoodwink the American public into believing something grievously serious occurred that day, and that the patriots who entered the Capitol—many of them ushered in by guards—were hell-bent on overthrowing the U.S. government. It's baloney.

The fact is, many of them were there not only to protest the questionable outcome of the 2020 presidential election, but also because they were gravely concerned about the direction of the country. These people were not stupid. They knew that the defeat of Donald Trump meant they would have to endure four years of unceasing climate change propaganda; four years of inflation due to massive spending programs paid for with imaginary money from empty coffers; four years of incessant harping on the normalcy of sex-change operations for kids; four more years of a genocidal war in Ukraine; four years of officially exaggerating "White supremacy" as the No. 1 threat to the nation; four years of expanding anti-White discrimination; four years of political censorship for conservatives; four years of radical liberal rule; etc., etc., ad nauseam. In short, they knew what was coming, and their presence in D.C. that day was not all about Trump's "Stop the Steal" rhetoric. It was their warning to us.

This wasn't the first time in history that a populace felt it was being drowned by a rising tide of dangerous left-wing policies. We could name dozens of other historical instances. But let's flash back to France, February 6, 1934. The optimism felt by millions of Frenchmen after World War I was dissipating. A far-left government, riddled with corruption, was in power. A financial crisis—enabled by brazenly crooked politicians—cost millions of small investors their life savings. Worst of all, no one in government was accepting responsibility for any of it.

Frustrated beyond belief, French citizens formed leagues on both the left and right of the political spectrum. On that day, they marched in huge numbers through the center of Paris.

But the tyrannical French government was not sympathetic. Before the crowd grew too large, French police and military began shooting at the fed-up marchers. Dozens were killed and over 1,400 more wounded in the bloodbath. In the end, the massacre did force the leftist French leader to step down.Unfortunately, he was replaced by yet another of his ilk.

The events of January 6, 2021 and February 6, 1934 do bear much in common. See our lead story starting on page 4 for Rémi Tremblay's analysis of their parallels. ❖

—Paul Angel, Executive Editor

On the cover: A French propaganda poster calls attention to the heavy-handed reaction of the French government to the 1934 protests. The original caption read: "These are the unarmed [military] veterans shouting: 'Down with thieves! Long live France!' that the Cartel has killed, February 6, 1934."

Has DeSantis Made TBR Illegal in Florida?

Until recently, we thought Florida Gov. Ron DeSantis might make a pretty good presidential candidate. Our optimism was tempered when the popular Republican governor proudly signed into law one of the most blatantly unconstitutional pieces of anti-free speech legislation we've ever seen: the so-called Public Nuisances bill. The legislation passed without a hitch in the GOP-dominated Florida legislature, and makes it a felony to hand out literature critical of any "protected group"—whether the information be truthful or not. Such literature might possibly "offend" someone, and the governor just can't condone that.

The Anti-Defamation League (ADL) alleges this bill was particularly needed in Florida, as the Sunshine State "has the fourth-highest number of anti-Semitic incidents in the United States." The ADL says:

> From January 2020 to August 2022, the ADL Center on Extremism recorded over 400 instances of White supremacist propaganda distribution in Florida. The overwhelming majority of these incidents involved the White supremacist groups Patriot Front and the New Jersey European Heritage Association. Ninety-five of these incidents included anti-Semitic language or symbols, targeted Jewish institutions or both. Propaganda allows extremists to disseminate hateful messages and gain attention with little risk of public exposure.

In essence, then, this entire bill was passed because some people distributed flyers that made some other people feel uncomfortable. That's a dangerous precedent.

And to bolster its claim that Florida is a White supremacist haven riddled with violent insurrectionists, the ADL continues its bogus January 6th narrative:

> Florida is home to the most people charged in relation to the January 6 insurrection. Of the 855 individuals charged in connection to the insurrection, 90 (10.5%) hail from the state of Florida.

The ADL ought to take a look at the January 6 videotapes to see the number of Blacks, Asians and Hispanics who were also at the Capitol that day to protest. The tapes belie the claim that those who participated were homogenously White or somehow "supremacist."

Back to the new "hate law" that DeSantis signed to raucous applause while in Israel on an international trade junket. The official bill synopsis says:

> Public Nuisances: Prohibits person from distributing onto private property any material for purpose of intimidating or threatening owner, resident or invitee; prohibits person from willfully and maliciously harassing, threatening or intimidating another person based on person's wearing or displaying of any indicia relating to any religious or ethnic heritage; requires violations be reported as hate crimes; prohibits display or projection of images onto building, structure or property without permission; prohibits person who willfully enters campus of state university or Florida College System institution for purpose of threatening or intimidating another person from remaining on such campus after being warned to depart.

In response, several TBR readers have called or emailed recently wondering if they could get into any trouble receiving The Barnes Review in Florida. The answer is "no." First of all, TBR is a history magazine that reports the truth about historical events. If there are any errors in the articles we print, critics need to detail them and submit them to us in writing. We are not afraid to discuss any topic—and we publish facts, not "hate."

Second, TBR is not doing the distributing in Florida. The U.S. Post Office is. But the relationship between the Post Office and the U.S. government is complicated. The Brookings Institute explains:

> The Second Continental Congress appointed Benjamin Franklin as the first postmaster general in 1775. The Post Office Department was created in 1792 and became a cabinet department in 1872.
>
> In 1971, Congress replaced the department with the United States Postal Service (USPS), an independent entity within the executive branch. The USPS is operated by a 11-person board of governors (which resembles the board of directors of a public corporation)—the postmaster general, his deputy, and nine governors appointed by the president and approved by the Senate for seven-year terms. The board appoints the postmaster general, who acts as the CEO.

So, until the USPS denies us the right to use their services—which would be an egregious violation of the First Amendment—TBR is completely legal to receive in the state of Florida, and every other state in the union.

Note, you could get into trouble if you stood on the grounds of a house of worship and berated attendees for their religious preferences, symbols, garb, hair styles, etc.—and threw copies of TBR at them. But you wouldn't do that, would you? We don't think so.

Troublingly, DeSantis and other history-challenged politicians have voiced strong disapproval of any materials that allege details of the Holocaust have been exaggerated or describe Israel as a racist, apartheid state.

If DeSantis only knew: There was more freedom of speech in Hitler's Germany than some people have in the state of Florida—and the U.S.—right now. ❖

—Paul Angel, Executive Editor

February 6, 1934:
French patriots rise up against corruption

An overview of the chaotic, largely unorganized right-wing demonstrations in Paris that have some parallels with the much ballyhooed "insurrection" that took place in Washington, D.C. on January 6, 2021. Both protests culminated after patriotic portions of the population gathered to voice their opposition to brazen government corruption, scandals and general public disillusionment and distrust of the ruling regime.

By Rémi Tremblay

For those familiar with French history, it was impossible not to have noticed a parallel between the events that took place on January 6, 2021, in Washington, D.C., and the anti-government riots that shook Paris on February 6, 1934. While the date has remained iconic for most French nationalists, very few English-speaking historians have taken an interest in the uprising that could have resulted in a coup d'état, had it been properly planned.

CONTEXT

Less than 15 years after the end of World War I, the wounds inflicted on society by that disaster were still festering. The dreams of a better, fairer system had failed and the promises of a saner world had proven to be fallacious. The war that had been presented and promoted as the "war to end all wars" was in reality a senseless butchery for which millions of Europeans had been sacrificed.

In France, the years of naive joy and excitement that had followed the bloodbath came to an abrupt end in 1931, as the economic crisis that had started two years earlier in America violently hit the old continent. In 1933, contrasted with the previous decade of affluence and carelessness, the situation was bleak. France had about 300,000 unemployed. Farmers were selling their crops at a loss.[1] Countless businesses in many different industries and sectors of the economy had to file for bankruptcy.

ALEXANDRE STAVISKY
Swindler triggered crisis.

In this context, the Radicals of Gaston Doumergue seized power, capitalizing on the people's resentment and hopes. Doumergue had the capacity to appeal to the public, but he had no actual plan of action. His objective had been to take power but, once he had gotten it, he did nothing to improve the lot of the people.

The situation was worsened by the accession of Adolf Hitler to power in Germany in 1933. Determined to end the injustices of the Versailles Treaty, Hitler suspended German payments to France, weakening the French economy even more.[2]

As a result of those combined circumstances, the working classes experienced harsh conditions that contrasted with the frivolity of the previous decade. Just like Germany's Weimar Republic, the economic crisis was coupled with a political and moral crisis. The government was considered weak and corrupt. Most people had very little respect for their ruling elite, seen as made up of senile incompetents. The fascist temptation was not so distant: on the other side of the border, governments of able men were being set up by those who had the courage to embrace their destiny and devote their efforts to getting their nations turned around.

It is in this context of social instability that the Stavisky scandal erupted. At the center of this financial scam, we find the mysterious "Mr. Alexandre," a Jewish Ukrainian whose real

Mounted French police charge protesters in order to subdue the crowds in front of the Bourbon Palace on the Place de la Concorde in Paris on February 6, 1934. The authorities showed no mercy. Before the protests were over, police panicked and fired into the crowd, enraging the protesters who fought back with whatever they could find—rocks, bottles etc. By the riot's end, 26 were dead and 1,435 injured.

name was Serge Alexandre Stavisky. This crook had been backed by multiple powerful politicians and was thus able to continue his scams with impunity, thanks to the protection of these friends. The straw that broke the camel's back occurred when this con artist sold 240 million francs' worth of fake bonds. The city of Bayonne had officially backed Stavisky with the sum of 40 million francs, which gave him the opportunity to embezzle the sum of 200 million francs.

These bonds had been promoted by prominent politicians—including Camille Chautemps, a member of the Radical Socialist Party and three-time premier—who never dared to question the soundness of the investment. [In 1934, Chautemps resigned the premiership after accusations of complicity in the Stavisky affair.—Ed.]

In fact, the list of Stavisky's powerful friends and supporters reads like a "who's who" of prominent French politicians.[3]

Several had seen the bond deal for what is was—a scam—but the scandal had been buried and the whistleblowers muzzled.[4]

Mayor Joseph Garat of Bayonne was directly involved in the scheme that eventually ruined countless small investors. When the truth of the swindle finally became public, the outrage was proportionate to the sums Stavisky had stolen. To add to the general outrage, Stavisky—allegedly—committed suicide on January 8, 1934 while being chased by the police, thus ending the prosecution against him. His accomplices were thus able to escape justice and any punishment. The people never got justice, nor the truth.

THE RIGHT MOVES

The first organization to officially react was the then-powerful League of French Action (*Ligue d'Action française*), led by Charles Maurras, a leading French conservative, monarchist philosopher and politician. After the first revelations about the scandal, the young members of the league hit the streets and organized daily demonstrations at the Palais Bourbon and around the House of Commons, the heart of the government in Paris.[5]

In the opinion of Léon Daudet, a renowned author and an influential member of the league, Stavisky had not killed himself, but had been murdered to ensure he would not reveal the government's dirty secrets. That idea, shared by Maurras himself, was

Communism in Germany!

The Truth About the Communist Conspiracy on the Eve of the National Revolution

By Adolf Ehrt. Contrary to postwar propaganda, it was not the Nazis who terrorized Germany prior to 1933, but the far left. This book, based on original police case files, shows how the far left and their Socialist Party allies waged a campaign of violence, terrorism, armed uprising, forgery, subversion, and espionage from 1918 to 1933. It was the left's violent attacks on ordinary Germans that forced the Nazis to develop their self-defense units, the Brownshirts—who are nowadays falsely portrayed as the aggressors. This illustrated work shows that the Communist conspiracy to create a 1918-style Bolshevik revolution in Germany was very far advanced. Bombings, assassinations, and a planned list of murders and street violence were already underway when the Reichstag arson—also now commonly falsely attributed to the Nazis—took place as part of their plan to create a Soviet Germany. A fascinating study of an important period in history which definitively exposes the lies of postwar propagandists. Softcover, 179 pages, #700, $20. Softcover, 179 pages, #700, ***$20*** minus 10% for TBR subscribers plus $5 S&H inside the U.S. from TBR, P.O. Box 550, White Plains, MD 20695. Call 1-877-773-9077 toll free to charge, Mon.-Thu. 8-4. You may also purchase at www.BarnesReview.com.

widespread among most rightwingers in France at the time. The left, too, shared that impression. The Communist paper *L'Humanité* wrote that French President Edouard Daladier was helping Stavisky's accomplices, while *L'Écho de Paris* forecast nothing less than a revolution.

Maurras agreed with this latter statement and saw the whole episode as proof of the incompetence of the republic. On January 11, 1934, he wrote: "We are determined to fight. Not with words [but] with bullets that know their aims and will not miss their targets."[6]

Still, the various factions comprising the right were far from united, at least at the upper levels. Most rank-and-file members of the several prominent right-wing groups and organizations were enthused and willing to fight side-by-side with comrades from other factions, but their leaders were reluctant to merge to create a common battlefront. They were more interested in their powerful and lucrative positions than in overthrowing the system that was enriching them.

Interestingly, the same problem prevailed with the leagues of pre-WWI, including the Patriots League (*Ligue des patriotes*, 1882), the League of the French Fatherland (*Ligue de la patrie française*, 1898) and the Anti-Semitic League (*Ligue antisémitique*, 1889), that never managed to build a united front despite their ideological affinities.[7] The groups were famous for petty infighting, a common theme in right-wing politics.

Already, several activists from the Patriot Youth League (*Ligue des Jeunesses Patriotes*), French Solidarity (*Solidarité française*) and veteran organizations had joined ranks and were taking part in the demonstrations organized by the League of French Action. The only exception was Firecross (*Croix de Feu*), as its leader, Col. François de La Rocque, had strictly forbidden his followers to do so[8] as he judged the outburst "childish and meaningless."[9]

Still, many defied his orders and participated on their own initiative.[10] Those caught doing so were sometimes expelled from Firecross as a punishment.[11] La Rocque wanted to remain the sole leader of his troops and preferred organizing his own meetings against corruption than take part in the League of French Action's large-scale demonstrations.

The demonstrations, which grew in popularity and intensity, sometimes gathered a few thousand league members willing to clash with the police. Tensions rose to the point that the government was starting to contemplate the possibility of censoring the French Action's press organ to muzzle dissent.

OPPOSITION GALVANIZED

However, on January 20, 1934, a new scandal erupted. Minister of Justice Eugène Raynaldy was caught participating in yet another outrageous financial scam. A week later, more than 100,000 citizens joined the French Action. This forced Raynaldy and president of the Council Chautemps to resign.[12]

While many were satisfied to see some powerful politicians finally paying for their crimes, for most, however, this was but the tip of the iceberg. They knew the corruption involved larger players, still yet to be caught.

Deeply shaken, the government knew that unrest could not be tamed by a few resignations. Sooner or later, it would fall. On February 3, 1934, in a strategic move, the government decided to fire Police Chief Jean Chiappe, considered to be close, if not sympathetic, to the league.[13]

The only way President Daladier could stay in office was by forceful repression—and he needed loyal bureaucrats to do that. As the French saying goes: "The republic does not govern well, but knows how to defend itself." Seeing the time was right, the opposition leaders started making plans. They knew this growing turmoil could lead to something much bigger.

On February 5, Firecross announced a mass rally during President Daladier's inauguration speech scheduled for the following day. The group

French protesters on February 6, 1934: Thousands of French citizens—most politically right-leaning—came together in Paris to protest the failings of the corrupt left-wing government headed by Camille Chautemps, who resigned before the riots reached their peak. He was succeeded by Edouard Daladier, also a member of the Radical Party. Daladier resigned in late January. He was eventually replaced by former President Gaston Doumergue, a Radical Republican. The impetus for the public unrest was a succession of political and financial scandals that rocked France in the early 1930s.

French Solidarity printed thousands of flyers and distributed them across Paris. Citizens received the following message on the flyer: "The nation is endangered. Here is the moment we have been waiting for, the moment of the National Revolution."[14]

Tension and excitement grew. Parisians knew that February 6 would go down in French history as a major turning point. What exactly was going to happen next was not exactly clear, but everyone agreed that something momentous was about to happen.

On the government's side, the conclusions were similar: February 6 could be a very real threat. In response, the authorities flooded the capital city. Soldiers, armed policemen and mobile guards were posted everywhere. Armored cars blocked the streets leading to the French parliament and policemen erected blockades. They were ready for an impending clash.

Still, these measures would not deter the demonstrators, who considered themselves justified in demanding the end of this unworthy republic.[15] The government's blatant show of force was an insulting provocation, as well as an admission of the system's own weakness.

PROTESTERS RALLY

Despite the many measures aimed at limiting access to the square, the Place de la Concorde, close to the House of Commons, was soon overtaken by an ever-increasing and quite diverse crowd of people from the left and right. There were members of the political party The Call of the People, ideologically inspired by Napoléon Bonaparte, the National Association of Fighting Officers (*Association nationale des officiers combattants*) and others from the various leagues such as Firecross, the League of French Action, French Solidarity, the Patriotic Youth League, the National Union of Fighters (*Union nationale des combattants)* and other conservatives.

But there were also left-wing activists who shared the right's justified anger. Interestingly, no Fascist groups took part in the events except on an individual basis. Marcel Bucard, leader of the French Fascists, wanted to avoid his organization being associated with the reactionary movements or considered yet another right-wing league.

However, some league members, like Lucien Rebatet and Robert Brasillach, who participated in the demonstration and riot, later became Fascists themselves.

For Marcel Déat, then a staunch Socialist who later became a Fascist leader and founding member of the National Popular Rally, the massive crowd was mostly composed of unaffiliated citizens who were just fed up with corruption and the politicians involved with it.[16]

At 5 p.m., taking heed of the number of demonstrators, policemen decided to block the bridge leading to the House of Commons. Officers

The Civil War in France

The Paris Communist Uprising of 1871

A gripping account of the infamous and short-lived 1871 "Paris Commune," or Communist uprising, in France's capital city, written by the founder of Communism. Karl Marx's book was one of the first written to discuss the impact of the commune, which briefly ruled Paris from March 18 until May 28, 1871. Acting as a lightning rod for socialist radicals, the commune quickly dissolved into the usual "dictatorship of the proletariat" and began stripping away civil liberties and creating state enforcement agencies to enforce the ensuing terror. The "Decree on Hostages" made it legal to arrest, imprison and convict any critic of the state. Thousands were murdered in this manner. It is estimated that up to 20,000 people died during the short rule of the commune. Softcover, 146 pages, #849, *$15* minus 10% for TBR subscribers plus $5 S&H inside the U.S. Order using the form on page 80 and send to TBR, P.O. Box 550, White Plains, MD 20695. started pushing back the human mass toward the south of the square. Unfortunately, it should have become clear to onlookers and policemen that the protesters were actually prisoners of the square, squeezed between the police on one side and the flow of incoming protesters who were converging toward the demonstration from the other side. An hour after this first attempt to empty the Place de la Concorde, French cavalry moved into the crowd, welcomed by a hail of projectiles hurled by angry protesters.

By 7 p.m., things accelerated. Policemen claimed to have heard gunshots at the same time a huge column of Firecross members appeared on the other side of the Seine River, adding to the increasing mayhem. The veterans and their supporters, marching in complete silence and carrying a banner calling for a clean and honest France, had, according to some sources, received the order to take the House of Commons—one column entering through the front door and the other by the bridge.[17] This plan, however, never came to fruition.

Wishing to ease the tension, a delegation of right-wing city councilors agreed to go meet President Daladier to represent the people's complaints. This gesture off goodwill failed.

SHOTS FIRED

At 7:30 p.m., panicking under pressure, policemen started firing into the crowd without warning. People could have escaped the square if it had not been for the arrival at the other edge of the square of 1,500 members of French Solidarity who were joining the crowd, but also pushing toward the policemen. Their aim was to reach the bridge itself. The mass of demonstrators was thus further squeezed between the incoming men of French Solidarity and the policemen on the other side.

In that chaotic series of events, men started falling in the crowd. Young right radicals and old veterans who had fought in Verdun fell on the pavement of the Place de la Concorde, shot to death by the French military and Paris's own police force.

Demonstrators had first thought the policemen were firing blank cartridges, but it was not the case. They were shooting to kill.[18]

The wounded were evacuated to a coffee shop where a doctor—who simply happened to be there at the right moment—started treating the victims. During the clash, the Ministry of Marine was set ablaze by protesters outraged by the shootings.

At the parliament, after hearing of the action of the police, MPs Lionel de Tastes and Georges Scapini erupted, shouting, "They are shooting on the crowd! Who ordered that?" Daladier simply lifted his shoulders and made a vague move of semi-denial.[19]

On the right side of the House of Commons came the yells of several representatives: "Resignation! Resignation!" Still, 360 MPs voted in favor of Daladier, while only 220 voted for impeachment.

Meanwhile, events outside continued to unfold. While many among the less combative retreated, the youth of French Action, who had been hardened by the skirmishes that had taken place in January, used hammers to break apart bricks in order to attack the policemen with these impromptu projectiles.[20]

At 8:45 p.m., 6,000 veterans from the National Union of Fighters marched onto the square, singing patriotic songs. The troops avoided any direct confrontation and left after a march through the Place de la Concorde, but, right after the disciplined battalion had departed, several veterans came back on their own and joined the crowd that was becoming rowdier, excited by the blood of the martyrs shed that day.

By 10 p.m., policemen had still not gained any ground. They decided to charge with their truncheons drawn, supported by a contingent of French cavalry. Sensing that the best defense is a good offense, several protesters decided to make for the bridge. A violent clash resulted.

Once again, police and military auxiliary forces decided to fire upon

the crowd to disperse them. Stopped by the bullets, the assault on the bridge ended in a bloodbath. The final police charge was yet to come.

Jean Ducrot left a precise testimony of the chaotic series of events:

> At 11:40 p.m. exactly, I saw the guards passing around loaves of bread and packages of cartridges. Some sat down to eat while the others lined up along the parapet facing the Cours la Reine, elbow to elbow, aiming calmly at the crowd swarming in front of them; they began to machine-gun them at will. Soon it was a rolling fire. Then the mobile guards, still with their revolvers in their hands, and the horsemen with their swords in their hands, launched themselves in pursuit of the fugitives.[21]

After emptying the square, a game of cat and mouse ensued through Paris between small groups of demonstrators and policemen. At that point, the policemen and mobile guards used their guns not to break the mass movements of the crowd but to shoot down their opponents in cold blood.[22] In many instances, rioters who were spotted by the authorities were simply gunned down.

The fight lasted until around 2:30 a.m. the following morning. At 3:30 a.m., the police and military finally returned to their barracks. They had "saved" the Third Republic.

There had been 100,000 men on the streets that night, demanding the corrupt profiteers in government step down. The protesters were treated like criminals and fired upon. In total, there were more than 1,435 wounded, with at least 26 league members and other civilians killed. Interestingly, none was carrying a weapon. One policeman died.

On the following day, police went to the houses of several league leaders to arrest them even if they had not been involved in the protest. On the second evening, thousands gathered in front of the House of Commons calling for the murderers to resign.[23] Clashes of smaller scale were nevertheless more violent as the demonstrators were prepared this time, some carrying firearms. A few died on that night, while hundreds more were wounded.[24] Louis Darquier de Pellepoix[25] later founded an association to defend the wounded.[26]

"He escaped German bullets. ...The Cartel's bullets didn't miss him!" reads the headline of this propaganda poster referencing the riots of February 6, 1934 from the National Republicans' Propaganda Center.

DISORGANIZED CHAOS

One of Firecross's demonstrators involved in the disorganized riots that night, Paul Chopine, later confessed, "I always felt that if we had made it into the House, we would have been very embarrassed."[27]

They would have likely been as surprised and disorganized as the motley crew of demonstrators who entered the U.S. Capitol in Washington, D.C. on January 6, 2021. Similar to what happened in Washington, if they had taken the House of Commons, nothing concrete would have happened. The takeover of the building would have merely been a symbol,

Members of Firecross, led by Col. François de la Rocque (1885–1946), march in the streets of Paris. The Arc de Triomphe can be seen in the background. Below, the symbol of the Firecross League.

and nothing more.

"A parade revolution was played," wrote Jean-Pierre Maxence. "There was talk of force, of riots, of taking power. No attempt was ever made to seriously prepare for this revolution, to build up this force, to organize these riots, to secure this takeover. It was illegal, revolutionary in words."[28]

Brasillach, Lucien Rebatet, and Pierre Drieu La Rochelle later complained that the league leaders were absent on that fateful night, when the time was ripe. Those who could have led the protesters to a victory had remained at home, proof of their passive way of thinking, while their troops demanded a revolution. This legitimate criticism has often been repeated, although it was not totally deserved. Maurice Pujo, the French Action second-in-command, was there, as well as Pierre Taittinger, leader of the Patriotic Youth.

Another often heard criticism was the lack of unity. There again, the mass of demonstrators did not care about their own allegiance and acted as if no barrier separated them from the other demonstrators. However, leaders of the various factions failed to unite on common ground. Too selfish to see beyond their own role, they crippled any possibility of agreement between the different leagues.

To make matters worse, on the following day of the riots, La Rocque,

who had been reluctant about the whole affair since the beginning, claimed credit for it, thus crippling any possibility of presenting a united front with the other leagues.[29]

Interestingly, this strategy paid off and, in the following months, the only league to benefit from the February 6 events was Firecross, which experienced a dramatic spike in numbers and whose popularity kept on increasing until WWII started. The other leagues experienced an opposite fate.

Historian Philippe Guimberteau concluded:

> The Revolution of the right was therefore in defiance of nothing more than a poor masquerade. It was thought to be akin to Mussolini or Hitler, but it was incapable of doing so. It had no more leaders than ideas; it was the verbal disguise of an essentially conservative and fearful state of mind.[30]

Overall, the inaction of the league leaders—who did not try to take power when they had the opportunity to do so—showed their lack of vision, which was also exemplified by their failure to propose a program of social reforms and national recovery.[31] They nevertheless sent a fright into their opponents.

GUN CONTROL

The first consequence was that gun restrictions were enacted in the weeks after, even though the gunshots of February 6 had been initiated by the authorities and not the demonstrators. More importantly, the left used the specter of a Fascist uprising to mobilize its troops and eventually form the Popular Front.[32]

Jean-Pierre Maxence summed it up:

> It was on February 7, 1934, that the leaders of the leagues lost the game for years, spoiled the chances of the revolution, consciously or unconsciously, in good faith or not, out of simple fear or tortuous calculation, that they signed their act of abdication and a new lease to capitalist democracy, to the regime, that they opened the way to Marxism.

THE AFTERMATH

The left and the parliament were quick to dismiss the whole episode as the result of a conspiracy from the

right in order to overthrow the government, a version of events that was totally ludicrous.[33] Demonstrators were completely unorganized, unarmed and had no prior plan. Henriot would sarcastically comment: "Who can fail to see the short-sightedness of those 'fascists' who, intending to seize power by a coup de force, did not even think of carrying a weapon?"[34]

This is an observation made about those who stormed the Capitol on January 6, 2021. If it were truly an "insurrection," why not bring lethal weapons?

Nevertheless, under pressure, Daladier resigned on the following day and Doumergue took over the role of president of the Council, governing from February 9 to November 8, 1934. Doumergue, formerly a radical, was, by 1934, in his dotage. He had more in common with Joe Biden than with the leaguers. Old and almost senile, he represented the perfect compromise for the different forces of the parliament. Everyone was sure of one thing: He would not achieve anything that would meaningfully reform the corrupt system.

At first appreciated and respected on the right, Doumergue soon proved to be incompetent. Despite demonstrations of support from some leagues, he resigned in November.[35]

The real long-term consequence of the riot was the eventual formation of the Popular Front on the left to oppose the "rising tide of Fascism." This coalition took power in 1936 and eventually banned the leagues.

Curiously, the Fascist movements that emerged in the years after were not offshoots of these leagues but came from the far left. Marcel Déat and Jacques Doriot, the most iconic and popular French Fascists, were originally left-wing Socialists. ❖

The Naked Communist: Exposing Communism & Restoring Freedom

By W. Cleon Skousen. Soon after its quiet release during the height of the "Red Scare" in 1958, *The Naked Communist* exploded in popularity, selling almost 2 million copies and finding its way into the libraries of the CIA, FBI, the White House, and homes across the U.S. From the tragic falls of China, Korea, Russia and the UN, to the fascinating histories of Alger Hiss, Whittaker Chambers, Elizabeth Bentley and Gen. MacArthur, *The Naked Communist* lays out the entire graphic story of Communism, its past, present and future. Readers gain a unique insight into the inner workings of Communism—its appeal, its history, its unchanging concepts, even its secret timetable of conquest. What are the 45 goals of Communism in the U.S. and how did they implement 44 of them? Updated in 2017, *The Naked Communist* is more relevant now than it was 60 years ago. Hardback, 452 pages, #878, *$27* plus $5 S&H inside the U.S. Order using the form on page 80 and send to TBR, P.O. Box 550, White Plains, MD 20695. A Synopsis of the Most Prominent Leagues Operating in France During the 1920s & 1930s

Compiled by Rémi Tremblay

FIRECROSS

1927-1936

Croix de Feu

One of the most well-known patriotic French groups of the 1920s was the powerful *Croix de Feu* (Firecross), an organization of military veterans seeking to restore the honor of those who had fought and bled to defend the nation during World War I.

After the Tomb of the Unknown Soldier under the Arc de Triomphe had been desecrated by vandals, author Maurice D'Hartoy founded a group that would defend the veterans' honor. Backed by the journalist Jacques Péricard—famous for his exhortation "Dead, arise!"—D'Hartoy founded Firecross on November 26, 1927, with the help of world-famous perfumer François Coty.

The organization was exclusively made up of former fighters who could prove having taken part in open combat during the war, but it soon widened its appeal by merging with the Briscards, another group of veterans and war wounded.

The group sought to address the chaos, disfunction, and disillusionment widespread in France following the war. They had fought for the honor and glory of their country, but their hopes had been betrayed. Still, the organization claimed to be totally nonpartisan and non-sectarian, just like the frontline had been. As Paul Chopine had put it, "Deeply imbued with the spirit of comradeship at the front, they wanted to ignore the distinctions between right-wing and left-wing Frenchmen, to have no other ideal than the cleanliness and grandeur of their country."

FRANÇOIS DE LA ROCQUE

This fraternity soon established a corps, the "*dispos*" (meaning "those available"), that was able to be quickly mobilized in order to respond to any threat upon the nation. The members would continue training together to keep their discipline and esprit de corps and would serve as security at marches and gatherings. This force, many observers feared, could spearhead a coup or major challenge to any established regime.

In 1932, Col. François de La Rocque took charge of the organization. With the National Volunteers, he opened the membership to other citizens who were not veterans but who "wanted to serve the French flag, love their profession, defend [the] French family, [and] desire peace with honor." It quickly became a real political organization. Attracted by the calls for law and order, many among the lower-middle class joined La Rocque and his legions. The country was unstable, and natural leaders who had defended the nation on the frontline at the peril of their lives inspired trust.

In a political climate where passions were being fueled by events from surrounding countries, the league clashed with the anti-Fascists of the time, some of whom had fought Francisco Franco in the Spanish Civil War. Those extremely violent confrontations sometimes resulted in casualties.

Accused of authoritarianism and of having betrayed the original objective of the group, La Rocque pledged political neutrality, but still got involved in politics, supporting politicians mainly from the right. This often-criticized political vagueness ended in

1935 when La Rocque published a small political program based on Nationalism and Corporatism.

La Rocque's program was mostly an oppositional one: he was dedicated to combating Marxism, internationalism, pacifism, Freemasonry and parliamentarianism. He could articulate and explain the problems facing France, but had difficulty proposing any proactive solutions.

The league was sometimes described as Fascist, but it was largely a semantic exaggeration as French Solidarity's ideologist Jean-Pierre Maxence explained in his memoirs. Except for the authoritarian personality of its leader, Firecross as an organization was more reactionary than Fascist.

Historian Dominique Venner rightfully drew a parallel between the veteran movement and authoritarian leaders like Franco or Antonio Salazar. La Rocque was a rather dull character who denounced the downfall of France but had very few countermeasures to propose. His ideology was less than clear; there was not much behind his eloquent speeches.

The activists were absorbed into a group called the National Gathering. It soon numbered more than 100,000 active members, including the famous pilot Jean Mermoz, whose popularity in France equaled Charles Lindbergh's in the United States.

Later, the organization evolved to become the French Social Movement. Its aims were quite traditional for the right: a Catholic nationalism coupled with social advancement for workers. The movement was in full swing at that time and Firecross and the French Social Movement were growing in power. In 1936, then-French Prime Minister Léon Blum wielded the might of the law to dissolve the party and later Firecross itself.

More than 700,000 French patriots soon found themselves as political orphans. Most reunited in the French Social Party founded shortly after Firecross was dissolved in yet another metamorphosis.

With a network of organizations and semi-autonomous branches, including aviation clubs, sport clubs, choirs and day care centers, La Rocque managed to reassemble an influential organization and had 300 MPs elected in 1937. In 1939, when the war started, he had more than 1 million members.

While Pétain adopted their credo of "Work, Family, Fatherland," and had the support of La Rocque, the latter did not take part in the collaboration, as he was fiercely opposed to Germany. In 1942, his movement, which had been renamed French Social Progress, was dissolved by Hitler, and La Rocque was imprisoned by the Germans before being liberated and once more imprisoned by the victors. Weakened by those terrible hardships, he died in April 1946. His memory was never rehabilitated, and most French people still view him as nothing more than a would-be Fascist dictator.

FRENCH SOLIDARITY

1933-1939

Solidarité Française

The unlikely founder of this group calling for interclass solidarity was a wealthy French industrialist named François Coty who previously supported Firecross, helping establish that organization in 1927. In 1925, he launched a crusade "for the honor of civilization," namely against Communism. Despite not being a Fascist, he believed in authoritarian politics and felt that highly partisan political parties and corruption were crippling the nation.

In 1928, he started publishing *Friend of the People*, a publication that was cheaply priced—50% less than other newspapers to reach a wider audience. The publication quickly became a rallying point for the various rightist organizations operating at the time who could express themselves without any restraint on their message.

In February 1933, demonstrating the same ecumenical spirit, Coty announced the formation of a "great party of French solidarity." Thus, *Solidarité Française* (French Solidarity) was born. The party would be represented by the emblematic French rooster defending its soil.

Just like the later movements of Marcel Bucard and Gustave Hervé, Coty adopted the blue shirt for supporters of French Solidarity. Uniforms were hardly a Fascist monopoly. Anti-Fascists also sported a distinctive shirt with matching armbands.

Many French Solidarity members took part in the February 6 demonstrations, and two died on that fateful night. A few months later, Coty died and the movement that had boasted of 60,000 members dismembered itself. Beset with schism upon schism, it completely disappeared by 1939.

PATRIOTIC YOUTH LEAGUE

1924-1936

Ligue des Jeunesses Patriotes

The origin of the *Ligue des Jeunesses Patriotes* (Patriotic Youth League) began in May 1882 when Germanophobic nationalist Paul Déroulède founded the Patriot League, a reactionary organization opposed to the left, on the basis of law and order. After Déroulède's death in 1914, Maurice Barrès, "the intellectual leader of the youth," according to Léon Emery, took over until Gen. Edouard de Castlenau replaced him in 1923.

This organization, which rejected both Fascism and Communism, could not satisfy the restless youth of the 20th century. They wanted more than stuffy commemorations and patriotic propaganda events. Soon, many lost interest in the league, which continued to exist under the leadership of Gen. Gaston d'Armau de Pouydraguin, who proved to be too Germanophobic to

take part in Pétain's government.

Instead, discontented youth rallied behind Pierre Taittinger, who founded a more proactive and militant league called the Patriotic Youth League on December 18, 1924. This new league was at first organized within the Patriot League before separating once and for all in 1926.

Their objective was to eventually defend the state against the enemies of the nation. Its motto was "hierarchy, order, discipline," a slogan that suited a Pretorian guard better than a revolutionary vanguard. But, like Charles Maurras, Taitttinger nevertheless admired Benito Mussolini and, in 1935, an official delegation was sent to Rome to meet the Duce. According to Taittinger, parliamentarianism had failed. Therefore, a change of regime was desperately needed.

The Patriotic Youth League attracted the ire of its enemies. On April 23, 1925, four members were killed in a meeting organized by Taittinger. Several fights with the Reds helped boost their numbers and, by 1926, they soon counted 75,000 members. That peaked in 1934 with more than 100,000 members organized into "mobile sections." At that point, it was a real army.

Many were grouped in the Falanx, a university branch that aimed to "fight in university … against the negative action of the revolutionary miasma."

In 1935, the Patriotic Youth League joined the National Front initiated by French Solidarity to present a united front. Dissolutions and subsequent reorganizations led the Patriotic Youth League to become the National People's Party and later the National Republican Party, which eventually dissolved during the war.

LEAGUE OF FRENCH ACTION

1905-1934

Ligue d'Action française

The *Ligue d'Action française* (League of French Action) is an emanation of the movement often associated with Charles Maurras.

The League of French Action was born at the end of the 19th century in the wake of the famous Dreyfus affair. Those who had seen in this affair a smearing of France met together first to discuss then to find solutions to the prevailing decadence. The movement was far from uniform politically; republicans, nationalists, and royalists coexisted together, taking the side of "intelligence," of open debate on various philosophical as well as practical political topics. With this mindset, they hoped for the restoration of open and respectful dialogue rather than raw, emotional passion.

The sense of patriotism was shared by all, and Charles Maurras' conclusion that integral nationalism led "to the traditional, hereditary, anti-parliamentary and decentralized monarchy" was quickly adopted by all. The League of French Action thus became royalist out of love for the fatherland. Only the national interest mattered to this organization and its supporters.

> In the 1930s, France had many outspoken, vibrant anti-Communist organizations.

Royalist and chauvinistically nationalist, this movement proved to be one of the most important at the beginning of the 20th century, probably the most influential, intellectually speaking. Maurras excoriated the Versailles Treaty, considering it too soft and generous for Germany, and called for a preventive rearmament, positions that demonstrate the depth of the league's Germanophobia.

For Maurras and his disciples, France had to be protected from its outside foes, like Germany, but also from the enemies inside the gates, the subverters who threatened the nation's very soul, such as the spies, the pacifists, and the Communists.

Composed of middle- and upper-class members, its more activist branch, the *Camelots du Roi*, was founded in March 1908 by Charles Lefèvre and the sculptor Maxime Réal del Sarte, who were selling the newspaper on the street and decided to organize a defense organization to protect themselves from left-wing thugs. They became famous for their pranks, one of their most famous being the public spanking of a Parisian professor who was spreading lies about St. Joan of Arc. Made up of young radicals, the *Camelots du Roi* were always on the front-line during clashes with the police.

One of the most lasting legacies of the French Action is the rehabilitation of St. Joan of Arc, who had fallen into oblivion, but whose annual day is still commemorated by French nationalists today. After a decade of literal fighting to restore her commemoration, between 1912 and 1922, the French Action managed to have its annual celebration officially recognized by the state.

On February 6, 1934, the League of French Action was at the vanguard. Three of its members passed away on that night: Marcel Langlois, Marius Plateau, and Jules Lecompte.

The league was dissolved on February 13, 1936, after Léon Blum was attacked when his car unluckily crossed a huge French Action demonstration. During the Second World War, Charles Maurras, who despised Hitler and Germany in general, was arrested and imprisoned. When France was "liberated," de Gaulle sent him to prison for "sharing intelligence with the enemy," a ridiculous charge. Maurras answered the charges with the quip, "Intelligence, yes. With the enemy, no." ❖

Bankers & Plutocrats: Subverting America Since Its Founding

By John Friend

Shortly after the Constitutional Convention in 1787, when it was up to the states to ratify or reject the newly proposed United States Constitution, the Anti-Federalists were already warning the American people of the dangers of a powerful centralized government. These courageous dissidents argued that, once approved and established, a consolidated federal government's "relentless expansion of arbitrary power was unstoppable, its tendency toward corruption was inevitable, and its appetite for despotism was unquenchable," according to American historian and author Joseph J. Ellis in his book *American Creation: Triumphs and Tragedies at the Founding of the Republic* (pg. 116).[1]

In hindsight, the Anti-Federalists had it exactly right, at least in the case of the nature and development of the United States federal government over the past 240 years.

Anti-Federalists, most prominently Thomas Jefferson, James Madison and other skeptics of a centralized federal government, were also raising alarm bells at the prospect of a centralized Bank of the United States shortly after the Constitution was approved and ratified by the states.

Alexander Hamilton and the elite banking and financial establishment in America, working on behalf of and in collusion with international financial interests centered around the powerful banking families in London and other major European capitals, "represented a tiny minority within the overall populace" who "had somehow managed to engineer a hostile takeover of the fledgling American republic and were now poised to consolidate their control to the detriment of all the ordinary citizens, mostly farmers, the true lifeblood of the nation," writes Ellis (p. 170).

THOMAS JEFFERSON
Warned us about a central bank.

President Andrew Jackson, among others, would later warn the American people of the dangers that monopolistic, speculative financial interests posed to the young United States in the early 1800s. In his 1832 veto of the legislation that would have rechartered the Bank of the United States, Jackson wrote:

> The rich and powerful too often bend the acts of government to their selfish purposes. … Many of our rich men have not been content with equal protection and equal benefits but have besought to make themselves richer by act of Congress.

Jackson declared to his cabinet that "the Bank of the United States is itself a government," and warned the American people private corporations sought "power to control the government and change its character." He also courageously told Vice President Martin Van Buren, "The bank is trying to kill me, but I will kill it!" And, indeed, Jackson did just that. However, the international money power seeking to subvert the United States was by no means defeated.

Time and time again, righteous men in American history stood up to the international plutocrats and sought to prevent the subversion and destruction of the nation their ancestors founded. However, the insatiable desire for political and financial control over these United States was unstoppable, and the forces of international speculative financial capitalism came to dominate this country over the course of the 19th century.

The destruction of American economic and political sovereignty was finally complete with the establishment of the Federal Reserve System in 1913, which centralized the banking and financial apparatus of this nation into

Left, Alexander Hamilton, architect of America's current banking system. Above, the First Bank of the United States, in Philadelphia. Chartered for a term of 20 years by the U.S. Congress on February 25, 1791, it wasn't completed until 1795.

the hands of a clique of global speculators hell bent on world financial domination and subjugation. The centralization of a nation's banking system is a key component of both international capitalism and international Communism—two sides of the same coin that seek the destruction of national sovereignty and independence.

The very concept of a corporation has been transformed and perverted over time. In early American history, states granted private corporations a monopoly on fulfilling a particular public service for a specific period of time. If a road needed to be expanded, for example, and the state was lacking in funds to complete the project, a private corporation would write a charter explaining its purpose (expanding, managing and maintaining the road expansion, for example) and the state would grant the corporation the privilege of providing an essential public service.

Corporations helped build canals, bridges, roads and other major infrastructure projects, including the extensive railroad system that provided transportation and communication advancements to the American people and private businesses.

But even in this regard, corruption set in, monopolies formed and the people became oppressed by large financial interests dominating and influencing state and federal government. Expressing a popular grievance in early America, William Leggett, the editor of New York's *Evening Post*, wrote:

> We cannot pass the bounds of the city without paying tribute to monopoly. Not a road can be opened, not a bridge can be built, not a canal can be dug, but a charter for exclusive privileges must be granted for the purpose. … The bargaining and trucking away charted corporation privileges is the whole business of our lawmakers.

The rise of speculative financial capital and large corporations, especially railroad corporations, ushered in an era of unprecedented greed, speculation, corruption and insider dealings in early American history. Alexis de Tocqueville, the French philosopher and writer who expounded extensively upon the unique political and cultural traditions of America, perhaps best expressed the plight of the struggling American frontiersman and farmer. Writing in *Democracy in America*, Volume Two, de Tocqueville contrasted the "territorial aristocracy" or the traditional elite in European society and the "manufacturing aristocracy" or the financial elite that had arisen in America:

> The territorial aristocracy of former ages was either bound by law, or thought itself bound by usage, to come to the relief of its serving-men and to relieve their distresses. But the manufacturing aristocracy of our day first impoverishes and debases the men who serve it and then abandons them to be supported by the charity of the public.

Rep. Hendrick B. Wright of Pennsylvania, a champion of the working class and American pioneers, advanced legislation in the late 1870s to help

homesteaders—small independent American farmers and ranchers—secure and develop their land without going into massive debt. Wright's efforts were defeated by plutocratic financial interests and their minions who denied the small independent pioneer and farmer—the very men and women who tamed this country—any sort of financial concessions while they themselves were lavishly awarded government contracts and land grants.

Wright, who once said that "the working men of this land are better entitled to the bounty of government than aggregated wealth," responded to the rejection of his legislation with another poignant remark. "Congress can grant railroads money and land," he said, "but, if it talks of relieving the poor and oppressed, the cry comes, 'We cannot reward idleness'."

I wonder what Wright would have said about the criminal bailout of Wall Street in late 2008 or the financial, banking and corporate fraud involved with the Covid-19 pandemic and subsequent bailouts?

Congress can grant Wall Street speculators bailouts as a result of their criminal financial practices, but if it talks of relieving homeowners, small and independent business owners, and oppressed debt-slaves, the cry comes, "We cannot reward idleness."

The irony is that idleness is exactly what is rewarded most in America today. With federal assistance programs, people who don't work at all can have more cash in their pockets at the end of the month that lower-middle class workers—90% of whom are working full-time jobs.

Indeed, government largess and corrupt dealings created corporate bonanzas, especially for railroad corporations, which was the standard operating procedure in America for much of the 19th century—and even to this day. Railroad, lumber, cattle and mining interests were essentially handed large land grants, other special privileges and insider-deals by the federal government, while independent American farmers and homesteaders were largely exploited and forced to fend for themselves.

After being elected to his first presidential term in 1884, President Grover Cleveland appointed William Andrew Jackson Sparks as land commissioner. Sparks's first report to Congress summarized the situation Americans at the time understood all too well:

> The widespread belief of the people in this country that the Land Department has been very largely conducted to the advantage of speculation and monopoly, rather than in the public interest, I have found supported by developments in every branch of the service.

Former Pennsylvania Gov. Gifford Pinchot explained, "It must be remembered that monopolistic control was infinitely more potent in the West, in those days, than in the East. The big fellow had control of the little fellow to an infinitely greater extent west of the Father of Waters than east of it." Speculators, monopolists, and plutocrats were taking over America, and those that stood in their way did not stand a chance.

Speculators, monopolists, and plutocrats were taking over America.

Henry Adams and Charles Francis Adams Jr. prophetically wrote in the late 1800s:

> The belief is common in America that the day is at hand when corporations far greater than the Erie [Railway Company]—swaying power such as has never in the world's history been trusted in the hands of mere private citizens, controlled by single men like [Cornelius] Vanderbilt, or by combinations of men like [James] Fisk and [Jay] Gould … after having created a system of quiet but irresistible corruption—will ultimately succeed in directing government itself.

Rep. James B. Weaver, the populist presidential candidate for the Greenback Party in 1880 and the People's Party in 1892, described the ills of the American political system that still plague us today. He wrote in 1892, "Public sentiment is not observed. The wealthy and powerful gain a ready hearing, but the plodding, suffering, unorganized complaining multitude are spurned and derided."

The 19th century truly was a pivotal period of time in American history. It was during this century that the government formed by the Founding Fathers morphed from an instrument that served the American people to one that served private economic interests to the detriment of the average American worker, farmer, craftsman, and independent businessman.

Writing many decades later in *Mein Kampf*, Adolf Hitler succinctly explained exactly where America went wrong during the 19th century: "[A]s economic interests begin to predominate over the racial and cultural instincts in a people or a state, these economic interests unloose the causes that lead to the subjugation and oppression [of those people or state]."

Perhaps unknowingly, Hitler perfectly described the United States of America during the 19th century—and it has only gotten worse since then. ❖

NEW FROM TBR BOOK CLUB . . .

From TBR author Karl Haemers comes a scathing examination and condemnation of the powerbrokers behind the Covid lockdowns that forever changed the world!

Covert Covid Culprits: An Inquest Chronicle

The years 2020 and 2021 were among the most impactful in human history. Many other researchers have chronicled their extraordinary developments, focused on government agencies, mass media outlets, pharmaceutical companies, intelligence agencies, "think tanks" and the military. None has conducted an honest inquest into specifically "who" as a collective was responsible for the devastation of the alleged pandemic, lockdown measures and vaccine programs inflicted on humanity. They blamed The Powers That Be, the Deep State, Globalists, China, the World Economic Forum, the president, Congress, Big Pharma,

and others. In *Covert Covid Culprits*, Karl Haemers reveals the presence of members of a particular cabal within all these power centers, which exercised a remarkable coordination of the pandemic itself as well as the global response. They profited financially, extended their control, and further entrenched their power. Who are these criminals—both hidden and obvious—against humanity who planned, executed, covered up and redirected the greatest hoax, scam, fraud and Satanic op in world history? Once we know who, we will develop effective self-defense. In the end, we must consider a possible resolution of the gravest issue the world has ever faced. Softcover, 275 pages, $25 minus 10% for TBR subscribers.

More books on related subjects:

The Plague Cycle: The Unending War Between Humanity and Infectious Disease

By Charles Kenny. For 4,000 years, the size and vitality of cities, economies, and empires were heavily determined by infection. Striking humanity in waves, the cycle of plagues set the tempo of civilizational growth and decline, since common response to the threat was exclusion—quarantining. But the hygiene and medical revolutions of the past two centuries have freed humanity from the hold of epidemic cycles—resulting in an urbanized, globalized and wealthy world. However, climate fluctuations, population burdens and global trade have left us more vulnerable than ever to newly emerging plagues. *The Plague Cycle* reveals the relationship between civilization, globalization, prosperity, and infectious disease over the past five millennia. Hardback, 320 pages, #893, *$18.*

Pale Rider: The Spanish Flu of 1918 and How it Changed the World

In 1918, people in New York, Alaska and Persia had almost nothing in common except for a virus—one that triggered the worst pandemic of modern times and had a decisive effect on the history of the 20th century. With a death toll between 50 and 100 million people, the Spanish flu of 1918–1920 was possibly the worst human disaster in all of recorded history. Yet, in our popular conception, it exists largely as a footnote to World War I. Laura Spinney recounts the story of an overlooked pandemic, tracing it across the globe. Telling the story from the point of view of those who lived through it, she shows how this devastating natural experiment put both the ingenuity and the vulnerability of humans to the test. In the process, she demonstrates that the Spanish flu was as significant—if not more so—as two world wars in shaping the modern world. Softcover, 352 pages, #864, *$20.*

Reflections on the Founding Fathers & the American Spirit

By John Friend

What would men like George Washington, Thomas Jefferson, John Adams, Thomas Paine, and other leading figures who fought and liberated this country from British tyranny—physically and intellectually—have to say about contemporary America?

These courageous, principled men would not even recognize the nation they founded. Indeed, open borders, massive Third World immigration (legal and illegal), allegiance to global institutions, passionate attachments to foreign nations (Israel in particular), the systematic promotion of the cult of transgenderism and constant foreign interventions, for instance, have fundamentally transformed America into what some say resembles a modern-day Sodom and Gomorrah.

America has morphed from a beacon of freedom, liberty, honor, and rugged individualism governed by virtuous, principled men into a tyrannical Orwellian dystopia administered by a hostile elite and their buffoonish, embarrassing, degenerate puppets.

Our government is corrupted and controlled by foreign criminal elements. We are engaged in a never-ending war against a faceless, manufactured enemy. The U.S. military is now occupying countless foreign nations. At the same time it is working overtime to instigate a conflict with two rising challengers to U.S. global hegemony—Russia and China. The amazing men who founded this once great nation would not even recognize the country they established nearly 250 years ago.

GEORGE III
"I would be the first to meet the friendship of the United States as an independent power."

A RIGHTEOUS CAUSE

The Founding Fathers of America comprised some of the most brilliant, selfless, and honorable men in modern Western history. As the ambitious, righteous men they were, they risked it all—life, liberty, property, family, and legacy—to expose, resist, and overcome British tyranny, establishing a democratic republic based on Christian principles. These men knew what they were up against, and fully understood not only the risks of their words and actions, but also the revolutionary nature of the endeavor they were engaged in. This is perhaps best exemplified by Patrick Henry's timeless quote concluding a speech he made to the Virginia Convention supporting the Revolution: "Give me liberty or give me death!"

Thomas Paine, writing in *Common Sense*, one of the most influential pamphlets written during the Revolutionary period, said:

> The cause of America is in a great measure the cause of all mankind. We have it in our power to begin the world over again. The birthday of a new world is at hand.

John Adams, in a letter to his wife Abigail, wrote on May 17, 1776:

> Is it not a saying of Moses, "Who am I, that I should go in and out before this great people?"
>
> When I consider the great events which are passed, and the greater which are rapidly advancing, and that I may have been instrumental in touching some springs and turning some small wheels, which have had and will have such effects, I feel an awe upon my mind which is not easily described.

Almost to a man, the Founding Fathers were deeply influenced and shaped by Christian teachings and values. Skeptical and oftentimes disdainful of organized Christianity, which they viewed as having a stranglehold on Christ's message, the men who

A cartoon depicts Uncle Sam awakening with an allegorical hangover. When the party started, the nation was in good shape, but overindulgence in bad policies has left it in a shambles.

founded America sought to ensure religious freedom and prevent a state-sanctioned church from ever arising in America. The Christian faith and principles of the Founding Fathers formed the moral and philosophical framework in which they operated under.

Rather than seeking to totally overthrow society's existing political, social and economic order—as the Jacobins did in France during the French Revolution, and the Bolsheviks did in 1917 Russia—the Founding Fathers sought to gain American independence from the tyranny of the British Crown.

Turning to classical Greco-Roman civilization and traditional Anglo-Saxon conceptions of freedom and governance for guidance and inspiration, the founders of America established a constitutional republic, and warned the American people they must remain forever vigilant and informed to maintain their freedom. Otherwise, their freedom would be taken from them.

When asked what form of government had been created following the revolution, a monarchy or a republic, Benjamin Franklin replied, "A republic, if you can keep it."

The Founding Fathers recognized that, in order to ensure benevolent and responsible governance, the people had to maintain their moral compass, remain engaged in the political process, and be always willing to hold their leaders responsible for their actions. Good and responsible governance also required respectable, dignified, virtuous and objective public servants who put the interests of the American people and nation first and foremost.

Sadly, the basic requirements of both the American citizenry and political leaders for maintaining freedom and ensuring good, responsible governance outlined by the Founding Fathers have been forgotten in contemporary American society.

AMERICAN SPIRIT AND IDENTITY

What is the true essence of the American spirit? What does it mean to be an American?

J. Hector St. John de Crevecoeur, a French writer who eventually took American citizenship after settling in the state of New York, had the following to say when describing the new American man:

> He is an American, who, leaving behind him all his ancient prejudices and manners, receives new ones from the new mode of life he has embraced, the new government he obeys, and the new rank he holds.

* * *

> Here individuals of all [European] nations are melted into a new race of men, whose labors and posterity will one day cause great changes in the world. Americans are the Western pilgrims, who are carrying with them that great mass of arts, sciences, vigor and industry which began long since in the east; they will finish the great circle. The Americans were once scattered all over Europe; here they are incorporated into one of the finest systems of population which has ever appeared, and which hereafter become distinct by the power of the different climates they inhabit. …
>
> The American is a new man, who acts upon new principles; he must therefore entertain new ideas and form new opinions.[1]

A NATION OF IMMIGRANTS?

The claim is often made by liberals and leftists that America is a nation made up of immigrants when, in reality, America is a nation founded and established by pioneers—White Christian pioneers, as Clement Pulaski has detailed and documented.[2] White Christian peoples escaping the despotism of Europe explored, settled and developed the North American continent, often in the face of enormous odds and at extreme risk to their personal well-being and safety.

The American frontier profoundly shaped the character of the new American man, as noted historian Frederick Jackson Turner explains:

> The existence of an area of free land, its continuous recession, and the advance of American settlement westward, explain American development. Behind institutions, behind constitutional forms and modifications, lie the vital forces that call these organs into life and shape them to meet changing conditions.
>
> This perennial rebirth, this fluidity of American life, this expansion westward with its new opportunities, its continuous touch with the simplicity of primitive society, furnish the forces dominating American character.
>
> That coarseness and strength combined with acuteness and inquisitiveness; that practical, inventive turn of mind, quick to find expedients; that masterful grasp of material things, lacking in the artistic but powerful to effect great ends; that restless, nervous energy; that dominant individualism, working for good and for evil, and withal that buoyancy and exuberance which comes with freedom—these are traits of the frontier.[3]

That traditional suspicion and distain of an overreaching centralized government; that ambitious, fearless, risk-taking outlook; that love of individual liberty and personal freedom; that hardworking, productive, can-do attitude—these and similar characteristics are the essence of the true American spirit, which has been profoundly influenced and shaped by the unique American political tradition and frontier experience.

A passionate attachment of one nation for another produces a variety of evils.

FOREIGN AFFAIRS

In the realm of foreign policy, the Founding Fathers had much advice to offer, all of which has been thoroughly discarded and rejected by contemporary America and its disgraceful political leadership. The Founding Fathers held a deep suspicion of permanent foreign alliances, and sought to ensure a strong, independent American nation free from foreign influence and passionate attachments. George Washington, in his Farewell Address of 1796, had plenty of wise recommendations for the young American republic and people:

> Observe good faith and justice towards all nations; cultivate peace and harmony with all. …
>
> [A] passionate attachment of one nation for another produces a variety of evils. Sympathy for the favorite nation, facilitating the illusion of an imaginary common interest in cases where no real common interest exists, and infusing into one the enmities of the other, betrays the former into a participation in the quarrels and wars of the latter without adequate inducement or justification. It leads also to concessions to the favorite nation of privileges denied to others which is apt doubly to injure the nation making the concessions; by unnecessarily parting with what ought to have been retained, and by exciting jealousy, ill-will, and a disposition to retaliate, in the parties from whom equal privileges are withheld. And it gives to ambitious, corrupted, or deluded citizens (who devote themselves to the favorite nation), facility to betray or sacrifice the interests of their own country, without odium, sometimes even with popularity; gilding, with the appearances of a virtuous sense of obligation, a commendable deference for public opinion, or a laudable zeal for public good, the base or foolish compliances of ambition, corruption, or infatuation.
>
> As avenues to foreign influence in innumerable ways, such attachments are particularly alarming to the truly enlightened and independent patriot.
>
> How many opportunities do they afford to tamper with domestic factions, to practice the arts of seduction, to mislead public opinion, to influence or awe the public councils. Such an attachment of a small or weak towards a great and powerful nation dooms the former to be the satellite of the latter.
>
> Against the insidious wiles of foreign influence (I conjure you to believe me, fellow citizens) the jealousy of a free people ought to be constantly awake, since history and experience prove that foreign influence is one of the most baneful foes of republican government. …
>
> The great rule of conduct for us in regard to foreign nations is in extending our commercial relations, to have with them as little political connection as possible.

Thomas Jefferson, writing in 1823, argued that: "Our first and fundamental maxim should be never to entangle ourselves in the broils of Europe; our second, never to suffer Europe to intermeddle in cisatlantic affairs." Jefferson also wisely advocated "peace, commerce, and honest friendship with all nations—entangling alliances with none."

John Quincy Adams, writing in 1821, said America "goes not abroad in search of monsters to destroy. She is the well-wisher to the freedom and independence of all. She is the champion and vindicator only of her own."

Could you imagine what these men would say today given contemporary American foreign policy and the insidious influence of the pro-Israel lobby?

FRANKLIN PREDICTS FUTURE

Benjamin Franklin, perhaps the wisest of the Founding Fathers, accurately predicted the fate of the American experiment when writing to the Constitutional Convention in 1787:

> I agree to this Constitution with all its faults, if they are such: because I think a General Government necessary for us, and there is no form of Government but what may be a Blessing to the People if well-administered; and I believe farther that this is likely to be well administered for a course of years and can only end in despotism as other forms have done before it, when the People shall become so corrupted as to need despotic government, being incapable of any other.

Franklin argued that America would eventually slip into tyranny, as all other republics had before it, as a result of corruption, greed, self-interest, ignorance, and apathy—and he was right. Describing the corrupt nature of the British political and economic establishment, Franklin wrote:

> Avarice and ambition are strong passions and, separately, act with great force on the human mind; but when both are united, and may be gratified in the same object, their violence is almost irresistible, and they hurry men headlong into factions and contentions; destructive of all good government.

Is that not a perfect description of the contemporary American political and economic establishment?

AMERICAN POTENTIAL

As a proud American man, I take to heart the great American author Herman Melville's wise words:

> We Americans are the peculiar, chosen people—the Israel of our time; we bear the ark of the liberties of the world. … God has predestined [and] mankind expects, great things from our race; and great things we feel in our souls.

It is likely to be well administered for a course of years and can only end in despotism.

It is time we all rediscover who we are as Americans and rid ourselves of the tyranny and despotism we find ourselves under today. As we celebrate the July 4th holiday this year commemorating the 247th anniversary of the signing of the Declaration of Independence, let us recall the revolutionary words written by Jefferson in that powerful document, and ask ourselves if the time has come for Americans to "alter or abolish" the current form of government ruling America today.

> When in the Course of human events, it becomes necessary for one people to dissolve the political bands which have connected them with another, and to assume among the powers of the earth, the separate and equal station to which the Laws of Nature and of Nature's God entitle them, a decent respect to the opinions of mankind requires that they should declare the causes which impel them to the separation.
>
> We hold these truths to be self-evident, that all men are created equal, that they are endowed by their Creator with certain unalienable Rights, that among these are Life, Liberty and the pursuit of Happiness. That to secure these rights, Governments are instituted among Men, deriving their just powers from the consent of the governed. That whenever any Form of Government becomes destructive of these ends, it is the Right of the People to alter or to abolish it, and to institute new Government, laying its foundation on such principles and organizing its powers in such form, as to them shall seem most likely to effect their Safety and Happiness. … ❖

Thomas Paine's Attack on Paper Money Laws

By Thomas Paine

Paper money, paper money, and paper money is now, in several of the states, both the bubble and the inequity of the day. That there are some bad people concerned in schemes of this kind cannot be doubted, but the far greater part are misled. People are [purposely] bewildered upon the subject that they put and mistake one thing for another. They say Paper Money has improved the country—Paper Money carried on the war, and Paper Money did a great many other fine things.

Not one syllable of this is truth; it is all error from beginning to end. It was credit which did these things, and that credit has failed, by nonperformance, and by the country being involved in debt and the levity and instability of government measures.

We have so far mistaken the matter that we have even mistaken the name. The name is not Paper Money, but Bills of Credit: But it seems as if we are ashamed to use the name, knowing how much we have abused the thing. All emissions of paper for government purposes are not making of money, but making use of credit to run into debt by. It is anticipating or forestalling the revenue of future years, and throwing the burden of redemption on future assemblies. It is like a man mortgaging his estate and leaving his successors to pay it off. But this is not the worst of it, it leaves us at last in the lurch by banishing the hard money, diminishing the value of the revenue, and filling up its place with paper, that may be like something today and tomorrow nothing.

COMMON SENSE;

ADDRESSED TO THE INHABITANTS OF AMERICA,

On the following interesting SUBJECTS.

I. Of the Origin and Design of Government in general, with concise Remarks on the English Constitution.

II. Of Monarchy and Hereditary Succession.

III. Thoughts on the present State of American Affairs.

IV. Of the present Ability of America, with some miscellaneous Reflections.

Man knows no Master save creating HEAVEN,
Or those whom choice and common good ordain.
THOMSON.

PHILADELPHIA;
Printed, and Sold, by R. BELL, in Third-Street.
MDCCLXXVI.

The front page of Thomas Paine's *Common Sense,* which sold more than 500,000 copies within just a few months of its release.

So far as regards Pennsylvania, she cannot emit bills of credit, because the assembly which makes such an emission cannot bind future assemblies either to redeem them or receive them in taxes. The precedent of revoking the charter of the bank, established by a former assembly, is a precedent for any assembly to undo what another has done. It circumscribes the power of any assembly to the year in which it sits; that is, it cannot engage for the performance of any thing beyond that time. And as an assembly cannot issue bills of credit and redeem them within the year, and as it cannot by that precedent bind a future assembly so to do, it therefore cannot with the necessary security do it at all; because people will not put confidence in the paper promises or paper emissions of those who can neither perform the engagement within the time their own power exist nor compel the performance after that time is past. The politicians of the project for revoking the bank charter (and it was besides most wantonly done), to use a trite saying, aimed at the pigeon and shot the crew—they fired at the bank and hit their own paper.

As to making those bills what are called legal tenders, we have no such thing in this state, which is one reason they have not depreciated more: But as it is a matter which engrosses the attention of some other states, I shall offer a few remarks on it.

The abuse of any power always operates to call the right of that power in question. To judge of the right or power of any assembly in America to make those bills a legal tender, we must have recourse to the principles on which civil government is founded; for if such an act is not compatible with those principles, the assembly which assumes such a power, assumes a power unknown in civil government, and commits treason against its principles.

The fundamental principles of civil government are security of our rights and persons as freemen, and security of property. A tender law, therefore, cannot stand on the principles of civil government, because it operates to take away a man's share of civil and natural freedom, and to render property insecure.

If a man had a hundred silver dollars in his possession, as his own property, it would be a strange law that should oblige him to deliver them up to any one who could discover that he possessed them, and take a hundred paper dollars in exchange. Now the case, in effect, is exactly the same; if he has lent a hundred hard dollars to his friend, and is compelled to take a hundred paper ones for them. The exchange is against his consent, and to his injury, and the principles of civil government provides for the protection, and not for the violation of his rights and property. The state, therefore, that is under the operation of such an act, is not in a state of civil government, and consequently the people cannot be bound to obey a law which abets and encourages treason against the first principles on which civil government is founded.

The principles of civil government extend in their operation to compel the exact performance of engagements entered into between man and man. The only kind of legal tenders that can exist in a country under a civil government is the particular thing expressed and specified in those engagements or contracts. That particular thing constitutes the legal tender. If a man engages to sell and deliver a quantity of wheat, he is not to deliver rye, any more than he who contracts to pay in hard money is at liberty to pay in paper or in anything else. Those contracts or bargains have expressed the legal tender on both sides, and no assumed or presumptuous authority of any assembly can dissolve or alter them. Another branch of this principle of civil government is, that it disowns the practice of retrospective laws. An assembly or legislature cannot punish a man by any new law made after the crime is committed; he can only be punished by the law which existed at the time he committed the crime. This principle of civil government extends to property as well as to life; for a law made after the time that any bargain or contract was entered into between individuals can no more become the law for deciding that contract, than, in the other case, it can become the law for punishing the crime; both of those cases must be referred to the laws existing at the time of the crime was done or the bargain made. Each party then knew the relative situation they stood in with each other, and on that law and on that knowledge they acted, and by no other can they be adjudged. Therefore all tender laws which apply to the alteration of past contracts, by making them dischargeable on either side, different to what was the law at the time they were made, is of the same nature as that law which inflicts a punishment different to what was the law at the time the crime was committed: For in all cases of civil government the law must be before the act.

But there was no illegality in tender laws, they are naturally defective on another consideration. They cannot bind all and every interest in the state, because they cannot bind the state itself. They are, therefore, compulsive where they ought to be free; that is, between man and man, and are naturally free where, if at all, they ought to be compulsive: for in all cases where the state reserves to itself the right of freeing itself, it cannot bind the individual, because the right of the one stands on as good ground as that of the other. ❖

Common Sense

Johann Ewald
Jäeger Commander

Johann Ewald began as a commoner in one of the states of the Holy Roman Empire who rose above the constraints of his time. As a soldier, he fought in all of the great conflicts of the latter 18th century, the Seven Years' War, the American War of Independence and the Napoleonic Wars. He keenly recorded his observations of both the people he met and places he encountered throughout these adventures. Due to his observations on the conduct of irregular warfare of his time, he has become one of the most important authorities on 18th-century small-unit tactics. His writings provide a unique insight on the major events of the later-18th and early-19th centuries.

Ewald stood as one of the most accomplished practitioners of irregular warfare in hs era. Beginning his military career in the Seven Years' War, and continuing through the American War of Independence, he amassed a vast wealth of experience leading troops in the art of irregular warfare or *petite guerre*. He later wrote several works based on his experiences, and at least one of these received the favorable comment of Frederick the Great, the warrior King of Prussia. There are no other English-language biographies of Ewald.

American History Uncensored

Rosicrucian America: How a Secret Society Influenced the Destiny of a Nation

Rosicrucian America is a provocative book that gives you another side of American history plus an in-depth history of Rosicrucianism, its key members and their roles in the formation and settling of America. The book explores Sir Francis Bacon and Dr. John Dee's deep influence on England's colonization of America as well as the Rosicrucian influence on the Founding Fathers and on cities such as Philadelphia and Williamsburg. It also explains how Bacon was the author of many anonymous Rosicrucian texts and how he envisioned America as the "New Atlantis" and reveals the connections of the Order of the Rosy Cross to the Knights of the Golden Circle. Softcover, 294 pages, #870, *$20.*

Jesse James & the Lost Templar Treasure Secret Diaries, Coded Maps & the Knights of the Golden Circle

Here is an amazing investigation into the lost treasures of Jesse James and the Knights of the Golden Circle and their connections to the Templars, Rosicrucians and the Founding Fathers. Explains how Jesse James used techniques involving sacred geometry, gematria and esoteric symbols to hide the treasures he was entrusted with and encode his maps. Provides instructions for using the encoding template employed by Jesse and the Freemasons to hide and recover treasure and sacred relics. Shows how the encoding template confirms the existence of treasures on Oak Island and Victorio Peak and can be traced to a 16th-century book containing a secret map of the New World and the "Hooked X" of the Knights Templar. Softcover, 160 pages, #868, *$17.*

To Hell or Barbados: The Ethnic Cleansing of Ireland

Here is the story of over 50,000 Irish men, women and children enslaved and shipped off to work on plantations in Barbados and Virginia from the 17th to 19th centuries. Sean O'Callaghan documents their transportation, the conditions in which they lived as slaves or servants, and their rebellions in Barbados. O'Callaghan's description of 17th-century Barbados is a powerful portrait of a society as brutal, corrupt and unjust as anything the 21st century has to offer. In the 17th century, Oliver Cromwell encouraged the mass slaughter and enslavement of Irish men, women and children. Cromwell had Irish priests and nuns were hunted down like rogue wolves and Irish soldiers exiled to Spain or France, while rebels, widows and wee ones were enslaved side-by-side with more expensive Black Africans. Softcover, 248 pages, #754, *$23.*

Quantrell

Subtitle: *A True History of His Guerrilla Warfare on the Missouri and Kansas Border During the Civil War of 1861 to 1865.* By John P. Burch as told by Capt. Harrison Trow. The first edition of this book was self-published by the author in 1923. The book comprises Capt. Trow's numerous, vivid and colorful recollections—given by Trow when he was an elderly man—of his days riding with Quantrill. The author is clearly sympathetic to his commander, but the publisher, in his foreword, does not share the same rosy opinion of Quantrill as does Capt. Trow, pointing out some inconsistencies in the recollections of Trow and generally taking a dimmer view of Quantrill. Softcover, 266 pages, illustrated, #884, *$22.*

Indian Fighter: The Life of Gen. George A. Custer

By Frederick Whittaker. Gen. George Custer's career started with the Union Army during the Civil War, and ended after numerous highly successful campaigns in the Plains Wars against the Indians, where he was given the title of America's "best Indian fighter." This dramatic biography, produced in the year of his death, draws upon family and other original sources and takes the reader on a ride through some of the greatest engagements of the Civil War in which Custer played an important part, through to the many battles, atrocities and wars against the Indians, ending in Custer's death. Softcover, 684 pages, #795, *$30.*

Black Flag

Subtitle: *Guerrilla Warfare on the Western Border, 1861-1865—A Riveting Account of a Bloody Chapter in Civil War History.* By Thomas Goodrich. From 1861 to 1865, the region along the Missouri-Kansas border was the scene of death and destruction. Thousands died, millions of dollars of property was lost, entire populations were violently uprooted. It was here also that some of the greatest atrocities in American history occurred. Yet in the great national tragedy of the Civil War, this savage warfare seems a minor episode. Drawing from a wide array of diaries, letters, and firsthand newspaper accounts—the author presents a hair-raising report of life in this merciless guerrilla war. Bushwhackers and Jayhawkers, soldiers, civilians, scouts, spies, runaway slaves, and guerrillas all tell of their terrifying ordeals. Softcover 192 pages, #817, *$20.*

Forsaken But Not Forgotten: America's Most Shameful National Secret Revealed

Between the Russian civil war, WWI, WWII, the Korean War, Vietnam and the Cold War, as many as 30,000 U.S. servicemen and civilians were knowingly abandoned by our leaders. Philip Rife presents the government's rationale for abandoning so many of America's military men behind enemy lines. You can decide for yourself whether these were the right actions. Rife felt an obligation to tell this story for the abandoned Americans, their parents, brothers, sisters, wives, children and other concerned Americans. It's a story every American should know. The Barnes Review is proud to publish the first edition of this important book. Softcover, 89 pages, #812, *$15.*

FDR: My Exploited Father-in-Law

The author, Curtis B. Dall, was FDR's son-in-law and had an office in the White House. Dall was also a Wall Street insider and knew their tactics. The book is loaded with personal anecdotes of the people Dall met. This included FDR, Eleanor, Sara Delano, Bernard Baruch, Hopkins, Morgenthau Jr., Harry Dexter White, Warburgs, Astors, Rothschilds, Lehmans and more. In the end he portrays FDR as a man who began his career as a ladder-climber and ended up the most exploited president in U.S. history. Softcover, 288 pages, #696, *$25.*

Scalp Dance: Indian Warfare on the High Plains, 1865-1879

By Thomas Goodrich. Some of the most savage wars in world history were waged on the American Plains from 1865 to 1879. From the Sand Creek Massacre in 1864 through Custer's Last Stand in 1876 to the final defeat of the mighty Sioux and Cheyenne nations in 1878, *Scalp Dance* reveals the bloody, bitter clashes between two cultures—one bent on

conquest, the other defending its land. Drawing heavily from diary accounts, letters and personal memoirs, a tale of life and death on the prairie has been crafted. Individual fates are told, each its own drama. It also discusses the brutality with which the Indians treated their enemies, which is glossed over in today's history books. Softcover, #210, 340 pages, *$22.*

America's Secret History

By Steve Harris. Never in one volume have so many unknown facts that disprove America's mainstream history books been brought together in a cohesive historical context, all based on verifiable information. Utilizing the little-known 1953 Reece Committee revelations of the House of Representatives, the Carnegie, Rockefeller, Guggenheim and Ford foundations have systematically controlled education and the high-level appointees to the U.S. State Department for the last century. Here's conclusive proof that there has been one attempted *coup d'etat*, and three successful but peaceful coups in America's history. The author also reveals 26 people own the same wealth as the poorest 50% of the world. *America's Secret History* shows how the Deep State, the Fed and world governments caused this to happen. Hardback, 216 pages, #862, *$26.*

Epstein: Dead Men Tell No Tales

By Dylan Howard, Melissa Cronin and James Robertson. Here is the full and unedited story behind the sick life and mysterious death of Jeffrey Epstein that is being called one of the most significant scandals in American history. He was the billionaire financier and close confidant of presidents, prime ministers, movie stars and British royalty—the mysterious man who rose from blue-collar Brooklyn to the heights of luxury. But while he was flying around the world on his private jet and hosting lavish parties at his private island in the Caribbean—possibly monitored by multiple intelligence agencies including the Mossad—he was also secretly masterminding an international child sex ring involving some of the most influential men in the world. Softcover, 232 pages, #859, *$23.*

Mafia Spies: The Inside Story of the CIA, Gangsters, JFK and Castro

Thomas Maier offers a true story of espionage and mobsters, based on the infamous "JFK files." Here is the definitive account of America's most remarkable espionage plots—with CIA agents, mob hitmen, blackmail, presidential indiscretion and James Bond-like killing devices together in a top-secret mystery full of twists and deadly intrigue. In the early 1960s, gangsters—Johnny Roselli and Sam Giancana—were hired by the CIA to kill Cuba's Communist leader Fidel Castro, only to wind up murdered themselves. *Mafia Spies* revolves around the outlaw friendship of these two mobsters and their fascinating world of CIA spies, fellow Mafioso in Chicago, Cuban exile commandos in Miami, famous entertainers, Castro's own spies, double agents in Florida, and Hoover's FBI. Hardback, 424 pages, #861, *$28.*

Revolution's End
